June 1962 (Asadha 1884)

Publications Division, 1962

**PUBLISHED BY THE DIRECTOR, PUBLICATIONS DIVISION, MINISTRY OF INFORMATION
AND BROADCASTING, GOVERNMENT OF INDIA, OLD SECRETARIAT, DELHI-6, AND
PRINTED BY THE MANAGER, GOVERNMENT OF INDIA PRESS, FARIDABAD**

PREFACE

INDIA : A Reference Annual was first brought out by the Publications Division of the Ministry of Information and Broadcasting in 1953, with the object of providing authentic information on the diverse aspects of our national life and activities. The response both within the country and abroad encouraged the publishers to widen the scope of the *Annual* in successive issues.

Every effort is made to include the latest available information relating to each subject covered in the *Annual*. The present volume incorporates the Annual Financial Statements of the Union and State Governments for 1962-63 (those of the State Governments being Statements placed before the respective Legislatures prior to the recent General Elections), and other information available at the time of the presentation of the budget in Parliament and the State Legislatures. The results of the recent General Elections to Parliament have been included in the Appendices and the names of the newly elected members of the State Legislative Assemblies in Chapter XXX.

The *Annual* contains information compiled from official and other authoritative sources. It does not, however, claim to be exhaustive. Readers requiring additional information are referred to the Government reports and publications, reference works and other books which are listed in the *Select Bibliography* at the end of the volume.

The attention of readers is drawn to the detailed table of contents which replaces the Index given in earlier editions. It lists all the subjects that are dealt with both in the text and in the statistical tables.

CONTENTS

<i>Chapter</i>	<i>Pages</i>
I. THE LAND AND THE PEOPLE .. -- .. -- ..	1—27
THE PHYSICAL BACKGROUND (1—12) Physical Features—Geological Structure—River Systems—Climate —Normal Monthly and Annual Maximum Temperatures in Shade at Selected Stations—Normal Monthly and Annual Minimum Tem- peratures in Shade at Selected Stations—Normal Monthly and Annual Rainfall at Selected Stations	
POWER RESOURCES (13) Coal—Lignite—Oil—Water Power	
MINERAL RESOURCES (13-14) Iron Ore—Manganese—Chromite—Refractories—Gold—Copper —Bauxite—Mica—Ilmenite—Salt—Gypsum—Miscellaneous Mi- nerals	
THE DEMOGRAPHIC BACKGROUND (14—22) Area, Population and Density of Population—Growth of Popu- lation since 1901—Birth and Death Rates—Life Expectancy— Maternity Pattern, Age Structure, Sex Ratio and Marital Status —Variation and Density of Population	
THE SOCIAL PATTERN (22—27) Population according to Religion—Population according to Mo- ther-tongue—Languages (or Dialects) spoken by a Lakh and over— Rural and Urban Population—Statewise Distribution of Towns according to Population—Cities with a Population of a Lakh and over	
II. NATIONAL EMBLEM, FLAG, ANTHEM, SONG AND CALENDAR	29—31
NATIONAL EMBLEM (29) NATIONAL FLAG (29-30) NATIONAL ANTHEM (30) NATIONAL SONG (31) NATIONAL CALENDAR (31)	
III. CONSTITUTION	32—44
THE UNION AND ITS TERRITORY (32) CITIZENSHIP AND FRANCHISE (32) FUNDAMENTAL RIGHTS (33) DIRECTIVE PRINCIPLES OF STATE POLICY (33-34) THE UNION EXECUTIVE (34-35) President—Vice-President—Council of Ministers—Attorney-General PARLIAMENT (35-36) Council of States—House of the People THE UNION JUDICIARY (36) COMPTROLLER AND AUDITOR-GENERAL (36) THE STATE EXECUTIVE (36-37) Governor—Council of Ministers—Advocate-General THE STATE LEGISLATURE (37) Legislative Council—Legislative Assembly THE STATE JUDICIARY (38) UNION TERRITORIES (38) THE UNION AND THE STATES (38-39) Legislative Relations—Administrative Relations FINANCE (39-40) TRADE AND COMMERCE (40) PUBLIC SERVICE (40) ELECTIONS (41) OFFICIAL LANGUAGE (41) EMERGENCY AND OTHER SPECIAL PROVISIONS (41—43) Scheduled Castes and Tribes—Tribal Areas in Assam—Special Officers AMENDMENT OF THE CONSTITUTION (43-44)	

IV. LEGISLATURE	45—49
UNION PARLIAMENT (45—48)	
Composition—Officers of Parliament—Functions and Powers of Parliament—Procedure—Department of Parliamentary Affairs—Parliamentary Committees—Informal Consultations—Control over Executive	
STATE LEGISLATURES (48-49)	
Officers of the Legislature—Functions—Procedure—Reservation of Bills—Control over Executive	
V. EXECUTIVE	50—58
UNION (50-51)	
Administrative Organisation—Organisation and Methods Division	
STATES (51-52)	
Conduct of Government Business—Administrative Units	
LOCAL GOVERNMENT (52—54)	
Corporations—Municipal Boards and Committees—Local Self-Government in Districts—Village Panchayats—Finances	
PUBLIC SERVICES (54—58)	
Personnel and Functions of the Union Public Service Commission—All-India Services—Training of Services—Central Secretariat Service—Industrial Management Pool—State Services	
VI. JUDICIARY	59—65
SUPREME COURT OF INDIA (59—62)	
Personnel of the Court—Law Officers—Powers of Interpretation—Jurisdiction—Working of the Court—Advocates of the Supreme Court	
LAW COMMISSION (62)	
OFFICIAL LANGUAGE (LEGISLATIVE) COMMISSION (62-63)	
HIGH COURTS (63-64)	
Year of Establishment, Territorial Jurisdiction and Seat of High Courts—Powers and Functions	
SUBORDINATE COURTS (64-65)	
Structure and Functions—Criminal Justice—Separation of Judiciary from Executive	
VII. DEFENCE	66—74
ORGANISATION (66—68)	
Army—Navy—Air Force	
TRAINING INSTITUTIONS (68—70)	
National Defence College—National Defence Academy—Defence Services Staff College—Armed Forces Medical College—Rashtriya Indian Military College—Army Colleges and Schools—Naval Training Centres—Air Force Colleges and Schools	
DEFENCE RESEARCH AND PRODUCTION (70—72)	
Research and Development Organisation—Ordnance Factories—Hindustan Aircraft—Bharat Electronics	
SPECIAL ASSIGNMENTS (72)	
DEFENCE FINANCE (72)	
TERRITORIAL ARMY (72-73)	
LOK SAHAYAK SENNA (73)	
NATIONAL CADET CORPS (73—74)	
AUXILIARY CADET CORPS (74)	
WELFARE OF EX-SERVICEMEN (74)	
VIII. EDUCATION	75—90
GENERAL STATISTICS (75—78)	
Institutions, Students, Teachers and Expenditure—Sources of Expenditure—Literacy—Expenditure Under the Plans—Plan Achievements and Targets	
PRE-PRIMARY EDUCATION (79)	
PRIMARY EDUCATION (79)	
SECONDARY EDUCATION (79-80)	
BASIC EDUCATION (80—82)	
VOCATIONAL AND TECHNICAL SCHOOL EDUCATION (82)	
SPECIAL SCHOOL EDUCATION (82)	

- HIGHER UNIVERSITY AND TECHNICAL EDUCATION (82—87)
 State-wise Distribution of Institutions—General Education—University Grants Commission—Higher Technical Education—Universities
 RURAL HIGHER EDUCATION (87)
 SOCIAL EDUCATION (87-88)
 EDUCATION OF THE HANDICAPPED (88)
 DEVELOPMENT OF HINDI (88-89)
 YOUTH WELFARE (89-90)
 PHYSICAL EDUCATION AND SPORTS (90)
 Physical Education—Sports—National Discipline Scheme

IX. CULTURAL ACTIVITIES

91—96

- ART (91-92)
 Lalit Kala Akademi—Publications—National Gallery of Modern Art—Museums
 DANCE, DRAMA AND MUSIC (92-93)
 Sangeet Natak Akademi—Radio Drama—Radio Sangeet Sammelan—National Programme of Music—National Programme of Operas—Vadya Vrinda—Other AIR Programmes
 LITERATURE (93—95)
 Sahitya Akademi—Gandhian Literature—Literary Broadcasts—National Book Trust—Development of Modern Indian Languages
 PROMOTION OF INTER-STATE CULTURAL UNDERSTANDING (95)
 Exchange of Troupes—Exchange of Artists—Open Air Theatres—Assistance to Theatre Groups—Grants to Cultural Organisations
 CULTURAL RELATIONS WITH OTHER COUNTRIES (95-96)
 External Relations Division—Delegations—Cultural Agreements—Grants—International Students Houses—Indian Council for Cultural Relations

X. SCIENTIFIC RESEARCH

97—104

- POLICY (97)
 COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH (97—100)
 Functions—National Laboratories—Sponsored Research—Co-operative Research Associations—Liaison—Vigyan Mandirs
 NUCLEAR RESEARCH AND ATOMIC ENERGY (100—102)
 OTHER DEPARTMENTAL RESEARCH ACTIVITIES (102)
 OTHER INSTITUTIONS (103)
 MEDICAL RESEARCH (103-104)
 AGRICULTURAL RESEARCH (104)

XI. HEALTH

105—115

- VITAL STATISTICS (105)
 PREVENTION AND CONTROL OF DISEASES (105—108)
 Malaria—Filaria—Tuberculosis—Leprosy—Venereal Diseases—Influenza—Cancer
 NUTRITION AND PREVENTION OF FOOD ADULTERATION (108-109)
 WATER SUPPLY AND SANITATION (109)
 National Water Supply and Sanitation Programme
 MEDICAL RELIEF AND SERVICE (109—111)
 Hospitals and Dispensaries—Health Personnel—Contributory Health Service Scheme—Health Insurance—Primary Health Centres for Rural Areas
 INDIGENOUS AND HOMOEOPATHIC SYSTEMS OF MEDICINE (111)
 Udupa Committee—Central Institute of Research in Indigenous Systems of Medicine—Education—Regulation of Practice—Homoeopathy
 DRUG MANUFACTURE AND CONTROL (111-112)
 Drug Control—Drugs and Magic Remedies (Objectionable Advertisements) Act—Drug Manufacture—Medical Depots and Factories
 EDUCATION AND TRAINING (113-114)
 Medical Colleges—Central Health Education Bureau—All-India Institute of Medical Sciences—Specialised Training—Training of Auxiliary Medical Workers—Training of Refractionists, Opticians and Radiographers
 FAMILY PLANNING (114-115)
 Objects—Organisational Set-up—Family Planning Centres—Education and Training—Research.

XII. SOCIAL WELFARE

117—125

PROHIBITION (117—120)**WELFARE MEASURES FOR CERTAIN MALADJUSTED GROUPS (120—122)**

Social Defence Programme—Immoral Traffic in Women and Girls—Juvenile Delinquents—Beggars—Central Bureau of Correctional Services

CENTRAL SOCIAL WELFARE BOARD (122—125)

Welfare Extension Projects (Rural)—Welfare Extension Projects (Urban)—Holiday Homes for Children—Night Shelters—Socio-Economic Programme—Social and Moral Hygiene and After-care Programme—Child Welfare

XIII. RELIEF AND REHABILITATION

126—128

EXPENDITURE ON DISPLACED PERSONS (126)**DISPLACED PERSONS FROM EAST PAKISTAN (126—127)**

Rehabilitation—Dandakaranya Scheme—Rehabilitation Industries Corporation—Financial Assistance to Non-official Institutions

DISPLACED PERSONS FROM WEST PAKISTAN (127—128)

Rehabilitation—Negotiations with Pakistan—Resettlement of Kashmiri Displaced Persons

OTHER KINDS OF RELIEF (128)

Emergency Relief Organisation—Prime Minister's National Relief Fund

XIV. SCHEDULED CASTES, SCHEDULED TRIBES AND OTHER BACKWARD CLASSES

129—137

CONSTITUTIONAL PROVISIONS (129)**POPULATION OF SCHEDULED CASTES AND TRIBES (129—130)****MEASURES TO ERADICATE UNTOUCHABILITY (130—131)**

The Untouchability (Offences) Act, 1955—Campaign against Untouchability

REPRESENTATION IN LEGISLATURES AND SERVICES (131—132)**ADMINISTRATION OF SCHEDULED AND TRIBAL AREAS (133)**

Autonomous Tribal Areas of Assam—Tribes Advisory Councils in Other States

WELFARE AND ADVISORY AGENCIES (133—134)

Commissioner for the Scheduled Castes and Scheduled Tribes—Tribal Welfare Officer—Central Advisory Boards—Welfare Departments in the States

WELFARE SCHEMES (134—137)

Educational Facilities—Economic Opportunities—Other Welfare Schemes—Tribal Research Institutes—Tribal Development Blocks—Expenditure Under the Plans

XV. MASS COMMUNICATION

139—159

BROADCASTING (139—145)

Radio Stations—Programme Composition (Home and External)—Vividh Bharati—Special Audience Programmes—Five Year Plan Publicity—Programme Exchange—Transcription Service—Advisory Committees—Programme Journals—News Services—External Services—Production of Radio Receivers—Broadcast Receiver Licences—Television

THE PRESS (145—152)

Distribution of Newspapers according to State and Periodicity—Distribution of Newspapers according to State and Language—Periodicity-wise Circulation of Newspapers—Language-wise Circulation of Newspapers—Newsprint—Press Information Bureau—Freedom of the Press

FILMS (152—157)

Output and Thematic Classification of Feature Films—Film Institute of India—Children's Film Society—International Film Festivals—State Awards for Films—Documentaries and Newsreels—Film Censorship—Import of Cinematographic Film and Equipment—Export of Indian Films—Foreign Exchange earned by Indian Films

PUBLICATIONS (158)**ADVERTISING AND VISUAL PUBLICITY (158—159)**

XVI. ECONOMIC STRUCTURE

164—174

NATIONAL AND PER CAPITA INCOMES (161—164)

Index Number—National Income by Occupational Categories—Sources of National Income—Share of Government in the Generation of National Income—Share of Government in National Expenditure

SAVING (164)**UNEMPLOYMENT (164—165)****PATTERN OF ECONOMY (165—173)**

Expenditure Pattern—Consumer Expenditure Patterns in Villages, Towns and Cities—Middle Class Income and Expenditure—Pattern of Land Ownership—Pattern of Operational Holding—Housing Pattern—Tilling Methods and Rural Amenities

PRICES (173—174)

Index Numbers of Wholesale Prices—Working Class Consumer Price Indices

XVII. PLANNING

175—182

BACKGROUND AND OBJECTIVES (175-176)**FIRST AND SECOND PLANS (176—179)**

Objectives—Outlay and Investment—Financial Resources in Public Sector—Achievements

THIRD FIVE YEAR PLAN (179—182)

Objectives—Targets—Outlay and Allocations—Investment—Financing of Plan Outlay—Employment

XVIII. COMMUNITY DEVELOPMENT

183—188

BACKGROUND AND OBJECTIVES (183—184)**COVERAGE (184)****FINANCL (184—185)**

Resources—People's Contribution—Expenditure under the Plans

ORGANISATION (185—186)

At the Centre— In the States— In the Districts—In the Blocks— Extension Organisation— Block Development Committees

TRAINING (186—187)**ACHIEVEMENTS (187—188)****XIX. FINANCE**

190—224

PUBLIC FINANCE (190—194)

Constitutional Provisions—Allocation of Revenue—Transfer of Resources from Centre to States— Third Finance Commission— States' Share of Taxes, Duties and Central Grants—Budget—Audit

BUDGET ESTIMATES (194—209)

Budget of the Central Government for 1962-63 on Revenue and Capital Accounts—Incidence of Indirect Taxation—Budgetary Position of the Central Government from 1950-51 to 1961-62— Budgetary Position of the States from 1951-52 to 1961-62

PUBLIC DEBT (198 AND 209—211)

Interest-bearing Obligations and Interest-yielding Assets of the Government of India—Debt Position of the Government of India— Debt Position of States

MONEY SUPPLY AND CURRENCY (212—214)

Money Supply with the Public—Currency— Decimal Coins— Demonetisation of Anna—Pie Coins—Retirement of Indian Currency from Kuwait

BANKING (214—217)

Scheduled Banks—Guarantee Organisation—Monetary and Credit Policy of the Reserve Bank—Selective Credit Control

CORPORATE SECTOR (217—220)

Companies at Work —New Registrations—State-wise Distribution of Companies—Government Companies—Foreign Companies

INSURANCE (220-221)

Public and Private Insurance—State-run Schemes—Insurance Association of India—Compulsory Reinsurance

GENERAL INSURANCE (221-222)

Insurance Companies—Business Statistics—Premium Income— Assets and Investments

LIFE INSURANCE (222—224)	
Life Insurance Corporation—New Business—Total Business in Force	
—Foreign Business—Investments	
XX. AGRICULTURE	227—244
LAND UTILISATION (227—232)	
Irrigated Area—Area under Principal Crops—Crop Seasons—	
Production of Principal Crops—Index Numbers of Agricultural	
Production—Import of Foodgrains—Food Situation	
DEVELOPMENT PROGRAMMES (232—235)	
Minor Irrigation—Soil Conservation, Dry Farming and Land	
Reclamation—Improved Seeds—Manures and Fertilisers—Plant	
Protection and Locust Control—Intensive District Programme—	
State Farms	
AGRICULTURAL MARKETING (235-236)	
Grading and Standardisation—Regulation of Markets—Marketing	
Investigations and Surveys—Training of Personnel in Agricultural	
Marketing—Administration of Fruit Products Order, 1955	
FORESTRY (236-237)	
Area under Forests—Production of Timber and Firewood—Value	
of Minor Forest Produce—Development Schemes	
ANIMAL HUSBANDRY AND FISHERIES (237—242)	
Census of Livestock, Poultry and Agricultural Machinery— Key	
Village Scheme—Feeding and Nutrition—Goshala Development	
Scheme—Gosadan Scheme—Stray and Wild Cattle Catching	
Scheme—Training in Hide Flaying, Curing and Carcass	
Utilisation—Nomadic Cattle Breeding Scheme—Dairying—Poultry	
—Piggery—Fisheries	
AGRICULTURAL LABOUR (242—244)	
Occupational Structure—Employment and Unemployment—Wages—	
Household Income—Consumption and Cost of Living—Indebted-	
ness—Minimum Wage Fixation in Agriculture	
XXI. LAND REFORM	245—254
ABOLITION OF INTERMEDIARIES (245-246)	
Progress—Compensation Payable and Paid	
TENANCY REFORM (246—249)	
Andhra Pradesh—Assam—Bihar—Gujarat—Jammu and Kashmir	
—Kerala—Madhya Pradesh—Madras—Maharashtra—Mysore—	
Orissa—Punjab—Rajasthan—Uttar Pradesh—West Bengal—	
Union Territories	
CEILING ON HOLDINGS (249—251)	
CONSOLIDATION OF HOLDINGS (251)	
SUB-DIVISION AND FRAGMENTATION (251—252)	
CO-OPERATIVE FARMING (252-253 and 254)	
BHOODAN (253)	
XXII. CO-OPERATIVE MOVEMENT	255—263
BACKGROUND (255—257)	
NUMBER, MEMBERSHIP, WORKING CAPITAL AND PROFITS OF CO-OPERATIVE	
SOCIETIES (258)	
CREDIT SOCIETIES (258—261)	
State Co-operative Banks—Central Co-operative Banks—Agricul-	
tural Credit Societies—Grain Banks—Central Land Mortgage	
Banks—Primary Land Mortgage Banks—Non-Agricultural	
Credit Societies	
NON-CREDIT SOCIETIES (261-262)	
OTHER SOCIETIES (262)	
Supervising Unions—Co-operative Unions and Institutes—Socie-	
ties under Liquidation	
TRAINING (263)	
XXIII. IRRIGATION AND POWER	264—284
RIVER VALLEY PROJECTS (264—270)	
Bhakra-Nangal Project—Beas Project—Hirakud Dam Project—	
Rajasthan Canal Project—Damodar Valley Corporation Project—	
Tungabhadra Project—Kosi Project—Chambal Project—	
Nagarjunasagar Project—Bhadra Reservoir Project—Kakrapara	
Project—Mayurakshi Project—Project for the Preservation of the	
Port of Calcutta—Gandak Project—The National Projects	
Construction Corporation	

THE INDUS WATERS TREATY(270)	
DEVELOPMENT PROGRAMME (270-271)	
Net area Irrigated—Irrigation Benefits During the Second Plan	
INLAND NAVIGATION (271)	
POWER (271—276)	
Resources—Progress of Electricity Supply—Organisation for Power	
Development—Ownership—Consumption—Rural Electrification	
—Power Generation under the Plans—Nuclear Power—Major	
Power Projects: Koyna, Rihand Dam, Machkund	
FLOOD CONTROL (277-278)	
PRINCIPAL IRRIGATION WORKS (278—280)	
PRINCIPAL IRRIGATION PROJECTS IN THE THIRD PLAN (280-281)	
PRINCIPAL POWER STATIONS COMMISSIONED DURING FIRST AND SECOND	
PLANS (281-282)	
PRINCIPAL GENERATION SCHEMES INCLUDED IN THE THIRD PLAN (282—284)	

XXIV. INDUSTRY

291—328

INDUSTRIAL POLICY (291-292)	
REGULATION OF INDUSTRY (292-293)	
PRODUCTIVITY (293)	
INDUSTRIAL FINANCE (293—295)	
Industrial Finance Corporation—Industrial Credit and Investment	
Corporation—Refinance Corporation for Industry—National	
Industrial Development Corporation—Foreign Capital	
DEVELOPMENT OF INDUSTRIES (295—303)	
Early Stages—During First and Second Plans—Shortfalls in Industrial	
Production Targets (Second Plan)—Outlay on Industries	
(Second Plan)—Development Programme under Third Plan—	
Outlay on Industries (Third Plan)—Industrial and Mineral	
Projects in the Public Sector (Third Plan)	
INDUSTRIAL PRODUCTION (303—308)	
Index Numbers of Industrial Production—Expansion of Selected	
Major Industries and Minerals (Third Plan)	
PRINCIPAL INDUSTRIES (309—322)	
Cotton Textiles—Jute—Sugar—Cement—Paper—Iron and Steel	
—Engineering—Locomotives and Coaches—Shipbuilding—	
Aircraft—Chemical and Drugs—Fertilizers—Oil—Coal and	
Lignite—Other Minerals—Quantity and Value of Mineral	
Production	
PLANTATION INDUSTRIES (322—324)	
Tea, Coffee and Rubber: Area and Production	
SMALL-SCALE AND COTTAGE INDUSTRIES (324—328)	
Background—Expenditure and Outlay—Khadi Industry—Ambar	
Charkha	

XXV. TRADE

329—343

EXTERNAL TRADE (329—332)	
Foreign Trade of India—Balance of Merchandise Trade—Balance of	
Payments—Imports—Imports on Government Account—Private	
Imports—Exports	
TRADE POLICY (332—334)	
Import Policy—Export Promotion	
TRADE AGREEMENTS (334)	
TARIFF (334-335)	
DIRECTION OF TRADE (335-336)	
Exports to Principal Countries—Imports from Principal Countries	
PATTERN OF TRADE (336—339)	
Imports and Exports of Principal Commodities	
TERMS OF TRADE (339-340)	
Index Number of Exports—Index Number of Imports	
STATE TRADING CORPORATION (340-341)	
INTERNAL TRADE (341—343)	
Coastal Trade—Inland Trade—Metric Weights and Measures	

XXVI. TRANSPORT

344—362

RAILWAYS (344—353)	
Progress since 1853—Railway Zones—Railway Finances—	
Developments under Plans—Expenditure on Railways—New	
Construction and Works—Rolling Stock—Workshops, Plant	
and Machinery—Electrification—Dieselisation—Amenities for	
Railway Users—Staff Welfare—Self-Sufficiency—	

- Passenger Traffic and Earnings—Ticketless Travel—Accidents and Safety of Passenger Trains—Goods Traffic and Earnings—Punctuality Ratio—Export Traffic—Locomotive Utilisation—Wagon Usage—Fares and Freight—Administration
- ROADS (353—355)
 Progress—National Highways—Other Roads—Roads in the States' Sector—Twenty-year Plan
- ROAD TRANSPORT (355-356)
 Motor Vehicles—Administration
- INLAND WATERWAYS (356)
 SHIPPING (357-358)
 Progress under the Plans—National Shipping Board—Shipping Corporation of India—Hindustan Shipyard—Second Shipyard—Training Institutions
- PORTS (358-359)
 Major Ports—Traffic and Earnings of Major Ports—Minor Ports—National Harbour Board
- CIVIL AVIATION (359—361)
 Progress since 1947—Air Corporations—Training—Flying Clubs—Aerodromes—Aircraft—Air Transport Agreements
- TOURIST TRAFFIC (361-362)
 Administrative Set-up—Hotel Standards and Rate Structure Committee—Relaxation in Tourist Regulations—Information—Number of Tourists—Tourist Revenue—Tourist Development Plans

XXVII. COMMUNICATIONS

367—372

- POSTAL SERVICES (367—369)
 Postal Statistics—Urban Mobile Post Offices—Air Mail and All-up Schemes—Air Parcel Service with Foreign Countries—Postal Savings Bank—Postal Life Insurance
- TELEGRAPH SERVICES (369-370)
 Telegraph Statistics—Telegraph Service in Hindi and Other Indian Languages
- TELEPHONE SERVICES (370-371)
 Telephone Statistics—Own Your Telephone Scheme—Message Rate System—Ship to Shore Service—Telephone Industry
- OVERSEAS COMMUNICATIONS (371-372)
 Radio Telephone Services—Radio Telegraph Service—Radio Photo Service—International Telex Service—Other Services

XXVIII. LABOUR

373—383

- EMPLOYMENT STATISTICS (373-374)
 Employment in Factories, Coal Mines, All Mines, Cotton Mill Industry
- NATIONAL EMPLOYMENT SERVICE (374-375)
 Employment Exchange Statistics—Craftsmen Training—Central Institute for Labour Research
- WAGES AND EARNINGS (375—378)
 Annual Earnings—Real Earnings—Working Class Consumer Price Index—Regulation of Wages—Wage Boards—Wage Census Scheme—Steering Group on Wages—Coal Mines Bonus Schemes
- INDUSTRIAL RELATIONS (378—380)
 Industrial Disputes—Industrial Employment Standing Orders—Discipline in Industry—Works Committees—Tripartite Machinery—Conciliation Machinery—Adjudication Machinery—Workers' Participation in Management—Code of Efficiency—Workers' Education
- TRADE UNIONS (380)
 Membership of All-India Organisation—Registered Trade Unions and Membership
- SOCIAL SECURITY (380—382)
 Employees' State Insurance Scheme—Employees' Provident Fund—Coal Mines Provident Fund Schemes—Maternity Benefits
- LABOUR WELFARE (382—383)
 Motor Transport Workers Act—Coal Mines Labour Welfare Fund—Mica Mines Labour Welfare Fund—Iron Ore Mines Labour Welfare—Welfare of Plantation Labour—Labour Welfare Funds in Central Government Industrial Undertakings—Labour Welfare Centres

XXIX. HOUSING

384—389

BACKGROUND (384-385)**PROGRESS UNDER THE PLANS (385—388)**

Subsidised Industrial Housing Scheme—Low Income Group Housing Scheme—Plantation Labour Housing Scheme—Slum Clearance Scheme—Village Housing Projects Scheme—Land Acquisition and Development Scheme—Middle Income Group Housing Scheme—Rental Housing Scheme for State Government Employees

NATIONAL BUILDING ORGANISATION (388-389)**XXX. STATES AND UNION TERRITORIES**

390—500

Area, Population, Capital, Principal Languages, Governor, Council of Ministers, Chief Secretary, Judges of High Court, Advocate-General, Members of Public Service Commission, Members of Legislative Assembly and Council, Area and Population of Districts and Tehsils/Taluks, and Budget

ANDHRA PRADESH (390—397)

ASSAM (398- 401)

BIHAR (402 -409)

GUJARAT (410- 415)

JAMMU AND KASHMIR (416—418)

KERALA (419- 422)

MADHYA PRADESH (423—429)

MADRAS (430—435)

MAHARASHTRA (436—444)

MYSORE (445- 451)

ORISSA (452- 455)

PUNJAB (456- 461)

RAJASTHAN (462- 467)

UTTAR PRADESH (468- 478)

WEST BENGAL (479—485)

DELHI (486)

HIMACHAL PRADESH (487-488)

MANIPUR (489-490)

TRIPURA (491-492)

ANDAMAN AND NICOBAR ISLANDS (493)

LACCADIVE, MINICOY AND AMINDIVI ISLANDS (494)

NORTH-EAST FRONTIER TRACT (494)

NAGA HILLS—TUENSANG AREA (495-496)

DADRA AND NAGAR HAVELI (497)

GOA, DAMAN AND DIU (498)

PONDICHERRY (499-500)

XXXI. INDIA AND INTERNATIONAL ORGANISATIONS

501—508

UNITED NATIONS ORGANISATION (501—507)

Political: Indian Delegation to the 16th Session of the UN General Assembly—Colonialism—Disarmament—Trust and Non-Self-Governing Territories—Atomic Energy Agency—Diplomatic Intercourse and Immunity—Appointments and Elections to UN Bodies—International Law Commission. Economic and Social: Human Rights Seminar on Freedom of Information—Economic Commission for Asia and the Far East—Food and Agriculture Organisation—International Labour Organisation—United Nations Educational, Scientific and Cultural Organisation—World Health Organisation—United Nations International Children's Emergency Fund—General Agreement on Tariffs and Trade—United Nations Technical Assistance Programme—International Monetary Fund—International Bank for Reconstruction and Development—International Development Association—United Nations Special Fund—Other Specialised Agencies of the United Nations.

OTHER INTERNATIONAL ORGANISATIONS (507-508)

Commonwealth—C Colombo Plan—Asian Railways Conference—World Confederation of Organisations of Teaching Profession—General Assembly of the World Council of Churches

XXXII. LAWS OF PARLIAMENT DURING 1961

509—511

XXXIII. IMPORTANT EVENTS OF 1961 512—534

XXXIV. GENERAL INFORMATION 535—554

WARRANT OF PRECEDENCE (535-536)

REPUBLIC DAY AWARDS (536—538)

Bharat Ratna—Padma Vibhushan—Padma Bhushan—Padma Shri

GALLANTRY AWARDS (538-539)

Param Vir Chakra—Maha Vir Chakra—Vir Chakra—Ashoka
Chakra: Classes I, II and III

AWARDS TO SCHOLARS (539)

ARJUNA AWARDS (539-540)

DIPLOMATIC REPRESENTATIVES OF INDIA (541—546)

FOREIGN DIPLOMATIC REPRESENTATIVES IN INDIA (547—554)

APPENDICES

Chapter IV GENERAL ELECTIONS, 1962 (558—596) : State-wise
Allocation of Seats and Strength of Political
Parties in the House of the People (555)
State-wise Strength of Political Parties in Legislative
Assemblies and Territorial Councils (556)
Results of the Elections to the House of the People (557—596)

Persons Nominated by the President to the House of
the People (597)
Members of the Council of States (Rajya Sabha)(597—599)

Chapter V Union Government (599—601)
President and Vice-President (599)
Council of Ministers (599-600)
Secretaries to the Government of India (600-601)

Chapter VI Supreme Court Decisions (601—604)

Chapter VIII Scholarship Schemes (604—606)
Engineering and Technical Institutions (606—608)

Chapter IX Institutions Recognised by the Lalit Kala Akademi
(608-609)
Lalit Kala Akademi Awards (609)
Archaeological and Cultural Museums (609-610)
Institutions Recognised by the Sangeet Natak Akademi
(610—614)
Sangeet Natak Akademi Awards (615)
Institutions Recognised by the Sahitya Akademi
(615-616)
Sahitya Akademi Awards (616-617)

Chapter XI Ayurvedic Colleges (617-618)
Tibbia Colleges (618)
Medical Colleges (618-619)
Dental Colleges (619)

Chapter XV State Film Awards (619—621)

Chapter XXVI Aerodromes (621)

SELECT BIBLIOGRAPHY 622—637

OUR ADVERTISERS 641—643

CHAPTER I

THE LAND AND THE PEOPLE

India, also known as Bharat, is well marked off from the rest of Asia by mountains and the sea, which give the country an unmistakable geographical unity. Bounded by the Himalayas in the north, the country stretches southwards and, at the Tropic of Cancer, tapers off into the Indian Ocean between the Bay of Bengal on the east and the Arabian Sea on the west. Lying entirely in the northern hemisphere, the mainland extends between latitudes $8^{\circ} 4' 28''$ and $37^{\circ} 17' 53''$ north and longitudes $68^{\circ} 7' 33''$ and $97^{\circ} 24' 47''$ east, measures about 2,000 miles from north to south and about 1,850 miles from east to west and covers an area of 12,61,411 sq. miles.* Measured by the extent of its territory, India is the seventh largest country in the world. It has a land frontier 9,425 miles long and a coastline of 3,535 miles.

THE PHYSICAL BACKGROUND

The Himalayas generally form India's northern boundary, beyond which lies China. Nepal, Sikkim and Bhutan†, which also border India in the north and north-east, cover a portion of the Himalayan region. A series of mountain ranges in the east separate India from Burma. In the east lies East Pakistan surrounded by the States of West Bengal and Assam and the Union Territory of Tripura. In the north-west, West Pakistan and Afghanistan border on India. In the south, the Gulf of Mannar and the Palk Strait separate India from Ceylon. The Andaman and Nicobar Islands in the Bay of Bengal and the Laccadive, Minicoy and Amindivi Islands in the Arabian Sea are parts of the territory of India.

Physical Features

The mainland comprises three well-defined regions: (i) the great mountain zone of the Himalayas, (ii) the Indo-Gangetic Plain and (iii) the southern Peninsula.

The Himalayas comprise three almost parallel ranges interspersed with large^e plateaus and valleys some of which, like the Kashmir and Kulu valleys, are fertile, extensive and of great scenic beauty. Some of the highest peaks in the world are to be found in these ranges. The high altitudes limit travel only to a few passes, notably the Jelep La and Natu La on the main Indo-Tibet trade route through the Chumbi valley, north-east of Darjeeling. The mountain wall extends over a distance of about 1,500 miles with a varying depth of 150 to 200 miles. In the east, between India and Burma and India and Pakistan, the hill ranges are much lower. The Garo, Khasi, Jaintia and Naga hills running almost east-west join the chain of the Lushai and Arakan hills running north-south.

The Indo-Gangetic Plain, 1,500 miles long and 150 to 200 miles broad, is formed by the basins of three distinct river systems, the Indus, the Ganga and the Brahmaputra. It is one of the world's greatest stretches

*Revised on the basis of figures furnished by the Survey of India in January 1962. These are still provisional pending final revision survey of boundaries of States and Union Territories. Area figures exclude Pondicherry (186 sq. miles) over which the Government of India exercises jurisdiction by virtue of an agreement with the Government of France.

† Sikkim and Bhutan are States which are attached to India by special treaties.

of flat alluvium and also one of the most densely populated areas on earth. There is hardly any variation in relief. Between the Yamuna river at Delhi and the Bay of Bengal, nearly 1,000 miles away, there is a drop of only 700 feet in elevation.

The Peninsular plateau is marked off from the Indo-Gangetic Plain by a mass of mountain and hill ranges, varying from 1,500 to 4,000 ft. in height. The more prominent among these are the Aravalli, Vindhya, Satpura, Maikal and Ajanta. The Peninsula is flanked on one side by the Eastern Ghats, where the average elevation is about 2,000 ft., and on the other by the Western Ghats where it is from 3,000 to 4,000 ft., rising in places to over 8,000 ft. Between the Western Ghats and the Arabian Sea lies a narrow coastal strip, while between the Eastern Ghats and the Bay of Bengal there is a broader coastal area. The southern point of the Plateau is formed by the Nilgiri hills where the Eastern and Western Ghats meet. The Cardamom hills lying beyond may be regarded as a continuation of the Western Ghats.

Geological Structure

Geologically also, India consists of the same three distinct units, namely, the ancient block of the Peninsula, the Himalayas and their associated group of young fold-mountains and the Indo-Gangetic Plain.

The Peninsula is a region of great geological stability and is remarkably immune from seismic disturbances of any intensity. The basal complex of the larger part of the Peninsula consists of highly metamorphosed rocks of the earliest periods.

The geological sequence in the Himalayas has been almost entirely marine and there is little doubt that the area now occupied by the great mountains was a deep sea till a late period in the geological history of the area. Much of the area is still very imperfectly known geologically, especially in the east, and some aspects of its history are still controversial. The Siwalik formations represent the material derived from the erosion of the mountains themselves and they have filled in the foredeep that formed in front of the rising Himalayas. These deposits are not essentially different from some of those now forming.

The Indo-Gangetic Plain is a macro-region of alluvium covering 3,00,000 square miles. The thickness of the alluvial deposits has never been ascertained. Borings to a depth of 1,300 ft. have not revealed any rocky bed. The filling is of very unequal depth and varies in character, having been replenished in the east by alluvial deposits brought down from the mountains by the rivers and in the west by wind blown materials. Topographically the plains are remarkably homogeneous with little relief for hundreds of miles.

River Systems

The rivers in India may be classified as follows: (a) the Himalayan rivers, (b) the Deccan rivers, (c) the coastal rivers and (d) the rivers of the inland drainage basin. The Himalayan rivers are generally snow-fed and have, therefore, continuous flow throughout the year. During the monsoon months the Himalayas receive very heavy precipitation everywhere and the rivers discharge the maximum amount of water during this season, causing frequent floods. The Deccan rivers are generally rain-fed and, therefore, fluctuate very much in volume. A very large number of streams are non-perennial. The coastal streams, specially of the West Coast, are short in length and have limited catchment areas. Most of them also are non-perennial. The streams of the inland drainage basin of western Rajasthan are few and far between. Most of them are of ephemeral character. They drain towards the individual basins or salt lakes like the Sambhar or are

lost in the sands, having no outlet to the sea. The Luni is the only river that drains into the Rann of Kutch.

The Ganga basin is the largest, receiving waters from an area which comprises about one-quarter of the total area of India. Its boundaries are well-defined by the Himalayas in the north and the Vindhya mountains in the south. The Ganga has two main headwaters in the Himalayas—the Bhagirathi and the Alakananda, the former rising from the Gangotri glacier at Gaumukh. The Ganga is joined by a number of Himalayan rivers including the Yamuna, Ghaghara, Gandak and the Kosi. The westernmost river of the Ganga system is the Yamuna, which rises in the Yamnotri glacier and joins the Ganga at Allahabad. Of the rivers flowing north from Central India into the Yamuna or the Ganga, mention may be made of the Chambal, the Betwa and the Sone.

The second largest river basin in India is that of the Godavari. It covers an area which comprises about ten per cent of the total area of India. The basin of the Brahmaputra in the east and that of the Indus in the west are of about the same size. The Krishna basin is the second largest in Peninsular India. The Mahanadi flows through the third largest basin in the Peninsula. The basin of the Narmada in the uplands of the Deccan and that of the Kaveri in the far south are of about the same size, though of different character and shape.

The two other river systems, which are small but nevertheless agriculturally very important, are those of the Tapti in the north and the Pennar in the south.

Climate

The India Meteorological Department recognises four seasons: (i) the Cold Weather Season (December-March); (ii) the Hot Weather Season (April-May); (iii) the Rainy Season (June-September); and (iv) the Season of the retreating south-west monsoon (October-November). Tables 1 and 2 show the normal monthly and annual maximum and minimum temperatures in degrees Fahrenheit/Centigrade in shade at nearly 50 selected stations in India.

There are four broad climatic regions based on rainfall. Practically the whole of Assam and the West Coast of India lying at the foot of the Western Ghats and extending from the north of Bombay to Trivandrum are areas of very heavy rainfall. In contrast to these, the Rajasthan desert extending to Kutch, and the high Ladakh plateau of Kashmir extending westward to Gilgit are regions of low precipitation. In between these areas at the extreme ends of the rainfall range are two areas of moderately high and low rainfall respectively. The former consists of a broad belt in the eastern part of the Peninsula merging northward with the North India Plains and southward with the eastern coastal plains. The latter comprises a belt extending from the Punjab Plains across the Vindhya mountains into the western part of the Deccan, widening considerably in the Mysore plateau.

Table 3 shows normal monthly and annual rainfall at about 50 selected places in the country.

POWER RESOURCES

Coal

In India coal occurs mainly in the Gondwana system of Indian Geology, minor deposits occurring in Tertiary rocks of India. The reserves of all types of coal occurring in seams of one foot or more in thickness within a depth of 1,000 ft. are estimated at 6,000 crore tons.

Lignite

Lignite occurs in Madras, Rajasthan, Saurashtra, Kutch and Kashmir. Of these, the deposits covering an area of 100 sq. miles in and around Neyveli in the South Arcot district of Madras State are estimated at 20,000 lakh tons.

Oil

A tentative estimate places the potential oil-bearing areas in India at 4,00,000 sq. miles comprising Assam, Tripura, Manipur, West Bengal basin, Punjab, Himachal Pradesh, Jammu and Kashmir, Rajasthan, Cambay-Kutch, Ganga valley, Madras coast, Andhra coast, Kerala coast and the Andaman and Nicobar Islands. However, the country's oil reserves can be estimated only in the light of the extensive programme of oil exploration which is now in progress.

Water Power

Power potential studies of the river basins of India indicate an aggregate hydro-electric potential of the order of 411 lakh kw at sixty per cent load factor.

MINERAL RESOURCES

Iron Ore

The iron ore reserves in India, assessed at one-fourth of the total world reserves, are estimated at 2,100 crore tons. India's deposits are the largest as compared to any other country in the world. Large deposits of hematite ores are known in Bihar, Orissa, Madhya Pradesh, Mysore and Maharashtra, magnetite ores occurring in Madras, Mysore, Bihar, Orissa and Himachal Pradesh. Extensive reserves of limonite ores associated with spathic ores are present in West Bengal. The proved and indicated reserves of all types of ores amount to about 679 crore tons.

Manganese

India ranks third in the world in manganese deposits. About 10 crore tons of a total estimated reserve of 18 crore tons are in Madhya Pradesh, Gujarat and Maharashtra.

Chromite

Chromite occurs mainly in Bihar, Orissa and Mysore. The total reserves have been estimated at 48 lakh tons.

Refractories

Occurrences of magnesite have been reported from a number of places in Andhra Pradesh, Madras, Mysore, Rajasthan and Uttar Pradesh. The total reserves have been estimated at 1,034 lakh tons. Fire-clays occur in almost all States, those of Bihar and Bengal being the most important. The largest deposits of kyanite in the world occur in Bihar, smaller occurrences being known to exist in Orissa. Other States where kyanite occurs are Andhra Pradesh, Mysore, Maharashtra and Rajasthan. Deposits of sillimanite of potential commercial importance occur in Assam, Kerala, Madhya Pradesh and Mysore. Corundum is found in Assam, Madhya Pradesh, Mysore and Rajasthan, the reserves

in Madhya Pradesh alone being of the order of 4 lakh tons including 1 lakh tons of high grade mineral.

Gold

The Kolar Gold Fields in Mysore State hold probable reserves of about 12.6 lakh tons of ore.

Copper

Copper ore is available in a 80-mile belt in Bihar. Deposits in Rajasthan (Daribo in Alwar district and Khetri in Jhunjhunu district) and Andhra Pradesh (Gani area in Kurnool district) are under investigation. Reserves of 284 lakh tons of 0.8 per cent copper content on average have been estimated in the Khetri area of Rajasthan.

Bauxite

The occurrence of bauxite is widespread in India. The chief areas of occurrence are Bihar, Jammu, Madhya Pradesh, Madras and Maharashtra which together hold probable reserves of about 2,500 lakh tons. High grade bauxite reserves are estimated at 640 lakh tons, of which 130 lakh tons are in Bihar, 110 lakh tons in Gujarat and 160 lakh tons in Madhya Pradesh.

Mica

Mica is available in three mica belts of about 1,500 sq. miles in Bihar, 1,200 sq. miles in Rajasthan and 600 sq. miles in Andhra Pradesh. The best quality of mica, perhaps the best in the world, comes from Bihar.

Ilmenite

Workable deposits occur in the beach sands of the eastern and western coasts of India, those on the Kerala coast being known for their extensive occurrence. India's reserves of ilmenite in beach sands have been reckoned at 3,500 lakh tons.

Salt

Salt is mainly derived from the sea (along the coastal region, mostly in Gujarat, Maharashtra and Madras), inland lakes (in Rajasthan and Gujarat) and to a very small extent from rock salt deposits (in Himachal Pradesh).

Gypsum

Gypsum is found in Gujarat, Madras and Rajasthan. Deposits have been located in Jammu and Kashmir. India's reserves of gypsum are now placed at 104 crore tons.

Miscellaneous Minerals

Minor minerals like alum, apatite, asbestos, barytes, feldspar, fullers' earth, garnet, quartz, saltpetre and steatite are available on a small scale. Reserves of apatite-bearing rocks are placed at 7 lakh tons in Bihar and 80 lakh tons in Madras, of which 20 lakh tons are economically recoverable. Reserves of bentonite clay at Barmer are estimated at one crore tons.

THE DEMOGRAPHIC BACKGROUND*

According to the 1961 census the country's population is 43,72,02,747†. This figure does not include the population of Naga Hills-Tuensang Area

*Population figures in this chapter and elsewhere in this publication are based on the 1961 census. Only the provisional results of the 1961 census are as yet available. There are aspects of the Demographic Background in respect of which the results are not available. In all such cases, information based on the 1951 census has been provided.

†The 1961 census covered Sikkim also. Its population (1,61,080) is not included in this figure.

(Nagaland) and North-East Frontier Tract for which population data according to the 1961 census are not yet available. Census operations have not yet been conducted in the Union Territories of Dadra and Nagar Haveli and Goa, Daman and Diu.

The growth of population since 1901 is indicated in table 5.

The following table shows the area, population and density of population in India and the component States and Union Territories.

TABLE 4
AREA, POPULATION AND DENSITY OF POPULATION OF INDIA AND
THE COMPONENT STATES AND UNION TERRITORIES

	Area in sq. miles (a)	Population 1961 (b)	Density of population
INDIA	12,61,411	43,72,02,747	384(c)

Bihar	67,198	4,64,57,042	691
Gujarat	72,226(d)	2,06,21,283	286
Jammu & Kashmir	86,024	35,83,585(b)	(N.A.)(c)
Kerala	15,005	1,68,75,199	1,125
Madhya Pradesh	1,71,210	3,23,94,375	189
Madras	50,132	3,36,50,917	671
Maharashtra	1,18,741(d)	3,95,04,294	332
Mysore	74,191	2,35,47,081	318
Orissa	60,162	1,75,65,645	292
Punjab	47,084	2,02,98,151	431
Rajasthan	1,32,150	2,01,46,173	152
Uttar Pradesh	1,13,454	7,37,52,914	650
West Bengal	33,928	3,49,67,634	1,031
<i>Union Territories</i>			
Andaman and Nicobar Islands	3,215	63,438	20
Delhi	573	26,44,058	4,614
Himachal Pradesh	10,879	13,48,982	124
Laccadive, Minicoy and Amindivi Islands	11	24,108	2,192
Manipur	8,628	7,78,318	90
Tripura	4,036	11,41,492	283
Dadra and Nagar Haveli	189	N.A.	N.A.
Goa, Daman and Diu	1,426	N.A.	N.A.

(a) Revised on the basis of figures (rounded to the nearest unit) furnished by the Survey of India in January 1962. These are still provisional pending final survey of boundaries of States and Union Territories. A small difference of two sq. miles between the area figure given for INDIA and the total of the States and Union Territories is due to the latter having been rounded to the nearest unit. The area figure excludes Pondicherry (186 sq. miles) over which the Government of India exercises jurisdiction by virtue of an agreement with the Government of France.

(b) The population figure excludes (i) population of the areas of Jammu & Kashmir State, currently under foreign occupation, where census operations could not be undertaken and (ii) population of N.H.T.A. (Nagaland) and N.E.F.T. for which figures are not yet available.

(c) In working out the density of population for India, the area (2,744 sq. miles) and population (1,61,080) of Sikkim have been taken into account and the area and population of Jammu & Kashmir have not been taken into consideration because the 1961 census in that State did not cover portions currently under foreign occupation. Similarly the area (37,801 sq. miles) and population of N.H.T.A. (Nagaland) and N.E.F.T. and of the Union Territories of Dadra and Nagar Haveli and Goa, Daman and Diu have also not been taken into account because population figures are not yet available.

(d) Very approximate figures furnished by the Survey of India.

TABLE 5

GROWTH OF POPULATION (1901-1961)

	1901	1911	1921	1931	1941	1951	1961*

Tripura	1,73,325	2,29,613	3,04,437	3,82,450	5,13,010	6,39,029	11,41,492

* According to 1961 census 'Provisional Population'.

† The last census of Jammu & Kashmir State was held in 1941. For estimating the 1951 population the increase between 1941-51 has been taken as the mean of the increase between 1941-61.

NOTE.—(1) Manipur, N.H.T.A. (Nagaland) and N.E.F.T. are not included in the table as the figures are not available at present.

(2) Population of each State or Union Territory has been adjusted as close as practicable to its present area and limits following the reorganisation of States (1956).

Birth and Death Rates

Since many births and deaths go unregistered, there is a difference in the figures of births and deaths based on the registration data and those provided by the census data. The following table gives India's birth and death rates per thousand for the last fifty years in decennial averages.

TABLE 6
BIRTH AND DEATH RATES (DECENNIAL AVERAGES)

(per thousand of population)

Decade	Registered		Estimated by Reverse Survival Method	
	Birth rate	Death rate	Birth rate	Death rate
1901—10	37	—	48·1	42·6
1911—20	37	34	49·2	48·6
1921—30	34	26	46·4	36·3
1931—40	34	23	45·2	31·2
1941—50	28	20	39·9	27·4

According to studies made with the help of census data between 1941 and 1951, births had occurred at an average rate of 40 per thousand per annum, deaths at an average rate of 27 per thousand per annum and the natural increase of population at an average rate of 13 per thousand per annum. The highest birth rate was in Central India (44) and the lowest in South India (36 or 37). The highest death rate was in Central India (34) and the lowest in South India (21-22). The highest natural increase rate was in North-West India (16-17) and West India (16) and the lowest in Central India (10).

The following table shows the birth, death and infant mortality rates since 1951 based on the registration data.

TABLE 7
BIRTH, DEATH AND INFANT MORTALITY RATES*

Year	Per thousand of population		Per thou- sand births
	Birth rate	Death rate	Infant mortality
1951	25·8	14·7	130
1952	26·0	14·3	123
1953	25·2	14·9	125
1954	24·6	12·5	114
1955	26·7	11·7	103
1956	22·4	10·4	109
1957	21·7	11·2	107
1958	21·8	11·7	108
1959	23·0	9·9	92
1960**	24·6	10·4	—

Life Expectancy

The table below shows estimates of life expectancy for males and females for the decennium 1941-1951 and the two subsequent quinquennia.

TABLE 8
LIFE EXPECTANCY

	Expectation of life at birth	
	Male	Female
1941-51	32·45	31·66
1951-56	37·76	37·49
1956-61	41·68	42·06

*Revised on the basis of figures published in *Vital Statistics of India for 1959*.

**Provisional.

Maternity Pattern

The following table shows for all mothers aged 45 and over—but excluding widows and divorced ones—(i) the average number of live children born to them during their entire child-bearing period and (ii) the average number of children surviving. These data, described respectively as (i) child birth index and (ii) child survival index, were collected only in respect of two States during the 1951 census.

TABLE 9
CHILD BIRTH AND SURVIVAL INDICES

Natural Division/State	Child birth index	Child survival index
East Madhya Pradesh	6.1	3.6
North-West Madhya Pradesh	6.3	3.6
South-West Madhya Pradesh	6.6	3.6
Travancore-Cochin	6.6	4.6

Order of birth is recorded under the normal registration procedure in towns with a population of one lakh and over. The proportions of first, second, third, fourth and higher order births shown by the data thus collected are given in Section I of table 10 below. Similar results based on 'experimental census' undertaken in 61 districts in different zones of the country in 1952-53, subsequent to the 1951 census, and an analysis of registration data of 30 municipal towns in 1951 are given in Section II. The results from these two independent sources are broadly similar.

TABLE 10
MATERNITY PATTERN

	Number per thousand births which are			
	First births	Second births	Third births	Fourth & higher order births
<i>Section I (1959)*</i>				
Andhra Pradesh (6 Towns)	223	188	164	425
Bihar (4 Towns)	172	180	170	478
Bombay (9 Towns)	219	191	170	420
Delhi (1 Town)	173	171	151	505
Kerala (3 Towns)	193	167	138	502
Madhya Pradesh (1 Town)	185	175	168	472
Madras (7 Towns)	211	184	155	450
Mysore (3 Towns)	199	172	149	480
Orissa (1 Town)	275	252	174	299
Punjab (3 Towns)	269	188	157	385
West Bengal (5 Towns)	190	165	136	509
India (43 Towns)	209	183	158	450
<i>Section II (1951)</i>				
South India (27 Districts)	228	215	181	376
West India (7 Districts)	209	180	167	444
Central India (22 Districts)	210	189	162	439
North-West India (5 Districts)	231	206	151	412
30 Municipal towns of India	209	196	167	428

*Towns each having population of 1 lakh and over. Number of towns in each State for which information is given are shown in brackets.

Generally speaking, first births account for one-fifth of all births, second births for slightly less than one-fifth, third births for about one-sixth and fourth and higher order births for over two-fifths of all births.

Age Structure, Sex Ratio and Marital Status

The following table shows the percentage of different age-groups to the total population.

TABLE 11
AGE STRUCTURE*

	Age group	Percentage of total population
Infants and young children	0 to 4	13·5
Boys and girls	5 to 14	24·8
Young men and women	15 to 24	17·4
	25 to 34	15·6
Middle-aged men and women	35 to 44	11·9
	45 to 54	8·5
Elderly persons	55 to 64	5·1
	65 to 74	2·2
	75 and over	1·0
TOTAL		100·0

Table 12 gives the break-up of the population according to age, sex and civil condition, and table 13 the sex ratio.

*Excluding displaced persons.

TABLE 12

DISTRIBUTION OF POPULATION ACCORDING TO AGE, SEX AND CIVIL CONDITION* (1951)

(in thousands)

Age-group	Total		Unmarried		Married		Widowed or divorced	
	Male	Female	Male	Female	Male	Female	Male	Female

Tripura	874	885	885	885	886	904	931

The number of females per thousand males in 1961 was 940. The sex ratio has shown a trend towards slow decline since 1901. Kerala, Andhra Pradesh and Rajasthan have shown fluctuations between 1901 and 1961. Assam and Bihar have shown a stationary ratio in 1951 and 1961. Gujarat has shown a slight deterioration, while Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa and Uttar Pradesh have shown an appreciable

*Excludes Jammu & Kashmir State.

†Manipur, N.H.T.A. (Nagaland) and N.E.F.T. are not included in the table as enumeration has not yet been completed in these areas.

downward trend. Punjab and West Bengal have slightly improved their sex ratio over 1951.

Density

The density of population in India and its component States and Union Territories has already been given in table 4. The variation and density of population between 1921 and 1961 are as follows.

TABLE 14
VARIATION AND DENSITY OF POPULATION
(1921—1961)

								Increase (+)
								Percentage
								Decrease (—)
1921—31	+11.0
1931—41	+14.3
1941—51	+13.4
1951—61	+21.5*
								Density
1921	193
1931	213
1941	246
1951	287
1961	384*

THE SOCIAL PATTERN†

Religions

The number of persons in 1951 professing the different religions in India is shown in the table below.

TABLE 15
POPULATION ACCORDING TO RELIGION** (1951)

Religion	Number (In lakhs)	Percentage of total population
Hindu	30.32	84.99
Muslim	3.54	9.93
Christian	82	2.30
Sikh	62	1.74
Jain	16	0.45
Buddhist	2	0.06
Zoroastrian	1	0.03
Other religions (tribal)	17	0.47
Other religions (non-tribal)	1	0.03
All Religions	35.67	100.00

*According to 1961 census 'Provisional Population'.

† The results of the 1961 census pertaining to the various aspects of the Social Pattern are not yet available.

**Exclusive of people living in the State of Jammu & Kashmir and Part B Tribal Areas of Assam where the 1951 census was not taken, and of 2,68,602 persons in Punjab whose enumeration records were destroyed by fire.

Languages

The 1951 census enumerated a total of 845 languages or dialects as follows:

TABLE 16
POPULATION ACCORDING TO MOTHER TONGUE (1951)

	Number	Persons speaking
Languages specified in the Eighth Schedule to the Constitution	15@	32,39,72,607
Tribal languages or dialects with speakers numbering a lakh and over	23	1,15,31,848
Other Indian languages or dialects with speakers numbering a lakh and over	24	1,76,98,041
Other Indian languages or dialects with speakers numbering less than a lakh	720	28,60,974
Non-Indian languages	63	2,26,251
Unclassified population	—	5,89,673
	845	35,68,79,394*

The number of persons speaking languages or dialects of the first three categories is shown in the following table.

TABLE 17
LANGUAGES (OR DIALECTS) SPOKEN BY A LAKH AND OVER EACH (1951)**

Language/Dialect	Persons Speaking
<i>I. Languages specified in the Eighth Schedule to the Constitution †</i>

Bhili	11,60,299
Oraon or Kurukh	6,44,042
Lambadi	6,28,166
Ho	5,99,876
Mundari or Munda	5,85,211
Vagdi	5,16,991

*Exclusive of people living in the State of Jammu & Kashmir and Part B Tribal Areas of Assam where the 1951 census was not taken, but inclusive of those living in Sikkim.

**Figures given in this table are exclusive of speakers in Jammu & Kashmir and Part B Tribal Areas of Assam where no census was held in 1951.

② Fourteen languages have been specified in the Eighth Schedule to the Constitution. Since some persons preferred to return Hindustani instead of Hindi or Urdu, the 1951 census enumerated 15 instead of 14 languages.

† No all-India totals were available at the 1951 census separately for persons speaking Hindi, Urdu, Hindustani or Punjabi. The number of persons speaking Hindi in India excluding Punjab, Delhi and Himachal Pradesh was 10,87,60,966. The corresponding figure for Urdu was 1,35,71,321, for Hindustani 81,60,683 and for Punjabi 8,37,747.

‡ Figure does not include speakers in Jammu and Kashmir, where no census was taken in 1951.

TABLE 17—(concl'd.)

Rural and Urban Population

Of the 43.64 crores who constitute the population of the areas of the country for which provisional population figures are available according to the 1961 census, 35.86 crores or 82.2 per cent live in villages and 7.78 crores or 17.8 per cent live in cities and towns. There has been, between 1921 and 1961, a slow but steady shift towards urbanisation as shown below.

TABLE 18
RURAL AND URBAN POPULATION (1921—1961)

	Percentage of total population	
	Rural	Urban
1921	88.6	11.4
1931	87.9	12.1
1941	86.1	13.9
1951	82.7	17.3
1961 †	82.2	17.8

*Figure includes Rangari or Ahiri.

† Excluding Manipur, N.H.T.A. (Nagaland) and N.E.F.T. for which figures are not yet available. Figures are provisional.

According to the 1961 census (Provisional Population) there are 2,546 towns in India including Sikkim. Data pertaining to villages are not yet available. The following table shows the distribution of towns.

CHAPTER II

NATIONAL EMBLEM, FLAG, ANTHEM, SONG AND CALENDAR

NATIONAL EMBLEM

The National Emblem of India is an adaptation from the Sarnath Lion Capital of Asoka as it is preserved in the Sarnath museum. In the original, there are four lions, standing back to back, mounted on an abacus with a frieze carrying sculptures in high relief of an elephant, a galloping horse, a bull and a lion separated by intervening wheels (*Chakras*) over a bell-shaped lotus. Carved out of a single block of polished sandstone, the Capital was crowned by the Wheel of the Law (*Dharma Chakra*).

In the National Emblem adopted by the Government of India on January 26, 1950, only three lions are visible, the fourth being hidden from view. The wheel appears in relief in the centre of the abacus with a bull on the right and a horse on the left and the outlines of the other wheels on the extreme right and left. The bell-shaped lotus has been omitted. The words "Satyameva jayate", from the *Mundaka Upanishad* meaning "Truth alone triumphs", are inscribed below the Emblem in the Devanagari script.

NATIONAL FLAG

The National Flag is a horizontal tricolour of deep saffron on the top, white in the middle and dark green at the bottom in equal proportions. The ratio of the width to the length of the Flag is two to three. In the centre of the white band there is a wheel in navy blue to represent the *Charkha*. Its design is that of the wheel which appears on the abacus of the Sarnath Lion Capital. Its diameter approximates to the width of the white band and it has 24 spokes.

The National Flag was adopted by the Constituent Assembly of India on July 22, 1947, and was presented to the nation, on behalf of the women of India, at the midnight session of the Assembly on August 14, 1947.

Use of Flag

A pamphlet entitled *Flag Code—India* has been issued by the Government of India to ensure the proper use and display of the Flag. The instructions contained in the Code prohibit the dipping of the Flag to any person or thing.

No flag or emblem should be placed above the National Flag or to its right. All flags are placed to the left of the National Flag if they are hung in a line. When other flags are raised, the National Flag must be the highest. No other flag shall be flown from the same halyard from which the National Flag is flown. Where a mast has more than one halyard all of which do not reach the top of the mast, then the National Flag should be displayed at the highest point of the mast.

When the Flag is displayed from a staff projecting horizontally or at an angle from a window-sill, balcony, or front of a building, the saffron side shall be at the farther end of the staff.

When the Flag is displayed in a manner otherwise than by being flown from a staff, the saffron band must be uppermost when it is displayed flat and horizontal on a wall; when displayed vertically, the saffron band should be on the right with reference to the Flag, *i.e.*, it should be to the left of a person

standing facing it. When displayed over the middle of a street, running east-west or north-south, the Flag shall be suspended vertically with the saffron band to the north or to the east as the case may be.

When the Flag is carried in a procession or a parade, it shall be either on the marching right, that is the Flag's own right, or if there is a line of other flags, in front of the centre of the line.

Normally, the National Flag should be flown on all important Government buildings such as high courts, secretariats, commissioners' offices, collect-orates, jails and the offices of the district boards or zila parishads and municipalities. The frontier areas may fly the National Flag at some special points. The President of the Indian Republic and the Governors of States have their personal flags.

The use of the Flag will, however, be unrestricted on certain special occasions such as Republic Day, Independence Day, Mahatma Gandhi's birthday, during the National Week and on any other days of national rejoicing. The display of the National Flag on motor cars, even on such occasions, will be restricted only to those entitled to the privilege.

The use of the National Flag or any colourable imitation thereof for the purpose of any trade, business, calling or profession or in the title of any patent, or in any trade mark or design without the prior permission of the Central Government is an offence.

NATIONAL ANTHEM

Rabindranath Tagore's song *Jana-gana-mana* was adopted as the National Anthem of India on January 24, 1950. The song was first sung on December 27, 1911, during the Indian National Congress session at Calcutta. It was first published in January 1912, under the title *Bharat Vidhata* in the *Tattvabodhini Patrika*, of which Tagore himself was the editor. The poet translated the song into English in 1919 under the title *Morning Song of India*. The complete song consists of five stanzas. The first stanza, which has been adopted by the Defence Forces and is usually sung on ceremonial occasions, reads as follows:

Jana-gana-mana-adhinayaka jaya he
 Bharata-bhagya-vidhata.
 Punjaba-Sindhu-Gujarata-Maratha-
 Dravida-Utkala-Banga
 Vindhya-Himachala-Yamuna-Ganga
 Uchchhala-Jaladhi-taranga
 Tava subha name jage
 Tava subha asisa mage
 Gaha tava jaya-gatha.
 Jana-gana-mangala-dayaka jaya he
 Bharata-bhagya-vidhata
 Jaya he, jaya he, jaya he,
 Jaya jaya* jaya jaya he.

The following is Rabindranath Tagore's English rendering of the stanza:

Thou art the ruler of the minds of all people,
 dispenser of India's destiny.

Thy name rouses the hearts of the Punjab, Sind,
 Gujrat and Maratha, of the Dravid and Orissa and
 Bengal; it echoes in the hills of the Vindhyas and
 Himalayas, mingles in the music of the Jamuna and
 Ganges and is chanted by the peoples of the Indian
 Sea. They pray for thy blessings and sing thy
 praise. The saving of all people waits in thy hand,
 thou dispenser of India's destiny.

Victory, victory, victory to thee.

सत्यमेव जयते

NATIONAL SONG

At the same time as the National Anthem was adopted, it was decided that Bankim Chandra Chatterjee's *Vande Mataram*, which was a source of inspiration to the people in their struggle for freedom, shall have an equal status with *Jana-gana-mana*. *Vande Mataram* occurs in Bankim Chandra Chatterjee's novel *Ananda Math*, published in 1882. The first political occasion on which it was sung was the 1896 session of the Indian National Congress. The following is the text of its first stanza:

Vande Mataram !
 Sujalam, suphalam malayaja-sitalam,
 Sasyasyamalam, Mataram !
 Subhrajyotsna-pulakitayaminim,
 Phullakusumita-drumadala-sobhinim,
 Suhasinim sumadhura-bhasinim,
 Sukhadam, varadam, Mataram !

The following is Sri Aurobindo's translation of the stanza quoted above:

Mother, I bow to thee !
 Rich with thy hurrying streams,
 Bright with thy orchard gleams,
 Cool with thy winds of delight,
 Dark fields waving, Mother of might,
 Mother free.
 Glory of moonlight dreams
 Over thy branches and lordly streams,—
 Clad in thy blossoming trees,
 Mother, giver of ease,
 Laughing low and sweet!
 Mother, I kiss thy feet,
 Speaker sweet and low!
 Mother, to thee I bow.

NATIONAL CALENDAR

In November 1952, a Committee was appointed to examine the different calendars in use in the country and to submit proposals for an accurate and uniform calendar for the whole of India. In its report, submitted in 1955, the Committee recommended the adoption of a National Calendar based on the Saka era with Chaitra as its first month and a normal year of 365 days. The days of this calendar have a permanent correspondence with the days of the Gregorian calendar, Chaitra 1 falling on March 22 in a common year and March 21 in a leap year. As a result of the decision taken by the Government of India in consultation with the State Governments, the Gregorian Calendar continues to be used as hitherto for official and like purposes, the National Calendar being adopted with effect from March 22, 1957, along with the Gregorian Calendar, for the following official purposes : (i) The Gazette of India, (ii) News broadcasts by the All India Radio, (iii) Calendars issued by the Government of India, and (iv) Communications issued by the Government of India and addressed to members of the public.

The State Governments have also been requested to use progressively the National Calendar along with the Gregorian Calendar.

CHAPTER III

CONSTITUTION

The Constituent Assembly of India first met on December 9, 1946. It adopted a resolution on objectives on January 22, 1947, and appointed a number of committees to report on the various aspects of the proposed Constitution. On the basis of their reports, the Drafting Committee of the Assembly prepared a Draft Constitution which was published in February 1948. This was presented for general discussion on November 4, 1948. The Constitution comprising 395 Articles and eight Schedules, was finalised and adopted by the Assembly on November 26, 1949*. It came into force on January 26, 1950.

The preamble to the Constitution embodies the resolve of the people of India to secure for all citizens : "*Justice*, social, economic and political; *Liberty* of thought, expression, belief, faith and worship; *Equality* of status and of opportunity; and to promote among them all *Fraternity* assuring the dignity of the individual and the unity of the Nation."

THE UNION AND ITS TERRITORY

India is a Union of States and its territory comprises the territories of the States of Andhra Pradesh, Assam, Bihar, Gujarat, Jammu and Kashmir, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal, the Union Territories of Delhi, Himachal Pradesh, Manipur, Tripura, the Andaman and Nicobar Islands, the Laccadive, Minicoy and Amindivi Islands, Dadra and Nagar Haveli and Goa, Daman and Diu, and such other territories as may be acquired.**

CITIZENSHIP AND FRANCHISE

The Constitution provides† for a single and uniform citizenship for the whole of India. Birth within the territory of the Indian Union, descent from Indian parents, or residence for a period of five years at the commencement of the Constitution entitles one to be a citizen of India. Article 6 provides for displaced migrants from Pakistan to become citizens. Persons of Indian origin residing abroad can also become citizens by registering themselves as such with Indian diplomatic or consular representatives in the countries of their residence.

Article 326 of the Constitution confers the right of vote on every person who is a citizen of India and who is not less than twenty-one years of age on a date to be fixed by the appropriate Legislature and is not otherwise disqualified under the Constitution or any law on the ground of non-residence, unsoundness of mind, crime or corrupt or illegal practice.

*For broad details about the amendments to the Constitution, see under 'Amendment of the Constitution' at the end of this Chapter.

**Before the adoption of the Constitution (Seventh Amendment) Act, 1956, there were 10 States specified in the First Schedule to the Constitution as Part A States, 8 as Part B States, 9 as Part C States and one Part D Territory. Chapter XXX in 'INDIA 1957' may be consulted for details about the reorganisation of States.

†These provisions of the Constitution deal only with broad qualifications for citizenship at the time of its commencement, leaving details to be filled in by parliamentary legislation. This has since been done by the Citizenship Act, 1955, which provides for the acquisition of citizenship after the commencement of the Constitution by birth, descent, registration, naturalisation and as a result of incorporation of territory. The Act provides for the termination and deprivation of citizenship under certain circumstances. It empowers the Union Government to extend, on a reciprocal basis, all or any of the rights of an Indian citizen to the citizens of other Commonwealth countries and the Republic of Ireland.

FUNDAMENTAL RIGHTS

Part III of the Constitution enumerates seven broad categories of "Fundamental Rights". The right to equality (Articles 14 to 18) includes equality before the law, prohibition of discrimination on grounds of religion, race, caste, sex, or place of birth, and equality of opportunity in matters of public employment. "Untouchability" has been abolished, and Parliament has enacted a law making the practice of untouchability a punishable offence.

Article 19 guarantees to the citizen his right to freedom of speech and expression, assembly, association or union, movement, residence, acquisition, holding and disposal of property and the right to practise any profession or to carry on any occupation, trade or business. The Constitution does not, however, bar the State from making laws prescribing reasonable restrictions on the exercise of these rights in the interest of the security of the State, friendly relations with foreign States, public order, decency or morality or in relation to contempt of court, defamation or incitement to an offence or in the interest of the general public or for the protection of the interests of any Scheduled Tribe. The conferment of these rights does not affect the operation of any existing law or prevent the State from making any new law relating to the professional or technical qualifications necessary for practising any profession or carrying on any occupation, trade or business or the carrying on by the State, or by a corporation owned or controlled by the State, of any trade, business, industry or service whether to the exclusion, complete or partial, of citizens or otherwise.

Three other basic principles of law which the Constitution has recognised in Articles 20 and 21 as fundamental rights are : (i) No person shall be prosecuted and punished for the same offence more than once ; (ii) No person accused of any offence shall be compelled to be a witness against himself; and (iii) No person shall be deprived of his life or personal liberty except according to procedure established by law. The right against exploitation (Articles 23 and 24) prohibits all forms of forced labour, child labour and traffic in human beings.

Freedom of conscience and free profession, practice and propagation of religion for all (Articles 25 to 28) and the right of minorities to conserve their own culture, language and script and to receive education and establish and administer educational institutions of their choice (Articles 29 and 30) are guaranteed by the Constitution.

Article 31 provides that "no person shall be deprived of his property save by authority of law". This does not, however, deprive the State of its right to compulsory acquisition of private property for a public purpose, after payment of compensation. The article was amended in 1955 so as to place outside the purview of law courts the question whether the compensation provided by a specific law is adequate or not.

The right to constitutional remedies (Article 32) provides that the fundamental rights are justiciable and any citizen can move the Supreme Court to issue appropriate directions, orders or writs for their enforcement. Without prejudice to these powers of the Supreme Court, Parliament can also empower any other court to exercise similar powers within the local limits of its jurisdiction.

DIRECTIVE PRINCIPLES OF STATE POLICY*

The Directive Principles of State Policy, though not enforceable through courts of law, are regarded as "fundamental in the governance

*The extent to which these directives have been implemented after the inauguration of the Constitution can be seen from some of the succeeding chapters, particularly those dealing with executive, judiciary, education, health, social welfare, scheduled castes and tribes, land reform, co-operative movement, community development, labour and others.

of the country". These lay down that the State shall strive "to promote the welfare of the people by securing and protecting as effectively as it may a social order in which justice, social, economic and political, shall inform all the institutions of the national life". These principles further require the State to direct its policy in such a manner as to secure the right of all men and women to an adequate means of livelihood, equal pay for equal work, and, within the limits of its economic capacity and development, to make effective provision for securing the right to work, education and public assistance in the event of unemployment, old age, sickness and disablement or other cases of undeserved want. The State is also required to secure to workers humane conditions of work, a decent standard of life, and full enjoyment of leisure and social and cultural opportunities.

In the economic sphere, the State is to direct its policy in a manner as to secure the distribution of ownership and control of the material resources of the community to subserve the common good and to ensure that the operation of the economic system does not result in the concentration of wealth and means of production to common detriment. The State is also enjoined to guard against the abuse of workers' health and strength and to protect childhood and youth from being forced by economic necessity to enter avocations unsuited to their age or strength, against exploitation and against moral and material abandonment.

Among the other directives of State policy are the organisation of agriculture and animal husbandry on modern and scientific lines; promotion of cottage industries in rural areas; raising the level of nutrition and improvement in the standards of living and public health; prohibition of intoxicating drinks and drugs; provision for free and compulsory education for all children up to the age of fourteen; organisation of village panchayats; separation of judiciary from the executive; promulgation of a uniform civil code for the whole country; protection of national monuments; promotion of educational and economic interests of Scheduled Castes, Scheduled Tribes and other weaker sections; and the promotion of international peace and security, just and honourable relations between nations, respect for international law and treaty obligations, and settlement of international disputes by arbitration.

THE UNION

EXECUTIVE

The Union Executive consists of the President, Vice-President, and the Council of Ministers with the Prime Minister at its head.*

President

The President is elected by an electoral college consisting of the elected members of both Houses of Parliament and of the Legislative Assemblies of the States in accordance with the system of proportional representation by means of the single transferable vote. The President must be a citizen of India, not less than 35 years of age, and eligible for election as a member of the House of the People. His term of office is five years and he is eligible for re-election. Before entering upon his office the President takes an oath to preserve, protect and defend the Constitution. His removal from office for any violation of the Constitution is to be in accordance with the procedure prescribed in Article 61. In his capacity as the head of the State, the President is empowered to make appointments; summon, prorogue, address, send messages to Parliament and dissolve the House of the People; issue ordinances during recess of Parliament, make recommendations for introducing or moving money bills and give assent to bills; and

*For details about the functioning of the Union Government, see Chapters IV and V.

grant pardons, reprieves, respites or remissions of punishment or to suspend, remit, or commute sentences in certain cases. The executive power of the Union vested in him is exercised by him either directly or through officers of the Government in accordance with the Constitution.

Vice-President

The Vice-President is elected by an electoral college consisting of the members of both Houses of Parliament in accordance with the system of proportional representation by means of the single transferable vote. He must be a citizen of India, not less than 35 years of age, and eligible for election as a member of the Council of States. His term of office is also five years. The Vice-President acts as the ex-officio Chairman of the Council of States and acts as President when the latter is unable to discharge his functions due to illness, absence or any other cause, or till the election of a new President when a vacancy is caused by the death, resignation or removal of the President. While so acting he exercises all the powers and discharges all the functions vested in the President and ceases to perform the functions, of the Chairman of the Council of States.

Council of Ministers

There is a Council of Ministers headed by the Prime Minister to aid and advise the President in the exercise of his functions. The Prime Minister is appointed by the President who also appoints the other Ministers on the advice of the Prime Minister. Although the Council holds office during the pleasure of the President, it is collectively responsible to the House of the People. It is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers relating to the administration of the affairs of the Union and proposals for legislation and information relating to them and, if the President so requires, submit for the consideration of the Council of Ministers any matter on which a decision has been taken by a Minister but which has not been considered by the Council.

Attorney-General

The Attorney-General appointed by the President, advises the Government of India on legal matters and performs such other duties of a legal character as may be referred or assigned to him by the President. He also discharges certain other functions entrusted to him by or under the Constitution. He holds office at the pleasure of the President and has the right of audience in all courts in the country.

PARLIAMENT

The Legislature of the Union, which is called "Parliament", consists of the President and the two Houses known as the Council of States (*Rajya Sabha*) and the House of the People (*Lok Sabha*).

Council of States (Rajya Sabha)

The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest elected. The Council of States is not subject to dissolution, one-third of its members retiring on the expiration of every second year. The elections to the Council are indirect, the allotted quota of the representatives of each State, as provided in the Fourth Schedule to the Constitution, being elected by the elected members of the Legislative Assembly of that State in accordance with the system of proportional representation by means of the single transferable vote. The representatives of the Union Territories are chosen in such manner as Parliament by law prescribes. The nominated members are persons having special knowledge or practical experience in literature, science, art and social service. Members of the Council must be citizens of India and not less than 30 years of age.

House of the People (Lok Sabha)

The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States (the representatives of the State of Jammu and Kashmir being appointed by the President on the recommendation of the Legislature of the State), and not more than 20 members to represent the Union Territories chosen in the manner as Parliament by law provides. The number of seats for each State is so allocated that the ratio between the number and the population of the State is, as far as practicable, the same for all States. Up to 1970 the President can nominate two members to the House of the People to represent the Anglo-Indian community, if in his opinion it is not adequately represented. Unless dissolved sooner, the term of the House is five years from the date of its first meeting.

JUDICIARY*

The Supreme Court of India consists of a Chief Justice and not more than thirteen judges appointed by the President. The Judges hold office till the age of 65. For appointment as a judge of the Supreme Court, a person must be a citizen of India and must have been for at least five years a judge of a High Court or of two or more such courts in succession; or an advocate of a High Court or of two or more such courts in succession for at least ten years; or he must be in the opinion of the President, a distinguished jurist. Provision has also been made for the appointment of a judge of a High Court as an *ad hoc* judge of the Supreme Court and for retired judges of the Supreme Court to sit and act as judges of that Court. The Constitution debars a retired judge of the Supreme Court from practising in any court of law or before any other authority in India.

A judge of the Supreme Court cannot be removed from office except by an order of the President passed after an address by each House of Parliament, supported by a majority of not less than two-thirds of the members present and voting, has been presented to the President for such removal on the ground of proved misbehaviour or incapacity.

COMPTROLLER AND AUDITOR-GENERAL OF INDIA

Articles 148 to 151 provide for the appointment of a Comptroller and Auditor-General of India by the President to keep watch on the accounts of the Union and the States. His reports, submitted to the President and the Governors of States, are laid before each House of Parliament and the Legislatures of States.

THE STATES †

The system of Government in the States as embodied in Part VI of the Constitution, closely resembles that of the Union.

EXECUTIVE

The State Executive consists of the Governor and a Council of Ministers with a Chief Minister at its head.

Governor

The Governor of a State is appointed by the President of India for a term of five years and holds office during his pleasure. Only Indian citizens above 35 years of age are eligible for appointment to this office.

*For details about the organisation, functions and powers, etc., of the Judiciary, see Chapter VI.

† For details about the functioning of the State Governments, see Chapters IV and V.

The Governor is debarred from being a member of either House of Parliament or of a House of the State Legislature and from holding any other office of profit.

Council of Ministers

The Constitution provides for a Council of Ministers with a Chief Minister at the head to aid and advise the Governor in the exercise of his functions except in so far as he is, by or under the Constitution, required to exercise his functions in his discretion. The Chief Minister is appointed by the Governor, who also appoints other Ministers on the advice of the Chief Minister. The Council of Ministers, which holds office during the pleasure of the Governor, is collectively responsible to the Legislative Assembly of the State.

Advocate-General

The Advocate-General, who advises the Government of the State on such legal matters and performs such other legal duties as are referred or assigned to him by the Governor or entrusted to him by the Constitution or any other law, is appointed by the Governor and holds office during his pleasure.

LEGISLATURE

For every State there is a Legislature which consists of the Governor and the two Houses (except in the case of Assam, Gujarat, Kerala, Orissa, and Rajasthan which have only one House—the Legislative Assembly)*. Parliament can, by law, provide for the abolition of an existing Legislative Council or for the creation of one where one does not exist if the proposal is supported by a resolution of the Legislative Assembly concerned.

Legislative Council (Vidhan Parishad)

The Legislative Council of a State comprises not more than one-third of the total number of members in the Legislative Assembly of the State, and in no case less than 40 members. Nearly one-third of the members of the Council are elected by the members of the Legislative Assembly of the State from amongst persons who are not members of the Assembly, one-third by electorates consisting of members of municipalities, district boards and other local authorities, one-twelfth by registered teachers in educational institutions not lower than secondary schools and a further one-twelfth by registered graduates of more than three years' standing. The remaining members are nominated by the Governor from among those who have distinguished themselves in the fields of literature, science, art, co-operative movement and social service. The Legislative Councils are permanent, one-third of their members retiring on the expiration of every second year.

Legislative Assembly (Vidhan Sabha)

According to Article 170, the Legislative Assembly of a State should consist of not more than 500 and not less than 60 members chosen by direct election from territorial constituencies in the State. The demarcation of territorial constituencies is to be done in such a manner that the ratio between the population of each constituency and the number of seats allotted to it is, as far as practicable, the same throughout the State. The term of an Assembly is five years unless it is dissolved earlier.

*Although the Constitution (Seventh Amendment) Act, 1956, provides for the creation of a Legislative Council in Madhya Pradesh, the Council has not yet been constituted in that State.

JUDICIARY*

There is a High Court in each State which stands at the head of the State's judicial administration. Each High Court consists of a Chief Justice and such other judges as the President may, from time to time, deem necessary to appoint. The Chief Justice of a High Court is appointed by the President in consultation with the Chief Justice of India and the Governor of the State. The procedure for appointing other judges is the same except that the Chief Justice of the High Court concerned is also consulted. They hold office until they attain the age of 60 and are removable in the same manner as a judge of the Supreme Court of India. To be eligible for appointment as a judge, one must have held a judicial office in India for ten years or must have practised as an advocate of a High Court or of two or more such courts in succession for a similar period.

UNION TERRITORIES

Every Union Territory is administered by the President acting, to such extent as he thinks fit, through an administrator to be appointed by him with such designation as he may specify. The President may also make regulations for the peace, progress and good government of the Andaman and Nicobar Islands, the Laccadive group of islands, Dadra and Nagar Haveli and Goa, Daman and Diu.

THE UNION AND THE STATES

The power of establishing new States or altering the area, boundaries or names of any existing State is vested in the Union Parliament. It can do so by passing an appropriate law for the purpose on the recommendation of the President, who in his turn, is required to refer the matter to the legislatures of the States concerned for the expression of their views within a period specified in the reference or within such further period as the President may allow. Any such law shall not be deemed to be an amendment of the Constitution for purposes of Article 368.

The relations—legislative and administrative—between the Union and the States are described in Part XI of the Constitution.

Legislative Relations

The distribution of legislative powers between the Union and the States is governed by the provisions of the Seventh Schedule consisting of three Lists—the Union List, the State List and the Concurrent List—under which the known sphere of legislative activity has been mapped out by enumerating, as exhaustively as possible, the various categories or subject-matters of legislation. The Union List contains 97 subjects of all-India importance such as defence, foreign affairs, communications, currency and coinage, banking and insurance, customs duties, etc., in regard to which Parliament has exclusive power to make laws. The State Legislatures have exclusive authority to make laws in regard to 66 subjects such as maintenance of law and order, administration of justice, local government, public health and sanitation, education, agriculture, forests and fisheries, trade and industry, etc. The third or the Concurrent List which consists of 47 entries deals with subjects of common interest to the Union and the States, such as the legal system, economic planning and social security, trade and industry, electricity, newspapers, books, etc. in regard to which both Parliament and the State Legislatures can make laws.

Territorially, the legislative jurisdiction of Parliament extends to the whole or any part of the territory of India, while that of the legislature of a State to the whole or any part of that State. Parliament also legislates

*For details about the judicial system in the States, see Chapter VI.

for any part of the territory of India which is not in a State on matters which fall under the exclusive purview of State legislatures.

The Constitution provides that if any law made by the legislature of a State is repugnant to any provision of a law made by Parliament or to any provision of an existing law with respect to any of the matters enumerated in the Concurrent List, then the law made by Parliament shall prevail and the law made by the Legislature of that State shall, to the extent of the repugnancy, be void. Residuary powers have been exclusively vested in the Union Parliament.

The Constitution further provides that if the Council of States declares by a resolution supported by two-thirds of the members present and voting that Parliament should in the national interest make laws in respect of any matters contained in the State List, Parliament can make laws for these also and such laws will remain in force for a period not exceeding one year, unless continued under a fresh resolution and shall cease to have effect on the expiration of a period of six months after the resolution has ceased to be in force. Parliament exercises such a right if a proclamation of emergency is in operation, and a law made thereunder shall have effect for six months.

Administrative Relations

Although the executive authority of the Union and the States is co-ordinated with their respective legislative powers, the Constitution places the States under the constitutional obligation of so exercising their executive power as (i) to secure compliance with laws passed by Parliament and earlier Central laws applicable to them, and (ii) not to impede or prejudice the exercise by the Union of its executive power, the Government of India having the power to give directions for this purpose. The President may, with the consent of a State, entrust the Union's executive functions to the State Government or to officers thereof. The Governor of a State may, with the consent of the Government of India, entrust either conditionally or unconditionally to that Government or to its officers functions in relation to any matter to which the executive power of the State extends. The Union Government has also the right to construct and maintain highways or other means of communication of national or military importance within the territory of a State and may also direct a State Government to take measures for the protection of railways within its borders. The adjudication of disputes regarding the use, distribution or control of the waters of, or in, any inter-State river or river valley may also be provided by law by Parliament. The President can, in the public interest, establish inter-State Councils for enquiring and advising on inter-State disputes, investigating and discussing subjects of common interest and making recommendations for better co-ordination of policy and action.

FINANCE

Part XII of the Constitution deals with provisions relating to finance, property, contracts and suits. It lays down a broad scheme for distribution of revenues between the Union and the States.

The Union Government has powers to raise money by taxes and duties mentioned in items 82 to 92A in the Union List and to collect fees in respect of any of the matters in the Union List excluding court fees. The State Governments have similar powers with respect to items 45 to 63 in the State List and to collect fees in respect of any of the matters in the State List excluding court fees. The Constitution mentions the following specific categories of taxes in which the Union and the States have a common interest and whose proceeds accrue to them in different proportions:

- (i) Duties which are levied by the Union, but are collected and wholly appropriated by the States, *viz.* non-judicial stamp duties and excise duties on medicinal and toilet preparations.

- (ii) Taxes which are levied and collected by the Union but whose net proceeds are wholly assigned to the States. These include succession and estate duties on property other than agricultural land, terminal taxes on goods and passengers carried by rail, sea or air, taxes on railway fares and freights, taxes other than stamp duties on transactions in stock exchanges and futures markets, on the sale or purchase of newspapers and on advertisements published therein and taxes on the sale and purchase of goods in the course of inter-State trade or commerce.
- (iii) Taxes which are levied and collected by the Union but whose net proceeds are shared between the Union and the States. Taxes on income other than agricultural income come under this category.
- (iv) Taxes which are levied and collected by the Union but whose proceeds may be shared with the States as provided by Parliament by law, e.g., Union excise duties other than those on medicinal and toilet preparations.

The Constitution empowers the Union Government to borrow on the security of the Consolidated Fund within limits prescribed by Parliament. The Union can also grant loans to State Governments and guarantee loans raised by them. The States have powers to raise their own loans on the security of their respective Consolidated Funds.

The Constitution provides for the appointment of a Finance Commission by the President, at stated intervals, to make recommendations to him in regard to the distribution of the net proceeds of taxes which are, or may be, divided between the Union and the States and in regard to the principles which should govern the grants-in-aid to the States.*

Exemption of Union property from State taxation and State property from Union taxation, adjustment in respect of certain expenses and pensions, privy purses of the rulers of former princely States and restrictions as to imposition of taxes on the sale or purchase of goods in the course of inter-State trade or import and export transactions with foreign countries form the subject-matter of some of the other financial provisions. The rest of the provisions in this Part deal with property, contracts, rights, liabilities, obligations and suits involving the Union and the States.

TRADE AND COMMERCE

Part XIII of the Constitution embodies the general principles of freedom of trade, commerce and intercourse throughout the territory of the Union. Although Article 302 empowers the Union Parliament to impose certain restrictions on this freedom in the public interest, neither Parliament nor any State Legislature has power to make any law which authorises any preference or discriminates between one State and another. Discrimination is, however, possible under parliamentary law to deal with scarcity of goods in any part of the country. Subject to these restrictions the State Legislatures are empowered to impose reasonable restrictions on the freedom of trade, commerce or intercourse in the public interest. Parliament also has the power to appoint any authority it considers appropriate to enforce the foregoing provisions.

PUBLIC SERVICES †

Part XIV deals with recruitment, conditions of service, tenure of office and dismissal, removal or reduction in rank of persons serving the Union or a State. It also provides for the appointment of a Public Service Commission for the Union and a separate Commission for each of the States or group of States.

*The first and the second Finance Commissions under this provision were appointed in November 1951 and April 1956 respectively. The third Finance Commission, with A. K. Chanda as chairman, was appointed on December 2, 1960. For details, see Chapter XIX.

† For details, see Chapter V.

ELECTIONS

The superintendence and control of all elections to Parliament and to the Legislatures of the States, and of the President and Vice-President of the Union, are vested in an Election Commission headed by a Chief Election Commissioner appointed by the President. The President also appoints Regional Commissioners in consultation with the Election Commission. The conditions of tenure and service of the Commissioners are determined by the President. The procedure for the removal from office of the Chief Election Commissioner is the same as in the case of a judge of the Supreme Court.

The power to make laws in respect of elections to its two Houses as well as the Legislatures of the States is vested in the Union Parliament. The State Legislatures can also make laws in respect of elections to their own House or Houses on matters not provided for by Parliament.

OFFICIAL LANGUAGE

Article 343 of the Constitution provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English will, however, continue to be the official language for a period of 15 years from the commencement of the Constitution.*

The President is authorised under Article 344 to constitute, after the expiration of five years from the commencement of the Constitution and thereafter at the expiration of ten years from such commencement, a special Commission, consisting of a chairman and representatives of the different languages specified in the Eighth Schedule† as members, to examine the growth and development of Hindi and make recommendations as to its progressive use for all or any of the official purposes of the Union. The Constitution also provides that the recommendations of the Commission will be examined by a Parliamentary Committee of 30 members (20 members from the House of the People and 10 from the Council of States) elected from the respective Houses in accordance with the system of proportional representation. Under clause (6) of Article 344, the President is authorised to issue, after consideration of the report of the Parliamentary Committee, directions in accordance with the whole or any part of the report.@

The Constitution further lays down that the Legislature of a State may, by law, adopt any one or more of the regional languages in use in that State or Hindi as the language to be used for all or any of the official purposes. For communication between one State and another and between a State and the Union, the language for the time being authorised for use in the Union shall be used. Article 348 makes provision for the use of the English language in the proceedings of the Supreme Court and the High Courts and in bills, enactments and other laws. The proviso to Article 343 also empowers the President to authorise the use of Hindi in addition to English for any of the official purposes of the Union even during the stipulated period of 15 years.

EMERGENCY AND OTHER SPECIAL PROVISIONS

According to Article 352, if at any time the President of India is satisfied that there has arisen a grave emergency created by war or external

*The Government have recently decided that after 1965, when Hindi becomes the principal official language of the Union, English will continue as the subsidiary official language for as long as may be necessary.

†The Eighth Schedule to the Constitution recognises the following fourteen as the languages of India : Assamese, Bengali, Gujarati, Hindi, Kannada, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu and Urdu.

@For the text of the Presidential Order dated April 27, 1960, see Appendices to INDIA 1961. Brief summaries of the recommendations of the Official Language Commission and the Parliamentary Committee can be seen in Appendices to INDIA 1960.

aggression or internal disturbance which threatens the security of India or any part of its territory, he can by declaration (a) give directions to the constituent States as to how their authority is to be exercised, and (b) suspend from operation several Articles (268 to 280) of the Constitution under which it is obligatory on the Union Government to make certain contributions to the States. It is, however, necessary that the President's proclamation is laid before each House of Parliament for approval within a period of two months. During the period of such an emergency, Parliament has the power to legislate with respect to any of the matters enumerated in the State List.

Another occasion on which the President can by proclamation assume to himself all or any of the functions of the Government of a State is in the event of failure of the State's constitutional machinery. This he does either on receipt of a report from the Governor or when he is otherwise satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of the Constitution (Article 356).

Scheduled Castes and Tribes

Besides the general provisions which guarantee equal civil and political rights to all citizens, the Constitution contains special provisions to safeguard the interests of, and assist minorities such as the Anglo-Indian community and certain weaker and backward sections like the Scheduled Castes and Scheduled Tribes to progress more rapidly. These provisions include reservation of seats in Parliament and the State Legislatures for a period of twenty years from the commencement of the Constitution, preferential treatment in the matter of public employment and extended educational facilities.* A special responsibility has been placed on the Union Government to promote the welfare of the Scheduled Castes and Scheduled Tribes under the provisions of Article 339. Article 244(1), read along with the Fifth Schedule, details provisions as to the administration and control of Scheduled Areas and Scheduled Tribes in the States other than Assam.

Tribal Areas in Assam

Another special provision which the Constitution makes is with regard to the administration of the tribal areas of Assam. Article 244(2), read along with the Sixth Schedule to the Constitution, provides for the constitution of certain autonomous districts and autonomous regions in these areas. The Governor of Assam, who is specially entrusted with the task of administering these areas on behalf of the President, is empowered to constitute councils for these districts and regions. These councils are empowered to make their own rules for the administration of their respective areas. They have powers of legislation with respect to disposition of land, administration of villages, inheritance of property, marriage and social customs, etc. They can constitute village councils or courts for the trial of suits and disputes, administer district and regional funds and establish and manage schools, dispensaries, markets and fisheries. Certain powers of assessment and collection of taxes on land, professions, trade and employment, vehicles and boats are also vested in the councils. The Governor of Assam is empowered to appoint a Commission to enquire into and report on the administration of the autonomous districts and regions. If necessary, the Governor may also place one of his Ministers in special charge of their welfare. The areas specified in Part B of the Sixth Schedule—the North-East Frontier Tract and the

*See Chapter XIV for the implementation of these safeguards and review of the administration of the tribal areas.

Naga-Hills Tuensang Area—are administered by the President acting through the Governor of Assam as his agent.*

Special Officers

Article 338 provides for the appointment of a Special Officer by the President for the Scheduled Castes and Scheduled Tribes. It is the duty of this Officer to investigate all matters relating to the safeguards provided for these sections under the Constitution and to report to the President on their working. The President is further required to place these reports before both the Houses of Parliament. The appointment of another Special Officer is envisaged under Article 350B. He is required to perform similar duties with regard to constitutional safeguards provided for linguistic minorities.

AMENDMENT OF THE CONSTITUTION

Article 368 provides that an amendment to the Constitution may be initiated only by the introduction of a Bill for the purpose in either House of Parliament; and when the Bill is passed in each House by a majority of not less than two-thirds of the members of that House present and voting, it shall be presented to the President for his assent and upon such assent being given to the Bill, the Constitution shall stand amended in accordance with the terms of the Bill. The only provisions, for the amendment of which ratification by the legislatures of not less than one-half of the States has been prescribed in addition, relate to the election of the President, the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament and the procedure for amendment of the Constitution.

Since its inauguration on January 26, 1950, there have been eleven amendments to the Constitution. The Constitution (First Amendment) Act, 1951, besides making minor changes in Articles 15, 19, 85, 87, 174, 176, 341, 342, 372 and 375, added two new Articles 31A and 31B and a Ninth Schedule after the Eighth. Among the more notable features of this Act are: (i) the addition of a saving clause to Article 15 (prohibition of discrimination) enabling the State to make special provisions for the advancement of socially and educationally backward classes; and (ii) the substitution of clause (2) in Article 19 by a new clause broadening the State's power to impose "reasonable restrictions" on the citizen's right to freedom of speech and expression in the interest of "friendly relations with foreign States" and in relation to "defamation or incitement to an offence", besides security of State, public order, decency and morality, etc., which were included in the original clause as well. The two new Articles added after Article 31 (right to property) provided for the saving of laws relating to acquisition of estates and the validation of certain land reform Acts and Regulations passed by the States and specified in the Ninth Schedule.

The Constitution (Second Amendment) Act, 1952, amended Article 81 with a view to readjusting the scale of representation in the House of the People, necessitated by the completion of the 1951 census.

The Constitution (Third Amendment) Act passed in 1954 substituted entry 33 of the Concurrent List in the Seventh Schedule by a new one, including food-stuffs, cattle fodder and raw cotton and jute as additional items whose production and supply can be controlled by the Centre, if expedient in the public interest.

The Constitution (Fourth Amendment) Act, 1955, amended Articles 31, 31A and 305 and added a few more entries to the Ninth Schedule.

*Under the Nagaland (Transitional Provisions) Regulation, 1961, promulgated by the President of India on January 24, 1961, the areas comprised in the Naga Hills-Tuensang Area shall be known by the name of Nagaland and have the status of a separate State under the Indian Union. A brief summary of the provisions of the above Regulation is given in Appendices to INDIA 1961.

The amendment to Article 31(2) provided that when the State compulsorily acquires private property for a public purpose, the scale of compensation prescribed by the authorising legislation would not be called in question in a court of law. Article 31A was amended so as to exclude the temporary taking over of a property by the State, either in public interest or to secure its better management, from the compensation clause. The amendment to Article 305 was in the nature of a saving clause for laws providing for State monopolies. Seven new entries were also added to the Ninth Schedule.

The Constitution (Fifth Amendment) Act, 1955, substituted the proviso to Article 3 by a new one empowering the President to fix a time limit for State Legislatures to express their views on proposed Central laws affecting the area and boundaries, etc., of their respective States.

The Constitution (Sixth Amendment) Act passed in 1956 added a new entry, *i.e.*, 92 A to the Union List of the Seventh Schedule relating to taxes on the sale and purchase of goods in the course of inter-State transactions and the relevant clauses under Articles 269 and 286 on the same subject.

The Constitution (Seventh Amendment) Act, 1956, necessitated by the reorganisation of States, involved not only the establishment of new States and alterations in State boundaries but also the abolition of the three categories of the States and the classification of certain areas as "Union Territories". This led to the amendment of Article 1 and the First Schedule to the Constitution. Among the other important Articles which were affected by this amendment were Articles 81 and 82 which were substituted by new ones; Article 131 on the original jurisdiction of the Supreme Court; Article 168 providing for bicameral legislatures in certain States; and Articles 216, 217, 220, 222 and 224 dealing with the High Courts. Two new Articles, 350A and 350B, were added with a view to implementing the recommendations of the States Reorganisation Commission regarding constitutional safeguards for linguistic minorities.

The Constitution (Eighth Amendment) Act, 1959, amends Article 334 so as to extend the special provision relating to the reservation of seats for the Scheduled Castes and Scheduled Tribes and the representation of the Anglo-Indian community by nomination in the House of the People and the Legislative Assemblies of States for a further period of ten years from January 26, 1960.

The Constitution (Ninth Amendment) Act, 1960, amends the First Schedule to the Constitution in order to give effect to the transfer of certain territories to Pakistan in pursuance of the agreements entered into between the Governments of India and Pakistan in September 1958. Similarly, the Constitution (Tenth Amendment) Act, 1961, integrates the areas of Free Dadra and Nagar Haveli with the Union of India and provides for their administration under the regulation-making powers of the President (Article 240).

The Constitution (Eleventh Amendment) Act, 1961, obviates the necessity of a joint meeting of the two Houses of Parliament (Article 66) by constituting them into an electoral college for the election of the Vice-President. It also amends Article 71 so as to make it clear that the election of the President or the Vice-President shall not be challenged on the ground of any vacancy for whatever reason in the appropriate electoral college.

The Constitution (Twelfth Amendment) Act, 1962, integrates Goa, Daman and Diu with the Union of India with effect from December 20, 1961, by adding them to the First Schedule as the eighth Union Territory and by providing for their administration under Article 240.

CHAPTER IV

LEGISLATURE

India is a Sovereign Democratic Republic with a parliamentary form of government based on universal adult franchise. Sovereignty ultimately rests with the people. The executive authority is accountable for all its decisions and actions to the people through their elected representatives in the legislature.

UNION PARLIAMENT

The total number of members in the Council of States, as constituted at present, is 236, of whom 224 are the elected representatives of the States and the Union Territories and 12 are nominated by the President. The present strength of the House of the People is 509, consisting of 500 members directly elected from the fifteen States (including six from Jammu and Kashmir appointed by the President on the recommendation of the Legislature of the State) and the four Union Territories of Delhi, Himachal Pradesh, Manipur and Tripura, and nine members nominated by the President to represent Anglo-Indians, the areas specified in Part B of the Sixth Schedule and the Union Territories of the Andaman and Nicobar Islands, the Laccadive, Minicoy and Amindivi Islands, Dadra and Nagar Haveli and Goa, Daman and Diu.

For the State-wise allocation of seats and strength of parties in Parliament and the names of the members of the two Houses, including the detailed results of 1962 elections to the Lok Sabha, see Appendices.

Officers of Parliament

The principal officers of Parliament are the Chairman (Vice-President of India ex-officio) and the Deputy Chairman of the Council of States and the Speaker and the Deputy Speaker of the House of the People. Besides presiding over the deliberations of the respective Houses, they act as the guardians of their privileges. They interpret rules of the Houses and are the final authority on the procedure to be followed in any matter in their respective Houses or in any of their committees. Joint sittings of the two Houses are presided over by the Speaker.

Functions and Powers of Parliament

The main functions of Parliament are to make laws for the country, to make finances available for the needs of the Government and appropriate funds necessary for the services of the State. The two Houses form part of the Electoral College for the election of the President and constitute the Electoral College for the choice of the Vice-President. The Council of Ministers is collectively responsible to the House of the People which also votes the salaries and allowances of Ministers and can force the resignation of the Council of Ministers by refusing to pass the budget or any other major legislative measure or by adopting a vote of no-confidence. Parliament is also vested with the power to impeach the President and to remove judges of the Supreme Court and High Courts, the Chief Election Commissioner and the Comptroller and Auditor-General in accordance with the procedure laid down in the Constitution.

All legislation requires the consent of both Houses of Parliament. Delegated legislation is also subject to review and control by Parliament. Although all financial legislation must be recommended by the President, the House of the People alone can sanction grants, appropriations and proposals for taxation. Parliament's power to debate public questions

and to review the work of the different departments of the Government is unfettered by any limitations except those imposed by the Constitution or by its own rules of procedure. In times of emergency, the legislative authority of Parliament also extends to the matters enumerated in the State List. The power to amend the Constitution also vests solely in Parliament.

Procedure

The more important rules of procedure in the two Houses in legislative and financial matters are prescribed in Articles 107 to 117 of the Constitution. Subject to these, the two Houses may make their own rules for regulating their procedure and conduct of business. A bill may originate in either House of Parliament. All legislation requires the consent of both Houses of Parliament which decide every issue by a simple majority of the members present and voting except where a special majority is required by the Constitution. Until Parliament by law otherwise provides, the quorum to constitute a meeting of either House of Parliament is one-tenth of its total membership.

The procedure governing the actual passage of bills in the two Houses is identical. Every bill has to pass through the following stages, *i.e.*, (i) introduction and publication; (ii) general debate on principles; (iii) clause by clause consideration; and (iv) the passing of the bill by the House. Important and controversial bills are referred to a Select/Joint Select Committee for further scrutiny before they are passed by the Houses. After its passage in the two Houses, the bill is presented to the President for his assent and becomes law only after the President has given such assent. In cases of disagreement between the two Houses, the President is empowered to call a joint sitting to deliberate and vote upon the measure. At joint sittings decisions are taken by a simple majority of the members present and voting.

There is a special procedure for Money Bills which can be introduced only in the House of the People. When a Money Bill has been passed by the House of the People, it is transmitted to the Council of States which, within a period of fourteen days from the date of its receipt, returns the bill to the House with its recommendations and the House thereupon either accepts or rejects all or any of the recommendations of the Council.* At the time of transmission to the Council of States and of presentation to the President for assent, the Speaker certifies that it is a 'Money Bill'. In cases of doubt whether a bill is a Money Bill or not, the decision of the Speaker thereon is final.

Department of Parliamentary Affairs

The planning and co-ordination of the programme of official business before Parliament is done by the Department of Parliamentary Affairs in close liaison with the Parliamentary and Legal Affairs Committee of the Cabinet on the Government's side and the Business Advisory Committee for each House on Parliament's side. It arranges the programme and *inter se* priorities for legislative and other official business for every session and recommends time to be allotted to various items.

The Department examines the day-to-day proceedings of Parliament with a view to extracting from them any statements made by Ministers which constitute a promise, undertaking or assurance on behalf of the Government and sends them to the Ministries concerned for implementation. Implementation reports, when received from the Ministries, are laid on the tables of the two Houses in the form of periodical statements.

Government's stand on bills and resolutions sponsored by private members is also indicated by the Department on approval by the Parliamentary and Legal Affairs Committee of the Cabinet.

*For procedure relating to the budget, see Chapter XIX.

Parliamentary Committees

To assist Parliament in its deliberations, parliamentary committees are appointed either on a motion by the respective Houses themselves or by their presiding officers. Committees fall under three groups : those of a general nature concerned mainly with the organisation and powers of the House, those assisting the Houses in their legislative functions, and committees with financial functions. In the first category fall the Committees on Rules, Privileges, Absence of Members and the Business Advisory Committees, etc. The legislative committees include Select Committees of either House and Joint Select Committees of the two Houses, set up *ad hoc* for the consideration of important bills. The two important committees in the third category are the Public Accounts Committee and the Estimates Committee. While the first of these is composed of members from both Houses, the membership of the second is confined only to the Lok Sabha.

The Public Accounts Committee scrutinises the Appropriation Accounts of the Government of India and the report of the Comptroller and Auditor-General thereon. It ensures that public money is spent in accordance with Parliament's decisions and calls attention to cases of waste, extravagance, loss, nugatory expenditure or lack of financial integrity in public services. The Estimates Committee reports on "what economies, improvements in organisation, efficiency and administrative reform consistent with the policy underlying the estimates may be effected." It also examines whether the money provided in the estimates is well laid out and suggests the form in which estimates shall be presented to Parliament. Another important committee of the Lok Sabha is the Committee on Government Assurances. Its function is to scrutinise the assurances given by Ministers on the floor of the House and to report on the manner in which such assurances have been implemented. Ministers are debarred from being members of these three committees.

The chairmen of committees are appointed by the presiding officers of the respective Houses. One-third of the members of a committee constitute the quorum for a meeting. The sittings of the committees are not open to the public. They are, however, empowered to summon witnesses to appear before them and to require production of any papers or records. Decisions in committees are also taken by a majority of the members present and voting.

Informal Consultations

There are Informal Consultative Committees for different Ministries which provide a forum for informal discussions between Members of Parliament and the Ministries of the Government on matters of policy and the working of administrative departments. Membership of these committees is based upon preferences indicated by members themselves. These committees do not generally work on the basis of a formal agenda, rules of procedure or recorded proceedings.

During inter-session periods advantage is taken of the Members' comparative leisure to acquaint them with the working, achievements, problems and targets of national development projects in various parts of the country, through tours organised by the Department of Parliamentary Affairs. In inviting members to join these tours, the Department is generally guided by the interest evinced by them through questions, interpellations and discussions in Parliament or in the Informal Consultative Committee meetings of various Ministries.

Control over Executive

Apart from the general control exercised through legislation and the budgetary procedure, Parliament keeps on reviewing the financial adminis-

tration of the Government through its committees on Public Accounts and Estimates. The debate on the President's address to the two Houses, outlining the policy of the Government on matters of vital concern to the people and the programme of the Government for the year, provides an important occasion for a critical examination of governmental policies.

On urgent public questions, any member may bring forward a motion for the adjournment of the House to discuss that matter. There is provision for short discussion and 'calling attention' to less important matters. After giving notice of 15 days, a member may move a resolution on any matter of general public interest, which if adopted, is communicated by the Speaker to the Minister concerned for necessary action. There is also provision for a motion of want of confidence in the Council of Ministers.

Other opportunities of raising debates and eliciting information on the policies of the Government and other public questions and of ventilating grievances against the administration include resolutions, 'questions' by Members and 'half-an-hour discussions' on matters arising out of questions; and 'No-Day-Yet-Named' motions.

STATE LEGISLATURES

Of the fifteen States of the Indian Union, nine have a bicameral and six a unicameral legislature.* The strength of the Legislative Councils and the number of elected members of the Legislative Assemblies in the States and the position of various parties (on the basis of party affiliations at the time of elections) in the latter, are given under Appendices.

Officers of the Legislature

The State legislatures have their presiding officers known as the Chairman and the Deputy Chairman of the Legislative Council and the Speaker and the Deputy Speaker of the Legislative Assembly. The Chairman of the Council and the Speaker of the Assembly enjoy powers and privileges and perform functions similar to those of their counterparts in the Union Parliament.

Functions

The State Legislature has exclusive powers over subjects enumerated in List II of the Seventh Schedule to the Constitution and concurrent powers over those enumerated in List III. Ordinances promulgated by the Governor are subject to the approval of the Legislature. The financial powers of the Legislature include authorisation of all expenditure, taxation and borrowing by the State Government. The Council of Ministers is responsible to the Legislative Assembly of the State.

Procedure

Articles 188 to 213 of the Constitution of India describe the more important rules for the conduct of business, disqualification of members, powers, privileges and immunities of State legislatures and their members, and the legislative procedure for ordinary and financial bills. In addition, the State legislatures are empowered by the Constitution to frame their own rules of procedure. The quorum for a meeting of the Legislature is one-tenth of its membership or ten, whichever is higher. A simple majority of the members present and voting, except where a special majority is required by the Constitution, decides all questions before either House of the Legislature. In the discharge of their duties the members and officers of the State legislatures are immune from the jurisdiction of law courts.

*Although the Constitution (Seventh Amendment) Act, 1958, provides for the creation of a Legislative Council in Madhya Pradesh, the Council has not yet been constituted in that State. For the names of members of State Legislatures, see Chapter XXX.

Freedom of speech and discussion in the legislatures is guaranteed by the Constitution. Legislatures cannot, however, discuss the conduct of any judge of the Supreme Court or of any High Court in the discharge of his duties. In their proceedings, the State legislatures use either the official language or languages of the State, Hindi or English.

The detailed procedure governing the passage of ordinary bills and financial bills is almost the same as for the Union Parliament. Ordinary bills may originate in either House, and in order to become law they must be passed by both the Houses without amendments, or with only such amendments as are agreed to by both. In case of disagreement between the two Houses, there is no provision for a joint sitting as in the Union Parliament. If a disputed bill is given a second passage by the Legislative Assembly after an interval of three months from the date of its transmission to the Legislative Council, it automatically becomes law after one month of such passage.

The Legislative Assembly alone has the power to originate Money Bills. The Legislative Council can make only recommendations in respect of changes it considers necessary within a period of fourteen days of the receipt of the bill from the Assembly. This in no way affects the freedom of the Assembly to accept or reject the recommendations of the Council.

Reservation of Bills

Besides possessing the power to give or withhold his assent to bills passed by the Legislature, the Governor of a State may reserve certain bills for the consideration of the Union President. Such bills relate to subjects like compulsory acquisition of property, estates and jagirs, measures affecting the powers and the position of High Courts, and imposition of taxes on the storage, distribution and sale of water or electricity in inter-State river or river valley development projects. No bill seeking to impose restrictions on inter-State trade can be introduced in a State legislature without the previous sanction of the President.

Control over Executive

Besides exercising the usual powers of financial control, the State legislatures use all the normal parliamentary devices like questions, discussions, debates, adjournment and no-confidence motions and resolutions, etc., to keep a watch over the day-to-day work of the Executive. They also have their Committees on Estimates and Public Accounts to ensure that grants sanctioned by the Legislature are properly utilised.

CHAPTER V

EXECUTIVE

UNION

The head of the Indian Union is the President. All executive authority of the Union, including the supreme command of the Defence Forces, formally vests in the President and all executive actions of the Government are taken in his name. In the exercise of his functions, the President is aided and advised by a Council of Ministers with the Prime Minister at the head.

The Council of Ministers, as at present constituted, comprises (i) Ministers who are members of the Cabinet, (ii) Ministers of State who are not members of the Cabinet but hold Cabinet rank and (iii) Deputy Ministers.* The Cabinet finally determines and lays down the policy of the Government.

ADMINISTRATIVE ORGANISATION

In order to regulate the allocation of Government business and its convenient transaction, Rules of Business have been framed under Article 77(3) of the Constitution. The allocation is made by the President on the advice of the Prime Minister by specifying the items of business allotted to each Minister and by assigning a Ministry or a part of a Ministry or more than one Ministry to the charge of a Minister. The Minister is sometimes assisted by a Deputy Minister, who performs such functions as may be assigned to him.

A Secretary to Government is the administrative Head of a Ministry and the principal adviser of the Minister.** When the volume of work in a Ministry exceeds the manageable charge of a Secretary, one or more wings may be established under a Joint Secretary. A Ministry is divided into Divisions, Branches and Sections functioning under Deputy Secretaries, Under Secretaries and Section Officers respectively.

Organisation and Methods Division

The main task of the Organisation and Methods Division, established in March 1954, is to develop consciousness for administrative improvements, to co-ordinate such work and to initiate new projects which may act as catalytics for further action by the Ministries. The first phase of the Division's activities, directed to creating consciousness for an ordered improvement in work handled in the Secretariat, was concerned with expediting disposal of documents received and keeping track of them with a view to avoiding delay. Several special task groups were also set up to carry out studies of problems having a bearing on the disposal of work.

The second phase, on which the Division entered in 1961 in collaboration with the Special Reorganisation Unit of the Ministry of Finance and the Committee on Plan Projects of the Planning Commission, is directed towards (i) securing improvements in procedural competence of Government, supervisory capacity, techniques of programming direction and control, etc., (ii) organising work studies of organisations, matching of work load and staffing and such other aspects of economy in expenditure as may arise during the course of work studies, and (iii) securing cost reduction in projects.

A Committee on Administration, charged with the responsibility for promoting administrative efficiency, has recently been set up under the

*For the personnel of the Union Council of Ministers, see Appendices.

**For the names of Secretaries to Government of India, see Appendices.

chairmanship of the Cabinet Secretary. The Committee (i) arranges studies of specific problems and of specific sectors of administration and initiates proposals for administrative improvement in consultation with the Ministries and Departments concerned, (ii) supervises the implementation of decisions for raising standards of efficiency, and (iii) resolves, when necessary, points of difference between the administrative Ministries and the Special Reorganisation Unit of the Ministry of Finance in respect of work studies carried out by the latter.

STATES

The Governor is the head in each State. All executive actions of the State are taken in his name. In the exercise of his functions, the Governor is aided and advised by a Council of Ministers with the Chief Minister at the head. The Council works on the principle of collective ministerial responsibility and is accountable to the Legislative Assembly of the State. The number of Ministers, who in some States are assisted by Deputy Ministers and Parliamentary Secretaries, varies from State to State.

The Constitution vests certain discretionary powers in the Governor relating to the making of reports to the Union President about (i) the administration of Scheduled Areas, if any, in his State, and (ii) the breakdown of the constitutional machinery. In the latter case he administers the State as an agent of the President. In the case of Assam, the Governor also enjoys discretionary powers in relation to the administration of tribal areas.

Conduct of Government Business

Similar to the practice at the Centre, allocation of Government business among ministers is made by the Governor on the advice of the Chief Minister. Like the Ministries in the Union Government, the State Ministries are headed by Secretaries as their administrative heads. In addition, the States also have Chief Secretaries*, who besides acting as Secretaries to the State Cabinets, deal with all matters connected with public services and such other miscellaneous subjects as are not allotted to other departments, and generally co-ordinate the work of all the Government departments. The State Secretariats are patterned more or less like their counterpart at the Centre.

Besides Secretaries, who are the principal advisers of Ministers, there are heads of departments whose number depends on the number of the important subjects administered by a State. They carry out the policy and programme of the Government through a field staff.

ADMINISTRATIVE UNITS**

The principal unit of administration in a State is the district under a Collector and District Magistrate. As Collector, he is responsible to the Commissioner who heads a Division or to the Board of Revenue (depending upon the practice obtaining in a particular State), and through that agency to the Government, for the proper collection of revenue and for the administration of all matters connected with land other than irrigation, agriculture and forestry in their technical aspects and registration. As District Magistrate, he is responsible for the maintenance of law and order and the criminal administration of the district. For this purpose, the police force in the district with the Superintendent of Police as its immediate head is under his control and direction, although for purposes of disciplinary control and technical supervision, the Superintendent is responsible to the Inspector-General of Police. Besides a number of Assistant or Deputy Collectors and Magistrates who help him in the discharge of his duties, the

*For the names of Chief Secretaries to State Governments, see Chapter XXX.

**A complete list of districts and their taluks/tehsils, along with the area and population of each, is given in Chapter XXX.

Collector has also at his disposal the assistance and professional advice of a number of other district officers such as the Executive Engineer, the Deputy Commissioner of Excise, the Civil Supplies Officer and the Forest Officer, etc.

In some States the district is divided into a number of sub-divisions, usually three to five. The Sub-Divisional Magistrate, who is in charge of the sub-division, is the principal assistant of the District Magistrate and is responsible to him for the maintenance of law and order, collection of government dues and other connected matters in the sub-division. In other States, the district is divided into taluks or tehsils under the charge of a Tehsildar or a Mamlatdar.

Among other district officials are those belonging to the departments of Education, Medical, Public Health, Agriculture, Veterinary, Co-operation, Industries, Labour, Jails, Local Fund Audit, etc., who carry out their respective duties under the direction and orders of their heads of departments at the State headquarters.

Co-ordination for purposes of development programmes at State headquarters is achieved through an inter-departmental Committee of Secretaries in charge of various development departments with the Chief Secretary or the Secretary in charge of planning as the chairman. Generally, the functions of co-ordination for planning and for the implementation of programmes in the districts are combined in a single officer commonly described as the Development Commissioner. As a rule, a Committee of the State Cabinet under the Chief Minister provides overall guidance and direction. State Planning Boards which include leading non-officials have also been constituted in most of the States.

The Collector, who is the Chief Development Officer of the district, is assisted in many States by Additional Collectors and District Development or Planning Officers. District Development or Planning Committees, on which members of the State Legislature and Parliament from the district, representatives of Zila Parishads and Municipal Boards and leading non-official workers are represented, ensure popular association with the formulation and implementation of development programmes.

LOCAL GOVERNMENT

Local self-governing institutions are broadly classified into two categories—urban and rural. In the big cities they are known as Corporations, and in medium and small towns as Municipal Committees or Boards. The pattern of local government in rural areas has recently been changed and a three-tier structure, popularly known as 'Panchayati Raj', is being introduced in the various States.

Corporations

The corporations, established under specific Acts of the State Legislatures, are headed by elected Mayors. The administration of a city under a corporation is entrusted to three authorities: (i) the General Council of the Corporation; (ii) the Standing Committees of the Council; and (iii) the Commissioner or Executive Officer. The General Council appoints all the officers of the corporation except the Commissioner who is usually appointed by the State Government. The Standing Committees elected by the Council carry out the main work of the administration covering taxation and finance, engineering works, health and education. The executive power of the corporation vests in the Commissioner, who prescribes the duties of the various establishments and supervises their work. In addition to matters connected with the safety, health, education and other conveniences of the citizens, the jurisdiction of the corporation also extends to the maintenance of streets and bridges, avenues and parks, recreation grounds and markets.

Municipal Boards and Committees

Municipalities with elected Presidents also function through committees. All the members of a municipality constitute its general body which discusses and decides all questions of policy and important details of municipal administration. The powers of passing the budget, imposing taxation, voting expenditure and making rules and regulations vest in the general body. The day-to-day work of the municipality is carried on by an executive officer, drawn either from the State cadre of municipal executive officers or from the State Civil Service.

In general, the obligatory functions of a municipality are : scavenging and sanitary measures to keep public streets clean and healthy; regulation of places for the disposal of the dead and registration of births and deaths; construction, maintenance and improvement of public streets, latrines, drains, etc.; maintenance of public hospitals and provision of medical relief; primary education; regulation of offensive or dangerous trades and practices; lighting of public streets; and provision of adequate water supply. At their own discretion, municipalities may, however, also take up the construction and maintenance of libraries, museums, rest houses and other public buildings, and the laying out of public gardens, parks, public streets and any other measures likely to promote the welfare of citizens.

In recent years, a number of bigger cities have established improvement trusts and town planning bodies to improve the existing conditions of cities and to regulate their future expansion. The Central Regional and Urban Planning Organisation, set up by the Union Ministry of Health, advises the State Governments in regard to their town planning problems. The passage in 1956 of the Slum Areas (Improvement and Clearance) Act by Parliament is another measure in the same direction.

Local Self-Government in Districts

The new system of Panchayati Raj or democratic decentralisation involves a three-tier structure of local self-governing bodies at the village, block and the district levels. Specific powers and functions in the field of development and in other fields have been assigned to the Panchayati Raj institutions. Panchayati Raj is under implementation in Andhra Pradesh, Rajasthan, Madras, Mysore, Assam, Orissa, Punjab and Uttar Pradesh and the remaining States have either enacted or are in the process of enacting legislation to introduce a similar system.

Village Panchayats

One of the directive principles of the Constitution of India is that the State shall take steps to organise village panchayats and endow them with such powers and authority as may be necessary to enable them to work as units of self-government (Article 40). In pursuance of this directive, almost the whole of the country has been covered with panchayats, which numbered 1,93,527 on March 31, 1961. The State-wise break-up of the number of panchayats and the percentage of rural population covered by them was: Andhra Pradesh 14,548 (100%); Assam 2,570 (100%); Bihar 10,617 (95%); Gujarat 10,750 (98%); Jammu & Kashmir 936 (100%); Kerala 892 (91%); Madhya Pradesh 13,495 (69%); Madras 12,337 (98%); Maharashtra 19,151 (99%); Mysore 7,444 (100%); Orissa 2,342 (96%); Punjab 13,439 (100%); Rajasthan 7,394 (100%); Uttar Pradesh 72,333 (100%); West Bengal 4,556 (28%); Delhi 205 (100%); and Himachal Pradesh 518 (100%). Panchayats are being set up in the rest of the country and in some States they are being reconstituted into smaller units where they are too big, and into bigger units where they are too small to be economically and geographically viable.

Panchayats are elected by Gram Sabhas consisting of the entire adult population of the village. Elected by and from among the villagers, they are responsible for agricultural production, rural industries, medical relief, maternity and child welfare, management of common grazing grounds, maintenance of village roads, streets, tanks and wells and provision of sanitation, drainage, etc. In some places panchayats also look after primary education, the maintenance of village records and the collection of land revenue. For building up funds they levy taxes on houses and lands, fairs and festivals and sale of goods, impose octroi duties, and build up remunerative community assets.

Steps are being taken by the State Governments to develop the Gram Sabhas, with Panchayats as their executive agencies, to serve as the base for activities described above. Panchayats federate at a higher level in a body called Panchayat Samiti (different nomenclatures in different States) with Panchayat Sarpanches as *ex-officio* members. Besides performing their usual local functions, the panchayats also act as an agency of the Samiti, for such activities, works etc., as may be assigned by the Samiti.

While the administrative, civic and executive functions at the village level are attended to by the panchayat, the judicial functions are exercised by a separate body known as Nyaya Panchayat. These latter bodies are competent to try cases involving minor offences under the Indian Penal Code and other special and local laws. Their powers of punishment are limited to the imposition of moderate fines, and they employ simple and summary procedure for the disposal of cases. They have also been given limited powers under the Civil Procedure Code. Legal practitioners are not permitted to appear before them.

Finances

The sources of local finance at present are: (i) taxes levied by local bodies; (ii) taxes levied by local bodies but collected by the State Governments on their behalf; (iii) share in the taxes levied and collected by the State Governments; (iv) grants-in-aid given by the State Governments; and (v) revenue from non-tax sources.

The Local Finance Enquiry Committee appointed in 1949 recommended that terminal taxes on goods or passengers carried by the railways, sea or air and taxes on railway fares and freights, listed under item 89 of the Union List, should be reserved for local bodies. It further recommended the reservation of some ten or twelve other taxes such as those on lands and buildings, mineral rights, entry of goods into local areas, consumption and sale of electricity, advertisements other than those published in newspapers, goods and passengers carried by road or inland waterways, vehicles, animals and pets, professions and luxuries, and tolls and capitation taxes listed in the State List of the Seventh Schedule to the Constitution for utilisation by local bodies.

The Taxation Enquiry Commission appointed early in 1953 held the view that a sound system of local finance can rest only on local and direct taxation. They prescribed a two-fold criteria for the devolution of powers of taxation to local bodies: (i) stability of the taxes; and (ii) capacity to levy and administer the taxes equitably and adequately. The Commission also recommended financial assistance by the State Governments in the shape of loans and subsidies.

PUBLIC SERVICES

UNION PUBLIC SERVICE COMMISSION

The Union Public Service Commission are an independent authority constituted under Article 315(1) of the Constitution of India. The Chairman and members of the Commission are appointed by the Presi-

dent. The Constitution provides that as nearly as may be one-half of the members must be persons who at the time of their appointments have held office for at least ten years either under the Government of India or a State Government. A member of the Commission holds office for a term of six years or until he attains the age of 65.

In order to emphasise and ensure the independence of the Commission, the Constitution debar its Chairman from further employment either under the Government of India or the Government of a State. A member, other than the Chairman of the Commission is, however, eligible for appointment as Chairman of that Commission or of a State Public Service Commission, but for no other Government employment.

The personnel of the Union Public Service Commission, as on March 20, 1962, was as follows :

<i>Chairman</i>	..	B. N. Jha
<i>Members</i>	..	P. L. Varma
		S. H. Zaheer
		G. S. Mahajani
		A. T. Sen
		M. L. Chaturvedi
		M. A. Venkataramana Naidu
		A. V. Ramaswami

Functions

The functions of the Commission as prescribed in Article 320 of the Constitution briefly are: (i) recruitment to all civil services and posts under the Union Government by written examinations, by interview and by promotion, and (ii) advising the Government on all matters relating to methods of recruitment, principles to be followed in making appointments to civil services and posts and making promotions and transfers. All disciplinary matters affecting Government servants, any claim by or in respect of persons who are serving or have served under the Government of India in a civil capacity for re-imbusement of any expenses incurred by them in defending legal proceedings instituted against them in respect of their official acts and any claims for the award of compensation in respect of injuries sustained by Government servants while on duty, etc., also fall within its sphere of responsibility. It is obligatory for the Government to consult the Commission on all these matters. The President can, however, make regulations specifying the matters in which either generally or in any particular circumstances or class of cases it shall not be necessary for the Government to consult the Commission. Such regulations have to be placed before Parliament. Article 321 of the Constitution lays down that an act made by Parliament may provide for the exercise of additional functions by the Union Public Service Commission in respect of the services of the Union and also in respect of the services of any local authority or other body-corporate constituted by law or any public institution.

In addition to the examinations conducted for recruitment to civil services and posts under the Union Government, the Commission also assists the Defence Ministry by holding examinations for recruitment to some of the defence services.

Matters involving interpretation of conditions of service and principles for determination of seniority are also referred to the Commission for advice. Convention necessitates reference to the Commission in cases where the President proposes to pass an order awarding a pension less than the maximum admissible under the rules.

The Union Public Service Commission submit an annual report of its work to the President who causes it to be laid before each House of

Parliament. If there are any cases where the Government is unable to accept the advice of the Commission, a memorandum explaining the reasons for such non-acceptance has to be placed before Parliament.

The standards and syllabi of competitive examinations for recruitment to the All-India and Central Services are laid down by the Commission in consultation with the concerned Ministries of the Government of India. In addition to qualifying in the written tests, candidates competing for some of these services have also to appear at a personality test. The Chairman or a member of the Commission presides over the Personality Test Board; the Commission are assisted at these tests by senior administrators and other persons of high standing in public life.

The Commission have to make direct recruitment to quite a large number of specialised posts, which cannot be filled by promoting persons belonging to duly constituted services. At interviews for such posts, a representative of the Ministry concerned invariably joins the selection board and helps the Commission in its deliberations. In addition, it is usual to associate with the board a specialist or two not connected with the Ministry concerned. Whenever necessary, practical or written tests are also held. The Commission explore possibilities of securing suitable personnel through direct contact with experts in different fields, whenever such a course is considered advantageous.

Another fruitful method of recruitment to civil services which is in vogue follows from the decision taken by the Government in consultation with the Commission that officers of the Defence Services who have retired recently or are about to retire may be absorbed in civil posts for which they may be found suitable by the Commission. The Commission have been similarly assisting in the absorption of surplus retrenched personnel, as and when necessary, in accordance with the special schemes drawn up by the Government for the purpose.

ALL-INDIA SERVICES

The recruitment and the conditions of service of the members of the Indian Administrative Service and the Indian Police Service are regulated by the All-India Services Act, 1951, and the rules and regulations framed under it.

A resolution under Article 312 of the Constitution has been adopted by the Rajya Sabha on December 6, 1961, to the effect that it is necessary and expedient in the national interest that Parliament should by law provide for the creation of the Indian Service of Engineers, the Indian Forest Service and the Indian Medical and Health Services.

Under Article 311, no member of a civil or an All-India service under the Union or a State can be dismissed or removed by an authority subordinate to that by which he was appointed. Further, before they are dismissed or reduced in rank, the delinquent officers must be given a reasonable opportunity to defend themselves. This privilege is, however, denied (i) to those convicted on a criminal charge; (ii) where the dismissing authority is satisfied that it is not practical to give the offender an opportunity to defend himself; and (iii) where the President or a Governor is satisfied that from the point of view of the security of the State, it is inexpedient to allow an opportunity for defence to the offender.

Training of Services

A new development in this field has been the setting up of the National Academy of Administration at Mussoorie on September 1, 1959, by merging the IAS Staff College, Simla, and the IAS Training School, Delhi. The probationers of the Indian Administrative Service and the Indian Police Service are now trained at the National Academy of Administration, Mussoorie, and the Central Police Training College, Abu, respec-

tively. Among the principal subjects taught to the IAS officers are: Indian history and constitution, elements of criminal and civil law, the theory and practice of public administration with special reference to the social, cultural and economic developments in the country and the language of the State to which the trainees are allotted. Probationers of the Indian Foreign Service are also given training at the National Academy of Administration. They are taught Asian history, international law and practice, economic geography and geopolitics and international trade as additional subjects.

The Academy also conducts a refresher course for Central and State Government Officers with 10 to 15 years service and a combined training course in foundational subjects for the probationers of the All-India and Central Services. *Class I, appointed on the basis of the annual combined competitive examination. The refresher course for IAS officers consists of study of administration in specialised branches, discussions on administrative difficulties and pooling of experience gathered by officers in the field in different States. The subjects for the combined course are: evolution of the modern Indian State as a democratic, secular and welfare State; Constitution of India—its evolution and basic principles and main provisions; parliamentary democracy; public administration; Indian economy; State and the social services including Sarvodaya and Gandhian philosophy; socialism; industrial relations; science and technology; statistics; and general subjects like linguistics along with the common features of the various languages spoken in India.

The principal subjects for the course of training at the Central Police Training College are: Indian criminal law; Constitution of India; police procedure and administration including ways and methods of combating corruption; medical jurisprudence; scientific aids to the detection of crime; ballistics; drill; weapon training, equitation; motor transport; wireless training; Hindi; fire service; emergency relief; civil defence; and probation and aftercare of discharged prisoners. The probationers also undergo military training.

A new feature of the training programme, both for the IAS and IPS, is an educational and cultural tour to army and police training institutions, development project areas, and community development blocks.

CENTRAL SECRETARIAT SERVICE

The Central Secretariat Service, for manning posts in the Central Secretariat and the attached offices, was created in 1950. The Service was originally organised into four grades viz., Grade I (Under Secretary or equivalent), Grade II (Superintendent), Grade III (Assistant Superintendent) and Grade IV (Assistant). Subsequently a new grade called the Selection Grade, comprising officers of the Service appointed to posts of Deputy Secretary and equivalent rank under the Government of India

*The following is a list of all Central Services, both Class I and II : Indian Foreign Service, Indian Audit and Accounts Service, Indian Defence Accounts Service, Indian Railways Accounts Service, Indian Customs and Excise Service, Indian Income-Tax Service (Class I), Transportation (Traffic) and Commercial Department of the Superior Revenue Establishment of Indian Railways, Indian Postal Service (Class I), Military Land and Cantonments Service (Class I and II), Central Secretariat Service (Grade III), Railway Board Secretariat Service (Grade III), Customs Appraisers Service (Class II), Central Engineering Service (Class I and II), Central Electrical Engineering Service (Class I and II), Indian Railway Service of Engineers, Signal Engineering Department of the Superior Revenue Establishment of Indian Railways, Electrical Engineering Department of the Superior Revenue Establishment of Indian Railways, Mechanical Engineering Transportation (Power) Department of the Superior Revenue Establishment of Indian Railways, Telegraph Engineering Service (Class I), Telegraph Traffic Service (Class II), Military Engineering Service (Class I), Survey of India (Class I and II) Services, and Central Information Service (Class I and II).

was added. On the recommendation of the Second Pay Commission, Grades II and III (Superintendent and Assistant Superintendent) have now been merged into a single Grade of Section Officer. Appointments from the Grade of Section Officer to Grade I (Under Secretary) and from the latter to the Selection Grade (Deputy Secretary) are made entirely by selection on the basis of merit. Half the number of vacancies in the grade of Section Officer is filled by direct recruitment on the results of the combined competitive examination held for recruitment to the Indian Administrative Service and allied Central Services, and the remaining half by promotion from the grade of Assistants. Half the number of vacancies in the grade of Assistants is filled by direct recruitment in the results of open competitive examinations held by the Union Public Service Commission and the remaining half by promotion from the grade of Upper Division Clerks.

INDUSTRIAL MANAGEMENT POOL

For staffing senior managerial posts in the public enterprises operating under the Union Ministries, the Government of India constituted in November 1957 an Industrial Management Pool. For the present, the Ministries of Steel, Mines and Fuel, Transport and Communications and Commerce and Industry are participating in the scheme, which is under the administrative control of the Union Ministry of Home Affairs. Any other Ministry concerned with the running of industrial undertakings may later join the scheme. The Union Public Service Commission recommended 212 candidates for appointment to the various grades of the Pool in February 1959, and offers of appointment were made to all except five of them by the end of 1961.

STATE SERVICES

Although the two All-India services are organised on the basis of State cadres and a majority of the principal administrative posts both at the State and district headquarters is manned by members of these services, the States have their own civil services to administer the subjects falling within the sphere of their autonomy. To recruit personnel to their civil services, the States also have Public Service Commissions on the model of the Union Commission.

The executive branch of the State Civil Service is the most important among the public services of the State. Most of the sub-divisional appointments are held by the members of this service. The two other important branches are the State Police and Judicial Services. Apart from these, there are a good number of other State cadres to man the technical branches of governmental administration like public works, irrigation, forests, agriculture, public health, education, veterinary, registration, co-operation, community and national extension services and so on.

Besides enjoying the safeguards provided for civil services in the Constitution, the members of these services are governed by detailed rules and regulations made by the respective States.

CHAPTER VI

JUDICIARY

The adoption of a federal constitution by India in 1950 did not disturb the continuity of existing laws and the unified structure of courts evolved through more than a century of British rule. Article 372 provides that subject to the other provisions of the Constitution, all laws which were in force immediately before its commencement, with the exception of the Government of India Act, 1935, and the Indian Independence Act, 1947, shall continue to be in force until altered, repealed or amended by a competent legislature or authority. Article 375 provides that "all courts of civil, criminal and revenue jurisdiction, all authorities and all officers, judicial, executive and ministerial, throughout the territory of India, shall continue to exercise their respective functions subject to the provisions of the Constitution". The unity of the judicial structure was preserved by placing such basic branches of law as criminal law and procedure, civil procedure, marriage and divorce, adoptions, wills, intestacy and succession, transfer of property, contracts, evidence, etc., on the Concurrent List.

SUPREME COURT OF INDIA

The Supreme Court of India stands at the apex of a single unified judicial system for the whole country.* The Constitution has invested it with wide appellate powers over all other courts and tribunals; and its position as the highest judicial body in the country has been strengthened by making High Courts, including the appointment and removal of their judges, a Union subject. As the guardian and interpreter of the Constitution, the Court has to hold the scales even between the Union and the States, and the State and the citizen, and to function generally as the custodian of the liberties of the citizen.

The maximum number of judges of the Supreme Court, which under Article 124(1) of the Constitution was fixed at seven, excluding the Chief Justice, was raised to ten by the Supreme Court (Number of Judges) Act, 1956. To further accelerate the disposal of cases, the Act was again amended in 1960 and the maximum number of judges, excluding the Chief Justice, raised from ten to thirteen.

The membership of the Court, as on March 20, 1961, was as follows :

Chief Justice : B. P. Sinha

Judges : J. Imam

S. K. Das

J. L. Kapur

P. B. Gajendragadkar

A. K. Sarkar

K. Subba Rao

K. N. Wanchoo

M. Hidayatullah

K. C. Das Gupta

J. C. Shah

Rabhobar Dayal

N. Rajagopala Ayyangar

*For constitutional provisions governing the composition of the Court and the appointment of judges, etc., see Chapter III.

J. R. Mudholkar
T. L. Venkatarama Ayyar*

The following are the Law Officers of the Union Government :

Attorney-General of India : M. C. Setalvad
Solicitor-General of India : C. K. Daphtary
Additional Solicitor-General of India : H. N. Sanyal

Powers of Interpretation

The Supreme Court has defined its own powers to interpret the constitution in some of the judgments delivered since 1950. The Judiciary in India cannot alter or amend the law under the cover of 'liberal interpretation'. It has no powers to review legislative policy or to nullify the Act of the legislature with reference to general principles of jurisprudence. To put it in the words of the Court itself : "Where the fundamental law has not limited, either in terms or by necessary implication, the general powers conferred upon the legislature, we cannot declare a limitation under the notion of having discovered something in the spirit of the Constitution which is not even mentioned in the instrument. It is difficult, upon any general principles, to limit the omnipotence of the sovereign legislative power by judicial interposition, except so far as the express words of a written Constitution give that authority."†

Subject to these limitations, it is the duty of the Supreme Court to see that the laws in the country are justly administered and no citizen is denied justice by any court or tribunal. Article 140 provides that "the law declared by the Supreme Court shall be binding on all courts within the territory of India". Further, in exercise of its jurisdiction, the Supreme Court is authorised to pass such decree or order as is necessary for securing complete justice in any case or matter pending before it; and any decree or order so passed is enforceable throughout the territory of India. All civil and judicial authorities in the country are specifically enjoined by the Constitution to act in aid of the Supreme Court.

Jurisdiction

The Supreme Court has both original and appellate jurisdiction. Its exclusive original jurisdiction extends to all disputes between the Union and one or more States or between two or more States *inter se*. In addition to this, Article 32 of the Constitution gives an extensive original jurisdiction to the Supreme Court in regard to the enforcement of fundamental rights guaranteed under Part III of the Constitution. It is empowered to issue directions or orders or writs including those in the nature of writs of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari*, whichever may be appropriate, to enforce these rights.

The appellate jurisdiction of the Supreme Court can be invoked, by a certificate of the High Court concerned or by special leave granted by the Supreme Court, in respect of any judgment, decree or final order of the High Court in cases involving substantial questions of law as to the interpretation of the Constitution. Appeals also lie to the Supreme Court in civil matters where the amount or value of the subject matter of the dispute is not less than Rs. 20,000 or where the judgment, decree or final order involves claims respecting property of like amount, or where the High Court concerned certifies that the case is a fit one for appeal to the Supreme Court. In criminal cases, the right to appeal to the Supreme Court has been provided for, "if the High Court (a) has on appeal reversed an order of acquittal of an accused person and sentenced him to death;

*Sitting and acting as a judge under Article 128 of the Constitution from December 20, 1961.

† A. K. Gopalan v. the State of Madras, 1950.

(b) has withdrawn for trial before itself any case from any court subordinate to its authority and has in such trial convicted the accused person and sentenced him to death; or (c) certifies that the case is a fit one for appeal to the Supreme Court". Parliament is authorised to confer on the Supreme Court any further powers to hear and entertain appeals from any judgment, final order or sentence in a criminal proceeding of a High Court in Indian territory.

Besides this the Supreme Court has a very wide appellate jurisdiction over all courts and tribunals in India inasmuch as it can grant special leave to appeal from any judgment, decree, determination, sentence or order in any case or matter passed or made by any court or tribunal in the territory of India. It has also a special advisory jurisdiction in matters which may specifically be referred to it by the President under Article 143 of the Constitution.

Working of the Court

The Supreme Court is a court of record and has all the powers of such a court, including the power to punish for contempt of itself. It has the power to frame its own rules of procedure. In the exercise of these powers, it made the *Supreme Court Rules*, 1950, which, as amended from time to time, govern the day-to-day working of the Court. Under Article 145 of the Constitution, the Supreme Court can fix the minimum number of judges who are to sit for any purpose and may provide for the powers of single judges and Division Courts, subject to the condition that all cases involving a substantial question of law as to the interpretation of the Constitution are heard by a bench consisting of not less than five judges. Judgments of the Supreme Court, which must always be delivered in open court, are arrived at with the concurrence of the majority of the judges present at the hearing. A judge who does not agree with the majority may give a dissenting judgment.

The cases in the Supreme Court can be filed by the parties personally or through advocates, specially registered as "Advocates on Record". If it is an appeal case, copies of the judgments of lower courts along with all relevant evidence, oral as well as documentary, have to be printed before the case is filed.

During the year 1961, the Supreme Court disposed of 531 petitions under Article 32 of the Constitution for the enforcement of fundamental rights and 357 appeals involving questions concerning the interpretation of the provisions of the Constitution.*

Advocates of the Supreme Court

The Roll of Advocates of the Supreme Court was till recently being kept in two parts, the first containing the names of the senior advocates and the second those of other advocates. With the coming into force of the Advocates Act, 1961, on December 1, 1961, the enrolment of advocates will be made exclusively by Bar Councils. The Bar Council of India will prepare and maintain a common Roll of Advocates consisting of two parts, the first containing the names of senior advocates and the second of other advocates. The Roll will comprise the entries made in all State Rolls and will also include the names of all advocates entitled as of right to practise in the Supreme Court immediately before the date on which the Act came into force but whose names are not entered in any State Roll. All such advocates will be entitled as of right to practise throughout the territories to which the said Act extends including the Supreme Court. This Act, however, does not affect the power of the Supreme Court to make rules under Article 145 of the Constitution for (a) laying down the conditions subject to which

*For brief summaries of some important constitutional cases, see 'Supreme Court Decisions' under Appendices.

a senior advocate shall be entitled to practise in the Supreme Court, and (b) for determining the persons who shall be entitled to act in the Supreme Court. Till November 30, 1961, 3,257 lawyers were registered as Advocates of the Supreme Court.

LAW COMMISSION

With the submission of its report on September 30, 1958, on the reform of judicial administration, the Law Commission as constituted in 1955* ceased to function. Later on December 20, 1958, the Commission was reconstituted for continuing the task of statute law revision. The reconstituted Commission consists of a chairman, who is a retired judge of the Supreme Court, two retired judges of High Courts and the Special Secretary to the Government of India, Ministry of Law, as full-time members and two part-time members chosen from the Bar.

The terms of reference of the reconstituted Law Commission are to examine the Central Acts of general application and importance and recommend the lines on which they should be amended, revised, consolidated, or otherwise brought up to date. The principal objectives in the revision of the existing statute laws will be as follows :

- (a) to simplify the laws in general, and the procedural laws in particular;
- (b) to ascertain if any provisions are inconsistent with the Constitution and suggest the necessary alterations or omissions;
- (c) to remove anomalies and ambiguities brought to light by conflicting decisions of High Courts or otherwise;
- (d) to consider local variations introduced by the State legislation in the concurrent field, with a view to re-introducing and maintaining uniformity;
- (e) to consolidate Acts, pertaining to the same subject with such technical revision as may be found necessary;
- (f) to suggest modifications, wherever necessary, for implementing the directive principles of State policy laid down in the Constitution; and
- (g) to suggest a general policy in revising the laws.

The Commission has submitted seven reports (Nos. 15—21) on the following subjects :—

- (1) Law relating to marriage and divorce amongst Christians in India.
- (2) Official Trustees Act, 1913.
- (3) Indian Trusts Act, 1882.
- (4) Converts' Marriage Dissolution Act, 1866.
- (5) Administrator General's Act, 1913.
- (6) Law of Hire Purchase.
- (7) Law of Marine Insurance.

The Commission has under examination several Acts including the Civil and Criminal Procedure Codes.

OFFICIAL LANGUAGE (LEGISLATIVE) COMMISSION

In pursuance of the directions issued by the President in his Order dated April 27, 1960, under Clause (6) of Article 344 of the Constitution, a standing commission of legal experts known as the Official Language (Legislative) Commission has been set up. The functions of the Commission are :

- (i) to prepare and publish a standard legal terminology for use, as far as possible, in all official languages;

*For details, see INDIA 1961, pp. 75-76.

- (ii) to prepare authoritative texts in Hindi of all Central Acts and Ordinances and Regulations promulgated by the President;
- (iii) to prepare authoritative texts in Hindi of all rules, regulations and orders made by the Central Government under any Central Act or any such Ordinance or Regulation;
- (iv) to arrange for the translation of Central Acts, Ordinances and Regulations promulgated by the President in the respective official languages of the States and for the translation of all Acts passed and Ordinances promulgated in any State into Hindi, if the texts of such Acts or Ordinances are in a language other than Hindi; and
- (v) to perform such other duties as may be assigned to the Commission by the Government of India from time to time.

HIGH COURTS

The judicial administration of every State is headed by a High Court. As shown below there are fifteen High Courts in India.

TABLE 21
JURISDICTION AND SEAT OF HIGH COURTS*

No.	Name	Year of establishment	Territorial jurisdiction	Seat of the Court
1	Allahabad	1919	Uttar Pradesh	Allahabad (Bench at Lucknow)
2	Andhra Pradesh ..	1954	Andhra Pradesh	Hyderabad
3	Assam	1948	Assam	Gauhati
4	Bombay	1861	Maharashtra	Bombay (Bench at Nagpur)
5	Calcutta	1861	West Bengal, Andaman and Nicobar Islands	Calcutta
6	Gujarat	1960	Gujarat	Ahmedabad
7	Jammu & Kashmir ..	1928	Jammu & Kashmir	Srinagar and Jammu
8	Kerala	1956	Kerala, Laccadive, Minicoy and Amindivi Islands	Ernakulam (Bench at Trivandrum)
9	Madhya Pradesh ..	1956	Madhya Pradesh	Jabalpur (Benches at Indore and Gwalior)
10	Madras	1861	Madras	Madras
11	Mysore	1884	Mysore	Bangalore
12	Orissa	1948	Orissa	Cuttack
13	Patna	1916	Bihar	Patna
14	Punjab	1947	Punjab and Delhi	Chandigarh (Bench at Delhi)
15	Rajasthan	1949	Rajasthan	Jodhpur

For three-quarters of a century, till the establishment of the Federal Court of India in 1937, some of these courts were virtually the highest courts in the country. Appellate jurisdiction in certain categories of cases was exercised by the Judicial Committee of the Privy Council. Under the new Constitution, however, the power of the High Courts has been affected to the extent that the Supreme Court, with a slightly wider appellate jurisdiction than that exercised by the Federal Court of India, has now been established in the country.

The Constitution provides for a High Court for each State. The State Legislature has, however, no power to alter the constitution or the organisa-

*The functions of High Courts for the Union Territories of Himachal Pradesh, Manipur and Tripura are exercised by the Courts of Judicial Commissioners in these Territories.

tion of the High Court. This power vests in the Union Parliament. Similarly, the power to remove High Court judges also vests in Parliament. The special procedure to be followed in this matter is the same as prescribed for the removal of Supreme Court judges (Article 124, Clauses 4 and 5).

Powers and Functions

No substantial change in the powers and duties of the High Courts has been made by the Constitution. These are more or less the same as those prescribed in the Royal Letters Patent and the subsequent enactments which vested in them original or appellate jurisdiction in certain specified matters. The Letters Patent constituting the three Presidency High Courts in 1861 classified their jurisdiction as original and appellate, the original jurisdiction in civil as well as criminal matters being confined to the city limits. The other High Courts did not ordinarily possess original jurisdiction but had the power to try cases for special reasons. This was a kind of extraordinary original jurisdiction. The High Courts were expressly authorised by the Government of India Act, 1935, to transfer suits to themselves when these involved interpretation of the Constitution. Article 228 of the new Constitution makes the transfer obligatory in all such cases.

The High Courts have powers of superintendence over all courts and tribunals within their jurisdiction (Article 225). They can call for returns from such courts, make and issue general rules and prescribe forms to regulate their practices and proceedings and determine the manner and form in which books, entries and accounts shall be kept.

Under Article 226, every High Court has the power to issue to any person or authority, including any Government within its jurisdiction, directions, orders or writs, including writs which are in the nature of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari*, or any of them for the enforcement of any of the rights conferred by Part III of the Constitution and for any other purpose.

SUBORDINATE COURTS

The district judges, who preside over the principal civil courts of original jurisdiction, are appointed by the Governor of the State in consultation with the High Court. Appointments of persons, other than district judges, to the judicial service of a State are also made by the Governor in consultation with the State Public Service Commission and the High Court, and the power of posting, promotion and granting leave to persons belonging to the judicial service and holding posts inferior to those of district judges vests in the High Court.

Structure and Functions

Subject to minor local variations, the structure and functions of the subordinate courts are more or less uniform throughout the country. Each State is divided into a number of districts, each under the jurisdiction of the principal civil court presided over by a district judge. Subordinate to him is a hierarchy of different grades of civil judicial authorities.

Besides hearing suits, properly so called, the civil courts exercise jurisdiction over several other matters, such as guardianship, marriage and divorce, testamentary and intestate representation and admiralty jurisdiction. In another category of cases, such as those pertaining to the Land Acquisition Act and the Forest Act, questions affecting civil rights are, in the first instance, dealt with by administrative officers or tribunals, but their decisions are subject to the appellate authority of the appropriate civil courts. There is a third group of cases affecting civil rights which are tried by administrative or quasi-judicial tribunals or other statutory bodies. In such cases, there is no express provision for appeal to civil

courts and the parties frequently invoke the intervention of the High Court for writs.

Criminal Justice

The Code of Criminal Procedure, as amended and revised from time to time, regulates the administration of criminal justice and the constitution of criminal courts. The officer presiding over the district court in civil suits is the judge of the Sessions Division for criminal cases in that district. The Sessions Judge is sometimes assisted by additional or assistant sessions judges. These officers are subordinate only to the High Court and are generally independent of the executive. They, however, deal only with the more serious crimes and take cognisance of cases only when they have been committed to them by a magistrate after a preliminary enquiry.

The exercise of preventive jurisdiction in certain matters and the trial of crimes listed as not triable by a Sessions Court are entrusted to magistrates of various classes under the general supervision and control of the District Magistrate. In respect of nearly all judicial acts, the magistracy, including the District Magistrate, is subject to the control of the High Court. Some categories of cases involving minor crimes are tried by honorary magistrates, generally retired officers or other responsible citizens, and by benches of magistrates.

Separation of Judiciary from Executive

In pursuance of the directive principle regarding the separation of the judiciary from the executive (Article 50), the States in which separation is now in force are Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra, Mysore, West Bengal, the Madhya Bharat, Vindhya Pradesh and Bhopal regions of Madhya Pradesh, the former PEPSU region and five other districts of the Punjab, nine districts of Orissa, twelve districts of Bihar and forty-seven districts of Uttar Pradesh. The reform as it has come into operation in the State of Madras has been designed within the frame-work of the Criminal Procedure Code and has been implemented by an executive order. Broadly speaking, it divides all the powers and functions of a magistrate under two heads (i) judicial, and (ii) non-judicial. The officers discharging judicial functions have been placed under the High Court. Another important feature of the reform is that, for purely judicial work, only those qualified in law are eligible to become magistrates. Similar schemes, with modifications to suit local conditions, have been introduced in other States. The Governments of Assam and Rajasthan had set up Committees to consider this matter. The reports of the Committees have been received by the State Governments and are being considered.

CHAPTER VII

DEFENCE

The supreme command of the Armed Forces is vested in the President of India, the responsibility for their administrative and operational control resting with the Ministry of Defence and the three Services Headquarters. The main function of the Ministry is to ensure that (i) the development and activities of the three Services are properly co-ordinated, (ii) decisions on policy matters are obtained from the Government, transmitted to the three Services Headquarters and implemented, and (iii) necessary financial sanction for defence expenditure is obtained from Parliament.

ORGANISATION

Although the overall control of the three Services vests in the Ministry of Defence, they normally function directly under their respective Chiefs of Staff. The occupants of these offices, as on April 1, 1962, were :

<i>Chief of the Army Staff</i>	..	General P. N. Thapar
<i>Chief of the Naval Staff</i>	..	Vice-Admiral R. D. Katari
<i>Chief of the Air Staff</i>	..	Air Marshal A. M. Engineer

The Chief of Staff of each Service is assisted by a Deputy Chief.

Army

The Army is organised into three Commands—Western, Eastern and Southern—each under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under a General Officer Commanding of the rank of Major-General. The Areas are sub-divided into Sub-Areas, each under a Brigadier.

The Army Headquarters, located in Delhi, functions under the Chief of the Army Staff. Its four main branches, each under a Principal Staff Officer of the rank of Lieutenant-General are : General Staff Branch, Adjutant-General's Branch, Quartermaster-General's Branch, Master-General of Ordnance's Branch. The other two branches are the Engineer-in-Chief's Branch and the Military Secretary's Branch, each under a Major-General.

The General Staff Branch consists of the Directorates of Military Operations, Military Intelligence, Staff Duties, Military Training, Weapons and Equipment, Armoured Corps, Artillery, Signals, Infantry, Territorial Army and Defence Security Corps.

The Adjutant-General's Branch is divided into two Directorates, namely, Organisation and Personal Services and includes the Judge Advocate-General's Department. The Medical Directorate, though separate under a Major-General, is technically placed under this branch.

The Quartermaster-General has two Directorates, one to organise all rail, sea and air movements of personnel and stores within and outside the country, and the second to provide accommodation for personnel. The Directorates of Supply and Transport, Remounts and Veterinary and Farms are also under the overall supervision of the Quartermaster-General. A new organisation, namely, Directorate-General of Works under a Major-General, has been created under the Quartermaster-General for speeding up constructional activities, including troops' accommodation, roads and aerodromes. The Military Engineering Service, a civilian establishment hitherto under the Engineer-in-Chief, has been brought under the new Director-General of Works.

The two departments under the Master-General of Ordnance are the Directorate of Ordnance Services and the Directorate of Electrical and Mechanical Engineers. The Ordnance Services Directorate is responsible for procuring, stocking and supplying all kinds of defence equipment required for troops. The Electrical and Mechanical Engineers Directorate is charged with the responsibility of inspection, repair and maintenance of all types of mechanical and electrical equipment used by the Army.

The Engineer-in-Chief is the head of the Corps of Engineers. He advises the Chiefs of Staff of the three Services and the Director-General of Ordnance Factories on all matters concerning works, including their planning and construction. He has three Directorates under him, namely, Personnel and Co-ordination, Engineer Staff and Engineer Stores and Plants.

The Military Secretary maintains personal records of officers and is responsible for their postings and transfers, promotions and retirement as well as for the grant of honorary ranks.

Navy

At the Naval Headquarters in Delhi, the Chief of the Naval Staff is assisted by four Principal Staff Officers, namely, the Deputy Chief of the Naval Staff, the Chief of Personnel, the Chief of Material and the Chief of Naval Aviation. He functions through four Operational and Administrative Commands, one afloat and three ashore. These are : (i) Flag Officer Commanding, Indian Fleet, (ii) Flag Officer, Bombay, (iii) Commodore-in-Charge, Cochin, and (iv) Commodore, East Coast, Visakhapatnam.

Today, the Indian Fleet consists of *INS Vikrant* (Flagship of the Navy), an aircraft-carrier, *INS Mysore*, a Colony-class cruiser, *INS Delhi*, a Leander-class cruiser, two Destroyer Squadrons, (*INS Ranjit*, *Rajput*, *Rana*, *Godavari*, *Gomti* and *Ganga*) and a number of Frigate Squadrons, including some of the latest types of anti-submarine and anti-aircraft frigates. These new types of frigates, specially constructed for the Navy in the U.K., are *INS Brahmaputra*, *Beas*, *Betwa*, *Khukri*, *Kirpan*, *Talwar* and *Trisul*. The former frigates are *INS Cauvery*, *Kistna* and *Tir*, which are now being used for cadet's training. The three Mine-sweeping Squadrons are formed by *INS Konkan*, *Karwar*, *Kakinada*, *Cannanore*, *Cuddalore*, *Bassein* and *Bimlipatam*.

A beginning has been made in building smaller types of naval craft in India. Three seaward defence boats—*INS Ajay*, *Abhay* and *Akshay* and a mooring vessel, *INS Dhruvak*, have already been completed.

A newly-constructed cruiser-graving dock at the Naval Dockyard, Bombay, which can also accommodate the Navy's aircraft-carrier, was commissioned for service in January 1962.

Air Force

The Chief of the Air Staff is assisted by four Principal Staff Officers controlling the main branches of the Air Headquarters, viz. the Deputy Chief of the Air Staff, the Air Officer-in-Charge, Administration, the Air Officer-in-Charge, Maintenance, and the Air Officer-in-Charge, Policy and Plans. Each of these four branches controls a group of Directorates.

Under the Air Headquarters come four major Air Force formations, namely, the Operational, Training, Maintenance and the Eastern Air Commands.

In pursuance of the Reserve and Auxiliary Air Forces Act, passed by Parliament in 1952, seven Auxiliary Air Force Squadrons, namely,

No. 51 (Delhi), No. 52 (Bombay), No. 53 (Madras), No. 54 (UP), No. 55 (Bengal), No. 56 (Orissa) and No. 57 (Punjab), have been formed.

TRAINING INSTITUTIONS

National Defence College

The National Defence College, set up at New Delhi in 1960, trains senior officers of the three Services, on the pattern of the Imperial Defence College in the U.K. Its main purpose is to enable students to study the military, scientific, industrial, social, economic and political factors involved in war as also the higher direction and strategy of warfare. Concurrently with this study, it offers a unique opportunity to senior Service officers and highly-placed civil servants of getting together and exchanging ideas so as to give them both a better understanding of each other's problems in peace and in war.

National Defence Academy

Admissions to the National Defence Academy at Khadakvasla, near Poona, are made on the basis of a qualifying biannual written examination conducted by the Union Public Service Commission at different centres in the country, followed by an interview before a Services Selection Board. Boys who have passed the Matriculation or an equivalent examination and are between 15 and 17½ years of age on the first day of the month in which the course starts at the Academy are eligible for admission. Cadets must be unmarried and cannot marry during the period of their stay at the Academy.

All the expenses of cadets while at the Academy, except the pocket expense of Rs. 30 per month, are borne by the Government. Where the monthly income of parents is less than Rs. 300, even this expense is borne by the Government.

The Academy conducts a three-year course for the combined basic training of cadets of all the three Services after which they separate to receive specialised training at their respective Service establishments.

Defence Services Staff College

Training is imparted to serving officers on an inter-Service basis at the Defence Services Staff College at Wellington in South India. It trains officers up to the standard required for second-grade staff appointments. About 100 officers of all the three Services are trained every year, the duration of the course being 10 months.

Armed Forces Medical College

The Armed Forces Medical College at Poona, besides imparting training to newly-commissioned medical officers, runs refresher courses for medical officers of the Armed Forces to keep them up-to-date in their profession. Specialist courses are run in hygiene, X-ray, blood-transfusion and pathology.

Rashtriya Indian Military College

Run on the lines of public schools, the Rashtriya Indian Military College, located in Dehra Dun, prepares future officers for the three Services by imparting preliminary pre-cadet training to such pupils as desire subsequently to choose a military career. It thus serves as a feeder to the National Defence Academy.

Army Colleges and Schools

The Indian Military Academy at Dehra Dun is the premier centre for training officers of the Army. The main source of entry into the Academy is the National Defence Academy. Cadets passing out of the

Academy receive one year's training at Dehra Dun before being commissioned. The other categories of entrants in higher age-groups are those who have qualified in the competitive entrance examination of the Union Public Service Commission and the Services Selection Board for two years, training, graduate cadets of the NCC for a year and a half, other graduates selected for specialised commissions in the technical arms for a year and serving Regular or Territorial Army personnel—JCOs and NCOs—for two years. At the Military Academy, cadets undergo strenuous training designed mostly to equip them with the basic military knowledge necessary for all Army officers whatever their corps, arm or service.

The Armoured Corps Centre and School at Ahmednagar undertakes the training of regimental instructors, squadron commanders and regimental commanders of the Corps. The College of Military Engineering at Kirkee imparts training to officers and other ranks in all aspects of military engineering. Longer courses of over two years' duration are also conducted there to train officers up to the degree standard.

The School of Signals at Mhow imparts basic and advanced technical training in telecommunication and signal tactics. The School of Artillery at Deolali provides training in field, anti-tank and anti-aircraft artillery, while its branch at Bombay provides training in coastal artillery. The Infantry School at Mhow conducts courses in the tactical and administrative handling of units and sub-units for senior officers and junior commanders of all corps in the Army. The Ordnance School at Jabalpur imparts specialised corps training in the identification, handling, storage, care, custody and preservation of all items, including ammunition and explosives, stocked by ordnance depots.

The other Army training centres and schools are : the Service Corps School, Bareilly; the Remounts and Veterinary Centre and School, Meerut; the School of Physical Training, Poona; the Army and Air Transport Support School, Agra; the School of Mechanical Transport, Faizabad; the Corps of Military Police Centre and School, Faizabad; the Education Centre and School, Panchmarhi, the Military School of Music, Panchmarhi; and the Electrical and Mechanical Engineering School, Trimulgherry.

Naval Training Centres

Except for highly specialised technical courses, training of all officers and men of the Navy is undertaken at the main naval training centres located at Cochin, Bombay and Visakhapatnam. Advanced courses in subjects like gunnery, torpedo and anti-submarine and communications have already been started.

The principal training centres of the Navy are *INS Venduruthy* and the Naval Air Station *Garuda*, both situated at Cochin. *INS Venduruthy* is the premier training establishment, comprising technical schools for gunnery, communication, navigation and torpedo and anti-submarine. *INS Garuda* has the training aircraft of the Navy and some technical schools.

At *INS Shivaji*, situated at Lonavla (Maharashtra), mechanical engineers and artificers are trained. A new Engineering College has been started there to train junior engineers and electrical officers of the Service.

INS Valsura, the Electrical School of the Navy at Jamnagar, trains officers and men of the Electrical Branch of the Service. With most of the ships now acquired being fitted with complicated electronic equipment, training at this School has been geared to the present requirements of the Service.

New recruits coming into the Navy are trained at *INS Circars*, at Visakhapatnam, and, on completion of their courses, become sailors.

Officers and men of the Supply and Secretariat Branch are trained at *INS Hamla* in Bombay. Sea training is imparted by the Fleet.

Air Force Colleges and Schools

The basic flying training of a year's duration for pupil pilots is imparted at the Air Force Flying College, Jodhpur. Advanced flying and conversion training on jets and multi-engined aircraft is conducted for a year at the Jet Training and Transport Training Wings of the Air Force Station, Hyderabad. Pupil navigators also have their initial training at Jodhpur and advanced training at Hyderabad before graduating as full-fledged aircrew.

The Air Force Administrative College at Coimbatore trains officers in various ground duties, and medical officers receive training at the School of Aviation Medicine recently established at Bangalore. The Air Force Technical College at Jalahalli trains officers in engineering, signals and armament and electrical engineering. A school at Jalahalli trains airmen in accounting, equipment, general office duties, medical assistance, telephone operating, drill instruction, police duties, music, motor driving and catering. Another school, also located at Jalahalli, trains airmen in higher signal trades. Flying instructors are trained in a separate school at Tambaram. Another school, located at Tambaram, trains airmen in technical trades. A school for higher staff studies in combined land-air warfare has been instituted at Hyderabad. The Air Force also trains paratroopers for air-borne units of the Army at the Paratroopers' Training School at Agra.

DEFENCE RESEARCH AND PRODUCTION

The Research and Development Organisation, under the Scientific Adviser to the Defence Minister, was brought into being in January 1958, by the amalgamation of the Technical Development Establishments of the three Services and the Defence Science Organisation to promote and apply scientific research for production. It is closely associated with the Production Organisation which functions under the Controller-General of Defence Production and is responsible for achieving self-sufficiency in military stores and equipment. Besides running technical establishments dealing with weapons, ammunition, military explosives, metallurgy, electronics and optical instruments, it also has under it research installations like the Defence Science Laboratories at New Delhi, Jodhpur and Mussoorie, the Naval Physical Laboratories at Bombay and Cochin and research-cum-training installations like the Institute of Armament Studies at Kirkee.

With the growing tempo of defence research and production, a scheme has been evolved to impart theoretical knowledge of engineering subjects to those receiving practical training at various defence installations. Nearly 3,000 students are at present receiving this instructional training.

Ordnance Factories

During 1960-61, the ordnance factories produced stores and equipment, including items of civil trade consumption, worth Rs. 30.36 crores as against Rs. 25.14 crores in 1959-60. By the first half of 1961-62, the value of their output had already reached Rs. 17 crores. The steadily increasing manufacture of special items, hitherto imported, has resulted in substantial savings of foreign exchange.

The Service items produced by these factories include artillery guns, heavy mortars, naval guns, barrels and recoil system of guns, mountings, carriages and buffers for heavy and medium-calibre guns, light machine-guns and other small arms, bombs, shells and various types of ammunition and high explosives, sea mines, depth-charges, parachutes, service clothing and mountaineering equipment.

As part of their peace-time functions, the ordnance factories are also

using their utilisable spare capacity to cater for civilian needs. Their civil trade activities cover the five broad categories of ferrous, non-ferrous, leather and textile, chemical and general engineering. The last category includes scientific, optical and mathematical instruments, sporting arms and ammunition, metal castings and forgings and other miscellaneous articles. They recently started manufacturing three-ton and one-ton military trucks and four types of tractors.

The Machine-tool Proto-type Factory, Ambarnath (Maharashtra), one of the 19 ordnance factories in the country, has fulfilled three important functions, namely, the design of new armament and machine-tools; manufacture and proofing of proto-types of both, together with the manufacture of small arms; and creation of necessary design and craft skill. The surplus capacity in this factory is being utilised to produce various types of machine-tools required by the ordnance factories and other defence establishments. The factory first designed and made simpler types of machine-tools like tool grinders, polishing machines and dressing devices, and then switched over to advanced types. It has so far manufactured, among others, hydraulic surface-grinders and precision tool-room lathes.

Hindustan Aircraft

The Hindustan Aircraft Ltd., Bangalore, undertakes the repair, overhaul and manufacture of aircraft for the Indian Air Force. Since 1952, the HAL has been manufacturing the HT-2 trainer aircraft on a large scale for the IAF, the Navy and the flying clubs. The factory has also been building supersonic jet aircraft (HF-24), the first prototype of which was test-flown in July 1961, and Vampire jet fighters, which form part of the fleet of the IAF. It is also producing jet trainers and the turbo-jet engines to be fitted to them. It has designed and developed a logistic air-support aircraft, a light multi-purpose aircraft (Pushpak), and a six-cylinder piston aero-engine. The factory produced 17 'Pushpak' aircraft during 1960-61.

Recently an agreement was concluded with the Bristol Aeroplane Company to make the full range of Bristol Orpheus turbo-jet engines at the HAL. Another licence agreement has been reached with the Folland Aircraft Company for the manufacture by the HAL of Britain's jet-fighter, the Gnat.

The ancillary activities of HAL include the building of all-metal broad gauge coaches with modern amenities for the Railways and bus bodies for State and private transport authorities.

The IAF Aircraft Manufacturing Depot, Kanpur, has undertaken the production of AVRO—748 which is the first feeder-line aircraft designed on the fail-safe principles. The pressurised low-wing monoplane is powered by two Rolls-Royce Dart propeller-turbine engines, now under progressive manufacture at the HAL, and operates at comparatively low costs. The first flight of AVRO—748, manufactured at Kanpur, was held in Delhi in November 1961. This transport aircraft is intended to replace the Dakota now in service with the Air Force.

Bharat Electronics

The Bharat Electronics Ltd., Jalahalli (near Bangalore), went into initial production in December 1955, and started manufacturing tools and jigs required for receivers and transmitters.

The production programme of the BEL includes the manufacture of general-purpose receivers and medium-power transmitters for the Civil Aviation Department and equipment for All India Radio, Railways, Meteorological Department, States' Police, Fire Services and the Armed Forces.

Some other important items under production at the BEL are general-

purpose communication receivers, medium-power transmitters, mobile trans-receivers and portable man-pack sets.

A Heavy Vehicles Factory at Avadi and an Electrical Cable Factory at Chandigarh are expected to start functioning in 1963.

SPECIAL ASSIGNMENTS

In addition to their normal duty of defending the country, the Armed Forces, from time to time, perform certain emergency duties, such as (i) rendering of help in areas affected by natural calamities like floods, earthquakes and famines, (ii) carrying out of photographic surveys which are of use in the planning and development of hydro-electric and other schemes and (iii) reclamation of wasteland. Since independence, India's Defence Forces also assisted in implementing the Korean Truce Agreement and the recommendations of the International Commissions for Supervision and Control in Vietnam, Laos and Cambodia, set up under the Cease-fire Agreement concluded at Geneva on July 20, 1954. Several officers and other ranks, including some from the Navy and the Air Force, were deputed in September 1954, for this second assignment which still continues. The Army embarked on yet another mission of peace when on November 16, 1956, a contingent was sent to Egypt to join the United Nations Emergency Force. Nearly 70 Service officers served with the UN Observation Group in the Lebanon in 1958. Besides the 700 Service personnel working with the UN Force in the Congo earlier, India sent a brigade of combatant troops with some ancillary units to join that Force in March 1961. In October 1961, India sent six interdicator Canberra jet aircraft to Congo along with the necessary Air Force personnel.

DEFENCE FINANCE

The following is the break-up of the net Defence Services expenditure since 1955-56.

TABLE 22
DEFENCE EXPENDITURE

(in crores of rupees)

Year	Effective			Non-effective	Defence Capital outlay	Total
	Army	Navy	Air Force			
1955-56 (Actuals)	118	12	28	14	18	190
1956-57 („)	129	12	37	14	20	212
1957-58 („)	159	14	70	14	23	280
1958-59 („)	146	16	75	14	28	279
1959-60 („)	142	14	59	15	36	266
1960-61 („)	185	18	53	15	33	304
1961-62 (Estimates)*	204	19	60	19	26	328
1962-63 („) †	223	19	78	21	31	372

TERRITORIAL ARMY

The Territorial Army, which was raised in October 1949, is designed to give the youth of the country an opportunity of receiving military training in their spare time and to serve the country in times of emergency by provid-

*Revised

†Budget

ing units to the regular Army and taking over the responsibility for internal security. Membership of the Territorial Army does not involve service outside India except under a special order of the Union Government. The Territorial Army is composed of units of Artillery, Infantry, the Corps of Engineers (including Railways, Ports, Docks and Inland Waterways), the Corps of Signals (including Posts and Telegraphs), the Medical Corps and the Corps of Electrical and Mechanical Engineers.

Any able-bodied national of India between the ages of 18 and 35 (with relaxation in the upper age-limit for entry into certain technical units) and possessing the requisite qualifications is eligible to join the Territorial Army as an officer or other rank.

The Territorial Army has two types of units—provincial and urban. Training for recruits in the provincial units lasts 30 days. In the urban units training is given for 32 days, in the evenings after working hours, at weekends or on holidays. Every member of the Territorial Army who has undergone recruit training is liable to undergo annual training for two calendar months in the provincial units and for a period varying from a minimum of 144 hours to a maximum of 240 hours in the urban units, including a camp of eight to fourteen days.

While under training or otherwise employed, officers and other ranks of the Territorial Army are entitled practically to the same pay and allowances, rations and medical facilities as are admissible to the corresponding ranks of the regular Army. They are also entitled to terminal gratuity, disability and family pension under certain conditions.

A limited number of appointments on the permanent staff, with a tenure of three to five years, is offered to all ranks of the Territorial Army provided they possess the necessary experience and qualifications. Territorial Army personnel are also entitled to the award of decorations and medals.

The Auxiliary Territorial Army, which was reorganised as the National Volunteer Force in 1954, is now designated as "Lok Sahayak Sena".

All able-bodied men, except ex-Servicemen and ex-NCC cadets, between the ages of 18 and 40, can join the Lok Sahayak Sena. Membership of the force carries no liability to military service. Under a new scheme, special attention is given to the training of people in border areas.

Under the Lok Sahayak Sena scheme, 1,355 camps were held and 6,06,793 persons given training during the period from May 1955 to December 1961.

NATIONAL CADET CORPS

The National Cadet Corps consists of three Divisions, namely, Senior, Junior and Girls. The Senior and Junior Divisions are composed of three Wings—Army, Navy and Air Force. The Army Wing has units of the Armoured Corps, the Artillery, the Corps of Engineers, the Signals Corps, the Infantry, the Corps of Electrical and Mechanical Engineers and the Medical Corps.

In addition to normal basic training, cadets of the technical units receive specialised training. Naval Wing units are, of necessity, raised in the coastal towns where facilities for naval training are available. In the Air Wing units, theoretical and practical training is given in flying and, with the help of the flying clubs, cadets obtain 'A' flying licences at Government expense. Gliding has also been introduced as part of the training of air cadets. The special needs of girl cadets have been fully kept in view and their training has been made more instructive, interesting and useful. Aero-modelling and gliding have also been introduced in the Senior Wing of the Girls' Division.

The progressive increase in the strength of the Corps is shown in the following table :

TABLE 23
STRENGTH OF NATIONAL CADET CORPS

Date	Boys		Girls		Total
	Senior Division	Junior Division	Senior Wing	Junior Wing	
1-1-1951	23,349	45,105	279	—	68,733
1-1-1956	46,680	66,307	3,225	5,146	1,21,388
1-1-1957	52,147	70,829	3,999	6,727	1,33,702
1-1-1958	64,475	76,530	5,730	9,270	1,56,005
1-1-1959	73,407	92,258	9,246	17,342	1,92,253
1-1-1960	95,645	1,16,866	9,752	18,400	2,40,663
1-1-1961	1,05,770	1,28,633	9,752	19,314	2,63,469
1-1-1962	1,16,407	1,44,720	10,620	22,635	2,94,382

AUXILIARY CADET CORPS

In 1960, two new categories, namely, Officers' Training Units (OTU) and Rifles, were introduced in the Cadet Corps organisation. The strength of the NCC Rifles as on January 1, 1962, was 2,70,400 cadets and officers, while that of OTU was 483.

The Auxiliary Cadet Corps has been started to cope with the demand for military training for boys and girls in schools who cannot get admission to the National Cadet Corps. The Corps has made rapid progress: its strength at the end of 1961 was nearly 12,12,840.

The Auxiliary Cadet Corps trains the youth of the country in team spirit, discipline and patriotism. Its instructors selected from schools are trained by regular Army staff of the various NCC units.

WELFARE OF EX-SERVICEMEN

The Directorate of Resettlement in the Defence Ministry deals with matters relating to the resettlement of ex-Servicemen in Government, private services, vocational and technical trades, land colonies and transport services. Training in basic agriculture is given to facilitate their absorption in the community projects as *Gram Sevaks*. In matters of employment, preference is given to ex-Servicemen in filling up appointments in the police, watch and ward, excise and other departments where military training is a qualification. In addition, relaxation in age limits to the extent of the military service rendered has been permitted. Through the concerted efforts of the Central and State Governments as well as private organisations, employment has been found for 1,46,196 ex-Servicemen during the past eleven years.

One of the most important non-official organisations which renders useful assistance to ex-Servicemen and their families, in close liaison with the local administrations, is the Soldiers', Sailors' and Airmen's Board. The Board, which has its headquarters in New Delhi, co-ordinates the activities of State boards. These, in their turn, control a network of district boards, having in some cases tehsil or taluk committees. In addition to the funds of the Board which are primarily used for payment of special pensions to blinded ex-Servicemen and to meet expenditure on other miscellaneous items, there are a number of other Central funds like the Flag Day Fund, the Armed Forces Benevolent Fund and the Armed Forces Reconstruction Fund, which also render valuable assistance for the welfare of ex-Servicemen.

CHAPTER VIII

EDUCATION

Education is primarily the responsibility of the State Government, the Union Government concerning itself with the co-ordination of educational facilities and determination of standards in respect of higher education (through the University Grants Commission) and research and scientific and technical education. Co-ordination in regard to elementary and secondary education is secured through All-India Councils. The Union Government are also responsible for the running of four universities (Aligarh, Banaras, Delhi and Visva Bharati) and such other institutions of national importance as Parliament may by law declare.

There were 4,46·39 lakh students in 4,42,016 educational institutions of all types in India during 1959-60.* The percentage of children undergoing instruction to the total number of children in the age group 6-11 was 61·1; the percentage in the age groups 11-14 and 14-17 was 21·1 9·9 respectively.

The total number of recognised institutions, enrolment therein, the number of teachers and expenditure incurred on them is shown below.**

TABLE 24
INSTITUTIONS, STUDENTS, TEACHERS AND EXPENDITURE

Year	Number of institutions	Number of students on rolls (in lakhs)	Number of teachers (in lakhs)	Direct expenditure (in crores of rupees)	Indirect expenditure (in crores of rupees)	Total expenditure (in crores of rupees)
1950-51 ..	2,86,860	2,55·43	8·04	91·05	23·33	114·38
1955-56 ..	3,66,641	3,39·24	11·07	144·81	44·85	189·66
1956-57 ..	3,77,837	3,60·06	11·70	159·63	46·66	206·29
1957-58 ..	3,94,760	3,80·02	12·31	182·51	58·14	240·65
1958-59 ..	4,13,628	4,14·33	12·82	203·30	62·91	266·21
1959-60* ..	4,42,016	4,46·39	14·10	225·72	72·05	297·78

Of the 4,42,016 recognised institutions in 1959-60, 1,351 were pre-primary, 3,20,586 primary, 57,863 secondary, 3,836 vocational and technical and 56,434 special education schools; 946 arts and science, 728 professional and 177 special education colleges; 42 research institutions; 13 boards of education and 40 universities. The break-up according to management was as follows: Government 95,070 with 1,03,09,119 students; district boards 1,89,663 with 1,60,66,160 students; municipalities 13,171 with 32,13,231 students; private aided 1,28,949 with 1,36,11,607 students and private unaided 12,690 with 14,28,104 students.

The contributions from different sources to the total expenditure are shown in table 25.

*Provisional.

**Figures for unrecognised institutions are not available.

Literacy

The state of literacy in the country, according to the 1961 census is shown in table 28.

Plan and Education

The distribution of outlay in the First, Second and Third Plans is set out below.

TABLE 26
EXPENDITURE UNDER THE PLANS

(in crores of rupees)

	First Plan (actual expenditure)	Second Plan (estimated expenditure)	Third Plan (outlay)
Elementary education	85	87	209
Secondary education	20	48	88
University education	14	45	82
Other educational schemes	14	24	29
TOTAL ..	133	204	408

The achievements under the First and Second Plans and the targets aimed at under the Third Plan are indicated below.

TABLE 27
ACHIEVEMENTS AND TARGETS

Activity	1950-51	1955-56	1960-61 (estimated)	1965-66 (targets)
(1)	(2)	(3)	(4)	(5)
Number of pupils in classes I to V (in lakhs).	1,92	2,52	3,43	4,96
Percentage thereof to total population of the age group 6-11.	42.6	52.9	61.1	76.4
Number of pupils in classes VI to VIII (in lakhs).	31	43	63	98
Percentage thereof to total population of the age group 11-14.	12.7	16.5	22.8	28.6
Number of pupils in classes IX to XI (in lakhs).	12	19	29	46
Percentage thereof to total population of the age group 14-17.	5.3	7.8	11.5	15.6
Number of pupils at the university stage—arts, science and commerce—(in lakhs).	4	6	9	13
Percentage thereof to total population in the age group 17-23.	0.9	1.5	1.8	2.4
Percentage of students reading science at university stage.	38.1	33.0	35.8	42.5
Number of primary/junior basic schools	2,09,671	2,78,135	3,42,000	4,15,000
Number of middle/senior basic schools	13,596	21,730	39,600	57,700

1959-60**	1,351	1,48,372	3,508	51·09

PRIMARY EDUCATION

An All-India Council for Elementary Education advises the Central and State Governments on all matters relating to elementary education and preparation of programmes for the early implementation of compulsory and free education.

Legislation for compulsory primary education has been enacted in Andhra Pradesh, Gujarat, Madhya Pradesh, Mysore, Punjab and Delhi. Schemes have been drawn up for intensive enrolment in schools. Plans have also been drawn up to train 15 lakh teachers by 1966.

The progress of primary education is shown in the following table.

TABLE 30
PRIMARY EDUCATION†

Year	Number of recognised schools	Number of students on rolls	Number of teachers	Direct expenditure (in crores of Rs.)
1950-51	2,09,671	1,82,93,967	5,37,918	36·49
1955-56	2,78,135	2,29,19,734	6,91,249	53·73

1959-60**	3,20,586	2,59,18,864	7,33,382	69·63

SECONDARY EDUCATION

Significant among the reforms carried out on the recommendations of the Secondary Education Commission (which reported in August 1953) with the aim of making secondary education a self-contained and complete stage up to the age of 17 are:

- (i) Enriching the content of secondary education by adding one more class to the high school and making it a higher secondary course of 11 years' duration and providing in selected higher secondary schools a diversified system of education in which students could offer, in addition to a common core of studies, a group of three subjects from any one of seven, namely, Humanities, Science, Technology, Commerce, Agriculture, Fine Arts and Home Science.
- (ii) Provision of facilities for improvement in teaching science, libraries, introduction of crafts in middle schools, training of teachers and career masters, etc.

*Excludes pupils in institutions attached to primary and secondary schools.

**Provisional.

† Includes junior basic schools for which separate figures are available in table 22.

- (iii) The establishment of the All-India Council of Secondary Education to advise the Central and State Governments.
- (iv) The compulsory study of languages at the secondary stage.
- (v) The implementation of a long range programme of examination reform aiming at a closer integration of educational objectives, learning processes and methods of evaluation.
- (vi) The establishment of the Extension Services Project in selected training colleges to carry out a programme of in-service teacher preparation in all the subjects of the secondary school curriculum.

The table below shows at a glance the position regarding the development and financing of secondary education.

TABLE 31
SECONDARY EDUCATION*

Year	Number of schools	Number of students on rolls	Number of teachers	Direct expenditure (in crores of Rs.)

1959-60**	57,863	1,57,06,200	5,61,959	95·65

BASIC EDUCATION

Basic education is now the accepted pattern of the educational system at the elementary level. It is an activity-centered curriculum wherein the process of learning is correlated with the physical and social environment of the children. Education is imparted through socially useful productive activities like spinning and weaving, gardening, carpentry, leather work, book craft, domestic crafts, pottery, elementary engineering, etc. At the end of March 1961, junior and senior basic schools formed 29·3 per cent of the total number of elementary schools. The percentage is expected to rise to 35·9 by the end of the Third Plan period. Since the main demand on the resources of the country available for education is for the expansion of educational facilities for children of the 6-11 age-group, efforts in the field of basic education are confined at present to introducing in the non-basic primary schools such important features of basic education as do not entail heavy expenditure. Orientation programmes for education officers and primary school teachers are being implemented to reduce the differences, to the extent possible, between basic and non-basic schools. Most of the State Governments have already developed an integrated syllabus for the elementary schools, which is being followed in basic and non-basic schools alike. Meanwhile, all the teachers' training institutions for elementary school teachers are being progressively converted into the basic type.

Post-basic schools have been started to enable pupils who have been educated in the junior and senior basic schools to continue their secondary education along the basic lines. Since these institutions have been established by voluntary organisations and their syllabus and curriculum are different from those of the traditional secondary schools, students who pass out of these schools meet with difficulties, both in pursuing their higher studies and in securing employment. To resolve these difficulties, a committee, appointed to go into the question, has *inter alia* recommended a common scheme of examination for both the types of schools, and acceptance of crafts of post-basic schools as at par with the elective subjects of multipurpose schools.

*Includes senior basic and post-basic schools for which separate figures are available in table 32.

**Provisional.

The progress of basic education is shown below.

TABLE 32
BASIC EDUCATION*

1959-60**	56,434	15,62,483	31,883	2.97

HIGHER AND UNIVERSITY EDUCATION

Post-secondary education in India is imparted through arts and science colleges, professional colleges, special education colleges, research institutions and universities. In States having Boards of Higher Secondary and Intermediate Education, the post-intermediate education is conducted under the direction and control of universities in respect of courses of study, examinations and award of degrees and diplomas.

A forum for the discussion of university problems and for the mutual recognition of degrees and diplomas awarded by the universities in India is provided by the Inter-University Board founded in 1925. The functions of this Board are advisory in character.

Besides the universities, there are a large number of institutions which impart higher learning. The Indian Agricultural Research Institute, Delhi, the Indian Institute of Science, Bangalore, and the Indian School of International Studies, New Delhi, have the same standing as other universities, although they were not officially established as universities under

*Vocational institutions include schools for agriculture, arts and crafts, commerce, engineering, forestry, industry, medicine, physical education, teachers' training, veterinary science, polytechnics and others.

**Provisional.

Central or State Acts. Many of the research laboratories and institutions mentioned in the chapter on *Scientific Research* are recognised by the Inter-University Board as centres of higher research. Some of them undertake teaching as well. Besides these, there are certain national institutions, like Jamia Millia Islamia, New Delhi, Gurukul Kangari Vishwa Vidyalyaya, Hardwar, Gurukul Vishwa Vidyalyaya, Vrindavan and Kashi Vidyapith, Varanasi, whose degrees and diplomas are recognised by the Government of India as equivalent to the corresponding degrees and diplomas of a university for purposes of employment.

In table 35 is shown the State/Territory-wise distribution of various types of institutions in 1958-59 catering for higher education and in table 36 is shown the growth of these institutions since 1950-51.

General Education in Universities

Two schemes of general education have been drawn up by a study team which reported in January 1957. In the main scheme, general

*Provisional.

education covering basic studies in the fields of natural sciences, social sciences and the humanities together with training in communication skills are to be made compulsory for all under-graduate non-professional faculties. In the alternative scheme, six periods a week in the first and second years of the degree course are to be devoted to general education. The introduction of general education courses has been accepted in principle by almost all universities in India, some of them having actually introduced them in one form or another.

University Grants Commission

In pursuance of the recommendations of the University Education Commission appointed by the Government in 1948, the University Grants Commission was constituted in 1953. It was given an autonomous statutory status by an Act of Parliament in 1956. The University Grants Commission Act, 1956, requires the Commission to take such steps as it may think fit for the promotion and co-ordination of university education and for the determination and maintenance of standards of teaching, examination and research in universities. The Commission has the authority to make appropriate grants to different universities and implement development schemes.

The composition of the Commission as on March 20, 1962, was as follows:

<i>Chairman</i>	D. S. Kothari
<i>Members</i>	H. N. Kunzru, Dewan Anand Kumar, A. C. Joshi, D. C. Pavate, P. N. Kirpal, S. Bhoothalingam, S. R. Das and A. R. Wadia.
<i>Secretary</i>	Samuel Mathai

Table 38 shows the universities, their character, number of colleges, number of students and expenditure incurred on them.

HIGHER TECHNICAL EDUCATION †

The following table indicates the expansion of facilities for higher technical education (engineering and technology) during the period 1951 to 1961.

TABLE 37
HIGHER TECHNICAL EDUCATION

Year	Institutions		Sanctioned intake		Outturn	
	Degree Engg. & Tech.	Diploma Engg. & Tech.	Degree Engg. & Tech.	Diploma Engg. & Tech.	Degree Engg. & Tech.	Diploma Engg. & Tech.
1951	53	89	4,788	6,216	2,693	2,626
1956	70	109	6,367	9,899	4,293	4,075
1959	87	166	11,280	20,670	4,480	7,240
1960	100	195	13,860	25,570	5,703	7,969
1961*	111	210	15,690	27,640	7,026	10,349

Of the 10 engineering colleges and 52 polytechnics envisaged under the revised Second Plan of State Governments, all institutions except six polytechnics have started functioning. In addition, 9 engineering colleges and 23 polytechnics set up by private agencies have also started working.

To meet the requirements of technical personnel during the Third Plan period, the Central Government have approved a scheme to establish 8 regional engineering colleges, a college of engineering and technology at

*Provisional.

For a list of engineering and technological institutions, see Appendices.

Delhi and 26 polytechnics in different parts of the country. Seven regional colleges have started functioning at Mangalore, Warangal, Nagpur, Bhopal, Durgapur, Jamshedpur and Srinagar. The colleges at Allahabad and Delhi have started functioning in 1961-62. Fifteen of the 26 polytechnics have also been established and the rest are expected to commence functioning early in the Third Plan period. Facilities for post-graduate studies and research are being developed at a number of institutions.

The Indian Institute of Technology, Kharagpur, the first in the chain of four higher technological institutes, started functioning in 1951. The Indian Institute of Technology, Bombay, and the Indian Institute of Technology, Madras, admitted the first batch of students in 1958 and 1959 respectively and the Institute at Kanpur in 1960. Each institute when completed will provide for the education of over 1,500 students at the under-graduate level and 300 at the post-graduate level.

RURAL HIGHER EDUCATION

On the recommendation of the Rural Higher Education Committee, a National Council for Higher Education in Rural Areas was established in 1956 to advise the Government on all matters relating to the development of rural higher education. The Council have selected 13 institutions for development into rural institutes and these have started functioning at Sriniketan (W. Bengal), Gandhigram (Madras), Jamianagar (Delhi), Udaipur (Rajasthan), Sundarnagar Birauli (Bihar), Bichpuri (U.P.), Sanosara (Maharashtra), Coimbatore (Madras), Gargoti (Maharashtra), Amravati (Maharashtra), Rajpura (Runjab), Wardha (Madhya Pradesh) and Hanumanamathi (Mysore). The courses as approved by the Council and adopted by the rural institutes are : (i) a three-year diploma course in rural sciences, (ii) a two-year certificate course in agricultural science; (iii) a three-year certificate course in civil and rural engineering; (iv) a one-year sanitary inspectors' course and (v) a one-year preparatory course to initiate matriculates into the three-year diploma course. Recognition of the diploma in rural sciences as equivalent to a first degree of a university for purposes of employment has been secured. It has also been recognised by the Inter-University Board and certain universities for post-graduate studies in specified subjects. The diploma course in civil and rural engineering has been recognised by the All-India Council of Technical Education and some State Governments for appointment to subordinate services and posts.

SOCIAL EDUCATION

Social education provides an educational base for community development programmes in the country and includes literacy, use of libraries, education in citizenship, cultural and recreational activities, utilisation of audio-visual aids and organisation of youth and women's groups for community development. Most of the work is done in the development blocks, the Centre providing certain ancillary services such as the production of literature, research and training.

A National Centre for Fundamental Education has been established in New Delhi to train higher grade personnel for social education work, develop suitable techniques, carry out research on selected problems and serve as a clearing house of information. The Library Institute set up at the Delhi University performs similar functions in the field of libraries. The Government of India also run the Delhi Public Library as a pilot public library project. A Social Education Institute for Workers has also been set up at Indore. Janata Colleges and Vidyapiths are providing continuous educational facilities for adults in rural areas.

Audio-Visual Aids

The National Institute of Audio-Visual Education, established in January 1959, functions as a training, production and research centre, and as a clearing house for information relating to audio-visual education. The Central Film Library with a membership of 1,512 handled 10,044 films and 210 filmstrips during 1961. These films and filmstrips are lent free of charge to educational institutions. A quarterly journal *Audio-Visual Education* with a Hindi section has been started to foster interest in the use of audio-visual techniques among teachers and social education workers. The production of prototype instructional material has also been undertaken.

EDUCATION OF THE HANDICAPPED

A National Advisory Council advises the Government on all problems concerning education, training and employment of the physically and mentally handicapped. Scholarships are awarded to the blind, deaf and orthopaedically handicapped students for higher education or for technical professional training. Grants are provided to institutions and organisations for the handicapped chiefly for undertaking development work for the handicapped.

The training centre for the adult blind at Dehra Dun imparts training in handicrafts to about 150 blind men from all parts of the country. A women's section with a capacity of 35 has also been added to the centre. Attached to this centre is a sheltered workshop, set up in 1954, employing 9 blind workers. An employment office for the blind has been functioning in Madras since July 1954 and has so far placed 146 adult blind persons including 2 blind women in various industries. A special employment office for the handicapped, set up in Bombay in March 1959, has so far placed 17 blind, 53 deaf and 95 orthopaedically handicapped in employment. Another special employment exchange for the physically handicapped was set up in Delhi in March 1961, which has so far placed 3 blind, 10 deaf and 20 orthopaedically handicapped in employment.

The Central Braille Press, established at Dehra Dun in October 1950, produces braille literature in Indian languages, publishes a Hindi quarterly digest and manufactures braille appliances.

A model school for blind children established in January 1959, at Dehra Dun, provides kindergarten and primary education. Eventually it will be a full-fledged secondary school.

DEVELOPMENT OF HINDI

Steps so far taken for the propagation and development of Hindi are as follows :

- (i) 2,99,889 technical terms have been evolved by expert committees appointed by the Board of Scientific Terminology.
- (ii) Preparation of the second edition of the English version of the Basic Grammar of modern Hindi in the light of the comments from State Governments and universities, etc.
- (iii) Acceptance of the recommendations of the Hindi Shiksha Samiti relating to recognition of examinations conducted by different organisations for employment under the Government of India.
- (iv) Standardisation of keyboard for Hindi typewriters and teleprinters.
- (v) Evolving a standard system of Hindi shorthand.
- (vi) Organisation of Hindi teachers' training colleges on a zonal basis in the non-Hindi speaking areas.
- (vii) Provision of Hindi books in school libraries in non-Hindi speaking States.

- (viii) Organisation of an exhibition of scientific and technical literature in Hindi at various places in the country.
- (ix) Compilation of the Hindi encyclopaedia in ten volumes by the Nagari Pracharini Sabha, the first two volumes of which have been released.
- (x) Preparation of standard manuals in various subjects.
- (xi) Preparation of terminological indices of 14 standard Hindi works and publication of omnibus volumes of works of 16 eminent writers.
- (xii) Organisation of lecture tours of scholars from Hindi-speaking areas to non-Hindi speaking areas and *vice versa*.
- (xiii) Grants to State Governments in non-Hindi speaking areas and to voluntary organisations for promotion of Hindi and appointment of Hindi teachers.
- (xiv) Preparation of lists containing words common to Hindi and other regional languages.
- (xv) Preparation of bi-lingual and multi-lingual dictionaries.
- (xvi) Preparation of bi-lingual alphabet charts in Hindi and other regional languages.
- (xvii) Award of prizes to Hindi books of outstanding merit.
- (xviii) Translation of standard works in foreign languages into Hindi.
- (xix) Finalisation of the form of Devanagari script.
- (xx) Collection and indexing of special vocabulary of arts and crafts.
- (xxi) Evolution of symbols in Devanagari script for sounds in other regional languages.
- (xxii) Preparation of bi-lingual primers and readers.
- (xxiii) Preparation of primers for foreigners.
- (xxiv) Holding of seminars of Hindi Teachers from non-Hindi speaking States in Hindi-speaking States and *vice versa*.
- (xxv) Translation and publication of general books in Hindi.
- (xxvi) Publication of revised and critical editions of standard Hindi works now out of print.
- (xxvii) Starting of Hindi Teachers' Training Colleges.
- (xxviii) Establishment of the Central Hindi Directorate and its regional offices for propagation and development of Hindi.
- (xxix) Establishment of a Standing Commission for scientific and technical terminology.

YOUTH WELFARE

The highlights of the endeavour in the field of youth welfare have been as follows :

- (i) Organisation of annual inter-university youth festivals since 1954 and assistance to universities for the organisation of inter-collegiate festivals.
- (ii) Holding of youth leadership training camps, where short-term training is imparted to selected teachers to help and equip them to organise youth welfare activities in their institutions in a better and effective manner.
- (iii) Travel concessions and financial assistance for organising youth tours to places of historic, scenic and cultural interest and to development project areas.
- (iv) Assistance to the Youth Hostels Association of India and State Governments for setting up youth hostels all over the country.
- (v) Assistance to universities in the promotion of youth welfare boards and committees for the successful implementation and co-ordination of youth welfare activities.
- (vi) The setting up of non-student youth clubs and centres.

- (vii) Organising labour and social service camps to inculcate a sense of dignity in manual labour in students and to bring them into contact with villages.
- (viii) Campus Work Projects Scheme to provide amenities such as gymnasias, swimming pools, open air theatres, recreation halls-cum-auditoria, etc., to universities and other educational institutions.
- (ix) The setting up of a National Youth Centre.

PHYSICAL EDUCATION AND SPORTS

Physical Education

A 'National Plan of Physical Education and Recreation' has been prepared for the promotion of physical education and recreation. The plan aims at implementing the syllabi of physical education, popularising norms of physical fitness tests, conducting seminars, awarding fellowships and scholarships for higher studies in physical education, granting assistance to *Vyayamshalas* and *Akhadas*, holding physical efficiency weeks and festivals and producing documentary and feature films on physical education. All these schemes are being carried out.

The first National College of Physical Education, named after Rani Lakshmi Bai of Jhansi, was set up at Gwalior in 1957. The College offers training facilities for a three-year degree course in physical education. Up to 1961, the college has produced 40 graduates of physical education. It has since thrown open its admission to girl students also.

A Central Advisory Board of Physical Education and Recreation has been set up to advise Government on co-ordination of programmes and activities.

Sports

Encouragement offered to the organisation of sports has been in the following directions:

- (i) Rendering assistance to the national sports organisations (one for each game), on the advice of the All-India Council of Sports, for the purchase of sports equipment, sending Indian teams abroad, inviting foreign teams to play in India, holding national championships, etc.
- (ii) Setting up of State Sports councils in Andhra Pradesh, Assam, Bihar, Maharashtra, Delhi, Himachal Pradesh, Kerala, Madras, Mysore, Orissa, Rajasthan, Tripura and Uttar Pradesh.

A Central Institute of Coaching has been established at Patiala. It trains first class coaches in all games under the guidance of foreign experts. It lays special emphasis on popularising sports and games in educational institutions and in rural areas, besides the continuation of the existing schemes for the promotion of sports and games.

The All-India Council of Sports advises the Government of India and the Sports Federations in the matter of development of games and sports in the country.

National Discipline Scheme

In order to bring up the younger generation under a proper code of discipline and to instil in them ideals of good citizenship and comradeship, a scheme for the physical and general social training of displaced children was introduced in July 1954. The scheme has since been extended to other educational institutions and over eight lakh children are under training in various States at present.

CHAPTER IX

CULTURAL ACTIVITIES

The National Culture Trust was set up to promote art and culture and foster consciousness of art among the people. These objectives are secured through the agency of the Lalit Kala Akademi (Academy of Art), Sangeet Natak Akademi (Academy of Dance, Drama and Music) and Sahitya Akademi (Academy of Letters). The facilities for mass communication at the disposal of the State have also been utilised to make the people conscious of their cultural heritage. A number of institutions have collaborated in the task of popularising traditional arts and crafts*.

ART

Lalit Kala Akademi

The Lalit Kala Akademi, set up in 1954, promotes the development of fine arts and evolves a programme of work for the growth and nourishment of painting, sculpture and other graphic arts. It also co-ordinates the activities of the regional or State akademis, encourages exchange of ideas among various schools of art, publishes literature and fosters inter-regional and international contacts through exhibitions, exchange of personnel and of art objects.

The Akademi holds a National Exhibition of Art every year at New Delhi, which also visits different State capitals by rotation. Exhibitions of the arts and crafts of Eastern and Western countries in India and of Indian arts and crafts abroad are also organised by the Akademi. Seminars devoted to various aspects of art are also held periodically.

The Akademi is conducting a survey of the arts and crafts of different regions of the country with particular reference to details of work and living conditions of indigenous craftsmen, painters and sculptors.

The Akademi makes annual awards to outstanding artists participating in the National Exhibition of Art.†

Publications

Among the art publications brought out by the Akademi are *Mughal Miniatures*, *Portfolio of Contemporary Painting*, *Krishna Legend in Pahari Painting*, *Ajanta Painting*, *Mewar Painting*, *Kishangarh Painting*, *Birbhum Terracottas*, *Bundi Painting*, *Paintings of the Sultans and Emperors in American Collections*, *Miniature Painting*, and picture postcards of *Indian Miniatures*. Booklets on 'Bendre', 'Ravi Varma', 'Hebbar' and 'Chavda' have also been published in the Lalit Kala series on Contemporary Indian Art. The Akademi also brings out a bi-annual art journal *Lalit Kala*.

The Publications Division of the Ministry of Information and Broadcasting has also brought out a number of important art publications. These include *Indian Art Through the Ages*, *Architecture and Sculpture of India*, *The Way of the Buddha*, *Kangra Valley Painting and Basohli Painting*.

National Gallery of Modern Art

The National Gallery of Modern Art, established in 1954, possesses 2,056 art objects representing trends in art for the last hundred years.

*For lists of these recognised institutions, see Appendices.

† For a list of 1962 awards, see Appendices.

Among the distinguished artists whose works are represented at the gallery are Rabindranath Tagore, Nandalal Bose, Abanindranath Tagore, Jamini Roy, D. P. Roy Chaudhury, Amrita Sher Gill, Sudhir Khastagir and many other modern painters and sculptors.

Museums

A Central Advisory Board of Museums, set up in 1956, advises the Government of India on matters relating to the reorganisation and development of museums in the country, a list of which is given in the Appendices.

DANCE, DRAMA AND MUSIC

Sangeet Natak Akademi

The Sangeet Natak Akademi, inaugurated in 1953 and registered as a Society in 1961, directs its activities to the fostering of dance, drama and music. It promotes research, encourages setting up of theatre centres and training institutions, organises seminars and festivals, awards prizes, and fosters cultural exchange. It is also organising libraries of records, books and films relating to the fields of its activity.

The Akademi maintains close liaison with the institutions it has recognised* and with affiliated regional akademis now functioning in Andhra Pradesh, Assam, Bihar, Jammu and Kashmir, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Rajasthan and West Bengal. These regional akademis are collaborating with the national organisation in surveying the various art forms in the country. Drama competitions are organised by the Akademi to encourage dramatic activity in general and the writing and production of new plays in particular.

There are two training institutions being run by the Akademi—the National School of Drama and Asian Theatre Institute at New Delhi and the Manipur Dance College at Imphal.

The Akademi makes annual awards to outstanding artists in the field of dance, drama, music and films.†

Radio Drama

The National Programme of Plays, broadcast simultaneously from different stations of All India Radio in the languages of the regions, makes available to listeners all over India some of the best known plays in Indian dramatic literature of the past 75 years. Twelve such plays, including two in Sanskrit, were broadcast during the year 1961.

Radio Sangeet Sammelan

This regular annual musical event of All India Radio aims at stimulating appreciation of the principal forms of classical music and presenting a variety of ragas and raginis by exponents of Hindustani and Karnatak music. *Sugam Sangeet* or light music sessions are held in continuation of the classical music sessions. An annual music competition confined to young artists (which precedes the *Sammelan*) aims at discovering new talent. Group music competitions have become a feature of the *Sammelan*. Symposia to discuss the development of music and possibilities of giving it a new direction are also held.

National Programme of Music

Started in 1952, this AIR programme featuring eminent artists aims at fostering a better mutual appreciation between the two systems of music—Hindustani and Karnatak. Regional and folk music and operas are also broadcast periodically.

*For a list of these recognised institutions, see Appendices.

†For a list of the 1961-62 awards, see Appendices.

National Programme of Operas

This programme, broadcast from Delhi and relayed by all stations of AIR once every two months, makes available to listeners some of the best known traditional and modern operas and musical tunes in different regions of the country.

Vadya Vrinda

The AIR *Vadya Vrinda* (National Orchestra), set up in 1952, has built up a sizeable repertoire of compositions based on traditional *ragas* and folk tunes. It has also attempted thematic compositions.

Other AIR Programmes

Classical music recitals of short duration (*Subaddha Sangeet*) are also broadcast. *Vrindagan* (choral music), *Sugam Sangeet* (modern light music based on classical and folk melodies), folk and devotional music and western music broadcast from Bombay, Madras, Calcutta and Delhi are among other forms of musical programmes of All India Radio aimed at the fostering of music in the country.

LITERATURE

Sahitya Akademi

The Sahitya Akademi, inaugurated in 1954, is "a national organisation to work actively for the development of Indian letters and to set high literary standards, to foster and co-ordinate literary activities in all the Indian languages and to promote through them all the cultural unity of the country".

The publication of a *National Bibliography of Indian Literature*, covering all books of literary merit published in the twentieth century in the fourteen major languages specified in the Constitution, as well as books in English published in India or written by Indian authors, is one of the important activities of the Akademi. A comprehensive "Who's Who of Indian Writers" has been published by the Akademi.

Among other publications of the Akademi already released are a critical edition of Kalidasa's *Meghaduta* and *Vikramorvasiya*, a history of Malayalam literature, a history of Bengali literature, the second volume of an *Anthology of Sanskrit Literature*, anthologies of Punjabi, Kashmiri, Tamil, Telugu, Urdu and Assamese poetry, Vaishnava lyrics of Assam and Bengal, one-act plays in Gujarati, short stories in Gujarati, Tamil and Telugu, selections of Bharati's poems in Tamil, of Rajwade's and Agarkar's prose in Marathi and Diwan Kauromal's prose in Sindhi, a *Symposium on Contemporary Indian Literature*, an *Anthology of Contemporary Indian Short Stories* and a Russian-Hindi dictionary. Publications ready for press or in preparation include critical editions of Kalidasa's *Sakuntala* and *Kumarasambhava*, histories of Assamese and Oriya literatures, two volumes of an *Anthology of Sanskrit Literature* and a Tibetan-Hindi dictionary.

Bharatiya Kavita—1953, an anthology of poems selected from each of the fourteen languages along with their Hindi translations, has been published. The second volume covering the year 1954-55 has also been published and the third covering 1956-57 is in the press.

A number of Indian and foreign classics have been translated and published in several Indian languages. The first two of eight volumes of Rabindranath Tagore's works (original in Bengali in Devanagari script) covering 101 poems and 500 songs entitled *Ekottarasati* and *Gita-Panchasati* have been published. Gujarati, Punjabi, Marathi and Oriya editions of *Ekvinsati* (21 short stories) have also been released. The Tagore centenary volume with contributions by distinguished writers from all over the world was published at the time of the International Literary

Seminar. A small volume entitled *Kavi Katha* (Our Poet), giving the life story of Tagore for children, was published in Assamese, Bengali, Hindi, Gujarati and English.

The International Literary Seminar in November 1961 was organised by the Sahitya Akademi in collaboration with the Indian Council for Cultural Relations to mark the Tagore Centenary year. Nearly 40 delegates from various parts of the country and 29 distinguished scholars and writers from abroad participated in the Seminar to discuss "Tagore and Modern Indian Literature", "Tagore and the World", and "Literature and Modern Life." In June 1961 the Akademi participated in the celebrations of the International Union of Academies in Stockholm.

The Akademi publishes two half-yearly journals, one in English called *Indian Literature* and the other in Sanskrit called *Sanskrita Pratibha*.

The Akademi also makes annual awards to authors of outstanding books published in Indian languages.*

Gandhian Literature

Early in 1956, a scheme was launched by the Ministry of Information and Broadcasting to publish a complete collection of Mahatma Gandhi's writings, speeches and letters in chronological order in a series of volumes. The first six volumes covering the period 1884 to 1907 have been released.

Literary Broadcasts

The National Symposium of Poets, first organised in 1956 by AIR, is now a regular annual feature in which leading poets of the country participate.

An all-India gathering of writers representing different branches of creative writing was convened in 1956. The trends in contemporary Indian poetry, vital problems concerning Indian literature, contemporary Indian fiction and short stories, the use of language for mass communication, problems connected with contemporary dramatic literature, the growth of humour and the growth of prose in Indian literature were discussed in course of the first five sessions. The theme of the *Samaroh* in 1961 was "Tagore and Indian Literature".

The National Programme of Contemporary Literature, inaugurated in 1960, brings to listeners all over the country a selection of the creative and critical writing being produced in the regional languages of India. Broadcast on the last Thursday of every quarter, the programme covers short stories, skits, poems and other literary creations broadcast from various stations by well-known writers and litterateurs in the regional languages.

The Patel Memorial Lectures, delivered annually since 1955 by eminent persons and presenting in a popular manner the results of their study and experience, aim at contributing to the existing knowledge in a given subject and promoting awareness of contemporary problems. The Lad Memorial Lectures, instituted in 1958, are delivered in Marathi from the radio stations serving the Marathi-speaking region.

National Book Trust

The National Book Trust was set up in 1957 to encourage the production of good literature and to make such works available at moderate prices to libraries, educational institutions and the public. Thirty-five such publications have so far been released.

The Trust will also publish standard works on education, science, culture and the humanities. Classical Indian literature, the translation of foreign classics and the translation of Indian classics from one regional language to another will receive special attention. Universities and

*For a list of the 1961 awards, see Appendices.

other learned bodies can seek the assistance of the Trust for the publication of approved books. The Publications Division of the Ministry of Information and Broadcasting is the principal publisher of the Trust.

Development of Modern Indian Languages

A scheme costing Rs. 20 lakhs was drawn up by the Government of India for the development of modern Indian languages during the years 1958-61. It was intended to prepare and publish encyclopaedias, books of knowledge as well as bilingual or multi-lingual dictionaries of Indian languages under this scheme. Publication of old manuscripts or rare books, of catalogues and bibliographies, preparation and publication of popular books on science and culture and books bringing out similarities in grammar, syntax, etc., among the different languages, also are to be covered. The scheme has been retained in the Third Plan with a provision of Rs. 99 lakhs.

PROMOTION OF INTER-STATE CULTURAL UNDERSTANDING

Exchange of Cultural Troupes

Under the Inter-State Exchange of Cultural Troupes, introduced in 1959-60, troupes are sent to other States.

Exchange of Artists

Exchange of eminent artists is being organised to promote understanding of the music and dance forms of the different regions of India.

Open Air Theatres

Open air theatres are being established in rural areas to provide facilities to the people to stage drama, dance and other cultural activities. During 1961-62 grants were provided to all the State Governments for establishing over 100 such theatres in the rural areas.

Assistance to Theatre Groups

Theatre groups, registered under the Registration of Societies Act, 1860, and which have produced at least three separate dramas during the previous five years and staged not less than 50 shows during the previous year, are provided grants under a scheme launched in 1960-61 to encourage the theatre in the country. Such theatre groups are also eligible to receive financial assistance to enable them to send five persons to visit theatre groups at other places to study the techniques adopted by them.

Another scheme is in operation to offer assistance to professional theatres by way of meeting the deficit of the theatre groups on a matching basis by the Government of India and the State Governments. Initially such assistance has been limited to one theatre group in each State.

Grants to Cultural Organisations

Registered cultural organisations are provided grants for building purposes. Financial assistance is also given to cultural societies to implement their programmes.

CULTURAL RELATIONS WITH OTHER COUNTRIES

External Relations Division

An External Relations Division has been established in the Ministry of Scientific Research and Cultural Affairs to promote better understanding and goodwill by means of exchange of delegations of artists, students, scholars, publications, exhibitions and art objects with other countries, as also through presentation of books, selection of Indian teachers for service abroad, participation in international congresses and conferences, cultural agreements, construction and maintenance of international students'

houses and hostels, creation of chairs of Indology abroad and assistance for the publication of foreign translations of Indian classics.

Delegations

The itineraries of the Indian delegates, sponsored or assisted by the Division during 1961, included visits to Nepal, Pakistan, Burma, Cambodia, Morocco, Philippines, Afghanistan, Japan, Australia, USA, USSR and different European countries.

The delegations and visitors to India sponsored during the same period belonged to Sikkim, Nepal, Fiji, Bulgaria, Brazil, Holland and Mongolia.

Cultural Agreements

Cultural Agreements with Greece and Norway were entered into in 1961. Other countries with which agreements have been entered into earlier are Japan, Indonesia, Rumania, Poland, Turkey, Iraq, the United Arab Republic, Iran, Czechoslovakia, USSR, Yugoslavia and Mongolia.

Grants

Financial assistance in the form of grants-in-aid has been given to more than twenty societies and institutions in India and abroad engaged in fostering closer cultural relations between India and other countries.

International Students' Houses

The Governments of Maharashtra and West Bengal were provided with funds for construction of International Students' Houses at Bombay and Calcutta. YMCA of India and London also received grants and loans for the construction of an extension block to the Indian Students' Union and Hostel, London. Financial assistance is also being given to the proposed India House at the Cite Universitaire, Paris.

Indian Council for Cultural Relations

The Indian Council for Cultural Relations was established in November 1949, with the object of establishing, reviving and strengthening cultural relations between India and other countries. Although financed entirely by the Government of India, the Council functions as an autonomous body.

Amongst the many activities of the ICCR, the following may be mentioned : arranging orientation courses, summer camps, excursion tours and social get-togethers for the benefit of foreign students in India ; exchange of eminent scholars, savants and students; maintenance of chairs of Indology in foreign universities outside India; appointment abroad of lecturers in Indian culture; presentation of books and films about India; welfare of foreign students in India; reception and entertainment of distinguished foreigners in India; organisation of lectures by eminent scholars, exhibition of paintings and photographs and award of travel grants and scholarships to Indian and foreign students.

The Council publishes two quarterly journals, namely, *Indo-Asian Culture* in English and *Thaqafat-ul-Hind* in Arabic. Besides, it subsidises a journal in Persian and English entitled *Indo-Iranica*. The Council also sponsors the publication of rare manuscripts and valuable books on India. It undertakes publication of books and brochures relating to different aspects of India's culture and translation of Indian publications in foreign languages. During 1961 the Council organised the first Asian History Congress in collaboration with India International Centre and the Indian History Congress.

CHAPTER X

SCIENTIFIC RESEARCH

The policy of the Government of India with regard to science and scientific research was formulated in a resolution of March 4, 1958, and laid as a statement on the table of both Houses of Parliament on March 13, 1958.

The aims of this policy are :

- (i) to foster, promote, and sustain, by all appropriate means, the cultivation of science and scientific research in all its aspects—pure, applied, and educational;
- (ii) to ensure an adequate supply, within the country, of research scientists of the highest quality, and to recognise their work as an important component of the strength of the nation;
- (iii) to encourage and initiate, with all possible speed, programmes, for the training of scientific and technical personnel, on a scale adequate to fulfil the country's needs in science and education, agriculture and industry, and defence;
- (iv) to ensure that the creative talent of men and women is encouraged and finds full scope in scientific activity;
- (v) to encourage individual initiative for the acquisition and dissemination of knowledge, and for the discovery of new knowledge, in an atmosphere of academic freedom; and
- (vi) in general, to secure for the people of the country all the benefits that can accrue from the acquisition and application of scientific knowledge.

COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Scientific research under State auspices in India is carried out mainly through the Council of Scientific and Industrial Research and the various national laboratories or research institutes set up under its control and in universities and research institutes aided by the Council. The Council also grants fellowships to qualified persons who wish to pursue science as a career and disseminates scientific knowledge and information. It has also the responsibility of administering the "Pool for temporary placement of well-qualified Indian scientists and technologists returning from abroad." It maintains a National Register of Scientific and Technical Personnel in the country. In general, the Council is the chief vehicle of Government's policy for the promotion and co-ordination of scientific and industrial research in India. Its activities are financed mainly by the Union Government.

National Laboratories

The National laboratories and institutes set up by the Council at various centres in the country and the functions entrusted to them are shown in the following table.

TABLE 39
NATIONAL LABORATORIES/INSTITUTES

<i>Name of Laboratory/Institute</i>	<i>Location</i>	<i>Functions</i>
1. National Chemical Laboratory	Poona	Fundamental and applied research covering the whole field of chemistry for which other specialised institutes have not been set up. The National Collection of Type Cultures is housed in the Laboratory.

TABLE 39—(contd.)

<i>Name of Laboratory/Institute</i>	<i>Location</i>	<i>Functions</i>
2. National Physical Laboratory	New Delhi	Research in problems relating to physics, both fundamental and applied. Maintenance of Standards. Testing facilities are also available.
3. Central Fuel Research Institute	Jealgora (Bihar)	Fundamental and applied research on fuels—solid, liquid and gaseous. Physical and chemical surveys of Indian coals are conducted through six coal survey stations under the Institute.
4. Central Glass and Ceramic Institute	Jadavpur	Research on different aspects of glass and ceramics, pottery, porcelain, refractories and enamels; development of processes for manufacture of glass and ceramic articles; standardisation of raw materials used in the ceramic industry.
5. Central Food Technological Research Institute	Mysore	Food processing and conservation of food, food engineering and all aspects of fruit technology.
6. National Metallurgical Laboratory	Jamshedpur	Fundamental and applied metallurgical research.
7. Central Drug Research Institute	Lucknow	All aspects of drug research including evaluation and standardisation of crude drugs, discovery of substitutes for pharmacopoeial drugs and plants, pharmaceutical and synthetic chemicals, biochemistry and biophysics, infection, immunisation, pharmacology, chemotherapy and experimental medicine.
8. Central Road Research Institute	New Delhi	Research on road materials, testing of road materials and road surfaces.
9. Central Electro-Chemical Research Institute	Karaikudi (Madras)	Research on different aspects of electro-chemistry, including electro-metallurgy, electro-deposition and allied problems.
10. Central Leather Research Institute	Madras	Fundamental and applied aspects of leather technology.
11. Central Building Research Institute	Roorkee	Engineering and structural aspects of building and human comforts in relation to buildings.
12. Central Electronics Engineering Research Institute	Pilani (Rajasthan)	Design and construction of electronic equipment and components and test equipment.
13. National Botanical Gardens	Lucknow	Collection and large-scale cultivation of economic and medicinal plants of industrial importance.
14. Central Salt Research Institute	Bhavnagar	Investigation of production of pure salts, reduction in cost of production; economic utilisation of by-products of salt manufacture.

TABLE 39—(concl'd.)

<i>Name of Laboratory/Institute</i>	<i>Location</i>	<i>Functions</i>
15. Central Mining Research Station	Dhanbad	Research in methods of mining, safety in mines and mine machinery.
16. Regional Research Laboratory	Hyderabad	Research in problems relating to the industries and raw materials of the area.
17. Indian Institute for Biochemistry and Experimental Medicine.	Calcutta	Research in various aspects of bio-chemistry as applied to medicine, bacteriology, etc.
18. Birla Industrial and Technological Museum	Calcutta	A museum to depict scientific and technological advancement.
19. Regional Research Laboratory	Jammu-Tawi (Jammu & Kashmir)	Research in problems relating to the industries and raw materials of the area and research specially directed to medicinal plants of the Himalayas (Kashmir Region).
20. Central Mechanical Engineering Research Institute	Durgapur (W. Bengal)	Research in mechanical engineering in all its aspects.
21. Central Public Health Engineering Research Institute	Nagpur	Research in all aspects of public health engineering and co-ordination of work of all interested agencies in this field in the country.
22. National Aeronautical Laboratory	Bangalore	Scientific investigations of the problems of flight with a view to their practical application to the design, construction and operation of aircraft in India.
23. Regional Research Laboratory	Jorhat	Research problems relating to more efficient utilisation and better conservation of important national resources of Assam and other regional needs posing special problems.
24. Central Indian Medicinal Plants Organisation	New Delhi	Co-ordination of activities in the development of cultivation and utilisation of medicinal plants on organised basis.
25. Central Scientific Instruments Organisation	New Delhi	Promotion and development of indigenous manufacture of scientific instruments for teaching, research and industry.
26. Indian Institute of Petroleum	Dehra Dun	Research in petroleum refining and processing of natural gas, petrochemicals, etc., and providing facilities for the training of personnel for petroleum industry.
27. Central Board of Geophysics	Hyderabad	Encourage and help geophysical work in existing institutions, create new research units and projects and co-ordinate work carried out at present in universities and scientific departments.

The Council has also set up a Rain and Cloud Physics Research Unit at New Delhi and a Genetics and Biometry Research Unit at Barrackpore.

Sponsored Research

Through a liberal system of grants-in-aid, scientists in other technical institutes, industrial laboratories and universities are enabled to pursue fundamental and applied research and develop their own special fields. There are, at present, more than 450 such schemes in progress. Apart from the practical results achieved, the schemes provide opportunities of training for young research workers and develop centres of independent research work. Junior and senior fellowships are also being awarded to talented young persons, besides financial aid to retired scientists.

Co-operative Research Associations

Co-operative research associations in different industrial fields are being assisted in their capital and recurring expenditure and by way of technical advice, preparation of plans and procurement of expertise and materials. Six such associations now functioning are catering to the textiles, rubber, silk, art silk and paint industries. Similar associations are in the process of being formed for the tea, foundry, cement, mica, automobile, radio and electronic industries.

Liaison

Liaison units are being set up in the laboratories to maintain contacts with the industry, industrial and trade associations, government departments and other users of research. A Scientific Extension Service Unit is maintained at New Delhi to make use of the available scientific knowledge for the economic betterment of rural and semi-urban communities. Extension wings of the national laboratories arrange practical demonstration of the processes for the benefit of the industry. A short-term training in the know-how of the processes is also imparted to the representatives of the industry. Thirty processes were leased out in 1961 to the industry for exploitation, besides 25 released free of charge to interested parties.

Vigyan Mandirs

Forty-one centres known as 'Vigyan Mandirs' have been set up generally at sites covered by Community Development projects. Equipped with a laboratory each and manned by suitably qualified and trained personnel, these centres disseminate scientific knowledge among the rural populace and educate them in the potentialities of the methods of science as applied to their day-to-day life. Popular editions of scientific literature are being produced in the Indian languages to popularise knowledge of science among the people.

NUCLEAR RESEARCH AND ATOMIC ENERGY

The Department of Atomic Energy is responsible for formulating and implementing policies in all matters concerning atomic energy. The scientific and technical work of the Department is carried out by the Atomic Energy Establishment and the Atomic Minerals Division and its industrial work by the Indian Rare Earths Ltd. and the Travancore Minerals Ltd.

The Atomic Energy Establishment, located at Trombay near Bombay, is the national centre for research and development in the field of atomic energy. Over 2,800 scientists and technicians are working in the Establishment and a steady supply of trained personnel is provided by a training school with about 150 trainees each year. The Establishment is organised into 15 divisions, which cover various aspects of physics, chemistry, engineering, biology and medicine, each with its own laboratory. There are at present three reactors in operation—"Apsara", a 1 megawatt pool type reactor in operation since 1956; the "Canada-India Reactor" which is potentially one of the world's largest isotope producers and has special facilities for the in-pile testing of engineering loops for future power reactors;

and a zero energy reactor—"Zerlina" which went into operation in January 1961, and is being used for the study of various combinations of fuel elements and moderators.

To fuel these reactors, the Trombay Establishment operates plants to produce nuclear grade uranium metal and fabricate the metal into the fuel elements. A plant has also been set up for research on production of heavy water and reconcentration of heavy water which may become downgraded owing to its use as the moderator in the "Canada-India Reactor" and "Zerlina".

Among other activities of the Establishment are the provision of film badge and health survey services for ensuring safety of persons handling radioactive material and production of the nuclear electronic equipment required for the work of the Department. Laboratories for engineering loop experiments, ore extraction, ore dressing and chemical engineering were commissioned in 1961. A 5.5 MeV Van de Graaff accelerator has gone into operation.

The Atomic Minerals Division, organised into four field circles functioning under the central headquarters at Delhi, is responsible for the survey, development and acquisition of atomic minerals and for carrying out research connected therewith. It also renders assistance to the public in the exploration of radioactive minerals by way of free technical advice and loan of G.M. counters to bona fide prospectors, recognised institutions, universities and mining concerns.

Several potential deposits of uranium have been discovered in different parts of the country, those in Bihar and Rajasthan being comparatively larger and richer. The present major source is the Jaduguda deposit in Bihar which when fully developed will be capable of producing 1,000 tons of ore per day. Other sources in Rajasthan, Kerala and Madras are being extensively surveyed. A uranium ore mill is being set up at Jaduguda for treating and concentrating the ore. An expanded Uranium Metal Processing Plant and a Fuel Fabrication Plant for providing the fuel requirements of the Tarapur Power station are proposed to be set up during the Third Plan.

The Travancore Minerals Ltd. was set up by the Atomic Energy Department in October 1956 with the Kerala and Madras Governments as partners. Its main products are ilmenite and monazite. The monazite produced here is sent to the processing plant at Alwaye managed by the Indian Rare Earths Limited, jointly owned by the Union Government and the Government of Kerala. This plant produces rare earths (cerium) compounds as the main product and trisodium phosphate as a by-product. The residual crude thorium hydroxide is sent to the thorium plant at Trombay where thorium nitrate is extracted. The residual uranium fluoride is sent for further processing to the uranium metal plant. There is a pilot plant in operation at Ghatsila, Bihar, for the extraction of uranium from copper tailings. Heavy water will be produced as a by-product at the fertiliser plant which is being built at Nangal.

The activities of the Department also include a large-scale nuclear power programme and the development of power reactors which will utilise the country's vast thorium reserves. The first atomic power station of 300 MW capacity which will be located at Tarapur, near Bombay, is expected to go into operation by the end of the Third Plan period.

To promote research in nuclear science, subventions are granted to various universities, laboratories and research institutions. The Tata Institute of Fundamental Research, Bombay, is the national centre for advanced study and fundamental research in nuclear science and mathematics. Other institutions receiving the support of the Atomic Energy Department are the Saha Institute of Nuclear Physics, Calcutta, and the Physical Research

Laboratory, Ahmedabad A laboratory is being established at Gulmarg in Kashmir at an altitude of 9,000 feet for high altitude work in cosmic rays, biology, physiology and other subjects. A high altitude Cosmic Ray Laboratory is also proposed to be established at Kodaikanal in Madras State.

Scholarships tenable in various universities and science institutions are granted by the Department to under-graduate and post-graduate students in physics, chemistry, biology, metallurgy, chemical engineering, geology and mining. It also awards junior and senior research fellowships to attract students of science to a career in the Department and generally to encourage research in nuclear science.

Close liaison and contact is being maintained with the International Organisation of Pure and Applied Biophysics and with the atomic energy authorities in USA, UK, France, Canada, USSR, Hungary and Sweden.

OTHER DEPARTMENTAL RESEARCH ACTIVITIES

There are eleven Hydraulic Research Stations under the Central Board of Irrigation and Power. The Central Water, Power and Irrigation Research Centre, Khadakvasla (near Poona), is the pioneer hydraulic research station in India.

A Research and Development Directorate has been set up under the Ministry of Communications (Directorate-General of Civil Aviation). It is concerned with type certification, manufacture of aircraft and development of specifications for aircraft materials.

The Botanical Survey of India appraises the plant wealth in the country and maintains four regional circles with headquarters at Dehra Dun, Coimbatore, Poona, and Shillong, in addition to a Central Botanical Laboratory at Allahabad and a National Herbarium and Botanical Museum in Calcutta.

The Zoological Survey of India, with headquarters at Calcutta, maintains the standard zoological collections of India, identifies zoological specimens, collects information on the zoology of India and brings out journals, monographs and books. Six regional stations have been established by the Survey at Shillong, Poona, Jabalpur, Jodhpur, Madras and Dehra Dun.

The Geological Survey of India, with headquarters at Calcutta and established more than a hundred years ago, is responsible for the preparation of the geological map of India. The field work of the Survey is conducted through eight regional circles.

The Department of Anthropology, with headquarters at Calcutta, is responsible for conducting anthropological surveys including social, psychological, economic, linguistic, physical, genetic and instructional investigations.

The primary role of the Survey of India with headquarters at Dehra Dun is to carry out topographical surveys and to prepare up-to-date maps.

The Forest Research Institute at Dehra Dun conducts research in the utilisation of timber for constructional purposes.

The All India Radio maintains a research unit in New Delhi to investigate problems relating to the propagation and reception of radio waves and the design and performance of radio receivers.

The Railway Board has established a research centre at Lucknow with sub-stations at Lonavla and Chittaranjan to investigate problems referred to them by the railway workshops and the Central Standards Office (Railways).

The problems of road development and road materials, highways and bridge engineering, ports and harbours, etc., are dealt with by the Roads Organisation functioning under the Ministry of Transport.

The Indian Standards Institution, functioning under the Ministry of Commerce and Industry, lays down standard specifications for materials and products.

OTHER INSTITUTIONS

A number of research organisations financed by private endowments and Governmental assistance are engaged in the field of scientific research. The more important of these are dealt with in the following paragraphs.

The Bose Institute, Calcutta, is engaged in research in physics, chemistry, plant physiology, plant breeding, cytogenetics, micro-biology and zoology.

The Birbal Sahani Institute for Palaeobotany, Lucknow, carries out research in the fossil flora of India and related problems.

The Indian Association for the Cultivation of Science, Calcutta, one of the oldest research organisations in the country, conducts research in fundamental and applied aspects of physics and chemistry.

The Indian Institute of Science, Bangalore, undertakes advanced instruction and conducts original investigations in all branches of scientific knowledge.

The Physical Research Laboratory, Ahmedabad, is a centre for research in atmospheric physics, cosmic rays, electronics and theoretical physics.

The Shri Ram Institute for Industrial Research in Delhi renders research service to industrial concerns.

Several colleges, universities and research institutions provide courses of study and research facilities in the various branches of science.

MEDICAL RESEARCH

The Indian Council of Medical Research, has been engaged in the promotion and co-ordination of research in India ever since its establishment in 1912. It maintains the Nutrition Research Laboratories at Hyderabad, the Virus Research Centre at Poona and the Blood Group Reference Centre at Bombay. It provides grants-in-aid, disseminates information on medical research and publishes two journals.

The National Malaria Institute at Delhi carries out research in methods of malaria eradication.

Apart from medical colleges and attached hospitals each specialising in some branch of research, the country has a number of specialised institutions. The All-India Institute of Hygiene and Public Health, Calcutta, provides training in preventive and social medicine for diseases peculiar to India and ascertains how the results of pure and applied research can be utilised for promoting medical protection and positive health. The School of Tropical Medicine, Calcutta, carries out research in diseases peculiar to tropical areas.

The King Institute of Preventive Medicine, Guindy, Madras, conducts research in the preparation of bacterial vaccines, sterile solutions and therapeutic sera.

Research in tuberculosis and other chest diseases is in progress at the Vallabhbhai Patel Chest Institute, Delhi. Studies of the morphology of the tubercle bacilli and the effect on them of the different drugs constitute a special feature of its investigations.

The Lady Willingdon Leprosy Sanatorium at Chingleput and the Silver Jubilee Children's Clinic at Saidapet have been taken over from the Madras Government and converted into the Central Leprosy Research Institute.

The Haffkine Institute, Bombay, undertakes investigations in the manufacture of vaccines, sera and other biological products. It has been functioning as the chief centre for investigations connected with the prevention and treatment of plague. The scope of the Institute's work has been enlarged to cover, among others, the problems of nutrition, malaria and virus diseases.

Investigations on cancer are carried out at the Indian Cancer Research Centre, Bombay. Statistical surveys of the incidence of cancer in India have also been undertaken by it.

Investigations in the Central Research Institute, Kasauli, relate to problems of microbiology, serology and biochemistry. The Institute maintains a pathological museum.

The Pasteur Institute, located at Coonoor, is engaged on research in rabies, influenza, anti-venom serum, tropical eosinophilia and serological reactions.

The activities of the Central Drugs Laboratory, Calcutta, centre round biological and chemical assays of drugs. The Laboratory maintains a herbarium and tenders technical advice to concerns manufacturing drugs.

One among several privately owned research organisations is the Bengal Immunity Research Institute, Calcutta, which conducts research on a large range of problems which have a bearing on the prevention, control and cure of diseases.

AGRICULTURAL RESEARCH

The Indian Council of Agricultural Research, established in 1929, undertakes, aids, promotes and co-ordinates agricultural and animal husbandry education and research in India.

The Indian Agricultural Research Institute, New Delhi, is the oldest institution devoted to research in agricultural science. It has well-equipped laboratories and extensive farms for carrying out large-scale investigations on food crops.

The Indian Veterinary Research Institute, Izzatnagar, deals with veterinary diseases and their cure, while the National Dairy Research Institute at Karnal concerns itself with research connected with quality of milk and analysis of milk samples for quality control purposes. The Central Rice Research Institute at Cuttack and the Central Potato Research Institute at Simla devote themselves to problems of research relating to rice and potatoes, respectively.

There are nine commodity committees which devote themselves to research in specific commodities namely, cotton, jute, sugarcane, coconut, tobacco, oilseeds, arcanut, spices and lac. These committees have their own laboratories and research institutions.

The Central Marine Fisheries Research Station, Mandapam, carries out biological investigations in edible fish found in the coastal waters of the country.

The Central Inland Fisheries Research Station, Barrackpore, conducts research in inland fish—estuarine, riverine, lacustrine and pond fish.

The Central Fisheries Technological Research Stations at Cochin and Ernakulam, undertake studies in fishing gear material, gear design, fishing methods and preservation of fish and fish products.

CHAPTER XI

HEALTH

The steady improvement in the general health of the population is reflected in broad terms in the following table showing the birth rate, death rate and expectation of life during the last two decades.

TABLE 40
VITAL HEALTH STATISTICS

	(per thousand of population)		Infant mortality rate (per thousand births)		Expectation of life at birth	
	Birth rate	Death rate	Male	Female	Male	Female
1941—51 ..	39·9	27·4	190·0	175·0	32·45	31·66
1951—56 ..	41·7	25·9	161·4	146·7	37·76	37·49
1956—61 ..	40·7	21·6	142·3	127·9	41·68	42·06

This improvement has been due to concerted measures undertaken in several directions. Health programmes are primarily the responsibility of the State Governments. The Union Government have, however, sponsored and supported major schemes for improving the standards of health of the nation under the Plans. The broad objective of the health and family planning programmes has been to expand health services, to bring about progressive improvement in the health of the people by ensuring a certain minimum of physical well-being and to create conditions favourable to greater efficiency and productivity. As against outlays of Rs. 140 and Rs. 225 crores in the First and Second Plans respectively, the health and family planning programmes in the Third Plan involve an outlay of about Rs. 342 crores, of which Rs. 297 crores will be in the States' sector and the rest in the Central sector.

PREVENTION AND CONTROL OF DISEASES

Malaria

The National Malaria Control Programme, launched in 1953, was converted into the National Malaria Eradication Programme from April 1, 1958. The programme is being implemented by the Union Ministry of Health with the active participation of the State Governments as well as with the assistance of the US Technical Co-operation Mission and the World Health Organisation. The National Malaria Institute is responsible for research and for the training of staff in methods of malaria eradication. Six regional co-ordinating organisations have been established at Bangalore, Baroda, Cuttack, Hyderabad, Lucknow and Shillong.

About 38·24 crores of people were given protection and 390 malaria units were functioning as on March 31, 1961. Surveillance procedures have been instituted in 344 units. In 1961-62 the coverage was 92·5 per cent in the first round and 98·4 per cent in the next. In the border areas twenty-five and half units are engaged in insecticidal spraying without surveillance.

The percentage of clinical malaria cases treated in hospitals and dispensaries to cases treated for all diseases fell from 10·8 in 1953-54, when the control programme commenced, to 1·3 in 1960-61 and 0·6 by the end of September 1961.

Filaria

The National Filaria Control Programme, launched in 1954-55, consists of (i) mass administration of drugs in filarious communities, and (ii) anti-mosquito measures. Forty-seven control units are functioning. Random sample surveys covering a population of about 248 lakhs were completed by the end of November 1961. They have revealed that over 640 lakh persons live in the filarious areas of the country. Mass therapy has been administered to about 63 lakh persons and 41 lakh houses have been sprayed with insecticides. A centre for practical demonstration and field training has been established at Ernakulam. Eighty medical officers, 27 entomologists and 214 inspectors have so far received training.

Tuberculosis

The National TB Survey, which was completed in 1958 by the Indian Council of Medical Research, showed that nearly 50 lakh persons suffer from active or probably active tuberculosis. It revealed that (i) the morbidity from TB varied from 7 to 30 per thousand persons in different regions; (ii) the prevalence of the disease in villages, small towns and cities is not as markedly different as originally thought; (iii) the morbidity rate is lower for females than for males; (iv) the prevalence of TB is considerably higher in the age group 45 years and above than for other groups; and (v) bacteriologically positive cases vary from 1 to 11 per thousand persons in different areas.

The BCG Vaccination Programme, started in 1948 with the help of the International Tuberculosis Campaign and later of the WHO and the UNICEF, extended protection to 16.4 crore persons—7.8 crores of whom were below 15 years of age—by the end of the Second Plan period. One hundred and seventy-four technical teams, consisting of 123 doctors and 884 technicians, are engaged in field work. During the Third Five Year Plan period it is proposed to cover 10 crore children below 15 years of age. By the end of October 1961, 17.47 crore persons were tested and another 6.1 crore persons vaccinated.

Eight demonstration and training centres have been established at Bangalore, Hyderabad, Madras, Nagpur, New Delhi, Patiala, Patna and Trivandrum. Two more at Agra and Calcutta are to be set up in the near future. Training is also imparted at other institutions such as the Vallabhbhai Patel Chest Institute at Delhi. Training centres in six universities train doctors for the diploma course in tuberculosis. A National Tuberculosis Institute has been established at Bangalore with the assistance of UNICEF and WHO.

The number of TB hospitals, sanatoria and clinics and of beds therein for the years 1950 and 1960 is as shown below.

TABLE 41
TB HOSPITALS, SANATORIA AND CLINICS

	1950	1960
Sanatoria	49	68
Hospitals	35	70
Clinics	110	223
Wards	114	152
Beds	10,371	26,445

There are 15 after-care colonies in India where ex-patients are rehabilitated after they are cured. A work centre to impart vocational training to patients under domiciliary treatment has been established at Madras and eight more such centres will be set up at Amargarh, Delhi, Dhubulia, Hyderabad, Lucknow, Mysore, Pedavegi and Poona. A scheme for the establishment

*Including 5 TB training and demonstration centres with 165 beds.

of open air centres for isolation and treatment of advanced cases has been approved and the setting up of 430 such centres in Andhra Pradesh, Jammu and Kashmir, Mysore and Punjab has received sanction.

Two hundred more clinics, 25 more mobile clinics in rural areas, five more Tuberculosis Demonstration and Training Centres, about 3,500 more beds and 7 After-Care and Rehabilitation Centres are included in the targets of the Third Plan.

The Tuberculosis Association of India is the largest voluntary organisation in the country. Since its establishment in 1939, it has been engaged in stimulating anti-tuberculosis activities in a scientific and co-ordinated manner. It assists the authorities in combating the disease and provides assistance through the Tuberculosis Workers' Conferences, the State TB Association Secretaries' Conference, the technical committees and forums which bring together State officials and voluntary workers. It also runs several institutions which provide training facilities and demonstrate advanced methods for the treatment of TB cases.

Leprosy

The number of leprosy cases in India is now estimated at about 20 lakhs. Andhra Pradesh, Assam, Bihar, Kerala, Madhya Pradesh, Madras, and certain parts of Maharashtra, Uttar Pradesh and West Bengal are areas of high incidence.

Under the Leprosy Control Scheme, started during the First Plan period, four treatment and study centres (one each in Madras, Madhya Pradesh, Uttar Pradesh and West Bengal) and 29 subsidiary centres in different States were established. The subsidiary centres provide for mass treatment of all cases, detection of cases in the early stages of infection and their treatment. The treatment and study centres carry out a detailed survey to study its epidemiology and assess the results of sulphone therapy. By the end of June 1961, 4 treatment and study centres and 133 subsidiary centres were established. An advisory committee reviews the working of the scheme and suggests measures for improvement.

Short-term orientation courses in anti-leprosy work to doctors are being provided at the Medical College, Nagpur. Training facilities are also provided by the Gandhi Memorial Leprosy Foundation Centre, Chilakalapalli, Andhra Pradesh. The Central Leprosy Teaching and Research Institute at Chingleput provides treatment to indoor and outdoor patients at its two hospitals—the Lady Willingdon Leprosy Sanatorium, Chingleput, and the Silver Jubilee Children's Clinic at Saidapet.

The Mission to Lepers, established in 1875, is a voluntary organisation engaged in anti-leprosy work. Important among other such voluntary organisations are Hind Kusht Nivaran Sangh, Maharogi Seva Mandal, Gandhi Memorial Leprosy Foundation, Ramakrishna Mission and Vidarbha Maharogi Seva Mandal.

A committee to examine the various aspects connected with legislation for the control of leprosy was appointed in November 1960.

Venereal Diseases

It has been estimated that about five per cent of the population suffer from syphilis and an equal percentage from gonorrhoea. Yaws is prevalent in a few districts of Andhra Pradesh, Orissa, Madhya Pradesh and Maharashtra.

A demonstration team, established by WHO in Himachal Pradesh in 1949, carried out an extensive survey and a mass treatment programme and trained several teams deputed by the State Governments.

Five VD Clinics at State headquarters and 91 at the district level for the training of medical and auxiliary personnel were established by the end of March 1961. Six headquarter clinics and 100 district clinics are to be

set up in the Third Plan period. These clinics lay emphasis on the integrated function of both prevention and treatment, the epidemiological and case-finding functions, surveys and liaison with local maternity and child health centres for routine ante-natal blood testing.

An intensive mass campaign based on total treatment of the entire population at risk in the Kulu valley of the Punjab was launched in September 1959. Anti-yaws teams, operating in Andhra Pradesh, Madhya Pradesh, Maharashtra and Orissa have covered a large portion of the population at risk.

The first All-India VD and Yaws Conference was held in April 1961 in Simla. It made several recommendations to focus the attention of the public and the health authorities in the country on the problem of venereal diseases. Medical and para-medical personnel were given refresher training in the modern treatment of venereal diseases at the Training and Demonstration Centre in New Delhi and the Institute of Venereology, Madras. The latter also offers post-graduate training.

Influenza

An influenza centre was opened in 1950 at the Pasteur Institute, Coonoor. The centre devotes itself to the study of and research in problems relating to influenza.

Cancer

Problems relating to cancer are under investigation at the Indian Cancer Research Centre, Bombay, and the Chittaranjan National Cancer Research Centre, Calcutta. Clinical facilities are available at the Tata Memorial Hospital, Bombay. The establishment of cancer wards or units in the existing hospitals in the States is being assisted by the Government of India.

NUTRITION AND PREVENTION OF FOOD ADULTERATION

Surveys conducted in India since 1935 have revealed quantitative as well as qualitative deficiency in the diet of the Indian people. The average Indian diet lacks essential food elements like proteins, fats, minerals and vitamins, due to a deficiency of protective foods like vegetables, fruit, milk and eggs.

The general raising of dietary standards is largely an economic problem and is linked up with the development of the economy. Several measures have, however, been taken to meet the nutritional deficiency of certain vulnerable sections of the Indian population, such as expectant and nursing mothers, school children and industrial workers. The measures taken include school feeding programmes, distribution of skimmed milk, protein supplement to the diet of the vulnerable groups, opening of canteens in industrial concerns and offices, and manufacture and popularisation of cheap and nutritious food.

Consumer trials to assess acceptability of protein supplements such as multi-purpose food have been conducted. The results indicate that multi-purpose food produced by the Central Food Technological Institute, Mysore, is not only acceptable but beneficial to health.

The Nutrition Advisory Committee of the Indian Council of Medical Research sponsors schemes for nutrition research, besides advising the Government of India on nutrition matters.

The National Nutrition Advisory Committee was appointed in June 1960, to formulate a national nutrition policy and to recommend measures for improving the nutritional status of the population. Three working groups were appointed by the Committee to undertake detailed studies and formulate specific proposals for (i) production and utilisation of food, (ii) training, education and extension services in the field of nutrition and (iii) programmes designed to improve nutritional status of population

groups and their implementation. Several recommendations have since been made by the Committee.

Diet and nutrition surveys, distribution of skimmed milk and food supplements, and school feeding are among measures being carried out in Andhra Pradesh, Bihar, Gujarat, Madhya Pradesh, Madras, Maharashtra, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal.

Diploma courses for dieticians are being conducted at the All-India Institute of Hygiene and Public Health, Calcutta, since 1947. Twelve diet kitchens have been established in Andhra Pradesh, Bihar, Madhya Pradesh, Madras, Maharashtra, Punjab, Uttar Pradesh and West Bengal, for introducing diet therapy for treatment of nutritional diseases.

Prevention of Food Adulteration

The Prevention of Food Adulteration Act, 1954, and the Rules made thereunder are in force throughout the country, except Jammu and Kashmir. It provides for deterrent punishment to offenders and prohibits the manufacture, import or sale of adulterated food articles. The Central Committee for Food Standards and the Central Food Laboratory, envisaged in the Act, have been set up. The former advises the Central and State Governments on matters arising out of the administration of the Act, while the latter is carrying out investigations to standardise methods of detection and estimation of colouring matter and antioxidants in food. A seminar held in Hyderabad in November 1960 has made important recommendations for the better enforcement of the 1954 Act.

WATER SUPPLY AND SANITATION

In 1951, only 128 towns with a population of 50,000 and over, 60 towns with a population between 30,000 and 50,000 and 210 towns with smaller populations had protected water supply. It was estimated that only 6.15 per cent of the total population was served by protected water supply and only 3 per cent enjoyed the amenity of a sewerage system.

National Water Supply and Sanitation Programme

The National Water Supply and Sanitation Programme, launched in 1954, continues during the Third Five Year Plan period with a provision of Rs. 88.95 crores for the urban schemes and 16.33 crores for the rural. Most of the 369 urban water supply schemes, 100 urban drainage schemes and 348 rural water supply and sanitation schemes, estimated to cost Rs. 102.17 crores under the first two Plans, have been completed and the rest will be completed during the Third Plan period. A Water Supply and Sanitation Committee was appointed in 1960 to assess requirements and suggest means for financing programmes to meet the requirements. It has since submitted its report.

The programme also provides for the training of public health engineering personnel for implementing the programme. The training programme is being implemented at the All-India Institute of Hygiene and Public Health, Calcutta; the Engineering College, Guindy; the Engineering College, Roorkee; and other selected regional field centres. The Central Public Health Engineering Organisation has been set up for helping State Governments in the preparation and execution of their schemes and for giving technical advice and guidance. Similar organisations have also been established in most of the States.

MEDICAL RELIEF AND SERVICE

Medical relief and service is primarily the responsibility of the States. Certain charitable institutions also participate in giving medical relief. Table 42 shows the number of hospitals and dispensaries, the number of patients

treated by them and the expenditure involved in their maintenance during the years 1947 to 1960.

TABLE 42
HOSPITALS AND DISPENSARIES

Year	Number of hospitals and dispensaries	Number of patients treated
1947	3,825	4,30,19,772
1951	9,209	10,07,83,459
1956	10,501	13,33,26,513
1960	11,854	

The following table shows the number of registered medical practitioners and other health personnel at the end of the year 1960.

TABLE 43
HEALTH PERSONNEL

Group	Number
Registered medical practitioners	88,389
Compounders	20,448*
Nurses	32,733
Midwives	38,528
Vaccinators	6,142*
Dentists	†

Contributory Health Service Scheme

The Contributory Health Service Scheme, which came into operation on July 1, 1954, is confined to Delhi and New Delhi and serves 4.56 lakh Central Government employees and their families. The staffs of certain autonomous and semi-Government organisations and their families have been admitted into the scheme. The facilities under the scheme are also available to the members of Parliament. The contributions are based on a graduated scale varying from 50 np. to Rs. 12 per month according to emoluments. There are now 240 full-time medical officers, including 36 specialists. The number of dispensaries is 40, excluding 4 mobile dispensaries serving beneficiaries residing in outlying areas. The number of patients treated during 1961-62 was 52,96,451.

Health Insurance

The Health Insurance Scheme, which provides *inter alia* medical benefits to industrial workers under the Employees' State Insurance Act, 1948, now covers over 16.96 lakh workers in the country. Under the scheme, an insured worker and his family are entitled to receive medical help at the State Insurance dispensaries or at panel doctors' clinics, at their residences and in hospitals.

Colliery and mica workers receive medical help in institutions maintained by the Coal Mines Labour Welfare Fund and the Mica Mines Labour Welfare Fund. Private employers as well as the State Governments provide medical relief to their employees.

Primary Health Centres for Rural Areas

Seventy-four primary health centres were established in National Extension Blocks under a scheme launched in 1954. Each centre serves the Block area with an average population of 66,000. From the centre a team

*Provisional.

† Complete data not available.

of health workers goes round the surrounding areas and looks after their curative and preventive health needs. Two thousand six hundred and eighty-eight such centres had come into being by the end of March 1961. By the end of November 1961, 258 more such centres were established.

INDIGENOUS AND HOMOEOPATHIC SYSTEMS OF MEDICINE

It is the accepted policy of the Government to give all possible encouragement to the indigenous and homoeopathic systems of medicine and incorporate contributions of approved value from them in the modern system of medicine. Several measures have been taken by the Union and State Governments in this direction. As against a provision of 6.21 crores in the Second Plan, the Third Plan provides Rs. 9.8 crores for the development of indigenous systems of medicine.

Udupa Committee

A committee appointed under the chairmanship of K.N. Udupa, to assess and evaluate the present status of the Ayurvedic system of medicine, made recommendations in 1959 on the training, research and pharmaceutical products and status of practice in *Ayurveda*. A Central Council of Ayurvedic Research has been set up in pursuance of one of the recommendations. The functions of the Council are to advise the Government of India on (i) the formulation of a co-ordinated policy of research in *Ayurveda*, (ii) stimulation of such research and (iii) allocation of Central assistance to institutions carrying on research in *Ayurveda*.

Central Institute of Research in Indigenous Systems of Medicine

The Central Institute of Research in Indigenous Systems of Medicine, established in 1953 at Jamnagar, has a 50-bed hospital and an out-patient department, besides a pharmacy, a museum and a pathological research laboratory. A new 'Siddha' unit was started in the year 1956-57. A section of the Institute investigates and studies diagnosis and treatment in Ayurvedic and Siddha systems from the point of view of modern medicine.

Ad hoc schemes of research in *Ayurveda* and *Unani* are also being promoted by grants to States, educational institutions and non-governmental research organisations.

Education

A list of Ayurvedic and Unani Colleges is available in the Appendices.

A post-graduate training centre in Ayurveda has been established at Jamnagar.

Regulation of Practice

State Boards have been set up in almost all States for the regulation of practice in indigenous systems.

Homoeopathy

In 1955, the Government of India approved a five-year degree course in homoeopathy. There are over 30 institutions imparting training in homoeopathy, and some are recognised by the State Boards. Financial assistance is being provided by the Government of India for upgrading some of these institutions. Boards have been set up by the State Governments for the regulation of practice in homoeopathy.

An advisory committee on homoeopathy has been constituted by the Union Government.

DRUG MANUFACTURE AND CONTROL

Drug Control

The Drugs Act and the Drugs Rules are in force in all the States except Jammu and Kashmir. The Union Government have powers to keep a check

on the quality of imported drugs. The State Governments are responsible for controlling the quality of drugs which are manufactured, sold and distributed in the country. Amendments to the Drugs Act made in 1955 and 1960 empower the Central Government to assist State Governments in enforcing control over the quality of manufactured drugs.

The Drugs Technical Advisory Board to advise on technical matters arising out of the administration of the Act, and the Drugs Consultative Committee to advise the Central and State Governments for securing uniformity throughout India in the administration of the Act, have been formed.

The first Indian Pharmacopoeia was published in 1955 and a supplement to it in 1960. The National Formulary of India has also been published.

The Central Drugs Laboratory, Calcutta, serving as a statutory institution under the Drugs Act, analyses and tests samples of such drugs as are sent to it and performs such other functions as are entrusted to it by the Central and State Governments.

Drugs and Magic Remedies (Objectionable Advertisements) Act

This Act, which came into force on April 1, 1955, prohibits the publication of objectionable advertisements relating to sexual stimulants, alleged magic cures for venereal diseases and diseases peculiar to women. Import and export of objectionable advertisements are controlled in close liaison with the Customs and Postal authorities who can, under Section 6 of the Act, intercept articles suspected to contain objectionable advertisements. Liaison is also maintained with Indian Embassies, High commissions, Legations and Consulates abroad. Advertisements of contraceptives are, however, permitted in view of the importance of family planning.

Drug Manufacture

The BCG Vaccine Laboratory was established at Guindy in Madras, in 1948. It supplied 1,63,01,510 cc. of Tuberculin and 64,94,654 cc. of BCG vaccine to indentors in India till the end of November 1961, and 27,81,915 cc. of Tuberculin and 25,76,990 cc. of BCG vaccine to Malaya, Singapore, Burma, Ceylon, Thailand, Pakistan and Afghanistan.

The Central Research Institute at Kasauli (established in 1905) supplies vaccine for TAB, cholera, rabies, antivenom sera, tetanus toxoid, diphtheria anti-toxin and influenza vaccines. Influenza vaccines are also manufactured at the Influenza Centre, Coonoor.

The Hindustan Antibiotics Ltd., Pimpri, and the DDT factory at Delhi, have already gone into production.

The Haffkine Institute at Bombay manufactures sulpha drugs and the Imperial Chemical Industries (India) Ltd. and the Tatas manufacture BHC (benzene hexachloride).

Medical Depots and Factories

The Medical Stores Organisation, having five depots at Madras, Bombay, Hyderabad, Calcutta and Karnal, is maintained primarily for ensuring supply of medical stores of proper quality and approved pattern to Government, semi-Government and certain non-Governmental institutions. During 1961-62, 13,200 regular and a large number of casual indentors drew supplies of the value of Rs. 2.42 crores from these depots.

At the factories of the Organisation, a large number of drugs and dressings are manufactured to meet the requirements of both civil and military medical stores depots. There is also a repair workshop at the Madras depot for repairing surgical instruments and appliances.

EDUCATION AND TRAINING

Medical education in general is the responsibility of the States. The Government of India's interest is limited to the promotion of higher studies and specific schemes of research and specialised training.

There are at present 65 medical colleges, 11 dental colleges* and 5 other institutions for training in the allopathic system of medicine. Establishment of new medical colleges and expansion of existing ones during the Second Plan period raised the admission capacity of these institutions from 3,660 in 1955 to 7,900 in 1961. Expansion of dental colleges at Madras, Amritsar, Lucknow, Calcutta and Bombay and starting of new dental colleges at Trivandrum and Hyderabad were also aided by the Union Government during the Second Plan period. To provide post-graduate training to select doctors in different branches of medicine and surgery, twelve institutions have been upgraded with Central assistance. Financial aid has also been provided for the establishment of full-time teaching units in the clinical and non-clinical departments of medical colleges. Departments of Social and Preventive Medicine were started in eight medical colleges during the First Plan period and in ten other colleges during the Second Plan period.

Central Health Education Bureau

The Bureau, established in November 1956, co-ordinates and promotes health education in the country. It functions through two main—Media and Methods—divisions, produces a quarterly for the Central Public Health Engineering Organisation and maintains a film library. State Health Education Bureaus have been established in most of the States.

All-India Institute of Medical Sciences

The All-India Institute of Medical Sciences was set up in 1956 under an Act of Parliament. An under-graduate course leading to the Bachelor's degree and post-graduate courses in certain subjects are offered by the Institute. Besides the medical college, the Institute will have a dental college, a nursing college, a post-graduate teaching centre and a 650-bed hospital.

Specialised Training

Facilities for the training of nurses exist in practically all major hospitals in the country and in the nursing colleges at Bombay, Hyderabad, New Delhi, Indore and Vellore. States Governments and non-official organisations like the Andhra Mahila Sabha, Madras, have organised short-term courses* with the help of grants from the Centre. By the end of September 1961, 6,572 students were enrolled, of whom 3,258 qualified themselves.

By the end of March 1961, 11,796 *dais* and 2,751 health visitors completed their training.

The Malaria Institute of India is conducting a training course for health personnel working under the schemes to control malaria and filaria. Training leading to a diploma in public health, maternity and child health, nutrition and dietetics and leading to a degree in public health engineering is imparted by the All-India Institute of Hygiene and Public Health, Calcutta.

Training of Auxiliary Medical Workers

A scheme to train auxiliary medical workers (approved in 1954) envisages a two-year course in elementary curative and preventive medicine, minor surgery, sanitation and hygiene, laboratory techniques, health education and, in the case of women workers, also midwifery. Those trained under the scheme are expected to work as aides to doctors and serve the Governments for at least five years.

*For a list of medical and dental colleges, see Appendices.

Training of Refractionists, Opticians and Radiographers

Assistance is being provided to centres in Andhra Pradesh, Kerala, Madras, Mysore and Uttar Pradesh for training refractionists and opticians. Training facilities for radiographers are available in Madras and Maharashtra. Ten more such centres in Andhra Pradesh, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Orissa, Punjab, Rajasthan and Delhi are in the process of establishment.

FAMILY PLANNING

The objects of the family planning programme, as outlined by the Planning Commission, are: (i) to obtain an accurate knowledge of factors contributing to the rapid increase of population in India; (ii) to discover suitable techniques of family planning and devise methods by which knowledge of these techniques can be widely disseminated; and (iii) to make advice on family planning an integral part of service in Government hospitals and public health agencies. The family planning policy aims at reducing birth rates to stabilise the population at "a level consistent with requirements of national economy".

The family planning programme in the Third Plan, with an allocation of Rs. 27 crores and a programme ceiling of Rs. 50 crores, recognises that "the objective of stabilising the growth of population over a reasonable period must be at the very centre of planned development." "In the circumstances of the country, family planning has to be undertaken, not merely as a major development programme, but as a nation-wide movement which embodies a basic attitude towards a better life for the individual, the family and the country." The programme, as outlined, provides for (a) education and motivation for family planning; (b) provision of services; (c) training; (d) supplies; (e) communication and motivation research; (f) demographic research; and (g) medical and biological research.

Organisational Set-up

The Central Family Planning Board was constituted in September 1956 to formulate family planning programmes. The Demographic Advisory Committee, the Committee on Scientific Aspect of Family Planning of the Indian Council of Medical Research and the Communication Action Research Committee have been established. Family Planning Boards are functioning in all the States. District Committees have also been formed. Full-time Family Planning Officers have been appointed in most States.

Family Planning Service/Family Planning Centres

The number of rural and urban family planning centres and other medical and health centres providing advice in family planning is shown in the following table:

TABLE 44
FAMILY PLANNING CENTRES

	Centres established during			Other medical & health centres providing advice	Total
	First Plan	Second Plan	Third Plan*		
Rural ..	20	1,079	162	1,864	3,125
Urban ..	125	421	166	330	1,042
TOTAL ..	145	1,500	328	2,194	4,167

*Up to October 1961.

Till October 1961, one lakh and fifty-four thousand persons—seventy-eight thousand males and seventy-six thousand females—were reported to have undergone sterilization operations.

Contraceptives are distributed free in rural areas and in urban areas to individuals with an income of less than Rs. 300 per month. Two pilot schemes in select villages for the appointment of male and female depot holders and *dais* for distribution of contraceptives have been launched. Financial assistance is being given to State Governments for the establishment of mobile family planning clinics in the districts and to voluntary organisations and local bodies for setting up rural and urban family planning clinics. Assistance is also being provided for augmenting sterilization facilities in district hospitals, training in techniques of sterilization and mobile surgical units.

Education and Training

Apart from the well-known methods of educating the people through group meetings, film shows, advertisements, etc., family planning orientation camps are being organised. Honorary Family Planning Education Leaders have also been appointed in all the States.

The Government of India have established three Family Planning Centres at Delhi, Bombay, and Ramanagaram. Two more centres at Dhanbad and Baroda are expected to start functioning soon. The Government of India have also approved the formation of 17 family planning touring training teams, 14 family planning orientation training teams and 6 pilot family planning education mobile units. The State Governments have established regional family planning training centres. Voluntary organisations have, with the assistance of the Government of India, established three family planning welfare workers' centres for workers at Allahabad, Nagpur and Madras. Till October 1961, over 4,000 persons were trained.

Research

The Indian Council of Medical Research has addressed organisations and institutions for preparing research schemes on the development of suitable oral contraceptives, follow-up of sterilization cases and several other subjects pertaining to family planning. The Government of India have also under consideration recommendations made by an expert committee on the use of oral contraceptives.

The Demographic Training Research Centre at Bombay is continuing its investigations. Four other demographic centres have been established in West Bengal, Delhi, Mysore and Kerala

RAMTIRTH (HINDI MONTHLY)

Editor: Yogiraj Shri Umeshchandraji.

Published every month by Shri Ramtirth Yogashram—Bombay.

MORE THAN 160 PAGES PER ISSUE.

THE MAIN IDEA BEHIND THIS MAGAZINE IS TO DEVELOP THE PHYSICAL, MENTAL AND MORAL ASPECT OF THE COMMON MAN.

Annual subscription Rs. 5/- only. Single Copy 65 nP. only with Postage.

UMESH YOGA DARSHAN

(First Part)

*In Four Languages: English, Hindi, Gujarati & Marathi.
(Author: Shri Yogiraj Umeshchandraji)*

An excellent and highly readable book written by Shri Yogiraj Umeshchandraji is one of the best known treatises on the true meaning of Yoga. A best guide to methods of intestinal exercise and control, the book contains over 108 descriptive photographs of various Asanas explained according to the age, Season, Country and Time.

It is one of the excellent volumes published so far depicting different aspects of Yoga, and containing different photographs of Asanas and Neti Dhoti Functions. It also contains Yoga Therapy, Diet Therapy, Chromopathy, Psycho Therapy and many other Therapies. It also contains many an important remedy for various diseases. The Book is best of its

kind and useful for all men and women; healthy and unhealthy and hence should be preserved in all libraries and homes.

Price : Rs. 15/- Plus Postage Rs. 2/- extra.

Yogasana Chart

A Chart printed on Art glazed papers and fully illustrated with attractive pictures is also available from here. You can perform Asanas shown therein at your home, which will keep you fit and healthy. Price Rs. 3 including Postage to be sent by M.O. only.

Yogic Classes

are also regularly conducted in the morning and evening for healthy and unhealthy at; Shri Ramtirth Yogashram. Special classes for Ladies are also conducted. Lady teachers are available for Ladies. Diseases are also remedied.

Ramtirth Brahmi Oil

Special No. 1
Registered.

An invaluable hair tonic for the prevention of dandruff and falling hair, RAMTIRTH BRAHMI OIL is manufactured scientifically with many precious ingredients, which cool brain, improve system, and let sleep sound. Most ideal for body massage. It is useful to every one in all seasons.

Price : Rs. 4/50 for big bottle and Rs. 2/25 for small. Available everywhere.

SHRI RAMTIRTH YOGASHRAM,

Dadar, Central Rly., Bombay-14.

CHAPTER XII

SOCIAL WELFARE

PROHIBITION

The Constitution enjoins on the State to endeavour to bring about prohibition of the consumption of intoxicating drinks and drugs. In December 1954, the Prohibition Enquiry Committee was appointed to suggest a programme and a machinery for the implementation of the directive in the light of the experience of the States in implementing their prohibition policies in the past. The Committee's main recommendation that schemes of prohibition be integrated with the country's developmental plans was affirmed by a resolution of the Lok Sabha on March 31, 1956. The resolution recommended the formulation of a programme to bring about nation-wide prohibition speedily and effectively.

The Third Five Year Plan has laid emphasis on prohibition being a voluntary social welfare movement, whose success depends upon (i) its acceptance as public policy accompanied by concrete administrative steps to make the policy a reality, (ii) support of large section of public opinion and active participation of social workers and voluntary organisations, (iii) finding practical solutions to problems arising out of it, such as employment and (iv) enabling State Governments to meet possible loss of revenue on account of progress of prohibition.

A Central Prohibition Committee has been set up to review the progress of prohibition programmes, co-ordinate the activities in different States and keep in touch with their practical difficulties. The Committee also suggests ways and means to intensify propaganda in favour of prohibition, promotes research on the economic and social implications of prohibition and recommends measures to encourage and assist official and non-official agencies devoted to prohibition and temperance propaganda, care and rehabilitation of alcoholics and drink addicts and scientific research in respect of problems associated with prohibition.

The progress in the enforcement of the prohibition policy in the different States and Union Territories of the Indian Union is briefly dealt with in the following paragraphs.

Andhra Pradesh

Complete prohibition is in force in the districts of Anantapur, Chittoor, Cuddapah, East Godavari, Guntur, Krishna, Kurnool, Nellore, Srikakulam, Visakhapatnam and West Godavari. In the other districts, toddy and liquor shops have been shifted from populous areas.

Assam

The dry law is in force in the districts of Kamrup and Nowgong, covering 19.2% of the area and 15% of the population of the State. In the other districts, measures to discourage the sale and consumption of liquor have been set in motion, the more important of which relate to increase of rates of duty on both foreign and country liquor, stoppage of issuing new liquor licences, removing of liquor shops from industrial areas and tea gardens, the prohibition of serving liquor in public places and closure of liquor shops on national days.

Total prohibition of opium has been in force throughout the State since 1947. Seven opium addicts' treatment centres have been opened. With effect from July 1959, consumption of ganja and bhang has been totally prohibited.

Bihar

A Prohibition Board to consider details of policy and to review the programmes of its implementation has been established. The work of preparing a phased programme has been entrusted to a technical committee. Among other steps taken to introduce gradual prohibition and to prepare the ground for total prohibition, mention may be made of the enhancement of duty and retail prices of country spirit, introduction of the sliding scale system of settlements in respect of distillery liquor and drug shops, stoppage of sale on national days and closure of liquor shops for a period of 8 days in a month in certain areas of the State and a reduction in the sale hours of country liquor shops.

The supply of opium for oral consumption, except on certificates granted in limited numbers by approved medical authorities, has been completely withdrawn since April 1, 1959.

Gujarat

There is complete prohibition in the whole of the Gujarat State. Taluk prohibition drive committees and sub-committees of the block advisory committees have been set up. Similar committees at the village level are being formed with the help of the Panchayats.

Kerala

Complete prohibition has been in force in the whole of the Kozhikode, Palghat, Cannanore and Trivandrum districts as also five taluks in the Quilon and Trichur districts and Fort Cochin area of Ernakulam district, covering 58.8% of the area and 56% of the population of the State. Advertisements and public inducements relating to drink have been prohibited. No fresh licences for liquor shops are granted. A State Advisory Board has been set up. Six District Advisory Committees have also been established to enlist public co-operation for prohibition in the dry areas of the State.

All opium and ganja shops in the State have been closed with effect from April 1, 1959.

Madhya Pradesh

Prohibition is in force in the districts of Sagar, Damoh, Narsimhpur, Hoshangabad, Khandwa and Vidisha districts and portions of Bilaspur, Raipur and Durg districts and covering 16.4% of the area and 19.8% of the population of the State. A system of permits has been introduced in one tehsil of the Jabalpur district and one of the Betul district. Among other steps taken are progressive reduction in the number of liquor shops, ban on advertisements relating to drink, prohibition of liquor drinking in public places, progressive increase in the number of days on which liquor shops remain compulsorily closed, shifting of liquor shops from industrial and populous areas, enhancement of the price of intoxicants and encouragement of the consumption of healthy and refreshing light drinks.

The oral use of opium, except on permits issued by competent medical authorities, has been totally banned with effect from April 1, 1959.

Madras

Total prohibition has been in force throughout the State since October 2, 1958. The enforcement of the prohibition law has been strengthened by providing enhancement of sentence, summary trials and control over sale and transport of molasses.

Maharashtra

Total prohibition has been in force since April 1, 1961. Besides a State Prohibition Board, prohibition sub-committees have been set up in district development boards. Taluk prohibition drive committees and special

committees of the block advisory committees have also been established. Efforts are now being made to establish similar committees at the village level. Subsidies are paid to welfare institutions, co-operative societies, village panchayats and municipalities for conducting Sanskar Kendras (Recreation Centres) for prohibition propaganda.

Mysore

Prohibition is in force in the entire State except the districts of Bangalore, Gulbarga and Raichur. The dry area accounts for 81.1 % of the area of the State and covers 79 % of the population. To facilitate the successful implementation of the prohibition policy of the Government of Maharashtra, a ten-mile dry belt zone on the Maharashtra-Mysore border in the Gulbarga district was created in July 1959. A Prohibition Board has also been set up for advising the State Government in the matter of effective implementation of the prohibition policy.

The sale of ganja, except for medicinal and scientific purposes, has been totally banned in certain districts of the State. Consumption of opium, except for medicinal purposes and by addicts on medical certificates, has been completely banned from April 1, 1959.

Orissa

The dry law operates in the districts of Ganjam, Koraput, Cuttack, Balasore and Puri. Sale of foreign liquor to addicts in these districts is limited through licensed shops and on production of permits. In the non-prohibition areas, steps have been taken to reduce progressively the number of liquor shops and to increase the number of days on which liquor shops remain closed.

Oral consumption of opium has been prohibited since April 1, 1959, and all opium shops in the State have been closed.

Punjab

Total prohibition exists only in the district of Rohtak and steps have been taken in other districts to reduce sale and consumption of liquor through restriction of the grant of licences and sale of liquor, etc. Other steps taken by the State Government include imposing restrictions on advertisements relating to drinking and closure of liquor shops once in a week with effect from April 1, 1962.

Complete prohibition of the oral consumption of opium, except on medicinal grounds, has come into force since April 1, 1959.

Rajasthan

Prohibition is in force only in Abu taluk in the district of Sirohi. A phased programme has been put into effect since April 1, 1956. Among the more important aspects of this programme are the ban on serving drinks in public places, closure of liquor shops on pay days and other important national days, reduction in the number of country liquor shops, removal of liquor shops from populous areas and enhancement of duty on liquor and licence fees. A Prohibition Advisory Committee has been established to consider the question of introducing prohibition by stages.

Uttar Pradesh

There is total prohibition in the three pilgrimage centres of Brindavan, Hardwar and Rishikesh and the districts of Badaun, Etah, Farrukhabad, Fatehpur, Jaunpur, Kanpur, Mainpuri, Pratapgarh, Rae-Bareilly, Sultanpur, and Unnao. This covers 17.05 % of the area and 21.4 % of the population of the State.

The sale of ganja has been prohibited throughout the State and oral consumption of opium has also been banned with effect from July 1, 1959.

West Bengal

Prohibition has not been introduced in any area of the State. Among steps taken to discourage the drinking habit are the declaration of dry days in industrial areas, reduction in the hours of transaction in excise shops and in the grant of licences for retail sale, enhancing the rates of taxation on liquors, etc.

Union Territories

A policy of gradual prohibition is in operation in the Union Territories. All toddy and liquor shops have been closed, liquor shops closed for five days in a week and import of foreign liquor banned in the Andaman and Nicobar Islands.

In Delhi, restrictions on the saleable strength of country liquor and the number of country liquor shops have been imposed. Advertisements relating to liquor consumption have been banned and various steps have been taken to stop public drinking. Sale of liquor in clubs is restricted to members only, the number of dry days has been increased and duty on all varieties of country liquor has been enhanced. With effect from April 1, 1959, the supply of opium is available only to addicts on production of medical certificates.

There is total prohibition in the Bilaspur district and sub-divisions of Mahasu, Mandi and Chamba districts, covering nearly one-fourth of the population in Himachal Pradesh. In other areas of the State the quota of country liquor has been reduced, as also the number of liquor shops. Drinking in public places has also been banned. An Advisory Board has been set up to advise the administration, and prohibition committees are being constituted in all the districts.

In Manipur, the issue of licences for local distillation of country liquor has been discontinued since 1958 and special permits are issued to individual tribals for local distillation of liquor on festive and religious occasions. Public drinking and advertisements relating to drinking have been banned and a district prohibition committee has been set up to ensure the successful implementation of the prohibition policy and to seek public co-operation. The oral consumption of ganja, bhang and opium has been prohibited.

In Tripura, excise shops are closed for one day in the week and selling hours have been reduced. Advertisements relating to drinking have been banned. Steps are being taken to remove excise shops away from populous areas. The sale of ganja through government agencies has been completely withdrawn with effect from April 1, 1959.

WELFARE MEASURES FOR CERTAIN MALADJUSTED GROUPS*Social Defence (Care) Programme*

The Social Defence (Care) schemes in the Third Five Year Plan, involving an outlay of Rs. 3.58 crores, are aimed at (i) the prevention and treatment of juvenile delinquency, (ii) enforcement of Suppression of Immoral Traffic in Women and Girls Act, (iii) prevention and treatment of beggary and vagrancy; (iv) welfare services in prisons and (v) probation. The Government of India will share 50% of the total expenditure on the implementation of these schemes in the case of States and cent per cent expenditure in the case of Union Territories.

Immoral Traffic in Women and Girls

The Indian Penal Code provides for imprisonment up to 10 years and fines (Sec. 366A, 372 and 373) for the procurement, buying and selling of girls under 18 years for prostitution. Similar penalties have also been prescribed for importing into India girls below 21 years for this

purpose. In addition, there is a special Act known as the Suppression of Immoral Traffic in Women and Girls Act, 1956, which provides for the suppression of immoral traffic in women and girls in terms of the International Convention signed at New York in May 1950.

All the provisions of the Act have been enforced throughout India from May 1, 1958. The Act prescribes punishment for brothel-keeping, for living on the earnings of prostitutes, for procuring, inducing or taking a woman or girl for the purpose of prostitution, for detaining a woman or girl in premises where prostitution is carried on, for prostitution in or in the vicinity of public places and for seducing or soliciting for the purpose of prostitution. The setting up of an adequate number of protective homes for the rehabilitation and the educational and vocational training of women and girls recovered and detained under the Act is also envisaged.

Rescue Homes and Reception Centres established under the After-care Programme can also be utilised as Protective Homes. About 100 Protective Homes (Government as well as private), having a total capacity of 4,419 inmates, are reported to be functioning in the country. In addition, there are several other institutions in the States which aim at making good citizens out of fallen women. These are : Stri Sadans maintained by the Government of Madras, the Shradhdhanand Anath Mahilashram in Bombay, Good Shepherd Home in Madras, Crispin's Home in Poona, Kushalbag Mission Orphanage in Gorakhpur, Fendall Home and All-Bengal Women's Union Home in West Bengal, etc.

Juvenile Delinquents

Children Acts are in force in the States of Andhra Pradesh, Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore, Punjab, Uttar Pradesh and West Bengal and all the Union Territories. The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra, Mysore, Punjab, Uttar Pradesh and West Bengal. The Reformatory Schools Act of 1897 has also been enforced in all the bigger States and some Union Territories.

The problem of juvenile delinquency is mainly the concern of State Governments. The Central Government, however, have sponsored a Care Programme under which the States are given assistance. Under this programme, 40 remand homes, 17 certified schools, 5 borstal schools, 15 boys' clubs, and 5 probation hostels have been established.

Besides formal education, vocational training in a number of trades is imparted to the inmates of the certified, reformatory and borstal schools. Some of these institutions also provide juvenile delinquents on their release with implements and money to enable them to settle down in trades learnt by them in school. Other institutions provide follow up services. The inmates of the certified schools are given training in citizenship and democratic living and are encouraged to take part in extra-curricular activities, such as sports, debates, dramas, music and scouting.

Beggars

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Sections 55(i) (b) and 109 (b). Beggars may be proceeded against under Section 133 as those committing public nuisance. Beggary within railway premises was prohibited by law on February 15, 1941. Special Acts have been passed by most of the States to prohibit begging in public places. In others, the municipal and police acts provide measures against begging. To deal effectively with persons who kidnap children for the purpose of exploiting them for begging, the Indian Penal Code (Amendment) Act, 1959, was enacted. This Act makes kidnapping

or obtaining custody of a minor and the maiming of minors for the purpose of begging specific offences and provides for deterrent punishment, which may extend to life imprisonment where children are maimed.

There are institutions in the States for the custody, care and assistance of beggars in their rehabilitation. Eighteen certified institutions with a total capacity for 2,000 beggars exist in Maharashtra and Gujarat. West Bengal has 8 beggar homes with accommodation for 2,050. There are 7 similar institutions in Madras, 8 including 3 relief settlements in Kerala and 3 in Delhi. There is a beggar home each in the States of Uttar Pradesh, Madhya Pradesh and Mysore. A novel type of vagrant home-*cum*-training centre is in existence in New Delhi in which the inmates take part in the management of the home. Under the Central Care and After-Care Programmes assistance is available for the setting up of beggar homes, appointment of welfare officers in prisons for maintaining liaison between the prisoner and his family and creation of State homes for the after-care of discharged from correctional and non-correctional institutions.

Central Bureau of Correctional Services

Among the schemes to be implemented during the Third Plan period is the establishment of a Central Bureau of Correctional Services. The main functions of the Bureau are to co-ordinate and develop a uniform policy, to standardise the collection of statistics on a national basis, to exchange information with foreign Governments and the United Nations' agencies and to promote research, training and studies and surveys in the field of prevention of crime and treatment of offences.

CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board was set up in August 1953, under the Chairmanship of Smt. Durgabai Deshmukh. Its functions, as defined in the Resolution of Government setting up the Board, are to survey the needs and requirements of social welfare organisations, evaluate their programmes and objectives, co-ordinate the assistance given by various Central ministries and State departments, promote the development of voluntary organisations in the areas where no such organisations exist, and render financial assistance to deserving agencies. All welfare schemes sponsored by the Board have been implemented through the utilisation of voluntary organisations as the principal agencies.

Social Welfare Advisory Boards have been constituted in different States to decentralise the activities of the Board and to enable it to maintain continuous contact with the aided institutions for ensuring the most effective direction of their efforts.

Since its inception, the Board sanctioned grants amounting to Rs. 521.64 lakhs to 7,607 voluntary welfare institutions till the end of February 1962. Two thousand six hundred and twenty-four of these institutions were child welfare agencies, 3,696 women welfare organisations, 259 institutions working for the welfare of the physically handicapped and juvenile delinquents and 488 organisations engaged in general welfare.

In 1961, the grants-in-aid programme was decentralised and State Boards have been delegated powers to sanction and release grants up to a certain limit in the case of yearly grants.

Welfare Extension Projects (Rural)

A scheme of rural welfare, known as Welfare Extension Projects, was sponsored directly by the Board in August 1954. Each of these projects covers an area of about 25 to 30 villages and a population of about 20,000. The programme and activities of these projects comprise *balwadis* (community creches and pre-basic schools), maternity and infant health services (including

those for the handicapped and the delinquent), literacy and social education for women, arts and crafts centres and recreational activities.

A project implementing committee, comprising mainly of women social workers, is responsible for the formulation and execution of the programme in each welfare extension area. Each project area is generally divided into 5 centres of 5 villages each, each centre with a *dai* and a craft instructor and in charge of a trained *gramsevika*. At the project level are a *mukhyasevika* and a midwife.

Up to the end of October 1960, 418 such projects with 2,027 centres covering a population of 79.48 lakhs in 10,499 villages were established. From 1961-62 onwards, these projects have been handed over to local voluntary welfare organisations, each of which is given a suitable grant.

Since April 1957, these projects were extended to community development blocks. Projects of a co-ordinated pattern, as distinguished from the original pattern, have been started in these areas. Each project covers about 100 villages and a population of about 60,000 to 70,000.

More than twenty-five thousand workers were employed under the rural welfare schemes. Public participation manifested itself in about 5,000 non-official workers lending their active co-operation and in cash and kind contribution of the value of Rs. 80.44 lakhs and 260.86 acres of land.

The coverage of the projects of the original pattern as well as those of the co-ordinated pattern till February 1962, is shown in the table below.

TABLE 45
WELFARE EXTENSION PROJECTS (RURAL)

	Number of Welfare Extension Projects	Number of Centres	Villages covered	Population covered (in lakhs)
<i>Original Pattern</i>				
August 1954 to October 1960	418	2,027	10,499	79.48
November 1960 to February 1962	21	104	1,582	2.92
<i>Co-ordinated Pattern</i>				
April 1957 to February 1962	321	3,340	29,127	164.40

The Board sanctions building grants for project centres in the Welfare Extension Projects. Grants amounting to Rs. 44.33 lakhs were sanctioned for this purpose till the end of February 1962. The local community had, during this period, donated 261 acres of land and Rs. 25.38 lakhs for the same purpose.

For the execution of the rural welfare programme, 317 *mukhyasevikas*, 3,767 *gramsevikas*, 221 midwives and 335 *dais* have been trained in the training centres run by Kasturba Gandhi National Memorial Trust and other voluntary agencies. Condensed courses of training for adult women have also been organised. Three hundred and twenty-nine voluntary institutions were given Rs. 91.96 lakhs by way of grants for this purpose till the end of February 1962.

Welfare Extension Projects (Urban)

The activities undertaken in these projects, meant to provide community welfare centres for residents of slum areas, include starting of creches, *balwadis*, ante-natal and post-natal advisory services, infant health centres, hobby clubs, vocational guidance, training in arts and crafts for women, and referral and placement services for the handicapped. Eighty-one voluntary institutions running such projects in urban areas covering a population of 5.64 lakhs were given grants amounting to Rs. 31.79 lakhs till the end of February 1962.

Holiday Homes for Children

One hundred and seventy-two batches of 50 children each benefited from grants amounting to Rs. 4.8 lakhs given as assistance for organising holiday camps for children coming from lower income groups at hill stations and summer resorts till February 1962. The scheme is being co-ordinated by the Indian Council of Child Welfare.

Night Shelters

Thirty-eight institutions are running night shelters in different States to provide temporary accommodation for the shelterless in big industrial cities. A sum of Rs. 3.45 lakhs was given as assistance to them. The co-ordination work of this scheme has been entrusted to the Bharat Sevak Samaj.

Socio-Economic Programme

A scheme of setting up a number of production units with the assistance of the Ministry of Commerce and Industry and its industrial boards and the Khadi Commission has been initiated in order to provide needy women and handicapped persons with gainful employment. While a small beginning was made during the First Plan period, many new schemes were initiated during the Second Plan period, which include, (i) units ancillary to small industries, (ii) handloom training production units, (iii) handicrafts training centres, production units, procurement units and (iv) Ambar Parishramalayas. The different types of units established so far and the workers employed therein, are given below :

	No. of units	No. of workers
(a) Production Units		
(i) Units of small industries	11	767
(ii) Ancillary units of small industries	3	99
(iii) Handicrafts units	4	85
(iv) Units attached to State After-Care Homes	26	2,600
(v) Handloom-cum-production units	18	774
(b) Training of craft instructors		
(i) Ambar Charkha trained	386	
(ii) Handicrafts Teachers' Training		
Trained	200	
Under training	100	

During the Third Plan period it is proposed to create employment opportunities to 25,000 to 30,000 women workers.

Social and Moral Hygiene and After-Care Programme

The Social and Moral Hygiene and After-Care Programme undertaken on the recommendations of the Advisory Committee on After-Care Programmes and of the Social and Moral Advisory Committee, is aimed at the after-care and rehabilitation of rescued women and adults and children discharged from correctional, non-correctional and care institutions. The programme is implemented by the State Governments with Central assistance, with the Central Social Welfare Board and the State Social Welfare Boards being associated with it in an advisory capacity. Forty-six after-care homes, providing training to 1,794 inmates and meeting other needs of the inmates, and 89 district shelters, receiving the discharged persons and sending them to the homes established under this programme, were sanctioned till the end of February 1962.

Child Welfare

Provision has been made in the Third Plan for setting up demonstration projects for integrated child welfare services, aiming at the all-round

development of children up to the age of 16. Two training centres have been started at Delhi and Madras and a special training programme for child welfare workers to man these services is being formulated. A Committee on Child Care has been constituted for preparing a programme for the development of comprehensive child welfare services.

CHAPTER XIII

RELIEF AND REHABILITATION

Of the 88.57 lakh displaced persons from Pakistan who had migrated to India, 47.40 lakhs came from West Pakistan and the rest from East Pakistan. The main task of rehabilitating these displaced persons has been virtually completed. The assistance provided by Government towards the relief and rehabilitation of these persons till the end of March 1962 is shown in the table below.

TABLE 46
EXPENDITURE ON DISPLACED PERSONS

(in crores of rupees)

	On D.Ps. from West Pakistan	On D.Ps. from East Pakistan	Total
Grants	93.22	84.74	177.96
Loans	26.34	42.63	68.97
Housing	62.86	40.71	103.57
Establishment	2.85	0.84	3.69
Loans by Rehabilitation Finance Administration (up to 31-12-60)	7.28	3.94	11.22
Miscellaneous	0.01	—	0.01
Dandakaranya Scheme	—	13.52	13.52
Rehabilitation Industries Corporation	—	0.35	0.35
TOTAL	192.56	186.73	379.29*

DISPLACED PERSONS FROM EAST PAKISTAN

Rupees 194.37 crores have so far been sanctioned for the relief and rehabilitation of displaced persons from East Pakistan. Rehabilitation assistance was given to 6.40 lakh displaced families. Of the 41.17 lakh persons who migrated 12,306 persons were still being maintained in 5 camps in West Bengal only. About 30,000 displaced persons were being cared for in homes.

Out of about 3,109 displaced families in camps in West Bengal, 1,080 non-agriculturist families of the rehabilitable category were dispersed to rehabilitation sites within West Bengal and the remaining belonging to the long term liability category were transferred to homes. One hundred squatters' colonies were regularised in full and 10 in part, benefitting 11,400 displaced families.

Dandakaranya Scheme

An area of 30,052 square miles in selected areas in Bastar district of Madhya Pradesh and Koraput and Kalahandi districts of Orissa is being reclaimed under the Dandakaranya Scheme for resettling a sizeable displaced population from East Pakistan. The Dandakaranya Development Authority was set up in September 1958. Thirty-nine thousand acres have been fully reclaimed and 3,973 families comprising 18,006 persons were

*Does not include Rs. 111.48 crores gross capital expenditure incurred up to 1961-62 on payment of compensation and rehabilitation grants, Rs. 62.14 crores debited against revenue on account of write back of compensation from capital to revenue, Rs. 2.19 crores debited against revenue on account of loans to the Faridabad Development Board and Rs. 1.78 crores as maintenance and education grants to East Pakistan D.P.s. and *ex-gratia* payments to migrants from the Pakistan-held area of Jammu & Kashmir.

moved to the area up to the end of January 1962. Three thousand two hundred and forty families have been moved to village sites. A mixed farm at Umarkote and a central horticulture farm at Dumriput were set up and crops and vegetables grown. A poultry farm was also started at Mana. The fisheries schemes has been making steady progress. Malaria has been eradicated from the area of settlement, medical facilities have been provided and 78 primary and 3 secondary schools imparting education to about 5,700 students have been established. About 5,000 acres of reclaimed land were placed at the disposal of the district authorities for allotment to tribals.

Rehabilitation Industries Corporation

A Rehabilitation Industries Corporation with a Rs. 5 crore assistance from the Centre has been set up to establish industries in the public sector in partnership with private enterprise and to provide loans to private entrepreneurs for providing employment to displaced persons from East Pakistan. It also organises allied activities such as running of training and apprenticeship institutions which are specifically directed towards meeting the requirements of the industrial projects under the normal development plan of the country both in the public and private sectors. The Corporation devotes special attention to the setting up of small industries as ancillary units to major industries.

Financial Assistance to Non-Official Institutions

Till the end of March 1961, assistance of the value of Rs. 3.90 crores was provided to 791 non-official educational, medical and cultural institutions in the eastern region to enable them to meet the requirements of displaced persons. Three hundred and sixty displaced persons were provided employment with the West Bengal Transport Corporation with the help of Rs. 17.25 lakhs loan by the Government of India.

DISPLACED PERSONS FROM WEST PAKISTAN

Till the end of 1961, permanent rights were transferred to 2,73,317 allottees, covering an area of 19,79,730 standard acres valued at Rs. 90 crores. Proprietary rights in 91,379 houses were also transferred. Till the end of December 1961, 16,061 non-Punjabi land claimants were allotted 63,054 standard acres, 1,56,173 ordinary acres of land and groves worth Rs. 37.0 lakhs in various States. Of the new townships set up in the western region, the Central Government were directly associated with the construction and administration of four townships of Faridabad, Rajpura, Nilokheri and Hastinapur.

Up to December 31, 1961, a sum of Rs. 164.80 crores (Rs. 59.37 crores in cash, Rs. 81.10 crores by transfer of properties and Rs. 24.33 crores by way of adjustment of public dues) was paid as compensation to 4.97 lakhs of the 5.02 lakh claimants.

Negotiations with Pakistan

Out of 24,361 claims for pension, provident fund, security deposits, etc., 13,504 claims involving Rs. 49.39 lakhs non-recurring (in admitted claims) and Rs. 14.52 lakhs recurring per annum were verified by the Government of Pakistan till November 1961. Under the *ad hoc* payment scheme, 2,186 cases out of 3,377 cases examined have been finalised. One thousand five hundred and thirty-seven cases out of 2,834 for verification of service rendered in Pakistan have been verified. Four hundred and sixteen insurance policies of displaced persons out of 524 claims have been reassigned in favour of the insured persons. Eight hundred and sixty-nine claims of contractors and dues of other evacuees of the value of Rs. 49.15 lakhs have been settled.

Resettlement of Kashmiri Displaced Persons

In 1959, the Government of India decided to give rehabilitation assistance to the Kashmiri displaced persons in the form of an *ex gratia* payment which comes to Rs. 1,000 for families settled on agricultural lands and Rs. 3,500 for those settled elsewhere than on land. Migrants from Pakistan-occupied areas of Jammu & Kashmir were asked to submit declaration forms by November 15, 1960. Up to December 31, 1961, declaration forms from 10,376 migrants were received and payment of grants in 8,394 cases involving payment of Rs. 34.31 lakhs was made.

OTHER KINDS OF RELIEF

Emergency Relief Organisation

A country-wide organisation known as the Emergency Relief Organisation to provide relief in times of floods, famines, earthquakes, etc., has been set up in almost all the States and Union Territories. The Organisation will ensure that :

- (i) relief operations are conducted according to plans drawn up ahead of an emergency and, as far as possible, by personnel well-trained in conducting such operations;
- (ii) emphasis is laid on the principle of self-help so that assistance from outside the affected area is reduced to the minimum;
- (iii) each of the interested social welfare agencies is allotted a definite role to play; and
- (iv) the district and local authorities, the State Governments and the Government of India take upon themselves the responsibility for proper integration of activities within their respective spheres.

The Organisation, when fully established, will function at the Central, State and district levels. The Central organisation will implement the emergency relief policy of the Government, co-ordinate the efforts of the States and provide such relief services and supplies as can be arranged only by the Government of India.

As part of the Central Emergency Relief Organisation, a training Institute has been set up at Nagpur. The Institute lays down a basic pattern of training in emergency relief operations for the country as a whole and provides a source of supply of trained personnel in adequate numbers not only for instructional purposes but also for manning the various relief services envisaged under the scheme.

During 1961, the Government of India sanctioned ways and means advance of Rs. 4 crores to the Government of Maharashtra and Myore for providing relief to flood victims. A loan of Rs. 1 crore to the Government of Assam and grants of the value of Rs. 3.35 crores to the Governments of West Bengal and Punjab were also provided for affording relief to flood victims. Gifts for free distribution to flood stricken people were transported without any charge. The Home Guards Organisation rendered timely assistance.

Prime Minister's National Relief Fund

Since November 1947, when the Prime Minister's National Relief Fund was founded, a sum of about Rs. 2.25 crores was utilised till March 1962, in providing relief to people affected by national calamities such as earthquakes, floods, cyclones, draught, famine and fire. Relief was also given in the early stages to displaced persons from Pakistan.

CHAPTER XIV

SCHEDULED CASTES, SCHEDULED TRIBES AND OTHER BACKWARD CLASSES

The Constitution prescribes protection and safeguards for Scheduled Castes, Scheduled Tribes and other Backward Classes, either specifically or by way of general rights of citizens, with the object of promoting their educational and economic interests and of removing certain social disabilities the Scheduled Castes were subject to. These are:

- (i) the abolition of "Untouchability" and the forbidding of its practice in any form (Art. 17);
- (ii) the promotion of their educational and economic interests and their protection from social injustice and all forms of exploitation (Art. 46);
- (iii) the throwing open of Hindu religious institutions of a public character to all classes and sections of Hindus (Art. 25);
- (iv) the removal of any disability, liability, restriction or condition with regard to access to shops, public restaurants, hotels and places of public entertainment, the use of wells, tanks, bathing ghats, roads and places of public resort maintained wholly or partly out of State funds or dedicated to the use of the general public (Art. 15);
- (v) the right to practice any profession or carry on any occupation, trade or business (Art. 19);
- (vi) the forbidding of any denial of admission to educational institutions maintained by the State or receiving aid out of State funds (Art. 29);
- (vii) the obligation of the State to consider their claims in the making of appointments to public services and reservation for them in case of inadequate representation (Arts. 16 and 335);
- (viii) special representation in Parliament and the State Legislatures for a period of twenty years (Arts. 330, 332 and 334);
- (ix) the setting up of advisory councils and separate departments in the States and the appointment of a Special Officer at the Centre to promote their welfare and safeguard their interests (Arts. 164, 338 and Fifth Schedule); and
- (x) special provision for the administration and control of scheduled and tribal areas (Art. 244 and Fifth and Sixth Schedules).

The population of the Scheduled Castes is now estimated at 5.53 crores and that of Scheduled Tribes at 2.25 crores as a result of the issue of revised lists under the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. Denotified Tribes number about 40 lakhs.

The State-wise distribution of the Scheduled Castes and Tribes according to the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, the Constitution (Jammu and Kashmir) Scheduled Castes Order, 1956, and the Constitution (Andaman and Nicobar Islands) Scheduled Tribes Order, 1959, is shown in the following table.

MEASURES TO ERADICATE UNTOUCHABILITY

The Untouchability (Offences) Act, 1955

This Act, which came into force on June 1, 1955, provides penalties for preventing a person, on the ground of untouchability, from entering a place of public worship, offering prayers therein or taking water from a sacred tank, well or spring. Penalties are also provided for enforcing all kinds of social disabilities, such as denying access to any shop, public restaurant, public hospital or educational institution, hotel or any place of public entertainment; the use of any road, river, well, tank, water tap, bathing ghat, cremation ground, sanitary convenience, *dharamshala*, *sarai* or *musafirkhana* or utensils kept in such institutions and hotels and restaurants. The Act also prescribes penalties for enforcing occupational, professional or trade disabilities, or disabilities in the matter of enjoyment of any benefit under a charitable trust, in the construction or occupation of any residential premises in any locality or the observance of any social or religious usage or ceremony.

The Act similarly lays down penalties for refusing to sell goods or render services to a Harijan because he is a Harijan; for molesting, injuring or annoying a person or organising a boycott of, or taking any part in the ex-communication of a person who has exercised the rights accruing to him as a result of the abolition of untouchability.

Higher penalties have been prescribed for subsequent offences. For the purposes of awarding punishments, incitement or abetment of the offence has been treated in the same manner as the commission of the offence. The onus of proving innocence has been thrown on the accused. The offences under this Act are cognisable and compoundable.

*Population figures according to the 1961 census are not yet available.

Campaign against Untouchability

Since 1954 the Government of India have been giving financial support to the movement to eradicate untouchability. Both official and non-official agencies are being utilised for this purpose. The State Governments have instructed their district officers and other officials, who deal with the public, to stress the need for and the urgency of doing away with this evil. "Harijan Days" and "Harijan Weeks" are observed to focus public attention and enlist people's co-operation in the eradication of untouchability. Most of the States have appointed small committees to enforce, where necessary, the provisions of the Untouchability (Offences) Act, 1955. Publicity media, such as books, pamphlets, handbills and radio-visual aids have also been pressed into service.

The assistance and co-operation of voluntary organisations, such as the Harijan Sevak Sangh, the Bharatiya Depressed Classes League, the Bharat Dalit Sevak Sangh, Hind Sweepers Sevak Samaj and Iswar Saran Ashram have also been obtained. A sum of Rs. 61,50,746, of which Rs. 14,77,200 came from the Centre, was given as grants-in-aid to these organisations during the First Plan period. The Second Five Year Plan envisaged an expenditure of about Rs. 208 lakhs as aid to non-official agencies for this programme, of which Rs. 138 lakhs were provided under the States' sector and Rs. 70 lakhs under the Central sector of the Plan. All-India voluntary organisations were given grants amounting to Rs. 69.27 lakhs (Rs. 36.53 lakhs towards removal of untouchability) from the Central sector during the Second Five Year Plan period. A sum of Rs. 125 lakhs has been earmarked in the Third Plan for financial assistance to non-official agencies of all-India status.

REPRESENTATION IN LEGISLATURES

Under articles 330, 332 and 334 of the Constitution, seats, proportionate as far as possible to their population in the States, have been reserved for the Scheduled Castes and Tribes in the Lok Sabha and the State Vidhan Sabhas for a period of twenty years after the inauguration of the Constitution. Table 48 gives details of the representation in Parliament and the State Legislatures.

REPRESENTATION IN THE SERVICES

The manner in which the State carries out its obligation to reserve posts for Scheduled Castes and Tribes in the public services in case of inadequate representation and to consider their claims consistent with the maintenance of efficiency of administration, has been left outside the purview of obligatory consultation with Public Service Commissions [Art. 320 (4)].

Twelve and a half per cent of the vacancies for which recruitment is made by open competition on an all-India basis and 16½ per cent of the vacancies to which recruitment is made otherwise are reserved for the Scheduled Castes. For the Scheduled Tribes, the reservation is five per cent in both cases.

To facilitate their adequate representation, concessions such as (i) exemption in age-limits, (ii) relaxation in the standard of suitability and of qualifications, (iii) selection subject to fulfilling the minimum standard of efficiency and (iv) inclusion at least in the lower category for purposes of promotion where promotion is otherwise than through a qualifying examination, have been provided for. The principle of reservation has been extended to services filled by promotion through competitive examinations limited to departmental candidates. If no suitable Scheduled Caste candidates are available for the reserved posts, they are to be treated as reserved for Scheduled Tribes and *vice versa*. It is only when suitable candidates

are not available from either that a post is treated as unreserved. In such cases, an equal number of reservations are carried forward to two recruitment years.

To give proper effect to the reservation decided upon, model rosters of 40 posts each have been prescribed for recruitment by open competition and otherwise. If the vacancies in a Service or Cadre are too few for the purpose, all corresponding posts are to be grouped together. Annual reports are required to be submitted by the employing authorities for scrutiny by the Government. To bring about a greater awareness for ensuring effective implementation of the special representation orders, liaison officers have been appointed in the different ministries of the Union Government. Arrangements have also been made for intensive training and coaching facilities at certain educational institutions to enable Scheduled Castes and Tribes candidates to compete on merit for all-India services. Some of the State Governments have also drawn up rules for the reservation of posts for these classes, and steps have been taken to increase their representation in State services.

Three lakhs nineteen thousand nine hundred and ninety-eight persons belonging to Scheduled Castes and Scheduled Tribes were employed in the Government of India on January 1, 1961.

*One seat reserved for the Autonomous Districts in Assam.

† Excludes 25 seats for Pakistan-occupied areas of the State which are kept in abeyance pending the return of those areas to the Indian Union.

ADMINISTRATION OF SCHEDULED AND TRIBAL AREAS

Autonomous Tribal Areas of Assam

In pursuance of the provisions of the Sixth Schedule, one Regional Council and 5 District Councils have been set up in the districts of the United Khasi-Jaintia Hills, Garo Hills, Mizo Hills, North Cachar Hills and Mikir Hills. Each of these District Councils consists of not more than 24 members, three-fourths of them being elected by adult suffrage. The Councils possess wide legislative and rule-making powers as well as certain financial and taxation powers.

Tribes Advisory Councils in Other States

The Fifth Schedule to the Constitution provides for the setting up of a Tribes Advisory Council in each of the States having Scheduled Areas and, if the President so directs, for constituting such Councils in States which have Scheduled Tribes but no Scheduled Areas. Tribes Advisory Councils have been set up so far in the States of Andhra Pradesh, Assam, Bihar, Gujarat, Madhya Pradesh, Maharashtra, Madras, Orissa, Punjab, Rajasthan and West Bengal. These Councils advise the Governors on such matters concerning the welfare of the Scheduled Tribes and development of the Scheduled Areas as may be referred to them. An advisory board in Kerala for the Scheduled Tribes and another in Mysore for the Scheduled Castes and Tribes have been set up to advise the State Governments on matters pertaining to their welfare and advancement. Tribes Advisory Committees have also been formed in the Union Territories of Himachal Pradesh, Manipur, Tripura and Laccadive, Minicoy and Amindivi Islands.

WELFARE AND ADVISORY AGENCIES

Commissioner for the Scheduled Castes and Scheduled Tribes

A Special Officer has been appointed by the President under Article 338 of the Constitution to (i) investigate all matters relating to the safeguards for the Scheduled Castes and Scheduled Tribes provided under the Constitution and (ii) report to the President on the working of these safeguards. There are eleven Assistant Commissioners to assist the Commissioner.

Tribal Welfare Officer

A Tribal Welfare Officer for Assam has been appointed by the Government of India to take stock of and evaluate the work so far done among the tribal population both in the Autonomous Districts and the plains of Assam. He is also to submit a report to the Government of India in this regard.

Central Advisory Boards

To associate members of Parliament and public workers with matters pertaining to the development of Tribal Areas and the well-being of the Scheduled Tribes and Scheduled Castes, two Central Advisory Boards—one for Tribal Welfare and the other for Harijan Welfare—have been constituted. These Boards advise the Government of India on all matters relating to the welfare of these classes. They are also expected to assess the requirements of the tribal people in Scheduled and other Tribal Areas, formulate schemes for their welfare, periodically review the working of sanctioned schemes and evaluate the benefits derived from them for suggesting improvements.

Welfare Departments in the States

The proviso to Article 164(1) of the Constitution requires that in the States of Bihar, Madhya Pradesh and Orissa, Welfare Departments

in charge of a Minister be set up. Welfare Departments have been set up in these States as well as in Andhra Pradesh, Assam, Gujarat, Jammu and Kashmir, Kerala, Madras, Maharashtra, Mysore, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Himachal Pradesh, Manipur and Tripura.

WELFARE SCHEMES

Under Article 339(2) of the Constitution the Union Government can give directions to States in the formulation and execution of schemes for the welfare of the Scheduled Tribes in the States. Under the Article 275(1) the Centre is required to give grants-in-aid to the States for approved schemes of welfare and for improving the tone of administration in Scheduled Areas.

Educational Facilities

Measures to provide increased educational facilities have been taken, the emphasis being on vocational and technical training. The concessions include free tuition, stipends, scholarships and the provision of books, stationery and other equipment. Mid-day meals are also provided in many places.

The Government of India instituted a scheme for grant of scholarships to the Scheduled Castes in 1944-45. This benefit was extended to the Scheduled Tribes in 1948-49 and other Backward Classes in 1949-50. The scheme has been decentralised with effect from 1959-60. The following table shows the amounts spent on this account.

TABLE 49
SCHOLARSHIP GRANTS

(in lakhs of rupees)

Year	Scheduled Castes	Scheduled Tribes	Other Backward Classes	Total
1951-52	8·18	2·82	4 41	15·41
1955-56	63·78	13·05	73·70	150 53
1956-57	87 99	15 78	83·52	187·29
1957-58	100 37	18 97	82 19	201·53
1958-59	125 86	20·76	76·49	223·11
1959-60	143·85	23 89	90 08	257 82
1960-61	167 91	30·95	87·70	286·56

The Central Government's scheme to award scholarships to deserving students from these classes for studies in foreign countries came into force in 1953-54. From 1955-56 the number of such scholarships was increased to 12, four for each of the three groups. Tourist class sea passages are given to students who receive foreign scholarships without travel grants. Overseas scholarships to students belonging to backward communities are also awarded by the State Governments of Assam and Bihar.

Seventeen and a half per cent of the merit scholarships granted by the Centre to deserving students of the lower income groups for studies in institutions which are members of the Indian Public Schools Conference, are reserved for backward communities. Some of the State Governments offer similar scholarships. Some public schools also award scholarships to deserving backward class students. Reservation of seats, lowering of minimum qualifying marks and raising of the maximum age limit for admission of members of these classes in all technical and educational institutions are among other steps recommended by the Union Government to all educational authorities.

Economic Opportunities

Of a tribal population of 225 lakhs, about 26 lakh persons practise shifting cultivation annually over an area of 22,55,816 acres, the total area used so far for shifting cultivation being five times this figure. The problem is in its acute form in the States of Andhra Pradesh, Assam, Bihar, Madhya Pradesh and Orissa and the Union Territories of Manipur and Tripura. A scheme to control shifting cultivation was started during the First Plan period and 5,778 acres of land have been so far allotted for the settlement of shifting cultivators in Assam. Six colonisation schemes have been started in Andhra Pradesh and nearly 1,548 families in Bihar, 366 in Madhya Pradesh, 2,990 in Orissa and 13,229 in Tripura have been settled under the scheme.

Andhra Pradesh, Bihar, Gujarat, Madras, Maharashtra, Orissa and Uttar Pradesh have launched schemes to improve irrigation facilities to reclaim waste land and to distribute it among members of the Scheduled Castes and Scheduled Tribes. In addition, facilities for the purchase of livestock, fertilisers, agricultural implements, better seeds, etc., are also being extended to them. Some States have set up demonstration farms for training them in methods of scientific cultivation. Cattle breeding and poultry farming are being encouraged among these people.

The Governments of Andhra Pradesh, Assam, Bihar, Gujarat, Maharashtra, Uttar Pradesh and West Bengal are encouraging the development of cottage industries through loans, subsidies and training centres. Multi-purpose co-operative societies which provide credit in cash and in kind to the Scheduled Castes and Tribes have also been established in Andhra Pradesh, Bihar, Madras, Mysore, Orissa, Uttar Pradesh and West Bengal. In some States, such as Maharashtra and Andhra Pradesh, contracts for exploiting forest produce are being given to the Scheduled Tribes through labour co-operative societies.

Legislation has been enacted in almost all the States to extend relief to the indebted, including those belonging to the Scheduled Castes and Scheduled Tribes. Measures for the abolition of their debt bondage have been taken in Orissa and Bihar. Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Orissa and West Bengal have enacted tenancy laws to ensure security of land tenure to the Scheduled Tribes.

Other Welfare Schemes

Other welfare schemes include the grant of house sites free or at nominal cost, assistance by way of loans, subsidies and grants-in-aid to local bodies for the construction of houses for their Harijan employees and monetary assistance to co-operative building societies specially for the benefit of the Scheduled Castes and Scheduled Tribes. A scheme of legal aid to Scheduled Castes is now in operation in many States.

Tribal Research Institutes

Tribal research institutes, which undertake intensive studies of tribal arts, culture and customs, have been set up in Bihar, Madhya Pradesh, Orissa, Rajasthan and West Bengal. A Tribal Research Institute has been started in the Andhra University. The Gauhati University initiated some years ago the study of the social and cultural life of the tribes in Assam. In Maharashtra and Gujarat, tribal research is being conducted by the Anthropological Society of Bombay, the Gujarat Research Society and the University of Bombay. In West Bengal, the Cultural Research Institute has produced reports on several aspects of tribal life in the State. The Department of Anthropology, Government of India, has completed two studies on the inter-ethnic relationship and social mobility among some tribal and caste groups in the country and selected material traits in one hundred and forty-eight districts all over India. Studies in the culture and languages of the

people of NEFT are being undertaken by the research department of NEFT. The Tribal Research Bureau in Orissa has also undertaken investigation of several important tribal problems. The Institute in Madhya Pradesh has completed an evaluation of co-operative societies in five districts of the Mahakosal region and is now engaged in (a) the study of the impact of industrialisation on the social, cultural and economic life in the coal mines of Chindwara district; (b) the study of the problem and extent of shifting cultivation in Mandla, Surguja, Bastar and Raigarh districts; (c) assessing relative importance of minor forest produce in tribal economy; (d) the study of housing and water supply conditions in Scheduled Areas; (e) the study of social movement among Gonds of Surguja and (f) evaluation of the ashram schools in the Vindhya Pradesh region. The Bihar Institute has also completed studies on a tribe in Santhal Parganas. The Bharatiya Lok Kala Mandal, Udaipur, is a pioneer non-official organisation which has conducted cultural surveys of tribes in the former Madhya Bharat State and in Rajasthan.

Tribal Development Blocks

During the Second Plan, under a Central programme for special multi-purpose tribal blocks aimed at intensive development in tribal areas on the general pattern of community development with modifications to suit tribal conditions, 43 development blocks were started with an outlay of Rs. 27 lakhs per block. A committee headed by Verrier Elwin examined the working of these blocks. It is now proposed to have, in a 10-year programme, about 330 tribal development blocks each involving an outlay of Rs. 32 lakhs in two stages and covering about 200 square miles and 20,000 people of whom at least 66% per cent are tribal.

Expenditure under the Plans

The expenditure actually incurred on welfare schemes in the First Plan period, estimated expenditure in the Second Plan period and the outlay for the Third Plan period are shown in table 50.

CHAPTER XV

MASS COMMUNICATION

BROADCASTING

There are today 29 radio stations, covering all the important linguistic regions of the country. The stations are grouped into four zones as follows:

North: Delhi, Lucknow, Allahabad, Patna, Jullundur, Jaipur, Simla, Bhopal, Indore and Ranchi.

West : Bombay, Nagpur, Ahmedabad, Poona and Rajkot.

South : Madras, Tiruchirapalli, Vijayawada, Trivandrum, Kozhikode, Hyderabad, Bangalore and Dharwar.

East : Calcutta, Cuttack and Gauhati.

There are two stations of Radio Kashmir, one at Srinagar and the other at Jammu. Radio Goa is at Panjim. The number of transmitters, studio centres and receiving centres on December 31, 1961, was 77, 33 and 28 respectively.

A network of 56 new transmitters is being set up under a plan of expansion drawn up in 1961. On completion of the plan, the area covered by medium-wave broadcasting will increase from 37 per cent of the total area of the country to 61 per cent. About 74 per cent of the total population will be brought within the listening range of medium-wave programmes, as against 55 per cent at present. The Plan aims at (i) enabling new areas and population groups to hear programmes on medium-wave, which are not at present within their listening range, and (ii) providing an alternative light programme on medium-wave. At all stations of All India Radio and in a few urban centres, at least two medium-wave channels will be available, one of which will carry Vividh Bharati programmes.

Programme Composition

Music programmes comprise nearly 50 per cent of all the programmes broadcast by All India Radio. Talks, discussions, interviews, dramas and features cover a wide range of subjects. The National Programme of Talks given by well-known personalities in arts, sciences and literatures is broadcast every Wednesday and is relayed by all stations. Documentary features, radio reports, etc., are also broadcast. The composition and duration of the Home Services programmes, including Vividh Bharati, during 1961 are shown below.

TABLE 51

Vividh Bharati

This all-India light variety programme completed its fourth year in October 1961, and is now broadcast for 9 hours on week days and a little over 10 hours on Saturdays, Sundays and principal festival days. The Saturday programmes include a special transmission from 9·45 to 11 p.m., providing an alternative to the National Programme of Music for such listeners as may not be interested in classical music. The programme is broadcast over two powerful short-wave transmitters from Bombay and Madras. With effect from February 22, 1960, part of these programmes are also being broadcast on a medium-wave transmitter from Delhi. With the completion of the new medium-wave plan, Vividh Bharati programmes would be available on the medium-wave practically all over the country.

Special Audience Programmes

Rural broadcasts deal with all aspects of rural life and provide useful information to villagers through dialogues, discussions, plays, news, talks,

weather reports, etc. Problems concerning agriculture, education, health and hygiene are dealt with by experts in programmes broadcast in all major Indian languages and about 103 tribal languages and dialects for a total duration of about 10,000 hours. Under the Central Government's Subsidy Scheme, about 70,000 community sets have been supplied to various State Governments for installation in rural areas.

A country-wide scheme of Radio Rural Forums, providing listening-cum-discussion-cum-action group programmes in which a two-way contact between the broadcaster and the listener is established, was launched on November 17, 1959. These are organised in villages which regularly discuss the weekly broadcasts and send their criticisms and suggestions to the radio stations concerned. By the end of 1961, 2,129 such forums were functioning in the different States.

Educational programmes for schools are at present broadcast from 23 stations, for a duration of 20-40 minutes on two to five days in a week. School Listening Clubs have been formed at Madras, Tiruchi, Jaipur, Hyderabad, Lucknow and Simla to bring about a closer and more continuous contact of the radio stations with the schools concerned. Over 18,000 schools are registered with All India Radio for these broadcasts.

Programmes addressed to students of universities consist of talks and discussions on subjects of academic interest. Inter-university contests in group discussions and radio plays are held annually in Hindi, English and other languages.

Special programmes for women and children are broadcast from all stations generally twice and at some stations thrice a week for 30 to 45 minutes per programme. In the women's programmes, information on house-keeping, child care, nutrition, mental health, etc. is given. Talks, dialogues, short stories, choruses, plays, features and quiz programmes are broadcast in programmes meant for children. Formation of listening groups both for women and children is being encouraged.

Programmes for industrial workers are broadcast at convenient timings from Delhi, Madras, Bombay, Calcutta, Ahmedabad, Lucknow, Allahabad, Nagpur, Ranchi, Trivandrum, Bangalore and Hyderabad. They are meant to provide information and entertainment to industrial workers and in particular to acquaint them with the laws and problems of industrial establishments. A programme for tea garden workers and their families in Assam is also being broadcast from Gauhati.

Programmes for the armed forces are broadcast from Delhi, Srinagar and Jammu.

Five Year Plan Publicity

Publicity for the Plan aims at bringing home to listeners the theme of helping themselves to help the Plan. In addition to the general programmes in which the message of the Plan is carried, special audience programmes emphasise the various aspects of planned progress. Songs specially composed on various 'Help the Plan Schemes' are set to popular tunes and included in rural programmes. The various folk parties, which come to Delhi for the Republic Day celebrations, are invited to present special songs on development activities in a programme called 'Songs of the Nation Builders'. Use is also made of short documentaries on various projects under the Plan.

During 1961, about 4,500 programmes dealing with different aspects of the Plan were broadcast.

Programme Exchange

The Programme Exchange Unit (Internal) helps stations to exchange their best programmes. During 1961 about 10,200 programmes were thus

exchanged. The External Programme Exchange Unit receives contributions from foreign radio organisations and in return sends them contributions of Indian items. About 85 broadcasting organisations and Indian diplomatic posts abroad received programmes under this arrangement in 1961. A central library of recordings on tapes and discs is also maintained at Delhi. It serves both as a reference library and an archive of radio programmes of permanent value. A quarterly External Programme Bulletin, published by the Unit, gives full details of programmes available for distribution.

Transcription Service

In addition to the processing of speeches of important personalities, the Transcription Service has in its library recordings of folk music, of old masters representing various schools of music, and of music of different countries of the world. To co-ordinate the supply, circulation and utilisation of tapes by different stations and units of AIR, a Central Tape Bank is also functioning in this Unit.

Advisory Committees

The Central Programme Advisory Committee advises AIR on general principles to be kept in view in the planning and presentation of programmes and suggests methods of making them more useful and interesting. The Central Advisory Board for Music lays down in general terms the music policy for the guidance of AIR. The AIR Liaison Committee maintains effective liaison with the radio trade and industry. At the stations, public opinion is associated with the planning and presentation of programmes through (i) the Programme Advisory Committee (attached to all stations), (ii) the Rural Advisory Committee (attached to all stations), (iii) the Consultative Panels for Educational Broadcasts (attached to stations broadcasting school programmes) and Panels for University Programmes, and (iv) Advisory Committees for Industrial and Tribal Programmes (attached to stations broadcasting such programmes).

Programme Journals

The programmes planned by the different stations are announced in advance in the following journals :

TABLE 53
PROGRAMME JOURNALS OF AIR

Name of the journal	Published from	Language	Periodicity
Akashvani (formerly Indian Listener)	Delhi	English	Weekly
Awaz	do.	Urdu	Fornightly
Sarang	do.	Hindi	do.
Betar Jagat	Calcutta	Bengali	do.
Vanoli	Madras	Tamil	do.
Vani	do.	Telugu	do.
Nabhovani	Ahmedabad	Gujarati	do.
Akashi	Calcutta	Assamese	do.

The following monthly journals, carrying the external services programmes and distributed free to overseas listeners, are also published in languages indicated against each :

1. India Calling English
2. Idhaat-ul-Hind Arabic
3. Sada-i-Hind Persian
4. Ponghubung Indonesian
5. Lay Daiga Athan (Cyclostyled) Burmese
6. Yintudze Sheng (Cyclostyled) Chinese

7. Gya-Gar-Gi-Dra-Tan (Cyclostyled) .. Tibetan
 8. D-Hind Awaz (Cyclostyled) Pushto

News Services

News bulletins in the Home Services of AIR are broadcast in English and Hindi four times a day; in Bengali, Oriya, Tamil, Telugu, Kannada, Malayalam, Punjabi, Marathi, Gujarati, Assamese and Urdu three times a day; in Kashmiri and Dogri twice a day; and in Gorkhali once a day. A bulletin is also broadcast for troops in the Armed Forces Programme in Hindi and Gorkhali once a day. Daily commentaries are also broadcast in Kashmiri.

Ninety-nine bulletins—66 in the Home Services and 33 in the External Services—are broadcast daily. The Lucknow, Bhopal, Patna, Jaipur and Jullundur stations broadcast a regional news bulletin in Hindi, Bombay in Marathi, Madras in Tamil, Calcutta in Bengali, Hyderabad in Telugu, Bangalore in Kannada, Trivandrum in Malayalam, Gauhati in Assamese, Cuttack in Oriya, Ahmedabad in Gujarati and Srinagar-Jammu in Kashmiri, Dogri, Urdu and Pushto. Jullundur also broadcasts a bulletin in Punjabi. Radio newsreel programmes—two in English and three in Hindi—are broadcast every week, besides a series of special newsreels on important occasions. A commentary on the day's proceedings called "Today in Parliament" is broadcast on each day Parliament is in session. A weekly talk entitled "Matters of the Moment" of 10 to 15 minutes duration is broadcast every Sunday.

External Services

The External Services programmes are broadcast in 17 languages practically round the clock for listeners in Asia, Australia, New Zealand, Africa and Europe. Broadcasts for people of Indian origin abroad are directed to South-East Asia, East and Central Africa, Aden, Mauritius and Fiji and are in four languages, viz., Gujarati, Hindi, Konkani and Tamil. The broadcasts to non-Indian listeners abroad are in 13 languages, viz., Arabic, Burmese, Cantonese, English, French, Indonesian, Kuoyu, Nepali, Persian, Portuguese, Pushto, Swahili and Tibetan.

Production of Radio Receivers

The following table shows the position about the manufacture of radio receivers in India:

TABLE 54
 PRODUCTION OF RADIO RECEIVERS IN INDIA

Year	Number of receivers produced
1947	3,036
1951	61,800
1956	1,50,596
1957	1,90,690
1958	1,98,107
1959	2,14,955
1960	2,68,000
1961 (January—July)	90,163

Broadcast Receiver Licences

Table 55 shows the different kinds of licences in force on October 31, 1961, according to postal circles.

*Postal circles correspond to the pre-1956 reorganisation State Union Territory boundaries except as otherwise indicated.

**Assam Circle comprises Assam, Manipur, Tripura and NEFT.

† Central Circle comprises former Madhya Pradesh and Vidhya Pradesh areas.

@ Punjab Circle comprises former Punjab, Pepsu and Billa-pur areas, Himachal Pradesh and Jammu & Kashmir.

Television

The Experimental Television Service was inaugurated at New Delhi on September 15, 1959. This service, which is in the nature of a pilot project, is available for viewers in Delhi within a range of 12 to 15 miles. Designed primarily for community viewing, the programmes are mainly informative and educational in character and include illustrated talks, interviews, dialogues, discussions, documentary films, plays, skits, puppet shows, dance-drama, ballet and light and classical music.

During 1961 the Television Unit undertook two major projects—one with the co-operation of UNESCO and the other with the help of the Ford Foundation. The UNESCO project on social education, meant primarily to assess the effectiveness of social education releases on organised groups or teleclubs, has been completed and the assessment report from the Indian Adult Education Society awarded. The other project aims at putting out regular, systematic, in-school instructional programmes on selected subjects which will supplement the regular school instruction. Under the scheme eight programmes per week are televised in Chemistry, Physics, English and Hindi, for the 9th to 12th students of the Higher Secondary Schools in the Capital. About 250 television sets have been installed in 144 schools which may be effected shortly. It is proposed in due course to cover all the Higher Secondary Schools in Delhi. Work on the 5KW Television Transmitter at Delhi is in hand. When completed it will serve a radius of 25 miles.

THE PRESS

According to the fifth report of the Registrar of Newspapers for India, released in August 1961, there were 8,026 newspapers and periodicals in existence on December 31, 1960, as against 7,651 in 1959. This marked an increase of 4.9 per cent over the previous year.

Of the total of 8,026 newspapers, 593 were 'General Interest' newspapers and included 465 dailies and 128 non-dailies (published at intervals of less than a week) of A category and 128 dailies and non-dailies belonging to B category papers such as market reports, weather bulletins, etc. The number of periodicals was 7,433, of which 1,503 belonged to the B category.

The highest number (1,721) of newspapers was published in the State of Maharashtra, followed by West Bengal (1,107), Uttar Pradesh (1,003), Delhi (844) and Madras (786). Table 56 gives the State-wise break-up of newspapers according to periodicity.

An analysis of the language-wise distribution of newspapers shows that English continued to have the largest number of papers (1,647), Hindi coming next with 1,532. The largest number of dailies (116) were, however, published in Hindi. Of the 79 dailies published in English, 29 were market reports or commercial bulletins. The respective percentages for newspapers published in major languages were : English 20.5; Hindi 19.1; Urdu 8.5; Bengali 6.6; Gujarati 6.5; and Marathi 5.3. Table 57 shows the distribution of newspapers according to State and language, as on December 31, 1960.

*Circulation of Newspapers**

Out of a total of 8,026 newspapers and periodicals published in 1960, data of circulation were available in respect of 4,651. The total average circulation of these papers was 182.19 lakhs as against 170.72 lakhs commanded by 4,738 papers in 1959. A study of the circulation of 3,489 newspapers, for which data were available for both the years, shows that the average increase during 1960 was 8.3 per cent over that of 1959. The increase in circulation in 1960 was shared by papers of most periodicities and

*Circulation figures comprise copies sold and copies distributed free.

In 1960, newspapers in English continued to have the largest circulation, *i.e.* 41·47 lakhs or 22·8 per cent of the total. Next in importance were Hindi newspapers with a circulation of 35·83 lakhs or 19·7 per cent. Others in order of importance were: Tamil (24·86 lakhs), Gujarati (12·02 lakhs), Malayalam (11·30 lakhs), Marathi (10·71 lakhs), Urdu (10·55 lakhs), Bengali (9·39 lakhs), and Telugu (6·31 lakhs).

Table 59 gives the total number of papers for which data were available for 1959 and 1960 respectively, and their language-wise circulation in each of the two years.

*General Interest Newspapers, Categories (A) and (B).

Newsprint

For the major part of its requirement of newsprint, India depends on foreign countries. The only Indian manufacturing unit, the National Newsprint and Paper Mills Ltd. at Chandani in Madhya Pradesh, went into production in January 1955 and has an annual installed capacity of about 30,000 tons. The rest of India's newsprint comes mainly from Canada, Finland, Norway and Austria. The quantity and value of the newsprint imported are given in the following table :

TABLE 60
IMPORT OF NEWSPRINT

Year	Quantity (in cwt.)	Value (in rupees)
1957	12,75,183	5,64,19,510
1958	11,49,411	4,94,34,518
1959	14,90,760	5,97,28,803
1960	15,22,392	6,18,56,009
1961	17,59,120	7,48,74,620

Press Information Bureau

Information regarding the policy, plans, achievements and other activities of the Government of India is made available to the Press in English and 12 Indian languages by the Press Information Bureau. During 1961, textual services were received by 3,806 Indian newspapers and periodicals, photographic services by 307 and photographs in the form of eboid blocks by 900. Indian and foreign correspondents accredited to the Government of India at headquarters numbered 271 on December 31, 1961.

The Bureau's Information Services in Hindi and Urdu are run from the head office in New Delhi. The offices at Lucknow, Varanasi, Patna, Jaipur and Calcutta also serve the Hindi Press. Similar service to Urdu newspapers is provided by offices at Jullundur, Srinagar and Hyderabad. Services in other Indian languages are issued from the regional offices at Calcutta (Bengali), Gauhati (Assamese), Cuttack (Oriya), Bombay and Nagpur (Marathi), Ahmedabad (Gujarati), Madras (Tamil), Hyderabad (Telugu), Bangalore (Kannada), Ernakulam (Malayalam) and Jullundur (Punjabi). The Bureau's 17 regional and branch offices are linked with headquarters by teleprinter lines.

Information Centres have been opened at New Delhi, Jullundur, Srinagar, Madras, Lucknow, Patna, Hyderabad, Trivandrum, Rajkot, Bhubaneswar, Bombay, Bangalore, Nagpur, Jaipur, Bhopal, Shillong and Madurai as part of a scheme to open Information Centres at State capitals and other important places.

Freedom of the Press

Article 19(1) of the Constitution guarantees "the right to freedom of speech and expression" to all citizens. This freedom has been interpreted by the courts to include freedom of the Press. Under the Constitution (First Amendment) Act of 1951, Parliament can enact legislation reasonably restricting the exercise of this right "in the interests of the security of the State, friendly relations with foreign States, public order, decency or morality, or in relation to contempt of court, defamation or incitement to an offence". The words "reasonable restrictions" occurring in clause (2) of Article 19 make such legislation justiciable.

There are four main Central laws relating to the Press; (i) The Press and Registration of Books Act, 1867; (ii) The Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955; (iii) The Delivery of

Books and Newspapers (Public Libraries) Act, 1954; and (iv) The Parliamentary Proceedings (Protection of Publication) Act, 1960.†

FILMS

The output of feature films for the year 1961 was 303. Table 61 shows the number of feature films produced in various languages and certified for public exhibition.

In addition, the Central Board of Film Censors certified a total of 792 short films for public exhibition during the calendar year 1961. These consisted of :

(i) Short films over 2,000 ft. in length	81
35mm.	
(ii) Short films 2,000 ft. and below in length	636
16mm.	
(i) Short films above 800 ft. in length	18
(ii) Short films 800 ft. and below in length	57
TOTAL	792

The following table shows the classification of certified Indian feature films according to the nature of their themes:

Film Institute of India

The Film Institute of India, sponsored by the Ministry of Information and Broadcasting with a view to providing all-round technical training in the production of films and facilities for research in film techniques, commenced functioning at Poona with the inauguration of a three-month refresher course on March 20, 1961. Intended to give systematic training to assistants working in the film industry, the refresher course provided training in motion picture photography, sound recording and film editing.

Situated at a 20-acre site, formerly occupied by the Prabhat Studio, the Institute commenced regular courses in four subjects, namely, direction-cum-script writing and film editing (two-year courses), motion picture photography and sound engineering and sound recording (three-year courses) on August 16, 1961. The Institute charges a tuition fee of Rs. 200 per annum payable in eight equal monthly instalments. Scholarships of the value of Rs. 75 per mensem each are awarded to about 10 per cent of the students in a course on merit-cum-means basis.

An Advisory Committee of 12 eminent persons connected with films, education etc., with the Minister of Information and Broadcasting as chairman, advises the Government on all policy matters pertaining to the Institute.

†For a brief summary of these Acts, see 'INDIA 1958', pp. 176-178.

*Figures do not include two documentary feature films in 1956, one in 1957, two in 1959 and one in 1960.

Children's Film Society

The Society was registered under the Societies Registration Act in May 1955. The principal aim of the Society is to undertake, aid, sponsor, promote and co-ordinate the production, distribution and exhibition of films specially suited or of special interest to children and adolescents. The Society is in receipt of a grant-in-aid from the Central Government for the production of films suitable for children. State Committees have also been formed in a number of States to spread the children's film movement.

The Society has so far produced fourteen feature films: 'Char Dost', 'Jaldeep', 'Scout Camp', 'Haria', 'Yatra', 'Guru Bhakti', 'Meera Ka Chitra', 'Dilli Ki Kahani', 'Savitri', 'Story of Two Stamps', 'Bapu Ne Kaha Tha', 'Shivaji the Great', (Hindi), 'Shivaji the Great' (Marathi) and 'Mahatirath' and twelve short films 'Ganga Ki Lahren', 'Bachon Se Baaten', 'Gulab Ka Phool', 'Alladin and the Magic Lamp', 'Ekata', 'Our Festivals', 'Panchatantra', 'Sara Biswas', 'Id Mubarak', 'Hero', 'Chetak', and 'Nyaya'. In addition, the Society adapted two Indian feature films, viz., 'Ram Shahstri Ka Nyaya' and 'Bal Ramayana'. It has also adapted some foreign films for exhibition to children. The Society's film 'Jaldeep' was adjudged as the best children's film at the International Film Festival at Venice in 1957. Its films 'Id Mubarak' and 'Dilli Ki Kahani' won All-India Certificates of Merit in the State Awards for Films, 1960. 'Savitri' won the same distinction in 1961.

The Society also makes suitable versions of documentary films produced by the Films Division for exhibition to children. Its films are now shown in the morning shows of about 150 cinema houses in cities, in rural areas through mobile vans and in educational institutions having 16mm. projectors.

The Society is also showing films free of charge to children living in slums and in delinquent homes. It is estimated that children's films are reaching an audience of about 1 crore and 68 lakhs every year.

International Film Festivals

During the year 1961, Indian films were entered in a number of international and other foreign film festivals. The following are the awards earned by Indian films during the year :

- (i) "Rabindranath Tagore" (longer version) was awarded 'Golden Seal'—the first prize for the best documentary film at the XIV Locarno Film Festival, Locarno (Switzerland).
- (ii) "Green Heritage" was awarded a 'Certificate of Merit' at the Fourth Annual International Film Festival, Vancouver (Canada).

Both the documentaries were produced by the Films Division of the Government of India. In addition, the Films Division also received an 'Award of Meritorious Participation' at the San Francisco International Film Festival.

In India itself the Government organised an International Film Festival in co-operation with the Film Federation of India at New Delhi from October 27 to November 2, 1961. Besides India and the United Nations, 36 countries, with 39 feature and 59 short films, participated in the Festival. The films presented at the Festival were also screened during Film Weeks held at Calcutta, Madras and Bombay.

State Awards for Films

State awards for films of high aesthetic and technical standards and of an educative and cultural value have been a regular annual feature since 1954. The awards are given separately for feature, documentary and children's films as well as for educational films in 16 mm. and film strips in 35 mm.*

Regional committees at Bombay, Madras and Calcutta consisting of distinguished persons in public life as well as persons from the industry qualified to judge technical standards of films make a preliminary selection

*See Appendices for awards for films produced in 1961.

of feature films. Separate committees initially examine documentaries and educational films. The final selection is made by the Central Committee.

Documentaries and Newsreels

The Films Division of the Union Ministry of Information and Broadcasting is mainly responsible for producing short films and newsreels. Till the end of 1961, the Division produced 690 newsreels and released 555 short films for exhibition in cinemas. The Division today produces nearly 170 films per year. These include newsreels, documentaries, educational and scientific films.

The shorts and newsreels are produced in 13 languages, viz., English, Hindi, Bengali, Tamil, Telugu, Gujarati, Punjabi, Assamese, Kannada, Urdu, Oriya, Marathi and Malayalam. They are made in 35 mm. standard size. Films intended for circulation in rural areas through mobile vans are of slower tempo so as to enable the rural audiences to understand them easily. Some of the shorts are made in colour. Ten short films were produced in colour in 1961.

During 1961, 21 films were produced through outside producers and five ready-made films were purchased for release in cinema circuits. One film produced by the Khadi Board and the Village Industries Commission and two cartoon films were released on commercial circuits during the same period. The cartoon films were: "A Great Problem", a film on family planning and "This Our India", presenting with the help of animated maps and diagrams some geographical and economic facts about India.

Interesting events within and outside India are included in the weekly Indian News Review. Items from foreign countries are received from 24 organisations as part of an agreement of free exchange of newsreel material. Important events within the country are covered by 15 cameramen stationed at various centres in India. Sometimes the events covered by film units of the State Governments are also incorporated in the weekly newsreels.

Every cinema is required under the terms of its licence to exhibit at each performance not more than 2,000 ft. of films approved by the authorities as documentary films, films of scientific and educational value and films dealing with news and current events. These are supplied by the Films Division on payment of rental not exceeding one per cent of the average weekly net collections. One newsreel and one short film a week are released alternately to all cinemas throughout the country.

Prints can be obtained on loan by Government and semi-Government departments, educational institutions, hospitals, charitable, social, welfare and other non-profit-making organisations. These are made available through the network of six branch offices of the Films Division at Bombay, Madras, Calcutta, Nagpur, Lucknow and Secunderabad and also through the Field Publicity Units of the F.Y.P.P. organisation of the Government of India. Exclusive shows of documentary films and newsreels are also held at the Films Division Auditorium, New Delhi, Children's Theatre, Madras, Tarabai Hall, Bombay, and Academy of Fine Arts Theatre, Calcutta. These shows are open to public on a small admission fee.

Documentaries approved for external publicity are supplied to 79 Missions abroad. A special monthly overseas edition of newsreels is compiled and supplied to 26 external posts. These are utilised by the Indian Missions for exhibition in their premises and outside and are also lent to social and educational institutions, local Indian residents, etc. Besides, the Films Division has regular arrangements for screening of its documentaries in cinemas and on television in some foreign countries.

Film Censorship

The Central Board of Film Censors was constituted in January 1951 for the purpose of sanctioning films for public exhibition in the whole of India.

The Board consists of eight members, including the Chairman, all of whom are appointed by the Government of India. The head office of the Board is at Bombay and there are regional offices at Bombay, Calcutta and Madras. The Regional Officers are assisted in the examination of films by Advisory Panels, the members of which are appointed by the Government of India. They include educationists, doctors, lawyers, social workers, etc.

Every film, in respect of which an application for certification is made to the Board, is viewed by an Examining Committee. On the recommendations of the Examining Committee the Board may refuse a certificate for the public exhibition of any film, or grant it with or without cuts or modifications to be carried out in the film. Where this decision is not acceptable to the applicant concerned, he may ask for reconsideration of the film by a Revising Committee which is presided over by the Chairman. A film may also be referred to a Revising Committee by the Chairman on his own initiative. The applicant is given an opportunity to put forward his point of view both before the Examining and Revising Committees. Finally, an appeal against the decision of the Board may be made to the Government of India.

Certificates for unrestricted public exhibition are called 'Universal' certificates and bear a 'U' mark. Films restricted to adults, *i.e.* to persons above the age of 18 years, are given 'Adult' certificates and bear an 'A' mark. If any portion of a film is excised, a triangular mark is put at the left-hand bottom corner of the certificate, and a description of the deleted portion is endorsed on the reverse of the certificate. The decision of the Board in respect of each film examined by it is published in the Gazette of India.

Directions have been issued by the Government for the guidance of members of the Examining and Revising Committees of the Board. They include broad principles and detailed rules which aim at discouraging crime, vice, immorality, indecency, incitement to disorder, violence, breach of law, disrespect to a foreign country or people, etc.

Between 1951 and 1961, the Board certified 9,387 Indian films and 22,757 foreign films. During 1961, the Board examined 3,308 films, of which 75* including 70** foreign films were refused certification, and 2,920 were given 'U' and 150 'A' certificates. The certified films consisted of 1,975 foreign films and 1,095 Indian films. The excisions from the films totalled 1,05,092 ft.

Import of Cinematographic Film and Equipment

The quantity and value of cinematographic film—raw and exposed—and equipment imported during the period 1957 to 1961 are shown below :

TABLE 63
IMPORT OF CINEMATOGRAPHIC FILM AND EQUIPMENT

Year	Raw Film		Exposed Film		Sound recording equipment (value in Rs. lakhs)	Projection equipment (value in Rs. lakhs)
	Footage (lakhs)	Value (Rs. lakhs)	Footage (lakhs)	Value (Rs. lakhs)		
1957	2,713·19	205·36	168·73	45·36	13·10	56·39

PUBLICATIONS

The Publications Division in the Ministry of Information and Broadcasting is responsible for the preparation, production, distribution and sale of books of general interest, popular pamphlets, pictorial albums, journals, etc., for providing authentic information about the country's cultural heritage, activities of the Government, progress of developmental programmes and places of tourist interest. Publications are brought out in English, Hindi and the regional languages. A similar role is performed in the States by the Departments of Information and Publicity.

Besides acting as the centralised agency of the Central Government for publications of a non-technical nature, the Division undertakes the publication of literature for such organisations as the National Book Trust and the Central Social Welfare Board. It also acts as the distributor for some of the publications of the Sahitya Akademi, the National Museum, Lalit Kala Akademi, All-India Handicrafts Board, etc.

The Division publishes 18 journals including general and cultural magazines such as *The March of India* and *Ajkal* (in Hindi and Urdu) as well as journals devoted to the Plan such as *Yojana* (in English and Hindi), *Bhagirath* and *Kurukshetra* (in English and Hindi). In addition to these, the Division brings out 11 programme journals on behalf of All India Radio.

During 1961, the Division released a total of 233 books and pamphlets, both of general interest (including children's literature) and for tourist and Plan publicity, in various languages. Among the important publications were : the Hindi editions of the biographies of *Deshbandhu Chittaranjan Das* and *Dadabhai Naoroji* in the "Builders of Modern India" series; *Rise of the Maratha Power* and *Bharat Men Angrezi Raj* (Part II—Hindi) in the series "Classics of Indian History and Economics"; *the Collected Works of Mahatma Gandhi*, Vol. V (English and Hindi); *Sach Ki Dharti Tap ka Desh* (Gujarati) under the scheme of Basic and Cultural Literature for Panchayat Libraries; *History of the Freedom Movement in India*, Vol. I; *Lure of Everest: A.I.R. Miscellany*, 1960; *Mahatma* by D. G. Tendulkar, Vols. II, III and IV in the revised 8-volume edition; *India's Foreign Policy* comprising selected speeches of the Prime Minister, *India and the West* by Barbara Ward (Indian edition); *Summary of the Third Five Year Plan* (Hindi); *Ten Years of Progress* (English and Hindi); Parts I and II of *Bharat Ke Gaurav* (Hindi), a new series; *Gurudev Rabindranath* (Hindi); *Eighty-four Not Out* by R.P. Paranjpye; *Jungle and Backyard* by M. Krishnan; *When the World was Young* by Verrier Elwin; *Traditions of the Indian Army* by Dharm Pal; *Gospel of The Buddha* by Paul Carus; and *One World and India* by Arnold Toynbee (Hindi).

The Division sold about 18.6 lakh assorted copies of various magazines and pamphlets, and distributed free 15.05 lakh copies during 1961.

ADVERTISING AND VISUAL PUBLICITY

The Directorate of Advertising and Visual Publicity functions as the central organisation of the Government of India for the execution of its advertising and visual publicity requirements. It is responsible for the planning, production and release of display advertisements to newspapers and periodicals, the designing and production of printed publicity materials and the issue of classified advertisements on behalf of various Ministries and Departments (excepting Railways), and a number of autonomous bodies under Government.

In 1961, the Directorate placed 822 display and 7,284 classified advertisements, totalling 64,725 insertions. Major press advertising campaigns released during the year were for the Third Five Year Plan, metric system of weights and measures, national savings schemes, Post and Telegraphs

Department's educational campaigns, the two all-India Boards for Handicrafts and Handlooms, tourism, recruitment to Armed Forces and family planning. The increased tempo of publicity was reflected in the intensified use of the media of outdoor publicity such as enamel boards, hoardings, metallic tablets, cinema slides, transport bus panels, neon signs, poster frames, savings boxes and metallic badges and copper plaques.

The Exhibition Division at headquarters and its 12 field units along with the broad-gauge railway exhibition vans, organised a total of 647 exhibitions during 1961. In addition, the Family Planning Unit and the National Savings Unit put up 8 and 12 exhibitions respectively during the same period. The most important exhibition handled by the Division was the "Our India" pavillion at the Indian Industries Fair in New Delhi, which was visited by an estimated ten lakh people.

The Distribution Branch of the Directorate distributed in all 2,73,58,929 copies of publicity material in 1,45,996 consignments including postal packets.

CHAPTER XVI

ECONOMIC STRUCTURE

India is a country with a developing economy, rich in natural resources and manpower. Her resources, human as well as material, are capable of fuller exploitation and more intensive utilisation. Despite a 22 per cent rise since 1948-49, the per capita income remains low (Rs. 305 in 1959-60). The Indian economy is still predominantly agricultural; nearly half of the country's national income is derived from agriculture and allied activities which absorb nearly three-fourths of its working force. Since independence it has been the aim of national planning to accelerate the pace of industrial development and at the same time to increase productivity in agriculture. Net investment in the economy has been rising in recent years. At the end of the Second Plan it amounted to about 11 per cent of the national income.

According to the National Sample Survey (December 1955–May 1956)* results, over two-thirds (67·2 per cent) of the consumer expenditure in the rural areas was on food articles. In the urban areas this percentage was less (58·2). Other important items of expenditure were clothing, fuel and lighting and rent (in the urban area only).*

NATIONAL AND PER CAPITA INCOMES

The national income of India for 1959-60 was computed at Rs. 12,940 crores compared to Rs. 8,650 crores in 1948-49. The per capita income in 1959-60 was reckoned at Rs. 304·7 compared to Rs. 249·6 in 1948-49.** The national income in 1959-60 was 49·7 per cent higher than in 1948-49 at current prices, while in real terms, that is, assuming a constant price level, the rise in national income during this period (1948-49 to 1959-60) was 37 per cent. The per capita income in 1959-60 was nominally 22·1 per cent higher than in 1948-49, while, at 1948-49 prices, the rise in per capita income amounted to 11·8 per cent. Table 65 shows the national and per capita incomes at current and constant prices between 1948-49 and 1960-61. The figures for 1960-61 are preliminary estimates and subject to revision.

TABLE 65

NATIONAL AND PER CAPITA INCOMES

Year	National income (in crores of rupees)		Per capita income** (in rupees)	
	At current prices	At 1948-49 prices	At current prices	At 1948-49 prices
1948-49	8,650	8,650	249·6	249·6
1950-51	9,530	8,850	266·5	247·5

1957-58	11,390	10,890	279·6	267·4
1958-59	12,600	11,650	303·0	280·2
1959-60	12,940	11,850	304·7	279·0
1960-61 (preliminary)	14,200	12,690	327·3	292·5

*The details of the consumer expenditure patterns in villages, towns and cities, are given later in this chapter. The data regarding rural and urban household expenditure pattern are also given.

**Based on estimates of population of growth during the two decades 1941–61 and the three decennial census figures 1941, 1951 and 1961. The estimates, therefore, differ somewhat from the figures given in earlier years which were based on population growth projection based on two decennial census figures only, namely, those for 1941 and 1951.

The index numbers of national and per capita incomes for 1950-51, 1955-56, 1959-60 and 1960-61 (preliminary), with 1948-49 as base, are given below.

TABLE 66
INDEX NUMBERS OF NATIONAL AND PER CAPITA INCOMES

(Base: 1948-49=100)

	National income		Per capita income*	
	At current prices	At 1948-49 prices	At current prices	At 1948-49 prices

SAVING

The volume and pattern of saving in the Indian economy for 1950-51 and for the years between 1955-56 and 1958-59, according to a recent study by the Reserve Bank of India, are given in Table 71.

TABLE 71
VOLUME AND PATTERN OF SAVING

	(in crores of rupees)				
	1950-51	1955-56	1956-57	1957-58	1958-59
Government sector	93.84	69.92	128.92	114.42	103.00
Domestic corporate sector	32.16	54.33	53.69	17.20	34.27
Household sector	509.88	785.98	810.36	686.55	837.57
Rural ..	189.93	175.56	214.40	205.08	242.36
Urban ..	319.95	610.42	595.96	481.47	595.21
Total saving	635.88	910.23	992.97	818.17	974.84
Total saving as percentage of national income	6.7	9.1	8.8	7.2	7.7

UNEMPLOYMENT

A precise estimate of the number of the unemployed in the country as a whole is still to be made. Employment exchange statistics cover mainly urban areas, and as yet only a portion of the unemployed actually register themselves with the exchanges, even where these exist.

According to a National Sample Survey conducted in 1953, 7.10 per cent of the population of the city of Calcutta were unemployed. According to another sample survey conducted in that year 2.59 per cent of the population or 7.44 per cent of the labour force were unemployed in towns with a population of 50,000 and above, excluding the four big cities of Calcutta, Bombay, Madras and Delhi. The latter survey also revealed that 8.48 per cent of the population in these towns were underemployed including 5.17 per cent "severely underemployed." The total number of the severely underemployed in the urban areas for the country as a whole, on this basis, worked out at 27.4 lakhs at the beginning of the Second Plan. According to the Agricultural Labour Enquiry, the number of the rural unemployed in 1950-51 was about 28 lakhs. On the basis of the available data, the Planning Commission estimated that early in 1956 there were, roughly speaking, 53 lakh unemployed persons in the country, 25 lakhs in the urban areas and 28 lakhs in the rural areas.

Employment opportunities created during the Second Plan period fell short of the original target of matching new entrants to the labour force every year. The shortfall amounted to about 20 lakhs. Besides the increase in the labour force during the Second Plan was larger than originally estimated by about 17 lakhs. The backlog of unemployment at the beginning of the Third Plan is thus estimated at about 90 lakhs. In addition there is a good deal of underemployment especially in the rural areas. According to the ninth to the twelfth rounds of the National Sample Survey carried on between May 1955 and August 1957, about 8 to 9 per cent of the employed population in urban areas and 10 to 12 per cent in rural areas worked on an average 42 hours or less per week and were available for additional employment. On this basis, the Planning Commission has estimated the extent of underemployment in the country at 1.5 to 1.8 crores.

The following table gives the occupational distribution of applicants on the Live Register of the Employment Exchanges as at the end of December 1961.*

TABLE 72

OCCUPATIONAL CATEGORIES AMONG APPLICANTS ON THE LIVE REGISTER OF THE EMPLOYMENT EXCHANGES (DECEMBER 1961)

	Number (thousand)	Percentage of total
Professional, technical and related workers	80	4.4
Administrative, executive and managerial workers	4	0.2
Clerical, sales and related workers	89	4.9
Agricultural, dairy and related workers	10	0.5
Miners, quarrymen and related workers	6	0.3
Workers in transport and communication occupations	35	1.9
Craftsmen and production process workers	1,34	7.3
Service workers (e.g., cooks, chowkidars, sweepers, etc.)	73	4.0
Labourers with work experience not elsewhere specified	1,08	5.9
Persons without professional or vocational training or previous work experience	12,95	70.8
TOTAL	18,33	100.0

PATTERN OF ECONOMY

According to the tenth round of the National Sample Survey conducted between December 1955 and May 1956**, a rural household and an urban

*For the number on the Live Register at the end of each year, see the chapter on 'Labour'. Ad hoc surveys have revealed that about 25 to 30 per cent of those registered with the employment exchanges are employed persons seeking better jobs.

**Details of household composition and other characteristics concerning earners and earning dependents, etc. are given in National Sample Survey report No. 34 on 'Employment and Unemployment'.

household in India consisted, on an average, of 5.0 and 4.4 persons respectively. Earners accounted for 29.0 per cent of the rural population while 15.4 per cent were earning dependents, and 55.4 per cent non-earning dependents. Of the urban population, 30.1 per cent were earners, 6.7 per cent earning dependents and 63.1 per cent non-earning dependents. The annual consumer expenditure in the rural areas was, according to the sample survey, about Rs. 214 per person during 1955-56; the corresponding figure for the urban areas was Rs. 307. The average consumer expenditure per person was the highest in North-West India (Rs. 319 in rural areas and Rs. 359 in urban areas) and the lowest for rural areas in South India (Rs. 182) and for urban areas in North India (Rs. 273).

Expenditure Pattern

According to the results of the tenth round of the National Sample Survey* (December 1955–May 1956), the expenditure on food articles in rural areas constituted nearly 67.2 per cent of the total consumer expenditure, while in respect of the urban areas this percentage was only 58.2. Other important items of expenditure were clothing (10.0 per cent of the total consumer expenditure in rural areas and 7.3 per cent in urban areas) and fuel and lighting (6.8 per cent in rural areas and 6.5 per cent in urban areas). Rent constituted nearly 4.0 per cent of the total consumer expenditure in urban areas, whereas it was negligible (0.2 per cent) in rural areas.

The average expenditure on clothing in the rural areas was about Rs. 21.4 per person for the whole of India while the corresponding figure for urban areas was Rs. 22.5.

On the basis of the tenth round of the National Sample Survey conducted between December 1955 and May 1956, households in the rural and urban areas were classified according to per capita monthly expenditure classes. The percentage distribution of households in the rural and urban areas of the country according to per capita monthly expenditure classes is indicated in table below.

TABLE 73
PERCENTAGE DISTRIBUTION OF HOUSEHOLDS BY PER CAPITA MONTHLY EXPENDITURE (DECEMBER 1955–MAY 1956)

Per capita expenditure per month (in rupees)	Proportion of total number of households (percentage)	
	Rural	Urban
0—8	14.2	3.8
8—11	16.7	10.2
11—13	10.5	7.1
13—15	9.4	6.0
15—18	11.7	10.4
18—21	8.7	9.2
21—24	7.9	6.3
24—28	5.5	9.1
28—34	5.7	8.4
34—43	4.4	9.5
43—55	2.9	8.3
55 and above	2.6	11.7

Consumer Expenditure Patterns in Villages, Towns and Cities

According to the tenth round of the National Sample Survey, the consumer expenditure per person per month in the villages (including the imputed value of supplies obtained in kind) was Rs. 17.6 during December 1955 and May 1956; in towns it was Rs. 25.2 and the average for Calcutta, Bombay, Madras and Delhi was Rs. 38.5.

*Details of consumer expenditure pattern can be seen in National Sample Survey report No. 47.

The patterns of consumption in the villages, towns and cities were also different. While about 38 per cent of the expenditure in the villages was on foodgrains, the proportion for the towns was 23 per cent and for the cities 16 per cent. The expenditure on all food items was 67 per cent of the total expenditure in the villages as compared to 58 per cent in the towns and 54 per cent in the cities. The actual expenditure on food in absolute terms was, however, higher in the cities than in the towns and villages. The expenditure on fuel and lighting was the lowest in the villages and the highest in the cities, although their proportion to the total expenditure was more or less the same for all the three categories.

The expenditure on the rest of the items, particularly on education, services and taxes, showed a gradual rise as one proceeded from the villages through the towns to the cities. The pattern of expenditure for the country as a whole approximates to that in the villages because of the preponderance of villages in the country.

Two tables nos. 74 and 75 show the income-distribution and expenditure-pattern based on the thirteenth round of the National Sample Survey.

TABLE 74

PERCENTAGE DISTRIBUTION OF HOUSEHOLDS BY PER CAPITA MONTHLY EXPENDITURE (SEPTEMBER 1957-MAY 1958)

Monthly per capita expenditure class (in Rs.)	Rural	Urban		All-India
		Bombay, Calcutta, Delhi and Madras combined	All towns and cities

Middle Class Income and Expenditure

The income-distribution and expenditure-pattern of middle-class families, in four major cities, based on the Middle-Class Family Living Survey, 1958-59, are given in tables 76 and 77.

TABLE 76
DISTRIBUTION OF MIDDLE CLASS FAMILIES BY INCOME
(1958-1959)

Monthly income group (in Rs.)	Percentage of families in each income group to the total number of families			
	Bombay	Calcutta	Delhi	Madras
0—75	0.2	1.0	0.5	2.5
75—100	1.2	3.5	1.9	9.4
100—150	10.8	13.8	12.5	19.4
150—200	16.0	16.6	19.7	18.6
200—300	27.5	22.5	25.2	21.2
300—500	26.4	21.4	24.7	18.4
500—750	9.5	11.2	7.9	5.0
750—1000	4.0	4.6	3.2	2.2
1000—1500	3.2	3.5	2.5	1.5
1500 and above	1.3	1.9	2.0	1.8

Pattern of Land Ownership

According to the eighth round of the National Sample Survey (July 1954—March 1955)*, there were about 6.4 crore households residing in the rural areas of India. The estimated area owned by rural households was about 31 crore acres which formed about 38 per cent of the geographical area and 61 per cent of the topographically usable area of India. What remained belonged to Government, urban households and non-household bodies.

A little over one-fifth (23 per cent), that is, about one and a half crores of households did not own any land. About a quarter of all rural households (24 per cent) had land less than one acre in area. A little less than half of the rural households had thus either no land or owned less than one acre, their share being only a little more than one per cent of the land owned by all rural households. About three-fourths of all the households had either no land or less than 5 acres and their share was about one-sixth of the area. At the other end, about one-eighth of the households had more than 10 acres each with a total share of about two-thirds of the whole area, and about one per cent of the households owned more than 50 acres each and together accounted for nearly one-fifth of the area.

The estimated average area owned, for all households, was about 4.8 acres; if those who had no land are excluded, the average would rise to about 6 acres. Out of about 6.4 crores of households, about one lakh households had more than 100 acres each; but the number owning more than 250 acres would probably be a few thousands only.

Most of the land was held under proprietary rights with only about 2 per cent of tenure holders and 19 per cent of occupancy tenants. The total area leased out was about 11.4 per cent of the area owned.

Table 78 shows the percentage distribution of total land owned under different ownership rights in the whole of rural India and in the rural areas of each zone.

*Details are given in National Sample Survey report No. 36. Figures differ somewhat from those in the earlier editions of the Reference Annual, which were based on a 'First Report' (NSS Report No. 10).

TABLE 77
 AVERAGE MONTHLY EXPENDITURE PER FAMILY ON VARIOUS GROUPS OF ITEMS
 (1958-59)

	Expenditure (in rupees)				Percentages to total expenditure			
	Bombay	Calcutta	Delhi	Madras	Bombay	Calcutta	Delhi	Madras
Food, beverages, tobacco and intoxicants	147.9	149.2	158.1	136.3	38.8	42.1	40.7	42.1
Fuel and light	14.2	12.9	14.3	14.5	3.7	3.6	3.7	4.5

Clothing, bedding, head-wear and foot-wear	45.5	31.4	57.5	38.6	12.0	8.9	14.8	11.8
Miscellaneous	120.5	94.4	102.7	87.4	31.6	26.6	26.5	27.0
TOTAL	380.9	354.3	388.3	324.1	100.0	100.0	100.0	100.0

TABLE 78
PATTERN OF LAND OWNERSHIP (JULY 1954-MARCH 1955)

Zone	Percentage of total area owned by					
	Proprietors		Tenure holders		Permanent heritable occupancy tenants	
	With right to transfer title	Without right to transfer title	With right to transfer title	Without right to transfer title	With right to transfer title	Without right to transfer title
North India ..	37.1	61.1	0.1	0.1	0.1	1.1
East India ..	32.6	2.5	5.1	0.5	56.3	2.2
South India ..	94.3	3.2	0.1	0.2	1.2	0.3
West India ..	88.0	6.0	0.9	0.2	3.5	0.9
Central India ..	94.0	4.3	0.1	0.1	0.4	0.4
North-West India	39.3	5.9	0.2	2.6	19.2	31.7
ALL-INDIA ..	67.1	11.6	1.0	0.6	12.9	6.0

Table 79 shows the average area owned by a rural household in India and in each of the population zones. Households owning land below the average size (including those with no land) are shown as percentage of the total rural households. Also, the area owned by such households is shown as a percentage of the total area under rural ownership.

TABLE 79
AVERAGE AREA OWNED BY A HOUSEHOLD

(Figures in brackets have been obtained by omitting the households owning no land or owning less than 0.005 acre)

Zone	Average area owned (acres)	Percentage of households owning land below the average	Percentage of area owned by households owning land below the average
North India	3.4 (3.8)	67 (66)	20 (22)
East India	2.9 (3.6)	70 (67)	16 (21)
South India	3.1 (4.4)	75 (72)	13 (20)
West India	7.7 (11.3)	71 (68)	14 (23)
Central India	8.2 (11.0)	71 (70)	15 (23)
North-West India	7.9 (11.2)	72 (70)	16 (25)
ALL-INDIA	4.8 (6.3)	74 (72)	16 (21)

Among all households in rural India 64.9 per cent did not lease out any land, 9.9 per cent leased out partly their own land and 2.1 per cent leased out fully their own land. The remaining 23.1 per cent of the households were landless.

Ninetyfive per cent of the households in rural India were operating land individually and in some population zones the percentage of households operating individually was perhaps higher. In the whole of India, about 5 per cent of the households operated land jointly with others. Only about 9 per cent of the total area was under joint cultivation.*

Pattern of Operational Holding

Table 80 shows the pattern of household operational holding according to the eighth round of the National Sample Survey (July 1954-March 1955).

TABLE 80

PATTERN OF HOUSEHOLD OPERATIONAL HOLDING (JULY 1954-MARCH 1955)

Size of holding (acres)	Percentage of total number of households	Percentage of total area operated
Nil	10.9	—
0.01— 0.99	30.7	1.2
1.00— 2.49	14.6	4.7
2.50— 4.99	15.5	10.7
5.00— 9.99	14.3	19.1
10.00—24.99	10.1	29.2
25.00—49.99	3.0	19.3
50.00 and above	1.0	15.8
TOTAL	100.0	100.0

According to the eighth round of NSS, the average size of a household operational holding was 5.28 acres (5.92 acres if holding of size less than 0.005 acres were omitted) in the whole of rural India. More than 70 per cent of the households had household operational holdings below the average size and their total share of the entire operated area was only 16.5 per cent.

Housing Pattern

Results of the eleventh round of the National Sample Survey (August 1956-January 1957) on housing conditions in rural and urban areas show that about 68 per cent of the households in the rural area and 69 per cent in the urban area possessed not more than two rooms each. The percentage of households possessing one room only in rural areas varied between 25 and 42 for the different population zones. About 65 per cent of households in big cities like Calcutta, Bombay, Delhi and Madras, and 36 to 38 per cent in other small and big towns lived in one room.

The percentage of households with 3 or more persons per room in the rural areas varied between 16.5 and 38.3 in the different population zones of India. In the cities of Bombay, Calcutta, Delhi and Madras about 28 per cent of the households had to accommodate 3 or more persons per room; the corresponding percentage for the big and small towns was about 25. In the rural area about 30 per cent of the households occupied floor-space between 101 and 200 square feet, this being the most numerous floor-space group in the rural as well as urban areas. In the urban areas 26.6 per cent of the households had this range of floor-space. The percentage of house-

*Details of operational holdings are given in NSS Report No. 30.

holds with per capita floor-space up to 50 square feet was 48·1 in the rural and 46·6 in the urban areas.

About 69 per cent of the rural households (71 per cent of the rural population) had drinking water from wells, 5 per cent from tubewells and only 1 per cent had tap water. In the urban sector, 51 per cent of the households (95 per cent in the four big cities, 76 per cent in the big towns and about 39 per cent in small towns) had drinking water from municipal taps. About 34 per cent of the urban population as a whole got their supply of drinking water from tanks and ponds.

A built-up latrine was used by only 5 per cent of the rural households, either in exclusive or common use with other households. In the urban sector 42 per cent of the households did not use any built-up latrine, about 38 per cent used it in common, whereas only 20 per cent had a latrine for individual household use. In the big cities, 74 per cent of households had built-up latrines in common use, about 13 per cent had it for private household use and over 12 per cent had no built-up latrines at all.

Tilling Methods and Rural Amenities

Data on some socio-economic aspects of the Indian villages have been obtained from the tenth to the twelfth rounds (December 1955-August 1957) of the National Sample Survey. According to these, 64 to 67 per cent of all the villages had a population below 500, whereas the number of villages with a population above 2,000 constituted between 4·2 and 5·6 per cent of all villages. The villages with a population between 501 and 1,000 constituted 19 to 21 per cent and villages with population above 3,000 constituted between 1·7 and 2·4 per cent.

In about 97 per cent of the villages tilling was done with the help of animals. Only 0·4 to 0·9 per cent of the villages had the power-driven system, whereas in 1·3 to 2·3 per cent of the villages, the mixed system prevailed. Non-chemical manures (cowdung, green manures, composts, etc.) were used in 64 per cent and 75 per cent respectively of the villages in the twelfth and eleventh rounds, whereas chemical manures were used in only 0·1 per cent villages for each round.

Chemical as well as non-chemical manures were used in 29 and 21 per cent respectively of the villages in these two rounds. As regards irrigation, about 22 per cent of the villages received water from the wells; about 10 to 12 per cent of the villages received canal and river water; about 6 to 8 per cent water from tanks and a few others from tubewells and anicuts. In about 21 per cent of the villages, the mixed system of irrigation was in vogue. Thirtyfour to 36 per cent of villages had none of these systems of irrigation and probably had to depend on the rains for watering the fields.

The average distances of certain amenities such as school, post office, police station, hospital and so on, from the villages are shown in the following table.

TABLE 81
AVERAGE DISTANCE IN MILES FROM VILLAGES TO IMPORTANT
AMENITIES (DECEMBER 1955-AUGUST 1957)

	Tenth round	Eleventh round	Twelfth round
Primary school	1·3	1·4	1·2
Post office	4·0	3·8	3·6
Police station	7·6	8·2	—
Hospital	9·0	8·8	8·6
High school	10·5	10·2	10·0
Telegraph office	11·5	11·5	11·1
Railway station	20·5	20·2	—

The average distance from schools, post offices, etc. gradually decreases with the size of the villages. Thus, in the twelfth round the average distance in miles from a primary school decreases from 1.9 for a village with a population up to 200 to 0.3 for a village with population 2,001 and above. Similarly, the average distance from a high school decreases from 13.1 to 5.8; that from the hospital decreases from 9.8 to 7.1; from post office from 4.8 to 0.6; and the distance from telegraph office from 13.5 to 8.0.

About 19 per cent of the villages had a weekly or daily newspaper coming into them, 12 to 14 per cent of the villages had a radio set and about 7 per cent had a library. A village fair, religious or otherwise, was held in about 80 per cent of the villages, about 65 per cent being religious fairs.

Just over 2 per cent of the villages had at least one allopathic practitioner, about 2.5 to 3 per cent had an homeopathic practitioner, between 4.2 and 5.9 per cent had an Ayurvedic practitioner whereas between 4.8 and 5.9 per cent of the villages had some other kind of medical practitioner.

PRICES

The movement of prices in India over recent years may be seen from table 82 which shows the index numbers of wholesale prices compiled by the Office of the Economic Adviser, Ministry of Commerce and Industry, Government of India (base : 1952-53=100). The index for January 1962 for all commodities stood at 125.2.

Various monetary and non-monetary measures were taken during the year 1960-61 for holding the price line. In the monetary sphere, general and selective credit controls, with suitable flexibility, were applied to meet the changing needs of the situation. On the non-monetary side, continued efforts, were made to step up production of essential commodities and, among other things, to secure larger imports of foodgrains on government account and essential raw materials in short supply, to ban forward trading in foodgrains, to facilitate movement of foodgrains from surplus to deficit areas, to control distribution of available stocks of commodities like raw jute and raw cotton and to bring about a general reduction in prices in the case of cotton textiles, raw jute, etc. An important decision taken was to build up a reserve stock of 50 lakh tons of foodgrains, largely from imports under the May 1960 PL 480 Agreement.

TABLE 82
INDEX NUMBERS OF WHOLESALE PRICES
(Base : 1952-53 = 100)

Year	Food articles	Liquor and tobacco	Fuel, power, light and lubricants	Industrial raw materials	Manufactured articles			General index

CHAPTER XVII

PLANNING

In his pioneering work, *Planned Economy for India* (1934), M. Visvesvaraya advocated the necessity for planning and also drew up a ten-year programme of planned economic development for the whole of India. In 1938, a National Planning Committee was set up by the Indian National Congress to inquire into the possibilities of planned economic development in India and to suggest practicable schemes for this purpose. The Committee issued a questionnaire and, at the end of World War II, produced a series of studies on the subject.

In June 1941, a number of Reconstruction Committees were set up by the Government of India to deal with various aspects of post-war reconstruction, and a Department of Planning and Development was created in July 1944. The Provincial Governments were also instructed in the same year to prepare their plans for post-war development.

Among the non-official plans formulated during World War II were: (i) the Bombay Plan, drafted by a group of economists and industrialists, mostly from Bombay; (ii) the People's Plan, drafted by M. N. Roy on behalf of the Post-War Reconstruction Committee of the Indian Federation of Labour; and (iii) the Gandhian Plan, drafted by S. N. Agarwal.

After independence, the Planning Commission was set up by the Government of India in March 1950 to prepare a plan for the "most effective and balanced utilisation of the country's resources." In July 1950, the Commission was called upon to prepare a six-year Plan for the economic development of the country, which was later incorporated in the Colombo Plan. In July 1951, the Planning Commission issued a draft outline of the First Five Year Plan covering the period April 1951 to March 1956 for the "widest possible public discussion". In December 1952, the final version of India's First Five Year Plan was submitted to Parliament.

Objectives

The central objective of planning was defined as initiating "a process of development which will raise living standards and open out to the people new opportunities for a richer and more varied life." Economic planning has to be viewed as "an integral part of a wider process aiming not merely at the development of resources in a narrow technical sense, but at the development of human faculties and the building up of an institutional framework adequate to the needs and aspirations of the people".

The long-term objective as originally laid down was to double the per capita income and to raise consumption standards by a little over 70 per cent by 1977*. During the First Plan period between 1951 and 1956, the national income was to go up from about Rs. 9,000 crores to about Rs. 10,000 crores, a rise of about 11 per cent. It was visualised that the rate of saving as a proportion of the national income would have to go up from 5 per cent in 1950-51 to 6½ per cent in 1955-56, 11 per cent in 1960-61 and 20 per cent in 1967-68.

In view of the growth of population having been more rapid than was originally expected, and in the light of likely trends, the Third Five Year Plan lays

*On certain more optimistic assumptions it was later calculated that the national income might be doubled by 1967-68 and the per capita income doubled by 1973-74. (*Second Five Year Plan*, May 1956). The investment coefficient, it was assumed in this later model, would go up from about 7 per cent in 1955-56 to about 11 per cent in 1960-61, 14 per cent by 1965-66, 16 per cent by 1970-71 and a maximum level of 17 per cent by 1975-76.

down the following long-term objectives to be attained over the next fifteen years: (i) a cumulative rate of growth as near as possible to 6 per cent per annum so as to secure more than a doubling of national income (from Rs. 14,500 crores in 1960-61 to Rs. 34,000 crores in 1975-76 at Rs. 1960-61 prices) and a 61 per cent increase in per capita income (from Rs. 330 in 1960-61 to Rs. 530 in 1975-76)*; (ii) the creation of employment outside agriculture for more than 4.6 crore persons so as to reduce the proportion of population dependent on agriculture from about 70 per cent to about 60 per cent; and (iii) the provision of universal education up to the age of 14 as envisaged in the Constitution.

Another principal objective to be firmly kept in view is to stabilise the growth of population over a reasonable period. The step-up in the net investment rate has to be from about 11 per cent of national income at present to 14-15 per cent, 17-18 per cent and 19-20 per cent per annum by the end of the Third, the Fourth and the Fifth Plans respectively. The major part of the increase in investment will have to be financed by domestic savings; the net saving-income ratio will have to rise from about 8.5 per cent at present to about 11.5 per cent, 15-16 per cent and 18-19 per cent at the end of the Third, the Fourth and the Fifth Plans respectively.

Another objective is to ensure that the economy can, after a period of ten years or so, reduce substantially dependence on assistance from abroad. This also postulates a steady and sizable increase in exports through appropriate policies and measures.

FIRST AND SECOND PLANS

The First Five Year Plan (1951-52 to 1955-56), through its emphasis on agriculture, irrigation, power and transport, aimed at creating the base for more rapid economic and industrial advance in the future. It also initiated some of the basic policies by way of social change and institutional reforms, which were further developed during the Second Plan. The Second Plan (1956-57 to 1960-61) not only carried these policies a step further by placing before the nation the goal of socialistic pattern of society, but laid emphasis on the development of basic and heavy industries. It also defined the key role which the public sector was to play in the economic development of the country. Tables 84 and 85 show (i) public and private sector outlay and investment in the First and Second Plans and (ii) the distribution of the outlay in the public sector during the First and Second Plans by major heads of development.

TABLE 84
OUTLAY AND INVESTMENT IN FIRST AND SECOND PLANS

				<i>(in crores of rupees)</i>		
				First Plan (1951-56)	Second Plan (1956-61)	Total (1951-61)
Public sector outlay	1,960	4,600	6,560
Public sector investment	1,560	3,650	5,210
Private sector investment**	1,800	3,100	4,900
Total investment	3,360	6,750	10,110

*National and per capita income figures given in this chapter differ somewhat from those given in chapter on 'Economic Structure', which are based on later computations.

**Private sector investment was shown earlier at Rs. 1,600 crores for the First Plan and at Rs. 2,400 crores for the Second Plan. These estimates have been revised in the light of fuller information. They exclude transfers from the public sector.

TABLE 85

DISTRIBUTION OF OUTLAY (FIRST AND SECOND PLANS)

	First Plan		Second Plan	
	Expenditure (Rs., crores)	Percentage of total expenditure	Expenditure (Rs., crores)	Percentage of total expenditure
Agriculture and community development	291	15	530	11
Major and medium irrigation	310*	16	420	9
Power	260	13	445	10
Village and small industries	43	2	175	4
Industries and minerals	74	4	900	20
Transport and communications	523	27	1,300	28
Social services and miscellaneous	459	23	830	18
TOTAL	1,960	100	4,600	100

The financing of the public sector outlay in the First and Second Plans was as follows :

TABLE 86

FINANCIAL RESOURCES IN PUBLIC SECTOR (FIRST AND SECOND PLANS)

	First Plan		Second Plan	
	Actual (Rs., crores)	Percentage of total outlay	Estimated (Rs., crores)	Percentage of total outlay
Outlay on the Plan	1,960	100	4,600	100
Internal resources	1,772	90	3,510**	76
External assistance	188	10	1,090†	24

During the Second Plan in particular, there was a substantial step-up in the tax effort. A number of new direct and indirect taxes were introduced. The gap in resources was made up partly through deficit financing and partly through external assistance. Deficit financing during the Second Plan was roughly of the order of Rs. 948 crores.

Over the ten-year period of the First (1951-56) and the Second (1956-61) Five Year Plans, national income is estimated to have increased at an average annual rate of about 4 per cent, the aggregate increase in real national income during the period being about 42 per cent. Per capita income increased by about 16 per cent only.

The national income figure, however, does not adequately indicate the actual growth potential built up in the economy. Even the striking rise in the index of industrial production of about 94 per cent (average annual rate of about 9.4 per cent) does not reflect fully the extent of industrialisation that has taken place; for the index does not take into account the output of all new industries as well the qualitative changes. In fact the decade has witnessed the beginning of an industrial revolution. Particularly in the five years of the Second Plan, the growth and diversification of industry have been remarkable. Three new steel works, each of one million tons capacity, have been completed in the public sector and two existing steel works in the private sector have been expanded and modernised so as to bring their aggregate ingot capacity to thirty lakh tons. The foundations have been laid of heavy electrical and

*Includes flood control.

**Includes subscriptions to Government loans by the Reserve Bank and the State Bank out of PL 480 deposits.

†Includes investment of PL 480 funds in 1960-61 by Reserve Bank in special securities.

heavy machine tools industries, machine-building and other branches of heavy engineering, and the production of machinery for cement and paper industries has been started for the first time. In chemical industries, there has been an advance on a wide front. New skills have been acquired by workers. A large and growing class of industrial managers has come into being. The main indicators of development during the past decade are presented in Table 87.

TABLE 87
ACHIEVEMENTS DURING FIRST AND SECOND PLANS

	Begin- ning of First Plan (1950-51)	End of First Plan (1955-56)	End of Second Plan (1960-61)	Percentage increase in 1960-61 over 1950-51

**Figures relate to calendar years, 1950 and 1955.

The industrial advance and the growth-rate in national income could have been greater but for certain limiting factors: (i) agricultural growth-rate was discontinuous and was not adequate for supporting a higher rate of industrial growth as well as for increasing exports; (ii) the execution of some of the power projects as well as the new fertiliser projects and the heavy chemical project had to be delayed because of the foreign exchange difficulties; (iii) India's exports over the decade were stagnant, partly due to the fact that the programme for exports had not been regarded as an integral part of the Five Year Plans; (iv) some avoidable delays occurred in the formulation as well as the execution of certain projects both in the industrial and the agricultural spheres because of administrative inadequacies. The Third Plan emphasises these and other limiting factors and suggests determined action with regard to them.

THIRD FIVE YEAR PLAN

Objectives

The *Third Five Year Plan -- A Draft Outline* was published in June 1960. In its final shape the *Third Five Year Plan* was approved by Parliament in August 1961. The long-term objectives for the next fifteen years have already been described. The immediate aim of the Third Plan (1960-61 to 1965-66) is: (i) to secure an increase in national income of over 5 per cent per annum, and at the same time ensure a pattern of investment so as to sustain this rate of growth during subsequent Plan periods; (ii) to achieve self-sufficiency in foodgrains and increase agricultural production to meet the requirements of industry and exports; (iii) to expand basic industries like steel, chemicals, fuel and power, and establish machine-building capacity, so that the requirements of further industrialisation can be met within a period of ten years or so mainly from the country's own resources; (iv) to utilise to the fullest possible extent the manpower resources of the country and to ensure a substantial expansion in employment opportunities; (v) to establish progressively greater equality of opportunity and to bring about reduction in disparities in income and wealth and a more even distribution of economic power. National income would increase by about 30 per cent from Rs. 14,500 crores in 1960-61 to about Rs. 19,000 crores by 1965-66 (at 1960-61 prices); per capita income would rise by about 17 per cent from Rs. 330 in 1960-61 to about Rs. 385 in 1965-66.

Targets

The targets of production and development, in physical terms, in respect of some important items are shown below:

TABLE 88
PRINCIPAL TARGETS (THIRD PLAN)

	1960-61	1965-66	Percentage increase in 1965-66 over 1960-61
Index number of agricultural production (1949-50 = 100)	135	176	30
Foodgrains production (lakh tons)	7,93	10,00	26
Nitrogenous fertilisers consumed (thousand tons of nitrogen)	2,30	10,00	335
Area irrigated (net total) (lakh acres)	7,00	9,00	29
Co-operative movement: advances to farmers (Rs., crores)	200	530	165
Index number of industrial production (1950-51 = 100)	194	329	70

TABLE 88 (concl'd.)

	1960-61	1965-66	Percentage increase in 1965-66 over 1960-61
<i>Production of :</i>

<i>Consumption Level :</i>			
Food (calories per capita per day)	2,100	2,300	10
Cloth (yards per capita per annum)	15	17	11

Outlay and Allocations

The total cost of the physical programmes in the Third Plan, which include certain measures in preparation for the Fourth Plan, exceeds Rs. 8,000 crores for the public sector and Rs. 4,160 crores* (estimated) for the private sector. The estimate of financial resources for the public sector, however, has been placed for the present at Rs. 7,500 crores. The following table shows the distribution of this financial outlay by major heads (the corresponding expenditure during the Second Plan are also shown for comparison).

TABLE 89
DISTRIBUTION OF PUBLIC SECTOR OUTLAY BY MAJOR HEADS

	Second Plan		Third Plan	
	Total expenditure (Rs., crores)	Percent	Total provision (Rs., crores)	Percent
Agriculture and community development	530	11	1,068	14
Major and medium irrigation	420	9	650	9
Power	445	10	1,012	13
Village and small industries	175	4	264	4
Organised industry and minerals	900	20	1,520	20
Transport and communication	1,300	28	1,486	20
Social services and miscellaneous	830	18	1,300	17
Inventories	—	—	200	3
TOTAL	4,600	100	7,500	100

*Excludes Rs. 200 crores, estimated transfer from the public to the private sector.

The distribution of the outlay under major heads of development is shown for the Centre, the Union Territories and the States separately in the following table.

TABLE 90
DISTRIBUTION OF THIRD PLAN OUTLAY

(in crores of rupees)

	States	Union Territories	Centre	Total outlay
Agriculture and community development	919	24	125	1,068
Major and medium irrigation	630	2	18	650
Power	880	23	109	1,012
Village and small industries	137	4	123	264
Organised industry and minerals	70	—	1,450	1,520
Transport and communications	226	35	1,225	1,486
Social services and miscellaneous	863	87	350	1,300
Inventories	—	—	200	200
TOTAL	3,725	175	3,600	7,500

Of the total outlay of Rs. 7,500 crores in the public sector, investment (in the sense of expenditure on capital account) is estimated at Rs. 6,300 crores and current outlay at Rs. 1,200 crores. These do not include contribution in cash or kind made by the people towards the execution of local development works or the contribution of local bodies out of their own resources.

The investment by the private sector during the period of the Third Plan is estimated at Rs. 4,100 crores, thus making a total investment in the public and private sectors together of Rs. 10,400 crores. The break-up of the public and private sector investments under major heads of development, is given below, the corresponding investment during the Second Plan being also shown side by side for comparison.

TABLE 91
INVESTMENT IN SECOND AND THIRD PLANS

(in crores of rupees)

	Second Plan				Third Plan			
	Public sector	Private sector	Total	Per cent	Public sector	Private sector	Total	Per cent
Agriculture and community development ..	210	625	835	12	660	800	1,460	14
Major and medium irrigation ..	420	*	420	6	650	*	650	6
Power	445	40	485	7	1,012	50	1,062	10

TOTAL	3,650	3,100**	6,750	100	6,300	4,100**	10,400	100

*Included under agriculture and community development.

**Excludes transfers from public to private sector.

The manner of financing the public sector outlay of Rs. 7,500 crores would be as follows. The corresponding position for the Second Plan is also shown alongside.

TABLE 92
FINANCING OF PLAN OUTLAY (THIRD PLAN)

(in crores of rupees)

	Second Plan (1956-61) estimated	Third Plan (1961-66)		
		Centre	States	Total
Balance from current revenues (on the basis of existing taxation)	—50	410	140	550
Contribution of Railways	150†	100	..	100
Surpluses of other public enterprises ..	*	300	150	450
Loans from the public (net)	780**	475	325	800
Small savings (net)	400	213	387	600
Provident funds (net); steel equalisation fund (net) and balance of miscellaneous capital receipts over non-Plan disbursements	230	716	—176	540
Additional taxation, including measures to increase surpluses of public enterprises	1,052	1,100	610	1,710
Budgetary receipts corresponding to external assistance	1,090@	2,200	..	2,200
Deficit financing	948	524	26	550
TOTAL ..	4,600	6,038	1,462	7,500

Total investment in the economy would rise from an estimated 11 per cent of national income in the last year of the Second Plan to about 14-15 per cent in the last year of the Third Plan; the saving-income ratio would increase from about 8·5 per cent to about 11·5 per cent. The need for external resources (including the use of foreign exchange reserves) as a percentage of national income, thus, would be about the same in the Third Plan as in the Second Plan.

The backlog of unemployment at the beginning of the Third Plan is roughly estimated at 90 lakhs. Another 1·5 to 1·8 crores were underemployed. The addition to the labour-force may be of the order of 1·7 crores during the Third Plan. The Plan, however, visualises increase in employment to the extent of only 1·4 crores—about 35 lakhs in agriculture and about 1·05 crores outside agriculture. There may also be some reduction in underemployment during the Third Plan. Thus, even to provide employment to all new entrants to the labour force, there is need to create additional employment opportunities for 30 lakh persons. This is considered to be an essential objective in the Third Plan. It is, therefore; proposed that (i) efforts should be made to spread out employment more widely and evenly than in the past; (ii) a fairly large programme of rural industrialisation should be undertaken with emphasis on rural electrification, development of rural industrial estates, promotion of village industries and effective re-deployment of manpower; and (iii) a rural works programme should be organised to provide work for an average of about 100 days in the year for 25 lakh persons or more.

†Inclusive of increased fares and freights.

*Included in first and sixth items.

**Included investment by the State Bank of India out of PL 480 funds.

@ This includes investment of PL 480 funds by the Reserve Bank of India in special securities in 1960-61.

CHAPTER XVIII

COMMUNITY DEVELOPMENT

The Community Development Programme, which aims at the individual and collective welfare of India's vast rural population, was launched on October 2, 1952, in 55 selected projects, each project covering an area of about 500 sq. miles with about 300 villages and a population of about 2 lakhs. It is a programme of aided self-help to be planned and implemented by the villagers themselves, the Government offering only technical guidance and financial assistance. Its objectives are to develop self-reliance in the individual and initiative in the village community. Community thinking and collective action are encouraged through people's institutions like the panchayats, co-operative societies, vikas mandals, etc.

Agriculture receives the highest priority in the programme, it being the mainstay of about seventy per cent of the rural population. Among other activities included are provision of better communications, improvement in health and sanitation, better housing, wider education, measures for women's and children's welfare, development of cottage and small-scale industries, etc.

The programme is implemented in units of blocks, each comprising generally 100 villages with an area of 150-200 sq. miles and a population ranging between sixty and seventy thousand. Before April 1958, the programme was being carried out in three different phases. Under the revised pattern, on completion of a period of intensive development for five years, the block enters the second stage during which development is continued with a relatively reduced budget provision under the community development programme for another five years but with increased provisions from the respective subject-matter departments. Before entering on the first stage, every block undergoes a "pre-extension phase" of one year during which the programme is exclusively confined to agricultural development.

On January 12, 1958, the National Development Council endorsed the recommendations on democratic decentralisation made by the Study Team on Community Development set up by the Committee on Plan Projects and laid down certain broad principles that should guide the establishment of Panchayati Raj. These principles have been followed by the States in evolving patterns suitable to local conditions. Panchayati Raj is under implementation in Andhra Pradesh, Assam, Madras, Mysore, Orissa, Punjab, Rajasthan and Uttar Pradesh. The legislatures of Bihar, Madhya Pradesh, and Maharashtra have passed the necessary legislation and a Bill is under consideration in the Gujarat Legislature.

The panchayat, the co-operative and the school are the basic institutions at the village level for carrying out the programme. The elected panchayat has charge of all development programmes in the area. The co-operative functions in the economic sphere and the village school is being developed as the community centre to undertake work in educational, cultural, recreational and other allied fields. Associate organisations, such as women and youth organisations, farmers' associations, artisans' associations, etc., functioning in their respective spheres, are linked up with the panchayat in its development activities and are supported in turn by the panchayat in their own work.

Till the end of January 1962, 3,589 stage I and stage II blocks were set up, covering about 4·16 lakh villages and a population of 23·17 crores. There were also 681 pre-extension blocks functioning in the country.

The whole country has been delimited into 5,223 blocks and will be covered by the programme by October 1963. The State/Territory-wise coverage of the programme till January 31, 1962, is indicated below.

TABLE 93
COVERAGE OF COMMUNITY DEVELOPMENT PROGRAMME

State/Union Territories	No. of blocks delimited	No. of stage I & stage II blocks allotted	Population covered* (in lakhs)	Villages covered* (in hundreds)	Area covered* (in hundred sq. miles)	No. of pre-extension Blocks

FINANCE

Resources

Resources for the programme are drawn both from the people and the Government. For each block area, development schemes are conditioned by a qualifying scale of voluntary contribution from people in cash or kind or labour. When the State assistance is offered for execution of such projects, expenses are shared by the Central and State Governments equally, in respect of recurring items and in the proportion of 3 : 1 in the case of non-recurring items. For productive works like irrigation, reclamation of land, etc., necessary funds are advanced by the Central Government to State Governments in the shape of loans. The Central Government also bear half of the expenditure on personnel employed by the States in blocks.

People's Contribution

People's contribution till September 30, 1961, amounted to Rs. 105.73 crores forming about 43 per cent of the total Government expenditure which was Rs. 244.53 crores.

Expenditure under the Plans

Expenditure incurred during the First and Second Plan periods amounted to about Rs. 247 crores. The anticipated expenditure for the Third Plan period is Rs. 334.07 crores, of which Rs. 287.67 crores are earmarked for the Community Development Programme, Rs. 28.80 crores for the Panchayats and Rs. 17.60 crores for central schemes.

*Estimated

The sub-heads under which this expenditure was incurred are indicated below.

TABLE 94
EXPENDITURE UNDER THE PLANS

(in lakhs of rupees)

	During First Plan	During Second Plan					Total	1961-62*
		1956-57	1957-58	1958-59	1959-60	1960-61

ORGANISATION

At the Centre

The Ministry of Community Development and Co-operation is in overall charge of the programme. Matters of basic policy, however, go before the Central Committee consisting of members of the Planning Commission and the Ministers for Food and Agriculture and Community Development and Co-operation with the Prime Minister as Chairman. Co-ordination with the allied Ministries is secured through special committees.

In the States

The execution of the programme is the responsibility of the State Governments which act through the State Development Committees consisting of the Chief Minister (Chairman), the Ministers of Development Departments and the Development Commissioner as Secretary. The executive head of the programme is the Development Commissioner who co-ordinates activities of all development departments.

*Figures relate to the period between April 1, and September 30, 1961, excluding Madras and NHTA, and figures for Andhra Pradesh, Orissa, Punjab, Uttar Pradesh and NEFT for the quarter ending September 30, 1961.

In the Districts

The newly created statutory Zila Parishads are responsible for the implementation of the programme in the districts. The Parishads consist of elected representatives of the people, including the Presidents of the Block Panchayat Samitis and M.Ps. and M.L.As. of the district.

In the Blocks

At the block level, the Block Panchayat Samiti is in charge of the programme. The membership of the Samiti includes elected Sarpanches (Presidents of the village panchayats) and a few co-opted persons representing women and depressed and scheduled classes. The administrative personnel consisting of a Block Development Officer and eight Extension Officers, who are experts in agriculture, co-operation, animal husbandry, etc., work under the direction of the Samiti. Voluntary associate organisations like the youth club, farmers' forum, mahila mandal, etc., supplement the work of the panchayat in their respective functional spheres. At the village level, while the panchayat is in overall control of the programme helped by associate organisations, the Gram Sevak acts as a multipurpose extension agent having ten villages in his charge.

Extension Organisation

The role of the Extension Organisation at the block and village level is two-fold. It carries proved knowledge or research of practical utility to the villages. It transmits the problems of the villagers back to research organisations for special study and solution. It is also charged with the task of promoting useful corporate life through co-operatives, better farming societies, mahila mandals, etc.

Block Development Committees

The Block Development Committees, composed of representatives of the panchayats, co-operative societies, a few progressive farmers, social workers, women, M.Ps. and M.L.As. representing the area, function in States where decentralisation has not yet been brought about. By convention, the committees enjoy and exercise necessary powers and are responsible for planning, initiation, sanction and execution of the development schemes in the areas concerned.

TRAINING

A Central Institute of Study and Research in Community Development has been established at Mussoorie to provide orientation training to key personnel—both administrative and technical—with special emphasis on group methods and the sociological aspects of the programme. Seven hundred and one officials and non-officials have so far participated in the courses conducted in the Institute.

An Institute for Instruction in Community Development has also been set up at Rajpur near Dehra Dun, to provide training in teaching methods to principals and instructional staff of different training institutions. District Panchayat Officers as also the non-official heads of the Panchayati Raj institutions like the Pramukhs and Pradhans receive training in Panchayat work at this Institute. Up to December 1961, 97 Instructors and 196 District Panchayat Officers received training in the Institute.

There are 10 Orientation and Study Centres, mainly for the training of Block Development Officers and Block Extension Officers and another 14 centres for the training of Social Education Organisers and Mukhya Sevikas. At these centres, run directly by the Government of India or through State Governments or non-official organisations, non-officials like M.L.As., Pradhans, etc. are also associated. Till the end of December 1961, 4,236

Block Development Officers and 5,664 Social Education Organisers (men and women) were trained at these centres.

There are other centres conducted by the respective State Governments under the supervision of the Government of India, where training in subject-matter and extension methods to Gram Sevaks and Gram Sevikas as well as refresher training for Extension Officers (Agriculture) and Extension Officers (Animal Husbandry) is provided. There are 100 extension centres for the training of Gram Sevaks, at which 44,232 of these officials were trained till the end of December 1961. During the same period 3,895 Gram Sevikas received training in 43 Home Science Wings.

Till the end of December 1961, 3,244 Extension Officers (Co-operation) were trained at 13 centres run by the Government of India in collaboration with the Reserve Bank of India. Four centres run by the Small Services Institute and 7 centres run by the Khadi Board Mahavidyalayas provided training facilities to 2,356 Extension Officers (Industries) till the end of December 1961.

Health personnel were provided training in 3 main training centres conducted by the Government of India. In addition, there are 142 institutions for the training of auxiliary nurse-midwives which trained 3,335 of them up to the middle of 1961. Till the end of December 1961, 2,699 of these health personnel were provided training at the three Government of India centres.

An increasingly large number of short-duration camps are being held in rural areas to train non-officials in supplementing the work of Gram Sevaks. About 35 lakh Gram Sahayaks (functional village leaders) were trained by the end of December 1961.

With the implementation of the programme of democratic decentralisation, the State Governments have launched an ambitious programme of training the members of Panchayat Samitis and Block Development Committees. More than 72,841 non-official members of Block Development Committees were trained up to the end of 1961. Training of Panchayat Secretaries has been taken up in Assam, Bihar, Gujarat, Madhya Pradesh, Maharashtra, Mysore, Orissa and Punjab.

Study camps for M.Ps. and M.L.As. on the Community Development programme have so far been organised in Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Mysore, Orissa, Punjab, Rajasthan and West Bengal.

ACHIEVEMENTS

In table 95 the more important of the physical achievements under the programme are indicated.

CHAPTER XIX

FINANCE

PUBLIC FINANCE

The power to raise and disburse public funds has been divided under the Constitution between the Centre and the States. There is thus more than one budget and more than one public treasury in the country. The sources of revenue for the Centre and the States are, by and large, mutually exclusive.

The Constitution provides that (i) no tax can be levied or collected except by the authority of law, (ii) no expenditure can be incurred from public funds except in the manner provided in the Constitution, and (iii) the executive authorities must spend public money only in the manner sanctioned by Parliament.

All receipts and disbursements of the Union Government are kept in two separate parts, namely, the Consolidated Fund and the Public Account. All revenues received, loans raised and money received by the Union Government in repayment of loans go together to form the Consolidated Fund of India. No money can be withdrawn from this Fund except under the authority of an Act of Parliament. All other receipts and disbursements, such as deposits, service funds, remittances, etc., go into the Public Account which is not subject to the vote of Parliament. To meet unforeseen needs, not provided in the Annual Appropriation Act, a Contingency Fund of India has also been established under Article 267 (i) of the Constitution.

The Constitution also provides for the establishment of a Consolidated Fund and a Public Account for each State. Similarly the States also have Contingency Funds to meet unforeseen needs pending legislative authorisation.

The railways, the largest nationalised industry, have their own funds and accounts and their budget is presented separately to Parliament. The appropriations and disbursements under the Railway Budget are subject to the same form of parliamentary and audit control as the other appropriations and disbursements.

Allocation of Revenue

The main sources of Central revenue are customs duties, excise duties levied by the Union Government, the corporation and income taxes (excluding taxes on agricultural income) and the profits transferred from the Reserve Bank. The revenue from the wealth tax also accrues to the Centre. Besides, the net profits earned by the railways and posts and telegraphs also contribute to the general revenue of the Centre.

The main heads of revenue in the States are the taxes and duties levied by the State Governments; the share of taxes levied by the Central Government; and grants received from the Centre. Land revenue, sales tax, State excise duties, registration and stamp duties and shares of income tax and Central excise duties constitute more than four-fifths of the tax revenue and more than half of the total revenue receipts of the States. Property taxes and octroi and terminal taxes are the mainstay of local finance.

Transfer of Resources from Centre to States

The devolution of resources from the Centre to the States is a salient feature of the system of federal finance in India. Apart from their share of

taxes and duties the State Governments also receive statutory and other grants as well as loans for various development schemes and rehabilitation purposes. The total amount of resources transferred to the States during the Second Plan period was more than double of that during the First Plan period as shown in the following table.

TABLE 96
RESOURCES TRANSFERRED TO STATES

(in crores of rupees)

	Taxes and duties	Grants from			Loans	Total
		Revenue account	Capital account	Central Road Fund		
First Plan period	326·7	248·0	23·8	15·9	798·5	1,412·9

Third Finance Commission

The Third Finance Commission constituted on December 2, 1960 submitted its report on December 14, 1961, in which it made the following recommendations.

1. *Estate Duty:*

For a period of four years with effect from April 1, 1962 :

- (a) out of the net proceeds in each financial year of estate duty in respect of property other than agricultural land, a sum equal to 1 (one) per cent be retained by the Union as proceeds attributable to Union territories;
- (b) the balance of the net proceeds be apportioned between immovable property and other property in the ratio of the gross value of all such properties brought into assessment in that year;
- (c) the sum thus apportioned to immovable property be distributed among the States in proportion to the gross value of the immovable property located in each State; and
- (d) the sum apportioned to property other than immovable property be distributed among the States as shown in table 98.

2. *Grant in lieu of tax on railway passenger fares:*

With effect from April 1, 1961 a sum of Rs. 12·5 crores be distributed each year during the quinquennium 1961-66 among the States as indicated in table 98.

3. *Income Tax:*

For a period of four years with effect from April 1, 1962 :

- (a) the percentage of the net proceeds in any financial year of taxes on income other than agricultural income, except in so far as those proceeds represent proceeds attributable to Union territories or to taxes payable in respect of Union emoluments, to be assigned to the States be $66\frac{2}{3}$ (sixty-six and two-thirds);
- (b) the percentage of the net proceeds of taxes on income which shall be deemed to represent proceeds attributable to Union territories be $2\frac{1}{2}$ (two and a half);
- (c) the percentage of the net proceeds assigned to the States be distributed as shown in table 98.

4. *Union Excise Duties:*

For a period of four years with effect from April 1, 1962 a sum equal to 20 (twenty) per cent of the net proceeds of the Union duties of excise on the articles scheduled below be paid out of the Consolidated Fund of India to the States and distributed among them as given in table 98.

Sugar; coffee; tea; tobacco; kerosene; refined diesel oils and vaporising oils; diesel oil, not otherwise specified; furnace oil; asphalt and bitumen; vegetable non-essential oils; vegetable products; pigments, colours, paints, enamels, varnishes, blacks and cellulose lacquers; soap; tyres and tubes; paper; rayon and synthetic fibres and yarn; cotton fabrics; silk fabrics; woollen fabrics; rayon or artificial silk fabrics; cement; pig iron; steel ingots, aluminium; tin plate and tin sheets including tin taggers and cuttings of such plates, sheets or taggers; internal combustion engines; electric motors and parts thereof; electric lighting bulbs and fluorescent lighting bulbs; electric fans; motor vehicles; cycles, parts of cycles other than motor cycles; footwear; cinematograph films exposed; matches.

5. *Additional Duties of Excise:*

For a period of four years with effect from April 1, 1962, out of the total net proceeds of the additional duties of excise levied in replacement of sales tax on cotton fabrics, rayon or artificial silk fabrics, silk fabrics, woollen fabrics, sugar and tobacco (including manufactured tobacco) :

- (a) a sum equal to 1 (one) per cent of the net proceeds be retained by the Union as attributable to Union territories;
- (b) a sum equal to $1\frac{1}{2}$ (one and a half) per cent of the net proceeds be paid to the State of Jammu and Kashmir; and
- (c) a sum equal to the balance of the net proceeds of the duties, *i.e.* after the deduction of the amounts mentioned in sub-paragraphs (a) and (b) above, be distributed as follows :
 - (i) the sums mentioned in table 98, representing the income of the States in 1956-57 on account of sales taxes by whatever name called, on the six commodities, be first paid to them ;
 - (ii) the remaining sum, if any, be distributed as indicated in table 98.

6. *Grants-in-aid:*

- (i) Under the substantive portion of article 275 (1) of the Constitution, in each of the four financial years beginning on April 1, 1962, the sums shown in table 98 be charged on the Consolidated Fund of India as grants-in-aid of the revenues of the States mentioned against them.
- (ii) Under the substantive portion of article 275 (1) of the Constitution in each of the four financial years beginning on April 1, 1962, the

TOTAL	100.00	12.50	100.00	100.00	32,54.00	1,10,25	9,00

further sums as shown in table 98 be charged on the Consolidated Fund of India as grants-in-aid of the revenues of the States mentioned against them for improvement of communications.

Annual Financial Statement or Budget

An estimate of all anticipated revenue and expenditure of the Union Government for the coming financial year is laid before Parliament towards the end of February every year. This is known as the "Annual Financial Statement" or the "Budget". Apart from giving estimates of revenue and expenditure, this statement also contains (i) a review of the financial position of the preceding year, and (ii) proposals for financing capital expenditure.

The presentation of the Annual Financial Statement is followed by a general discussion in both Houses of Parliament. The estimates of expenditure, other than that charged, are then placed before the House of the People in the form of "Demands for Grants". Ordinarily, a separate Demand is made for each Ministry. All drawal of money from the Consolidated Fund is thus authorised by an Appropriation Act passed by Parliament every year. The tax proposals of the Budget are embodied in another Bill which is passed as the "Finance Act" of the year. Estimates of receipts and expenditure are similarly presented by State Governments to their legislatures before the beginning of the financial year and legislative sanction for financial expenditure is secured through similar procedure.

Audit

The Constitution requires that the audit authorities, who are independent of the executive, should scrutinise the expenditure of the Central and State Governments and ensure that this is strictly within the limits of their competence. It further enjoins that an account of the expenditure of each Government should be approved by its legislature.

BUDGET ESTIMATES 1962-63

The budget estimates for 1962-63 as presented in the Lok Sabha on April 23, 1962, placed expenditure at Rs. 1,381.65 crores as compared to Rs. 1,045.15 crores (revised) in 1961-62 and revenue (at existing level of taxation) at Rs. 1,320.87 crores as compared to Rs. 1,079.11 crores (revised) in the previous year, leaving a deficit of Rs. 60.78 crores.

Tables 99 and 100 show the budget of the Central Government for 1962-63 on revenue and capital accounts.

Aviation	3,46	4,36	3,45	4,09
Road and water transport schemes	25	40	43	41

*If the effect of the conversion of Rs. 50 crores is ignored, the net expansion of treasury bills during the year would amount to Rs. 126 crores. Of this, Rs. 5 crores will be taken to increase the closing cash balance to the normal level of Rs. 50 crores. Thus the overall gap in the current year would amount to Rs. 121 crores.

Incidence of Indirect Taxation

The first systematic study of the incidence of Central and State indirect taxes on rural and urban households in five monthly expenditure groups of Rs. 1-50, 51-100, 101-150, 151-300 and 301 and above, was undertaken for 1953-54 by the Taxation Enquiry Commission. Another study on similar lines made by the Department of Economic Affairs for 1958-59 undertakes a comparative analysis of the distribution of money burden of indirect taxes among rural and urban households in the five expenditure groups during 1953-54 and 1958-59 as shown in the following table.

TABLE 101

INCIDENCE OF INDIRECT TAXATION

	Tax as per cent of consumer expenditure					
	1953-54			1958-59		
	All house- holds	Rural house- holds	Urban house- holds	All house- holds	Rural house- holds	Urban house- holds
<i>All Indirect Taxes</i>	3.6	2.9	5.9	5.7	4.4	9.—
<i>Central Taxes</i>	2.1	1.8	3.5	3.8	3.1	6.3
(i) Central excise duties	1.0	0.8	1.5	2.7	2.2	4.0
(ii) Import duties	1.1	1.0	2.0	1.0	0.8	1.1
(iii) Railway passenger fares tax	—	—	—	0.1	0.1	7

TABLE 101 (concl.)

	Tax as per cent of consumer expenditure					
	1953-54			1958-59		
	All households	Rural households	Urban households	All households	Rural households	Urban households
<i>State Taxes</i>	1.5	1.1	2.4	1.9	1.3	3.3
(i) State excise duties ..	0.4	0.5	0.4	0.4	0.4	0.4
(ii) Sales taxes (State & Central)	0.7	0.5	1.3	1.0	0.6	1.9
(iii) Sales tax on motor spirits and motor vehicles tax ..	0.2	0.1	0.4	0.3	0.2	0.6
(iv) Entertainment tax ..	0.1	—	0.2	0.1	—	0.3
(v) Sugarcane cess ..	0.1	—	0.1	0.1	0.1	0.1

The study brings out that the increase in indirect taxation during the period 1953-54 to 1958-59 was accompanied by a more progressive distribution of its money burden among the five expenditure groups of rural and urban households.

Tables 102, 104 and 105 show both on revenue and capital accounts, the budgetary position of the Central Government for 1950-51, 1955-56 and the three years ending 1961-62 and tables 103, 106 and 107 show the budgetary position of the States for 1951-52, 1955-56 and the three years ending 1961-62.

PUBLIC DEBT

The interest-bearing obligations of the Government of India which include public debt, unfunded debt, deposits bearing interest and foreign debts, etc., rose by Rs. 513 crores from Rs. 6,281* crores at the end of 1960-61 to Rs. 6,794 crores at the end of 1961-62 and are expected to rise further by Rs. 983 crores to Rs. 7,677 crores by the end of 1962-63. External obligations stood at Rs. 1,090 crores at the end of 1961-62 showing a rise of Rs. 264 crores over 1960-61.

As against these liabilities, interest-yielding assets of the Government of India (capital advanced on railways, posts and telegraphs, public sector industries, State Governments, etc.) amounted to Rs. 5,697 crores at the end of March 1962 representing an increase of Rs. 607 crores over 1960-61. During 1962-63 interest-yielding assets are estimated to show a further rise of Rs. 709 crores to Rs. 6,406 crores.

Table 108 shows the interest-bearing obligations and interest-yielding assets of the Central Government.

*Figures given here are based on revised estimates for 1960-61 and 1961-62.

NOTE :—The figures for the year 1951-52 do not include Part C States (*viz.*, Ajmer, Bhopal, Coorg, Delhi, Himachal Pradesh and Vindhya Pradesh) since they had capital budgets only from 1954-55. For 1955-56 revised estimates are used since later figures are not available. The figures of purchase and sale of securities up to 1956-57 relate to Part A and B States. The figures from 1957-58 onwards relate to the re-organised States which exclude Delhi and Himachal Pradesh, which are now Union Territories and include Kutch, which is now a part of the Gujarat State; the figures from 1957-58 also include Jammu and Kashmir. The budget estimates for 1960-61 are on the basis of existing taxation except in the case of Andhra Pradesh, Orissa and Rajasthan. The budget estimates for 1961-62 are before tax changes in the case of Orissa and Rajasthan.

(a) Transfers from and to funds are excluded from revenue and expenditure, respectively. (b) Excluding *net* purchase or sale of securities. (c) Consists of remittances. (d) Including overdraft.

NOTE :— The figures of total revenue and expenditure as given in this statement differ from those in the Budget papers as receipts from forests, opium and currency and mint are shown on a net basis and States' share of Union excise duties and additional duties of excise are excluded. Budget estimates for 1961-62 relate to those presented to the Lok Sabha.

Figures under revenue and expenditure for 1959-60 to 1961-62 include self-balancing items in respect of (i) grants under PL 480 amounting to Rs. nil in 1959-60 (accounts), Rs. 10 crores in 1960-61 (budget), Rs. 5 crores in 1960-61 (revised) and Rs. 10 crores in 1961-62 (budget), and (ii) steel equalisation fund for Rs. 26 crores in 1959-60, Rs. 32 crores in 1960-61 (budget), Rs. 30 crores in 1960-61 (revised) and Rs. 27 crores in 1961-62 (budget).

(a) Including effect of budget proposals; subsequent modifications in tax proposals estimated to cost Rs. 6.1 crores have not been taken into account. (b) Including forests, opium, irrigation, electricity & road and water transport schemes. (c) Excludes forests, opium & States' share of Union excise duties and additional excise duties up to 1960-61; figures for 1961-62 exclude forests and opium only. (d) Comprises general administration, audit, administration of justice, jails, police, tribal areas and external affairs; with effect from 1961-62 expenditure relating to Tribal Areas would be adjusted under the relevant major heads most closely connected with the object of the expenditure. (e) Include appropriation for reduction or avoidance of debt. (f) Include provision for grants to States for G.M.P. schemes, relief in natural calamities etc. From 1957-58, these items are transferred to miscellaneous expenditure under appropriate Ministries, for 1961-62 these grants are shown against item 17. Since 1957-58, it includes provision for transfer to the Special Development Fund of grants received under PL 480. (g) Include certain grants to States; for 1961-62 these grants are shown against item 17. (h) Comprise irrigation and multi-purpose river schemes, ports and pilotage, lighthouses and lightships, scientific departments, education, medical, public health, agriculture, rural development, veterinary, co-operation, industries and supplies, aviation, broadcasting, civil works, post-war reconstruction and electricity schemes, community development projects, national extension service, labour and employment and miscellaneous departments. (i) Include grants-in-aid to States; (ii) grants to States are grouped together in this item for 1961-62 and exclude States' share of Union excise duties. (j) Comprises famine, stationery and printing, civil defence and pre-pension payments.

NOTE :—(1) Figures of receipts and disbursements given in this statement do not tally with those in the budget papers as certain adjustments have been made here;

accounts are provisional. (2) Receipts and a disbursements for 1959-60, 1960-61 (B.E.), 1960-61 (R.E.) and 1961-62 (B.E.) include a formal adjusting item amounting respectively to Rs. 35 crores, Rs. 74 crores, Rs. 76 crores and Rs. 75 crores in respect of loan assistance from the US Government which is transferred to Special Development Fund by debit to capital. (3) Treasury bill receipts and miscellaneous items such as remittances, etc., have been excluded from this statement.

(a) Excluding 15-year annuity certificates which are included under small savings. (b) Excludes the conversion of *ad hoc* treasury bills of Rs. 150 crores into 3½ per cent bonds, 1969, 3½ per cent bonds, 1962, 3½ per cent National Plan bonds, II series, 1965, 3½ per cent National Plan bonds, III series 1967, and 3½ per cent loan, 1968. (c) Excludes the conversion of *ad hoc* Treasury bills of Rs. 50 crores into 3½ per cent National Plan bonds III series 1967, 3½ per cent National Plan bonds V series, 1968, and 3½ per cent bonds 1969. (d) Figures are net. (e) Introduced from April 1, 1960. (f) Receipts comprise the sale proceeds of American (loan) wheat, wheat received under Colombo Plan, assistance under Indo-U.S. Technical Assistance Agreement and other aid. (g) Residual item. (h) mostly sold to the Reserve Bank of India. (i) Excludes an amount of Rs. 17.9 crores representing *ad hoc* Treasury bills issued to the Reserve Bank for the purchase of gold for part payment of India's increased subscription to IMF. (j) Includes transfer of sale proceeds of American (loan) wheat, contingency fund, and payments to displaced persons. (k) Include grants to States for development purposes, ports etc.

Surplus (+) or deficit (—) ..	+3,77	—78,45	+37,19	+2,86	+13,87	—35,99

NOTE :— Figures given here differ from those in the budget papers as certain adjustments have been made to ensure uniformity in presentation. The figures for 1951-52 do not include Part C States (*viz.* Ajmer, Bhopal, Coorg, Delhi, Himachal Pradesh and Vindhya Pradesh) since separate revenue budgets for these States are available only from 1952-53. For 1955-56 revised estimates are used since later figures are not available. Figures from 1959-60 onwards relate to the re-organised States which exclude Delhi and Himachal Pradesh which are now Union Territories and include Kutch which is now a part of the Gujarat State. Figures from 1957-58 onwards also include Jammu and Kashmir. Budget estimates for 1960-61 are before tax changes except in the case of Andhra Pradesh, Orissa and Rajasthan. Budget estimates for 1961-62 are before tax changes except in the case of Orissa and Rajasthan.

*For 1961-62 (B.E.) receipts from tax on railway fares have been excluded from tax revenue and included under grants-in-aid and other contributions.

(a) Include sugarcane cess, tax on passengers and goods, tobacco duties, tax on prize competitions and betting, inter-State transit duties, tax on raw jute, etc. (b) Include receipts from civil works and receipts of the various departments such as education, medical, public health etc. and certain grants from the Central Government; for 1961-62 these grants have been shown under 'Grants-in-aid and other contributions.' (c) The contribution of public enterprises to revenue is not as given in the budgets and does not constitute a commercial surplus. (d) Irrigation works for which capital accounts are not kept are taken on a gross basis. (e) Comprises receipts on account of debt services, stationery and printing, miscellaneous receipts; exclude transfers from reserve funds. (f) The classification of development and non-development expenditure has been done on the basis of broad budget heads. (g) Including interest on capital outlay; consequently the figure under 'debt services' are under-estimates. (h) Includes expenditure on miscellaneous and scientific departments, aviation and ports and pilotage. (i) Excludes forests. (j) Include appropriation for reduction or avoidance of debt. (k) Comprises general administration, administration of justice, jails and convict settlements and police. (l) Covers expenditure on displaced persons, grants and other contributions to local bodies and private parties, irrecoverable loans and advances, advanced technical training, scholarships, etc. (m) Includes pensions, stationery and printing, and extraordinary charges but excludes transfers to reserve funds.

NOTE :— Figures given in this statement differ from those in budget papers as certain adjustments have been made to ensure uniformity in presentation. The figures for the year 1951-52 do not include Part C States (*viz.*, Ajmer, Bhopal, Coorg, Delhi, Himachal Pradesh and Vindhya Pradesh) since they had capital budgets only from 1954-55. For 1955-56 revised estimates are used since later figures are not available. The figures from 1957-58 onwards relate to the reorganised States which exclude Delhi and Himachal Pradesh which are now Union Territories and include Kutch which is now a part of the Gujarat State; the figures from 1957-58 also include Jammu and Kashmir. Figures for 1960-61, budget and revised, exclude Rs. 68.87 crores and Rs. 66.92 crores, respectively in the case of Uttar Pradesh Government representing the value of assets of electricity schemes transferred to State Electricity Board and shown as recovery of capital expenditure on electricity schemes.

- (a) Figures are net. (b) This is a new item included from 1957-58 to show loans from National Agricultural Credit (Long-Term Operations) Fund of the Reserve Bank of India, loans from National Co-operative Development and Warehousing Board, loans from Khadi and Village Industries Board, Employees' State Insurance Corporation etc. (c) Excluding sale or purchase of securities but including contingency fund transactions (net); also including, in case of Assam, transfers from/to contingency fund included under revenue account of that State. (d) Excludes appropriations to contingency fund and other funds which are adjusted under the item 'Deposits and advances and other items'.

Other interest-bearing loans	20·71	700·54	767·01
Amount recoverable from the U.K. and the States on account of purchase of annuities for Sterling pensions	—	18·80	18·17
Debt due from Pakistan	—	300·00	300·00
Total—Interest-yielding assets	896·65	5,696·65	6,395·89
Cash and securities held on Treasury account	30·30	82·13	82·12
Balance of total interest-bearing obligations not covered by above assets	254·01	1,015·16	1,202·49

NOTE 1 : The outstandings at the end of each year are shown in the statement. The account for the year 1947-48 (pre-partition) and 1960-61 have not yet been closed finally and the figures have, therefore, been worked out on the best information available.

NOTE 2 : Sterling obligations have been converted into Rupees at 1 sh. 6 d. to the Rupee

NOTE 3 : Final debt settlement with Pakistan has yet to be made. The figure entered for debt from Pakistan is a rough indication of the amount likely to be due to India

Tables 109 and 110 show the position regarding the debts of the Government of India and the State Governments.

TABLE 110
DEBT POSITION OF STATES

(in lakhs of rupees)

	At the end of		
	1951-52	1955-56 R.E.	1960-61 R.E. (c)
I. Public Debt :			
(i) Permanent debt	133,71	264,48	490,65
(ii) Floating debt	15,66	8,20	27,27
(iii) Loans from Central Government	238,54	876,07	1,966,55
(iv) Other debt (a)	—	—	47,52
			(b)
II. Unfunded debt	57,37	83,19	132,26
			(d)
III. Gross total debt	445,28	1231,94	2,664,25

NOTE : —The figures in this statement are based on actual returns furnished by the States except in certain cases where they are based on the Budget papers. The data for 1951-52 and 1955-56 exclude Part C States which had a separate capital account only from 1954-55; figures from 1956-57 onwards relate to re-organised States and include Jammu and Kashmir from 1957-58.

(a) This item shows loans from National Agricultural Credit (Long-Term Operations) Fund of the Reserve Bank of India, loans from National Co-operative Development and Warehousing Board, loans from Khadi and Village Industries Board, Employees' State Insurance Corporation etc. (b) In the case of Mysore, includes the amount of Rs. 66 lakhs on account of inter-State debt settlement. (c) Include figures of Orissa as at the end of February 1961. (d) Provisional.

NOTE

—Figures are provisional, excepting those of rupee loans and Treasury bills.

(a) Figures from end of March 1957 include Hyderabad State Loans, the liability of which was taken over by the Central Government under Section 82(1) of the States Reorganisation Act, 1956; the figures for 1961 include those of prize bonds issued from April, 1, 1960. (b) Inclusive of Indian Union's share of pre-partition liabilities. (c) Including (1) unclaimed balances of old loans which have ceased to bear interest from the date of discharge, (2) balances of special loans, (3) balances of State provident funds and other accounts such as General Family Pension Fund, the Hindu Family Annuity Fund, the Postal Insurance and Life Annuity Fund etc, and (4) unclaimed balances in respect of Three-year interest-free Defence bonds and Five-year interest-free prize bonds; these were issued from June 1940 and January 1944 respectively and discontinued from May 1946 and January 1949, respectively. (d) Including Treasury deposit receipts. (e) Include a special issue of the 4 per cent loan, 1973 for Rs. 300 crores created in July 1958, which was wholly taken up by the Reserve Bank of India against cancellation of *ad hoc* Treasury bills and held in the Issue Department as cover against note issue. (f) Include further issues of Rs. 150 crores created in December 1959 against cancellation of *ad hoc* Treasury bills held by the Reserve Bank. (g) Include further issue of Rs. 50 crores created in January 1961 against cancellation of *ad hoc* Treasury bills held by the Reserve Bank. (h) Includes investment of Rs. 240 crores (estimated) of U.S. Government counterpart deposit funds in 'special securities'.

MONEY SUPPLY AND CURRENCY

During 1961, money supply with the public expanded by only Rs. 136.4 crores* as compared to Rs. 216.1 crores in 1960 and Rs. 171.4 crores in 1959. The rate of expansion in money supply which had shown a progressive rise from 3.3 per cent in 1958 to 7.3 per cent in 1959 and 8.6 per cent in 1960, slowed down considerably, the rise during 1961 being only 5.0 per cent. Currency with the public rose by Rs. 85.3 crores and deposit money by Rs. 51.1 crores. In 1960, currency with the public had expanded by Rs. 144.3 crores and deposit money by Rs. 71.8 crores.

An analysis of the factors influencing money supply shows that the expansion during the year stemmed from (i) an increase in bank credit to the Government and (ii) an increase in public's net indebtedness to banks. The combined effect of these two factors was partly offset by a balance of payments deficit. Bank credit to Government increased by Rs. 122.5 crores (a) which was higher than that in the preceding year (Rs. 42.0 crores). The expansion in bank credit to the public amounted to Rs. 135.7 crores which was substantially lower than the rise of Rs. 243.4 crores in 1960. At the same time, time liabilities increased during the year by Rs. 33.7 crores as compared to Rs. 7.7 crores in 1960. In the result, the public's net indebtedness to banks shows a rise of only Rs. 102.7 crores as compared to Rs. 235.7 crores in 1960. On the contractionist side, the balance of payments deficit as measured by a fall in foreign assets held by the Reserve Bank amounted to Rs. 59.7 crores † as compared to Rs. 44.5 crores † in 1960.

The following table shows the movements in money supply with the public and its components during 1951, 1956 and 1961.

TABLE 111
MONEY SUPPLY WITH THE PUBLIC**

End of	Currency with the public (including Hali Sica Currency) ‡		Deposit money with the public		Money supply with the public (including Hali Sica Currency) ‡	
	Amount	Annual Variation	Amount	Annual Variation	Amount	Annual Variation
1951	1,208.4	-30.1	592.2	-22.4	1,801.3	-52.3
1956	1,485.3	+99.4	693.3	+32.0	2,178.7	+131.5
1961	1,984.0	+85.3	889.7	+51.1	2,873.7	+136.4

*Currency****

During 1961, currency in circulation †† (excluding small coins), registered a further rise of Rs. 84.5 crores to Rs. 2,044.18 crores. The year's increase was smaller than that in 1960 (Rs. 150.3 crores) and in 1959 (Rs. 149.2 crores). Currency in circulation has been continuously rising since 1953, the aggregate increase up to the end of 1961 amounting to Rs. 878.8

*But for the withdrawal of special currency from Kuwait (Rs. 34.2 crores) between April and June 1961, the expansion would have been of the order of Rs. 170.6 crores.

@ Comprising (i) a rise of Rs. 130.9 crores in rupee investments of the Reserve Bank (ii) an increase of Rs. 19.2 crores in loans and advances to Governments, (iii) a decline of Rs. 1.7 crores in rediscounts of Treasury bills by the Reserve Bank (iv) a fall of Rs. 53.6 crores in banks' investments in Government securities and (v) a reduction of Rs. 27.7 crores in Government's balances with the Reserve Bank of India.

† Disregarding the re-purchase of rupees from the I.M.F. and other extraordinary transactions.

**Excludes small coins in circulation. Figures for 1961 are provisional.

‡ Upto 1957.

***Figures for 1961 are provisional.

†† Figures are inclusive of notes and rupee coins held by banks and at treasuries but exclusive of Rs. 43 crores of India notes returned from Pakistan and awaiting cancellation.

crores or about 75.4 per cent. The expansion during the year was mainly accounted for by notes in circulation which rose by Rs. 74.7 crores as compared to Rs. 138.9 crores in 1960 and Rs. 140.7 crores in 1959. Total notes in circulation amounted to Rs. 1,900 crores at the end of 1961. The circulation of rupee coins (including one rupee notes) increased during the year by Rs. 9.8 crores, the rise being smaller than in 1960 (Rs. 11.4 crores) but larger as compared to Rs. 8.5 crores in 1959. At the end of 1961, rupee coin circulation stood at Rs. 144 crores.

Decimal Coins

The value of decimal coins of the denominations of 50 nP. and under issued up to August 1961 is as follows:

TABLE 112
DECIMAL COINS IN CIRCULATION

Denomination	Value in lakhs of rupees
1 nP.	2,00.80
2 nP.	2,00.70
5 nP.	3,57.86
10 nP.	6,33.68
25 nP.	4,94.44
50 nP.	1,45.75
TOTAL	20,33.23

Decimal coins of the denomination of 100 nP. have not yet been issued.

Demonetisation of anna-pie coins

In accordance with the Government's decision taken in 1958 to withdraw from circulation the old anna-pie coins, the coins demonetised up to the end of 1961 include (i) all nickel-brass two-anna coins, all half pice coins and all pie coins which ceased to be legal tender from January 1, 1959; (ii) all nickel-brass one-anna and half-anna coins which ceased to be legal tender from January 1, 1960 and (iii) all cupro-nickel two-anna and half-anna coins which ceased to be legal tender with effect from October 1, 1960. These coins, which were accepted for certain prescribed periods as legal tender at all offices of the Reserve bank of India, agency banks of the Bank conducting Government business and Government treasuries and sub-treasuries and for payment of dues at Post and Telegraph offices and Railway offices will continue to be accepted as legal tender at offices of the Issue Department of the Reserve Bank at Bombay, Calcutta, Madras, Kanpur, New Delhi, Bangalore and Nagpur until further notice.

Retirement of Indian Currency from Kuwait

An important development during the year was the decision of the Government of Kuwait to introduce, with effect from April 1, 1961, a local currency known as the 'Dinar' in place of the special series of India notes in circulation in that country. In this connection, during the year, the Government of India and the Kuwait Government agreed upon the settlement of India's liability in respect of the Indian currency in circulation in Kuwait. In terms of the Agreement, the Kuwait Government was to retire the Indian currency during a period of 6 weeks from April 1, 1961 and India discharge the liability in eleven annual instalments commencing from 1961. Accordingly, Indian currency of the value of Rs. 34.2 crores was received from Kuwait and £19.8 lakhs representing the first instalment of payment in sterling, was made to Kuwait by the Government of India

on July 1, 1961. The Indian currency continues to circulate as usual in the other Sheikdoms in the Gulf.

BANKING

A higher rate of growth of deposits and a decline in the rate of increase of bank credit were the salient features of the banking situation during 1961. Aggregate deposit liabilities of scheduled banks rose in 1961 by Rs. 85.9 crores or by 4.5 per cent to Rs. 1,978.9 crores as compared with a rise of Rs. 66 crores or 3.6 per cent to Rs. 1,893.1 crores in 1960.* Excluding P.L. 480 deposits, the rise in deposit liabilities in 1961 was appreciably higher than in 1960. The higher rate of increase in deposits reflected the resumption of the secular trend of deposit growth which was temporarily interrupted in the latter half of 1960 following the failure of two scheduled banks, thus indicating the return of public confidence in the banking system aided, among other things, by the measures taken for the amalgamation and reconstruction of the weaker banking units and by the decision to set up a deposit insurance corporation. A general raising of interest rates paid by many banks on deposits, following a revision of the Inter-Bank Agreement on deposit rates in March 1961 also appears to have helped this process in that the larger growth in deposits was entirely on account of time liabilities.

Reflecting the relative stability in the price level during 1961 as also the slower rate of growth in industrial production, scheduled bank credit recorded a smaller increase of Rs. 104.3 crores (or by 8.8 per cent) to Rs. 1,285.3 crores as compared to a rise of Rs. 216.5 crores (or by 22.5 per cent) in 1960. Investments in Government securities declined during the year by Rs. 53.5 crores to Rs. 579.9 crores as compared with a steep fall of Rs. 154.1 crores to Rs. 633.5 crores in 1960.* However, if adjustment is made for investment on account of P.L. 480 deposits, gilt-edged holdings of banks in 1961 showed an appreciable rise.

Cash reserves of scheduled banks declined over the year by Rs. 10.5 crores to Rs. 151.3 crores as against a rise of Rs. 47.8 crores to Rs. 161.8 crores in 1960, reflecting the effect of the withdrawal of the additional statutory reserve requirements (see paras on Credit Policy). Scheduled banks reduced their borrowings from the Reserve Bank by Rs. 42.7 crores to Rs. 13.7 crores while in the preceding year borrowings had recorded a rise of Rs. 49.6 crores to Rs. 61.5 crores.

The variations in the principal items of liabilities and assets of scheduled banks during 1960 and 1961 are given in the following table:—

*In analysing the figures relating to both aggregate deposit liabilities and investments in Government securities, it should be noted that the changes in the procedure relating to the lodgement of P.L. 480 funds have affected their trends during the period October 1956 to June-end 1961. Thus, between October 1956 and May 12, 1960, when these funds were credited to the US Embassy account with the State Bank they led to an overstatement of the increases or understatement of the declines in these items. Since May 12, 1960 fresh accruals of P.L. 480 funds are flowing direct to Government against special securities issued by them and as such have no effect on the deposit liabilities and investments of scheduled banks. However, during the 12 month period July 1960 to June 1961, part of the past accumulations of these funds with the State Bank were also transferred to Government in monthly instalments of Rs. 12 crores each, thus resulting in understating the increases or overstating the declines in deposits and investments of scheduled banks in this period; these transfers have ceased from July 1961.

TABLE 113
SCHEDULED BANKS—LIABILITIES AND ASSETS

(in lakhs of rupees)

	End 1959	End 1960	End 1961	Variations	
				During 1960	During 1961
Aggregate deposit liabilities	1,827,09	1,893,06	1,978,93	+ 65,97	+ 85,87
(a) Demand liabilities	716,87	781,07	835,82	+ 64,20	+ 54,75
(b) Time liabilities	1,110,22	1,112,00	1,143,11	+ 1,78	+ 31,11
Inter-bank borrowings	47,64	26,14	39,32	- 21,50	+ 13,18
Borrowings from the R.B.I. ..	11,83	61,47	18,74	+ 49,64	- 42,73
Borrowings from the State Bank and/or notified banks	8,70	9,93	12,31	+ 63	+ 2,38

Balances with R.B.I.	69,53	110,10	99,37	+ 40,57	- 10,73
Cash and balances with R.B.I.	114,05	161,84	151,34	+ 47,79	- 10,50
Investment in Government securities.	787,52	633,47	579,94	- 154,05	- 53,53
Bank credit (advances, inland and foreign bills purchased and discounted).	964,49	1,181,01	1,285,28	+ 216,52	+ 104,27

During the year, no bank was included in the second schedule to the Reserve Bank of India Act, 1934 but ten banks were excluded therefrom. The total number of scheduled banks thus declined from 94 to 84. The net increase in the number of their branches, (after adjustment for the branches of non-scheduled banks taken over as a result of amalgamations, during the period November 1960 to October 1961, came to 180, those belonging to State Bank of India being 42. Consequently, the total number of offices of scheduled banks at the end of October 1961 stood at 4,329 as against 4,419 (revised) at the end of October 1960.

During the year, the case for strengthening the capital funds of Indian banks was considered urgent in order to increase and sustain the confidence of the public in banks. The Reserve Bank, therefore, exhorted the Indian scheduled banks to seek to transfer at least 20 per cent of their declared profits till their reserves are at least equal to the paid-up capital and the ratio of paid-up capital and published reserves to total deposits is at least 6 per cent.

Guarantee Organisation

A scheme for the guarantee of loans and advances granted to small-scale industries by approved credit institutions was instituted by the Central Government with effect from July 1, 1960 for an experimental period of two years with a view to enlarging the supply of institutional credit to such industries. The scheme is administered by the Reserve Bank of India (designated as 'Guarantee Organisation') as agent of the Government. It provides for the sharing of losses in respect of guaranteed advances between the lending institutions and the Government of India. The maximum amount recoverable against guarantee issued under the scheme in respect of any one advance will not exceed Rs. 1 lakh. Initially, the scheme was introduced in 22 approved districts. It was later extended to another 30 districts and now covers 52 districts which are the more important centres of small-scale industries in the country. Ninety-three credit institutions, viz. State Bank of India and its subsidiaries, 48 other scheduled banks, 21 State Co-operative Banks, 14 State Financial Corporations and the Madras Industrial Investment Corporation Ltd., have been approved for the grant of facilities under the scheme. Other credit institutions can also avail themselves of the

guarantee facility provided a specific credit institution participates in the advance to the extent of not less than 25 per cent of the amount of the advance or undertakes to share not less than 25 per cent of the ultimate loss in the account. The scheme is applicable to advances granted to small-scale industrial units for the purpose of acquiring fixed assets or equipment or for providing working capital. Though initially only advances repayable on demand or term loans for periods not exceeding 7 years were eligible for guarantee, advances sanctioned for any period are now eligible but the guarantee will not, in any case, extend beyond 7 years from the date of first disbursement of the advance. A charge at the rate of $\frac{1}{4}$ per cent per annum on the maximum amount of advance as sanctioned is payable in advance for the guarantee cover. For the purpose of the scheme, a small-scale industrial unit is the one whose investment of a capital nature, including the capitalised value of rented premises, but excluding the amounts spent on housing and amenities for workers, is not in excess of Rs. 5 lakhs.

Up to the end of November 1961, the Guarantee Organisation had received 1,761 applications for guarantees for a total amount of Rs. 6.16 crores and had issued 1,658 guarantees for an aggregate sum of Rs. 5.21 crores.

Monetary and Credit Policy of the Reserve Bank

The Reserve Bank's credit policy continued to be one of overall restraint but adequate encouragement was given to meet the genuine requirements of preferred sectors. The system of penalty rates on borrowing from the Reserve Bank exceeding a basic quota as also the higher structure of lending rates imposed on banks in October 1960 (referred to in 'India 1961') continued unchanged during the year. However, in the context of the slowing down of deposit growth towards the close of 1960 and early in 1961 the ceiling of 2 per cent imposed on 21 days' deposits was withdrawn with effect from February 22, 1961 thus enabling the banks to readjust their deposit rate structure. The additional reserve requirement, introduced in March 1960 and reinforced in May and partially relaxed on November 11, 1960 were completely withdrawn with effect from January 13, 1961 in order to facilitate the financing of demand for credit from banks during the 1960-61 busy season. With a view to providing an incentive to scheduled banks to increase their lending to small scale industries and co-operative institutions, the Reserve Bank issued a circular letter on December 11, 1961 permitting banks to borrow from the Bank *at the Bank rate* an amount, in excess of the basic quota, equivalent to the excess of the average of its outstanding advances to small scale industries and co-operative institutions as on the last Friday of each month during the half-year January-June 1961 over the corresponding figures for the half-year January-June 1960, provided that the amount is not less than Rs. 1 lakh. This arrangement is to remain in force from January 1, 1962 to June 30, 1962 when the position will be reviewed.

Selective Credit Control

The selective credit controls on a number of commodities were either withdrawn or relaxed in consonance with the trends in supply and prices of the commodities concerned. On February 8, 1961, the minimum margins on advances against foodgrains were reduced from 40 per cent to 35 per cent and the ceilings on advances against paddy and rice were raised to 110 per cent of the permitted levels in 1960 in respect of all States except Andhra Pradesh. With the creation of a new food zone comprising Madhya Pradesh, Maharashtra and Gujarat, the separate ceilings in respect of advances against paddy and rice for Madhya Pradesh were abolished. Also, in order to ensure greater flexibility, the permissible levels for advances against foodgrains were fixed for two month periods, instead of on a monthly basis, commencing from March 1961. The permissible level of advances against oilseeds were also re-fixed on a two-monthly basis instead of on a

monthly basis. The control on advances against sugar and wheat was withdrawn completely, on April 21, 1961 and May 15, 1961 respectively.

On February 24, 1961 with a view to facilitating the financing of exports the minimum margin in respect of advances against jute goods to established shippers was reduced from 40 to 25 per cent, subject to certain safeguards ensuring the genuineness of the requirements. The Bank withdrew on June, 23, 1961, the margin requirement of 40 per cent in respect of advances against jute goods and on August 29, 1961, the existing margin requirements on advances against raw jute and the ceiling limits on advances against jute goods were finally withdrawn. The control on clean advances which was in force from April 1960 was also removed with effect from October 23, 1961. This measure was introduced mainly with a view to preventing circumvention of selective credit controls through extension of clean loans; with the withdrawal or relaxation of selective controls on a number of items and in the context of the overall restriction on credit the need for this control was felt to have ceased.

In the field of open market operations, as in the preceding year, the Bank made net purchases during 1961 which were mainly against transfer of P.L. 480 funds from the State Bank.

CORPORATE SECTOR

The total number of joint stock companies at work in India as on March 31, 1961 was 26,108 accounting for a total paid-up capital of Rs. 1,724.6 crores. Of these, the number of public and private companies was 6,745 and 19,363 with a paid-up capital of Rs. 876.1 crores and Rs. 848.5 crores respectively. The total number of associations, not for profit, and companies limited by guarantee was 1,219. The following table shows the number and paid-up capital of the companies at work during 1950-51, 1955-56 and 1960-61.

TABLE 114
COMPANIES AT WORK

(paid-up capital in crores of rupees)

Year	Companies with share capital						Companies limited by guarantee and associations not for profit
	Public		Private		Total

1950-51 ..	12,568	566.5	15,964	208.9	28,532	775.4	1,123
1955-56 ..	9,575	690.4	20,299	333.8	29,874	1,024.2	1,394
1960-61 ..	6,745	876.1	19,363	848.5	26,108	1,724.6	1,219

New Registrations

Between April and October 1961, 979 new companies with a total authorised capital of Rs. 198.89 crores were registered. Of these, 103 companies were public and 876 private, having an authorised capital of Rs. 84.73 crores and Rs. 114.16 crores respectively.

There has been an increase in the number of new registrations, the total number of companies having increased from 1,095 in 1958-59 to 1,683 in 1960-61. The following table shows the number of companies newly registered in different regions during the three years ending 1960-61.

*Provisional.

Government Companies

One hundred and forty Government companies, (i.e. companies in which the Central or a State or both Governments own 51 per cent or more of the share capital) were incorporated within the Indian Union up to the end of March 1961 with a paid-up capital of Rs. 545.2 crores.

Table 117 shows that the number of Government companies has increased by four times from 36 to 140 and by more than 21 times in their paid-up capital during the two Plan periods 1951-61. As compared to this position in the public sector, the number of companies in the private sector has shown a decline from 29,283 companies in 1956-57 to 25,971 companies in 1960-61 even though the paid-up capital has increased from Rs. 1,005 crores in 1956-57 to Rs. 1,200 crores in 1960-61.

TABLE 117
NUMBER OF GOVERNMENT COMPANIES

Year	Number	Paid-up capital (in crores of rupees)
1951	36	26.3
1956	61	66.0
1961*	140	545.2

The table given below shows the State-wise distribution of Government companies. The four Government companies in Bihar account for 60.92 per cent of the total paid-up capital of all Government companies during 1960-61.

TABLE 118
STATE-WISE DISTRIBUTION OF GOVERNMENT COMPANIES
1960-61*

State/Union Territory	Number	Paid-up capital (in crores of rupees)	Percentage to total paid-up capital

TOTAL ..	140	545.22

*Figures are provisional.

Foreign Companies

The total number of joint stock companies incorporated elsewhere than in India which established their places of business in this country stood at 565 as on March 31, 1961. Out of these, 393 companies had their origin in the UK whereas 63 were of the USA origin. The number of Pakistani, French and West German companies was 13, 12 and 12 respectively. All the other foreign countries had less than 10 companies each in India.

During the six months April to September 1961, 10 joint stock companies incorporated elsewhere than in India (4 in UK, 3 in the USA and one each in Canada, France and Japan) established their places of business in this country. Of these, four were concerned with business services, two with wholesale trade and one each with manufacturing of paper, pulp and allied products, printing and publishing, air transport and construction and utility.

INSURANCE

Public and Private Insurance

Since September 1, 1956, when the Life Insurance Corporation of India was established, life insurance business in India is transacted by the Corporation and, in a restricted sphere, by the Posts and Telegraphs Department of the Government of India and by certain State Governments.

Fire, marine and miscellaneous classes of insurance business are transacted both by the Indian insurance companies and by foreign insurance companies operating in India. In addition, certain State Governments are also transacting such business.

State-run Insurance Schemes

The Governments of Andhra Pradesh, Kerala, Madhya Pradesh, Mysore, Rajasthan and Uttar Pradesh are transacting life insurance business, the benefits of which are restricted to their employees. With effect from September 1, 1956, the Life Insurance Corporation of India acquired the exclusive privilege of carrying on life insurance business in India, but, in terms of clause (f) of section 44 of the Life Insurance Corporation Act, the State Governments are enabled to carry on compulsory life insurance of their employees. The Governments of Gujarat and Maharashtra have an Insurance Fund for the insurance of all types of Government property in their commercial and industrial undertakings. The Government of Kerala is transacting fire and miscellaneous (motor) insurance business while the Government of Mysore is transacting miscellaneous (motor) insurance business.

Insurance Association of India

With the nationalisation of life insurance business in India, the Life Insurance Council of the Insurance Association of India and its Executive Committee have ceased to function. The membership of the General Insurance Council of the Insurance Association of India is confined to insurers carrying on general insurance business. The Executive Committee of the Council has evolved a code of conduct for observance by general insurers with the object of eliminating various alleged malpractices of rebating and payment of excessive commission. With a view to tightening control over general insurance business, the Executive Committee has recommended, *inter alia*, certain standards of solvency and minimum departmental reserves to be maintained by insurers on a voluntary basis.

The Committee has set up an administrative machinery to administer the code of conduct. The Controller of Insurance, in his capacity as a member of the Committee, is the head of the organisation.

Another wing of the association is entrusted with the regulation and control of the tariff structure in this business. The authority for this purpose is the Tariff Committee, which functions through four Regional Councils.

Compulsory Reinsurance

The Insurance Act, 1938 was amended by the Insurance (Amendment) Act, 1961 which came into force on the April 1, 1961. Provision has been made therein (a) for compulsory reinsurance with approved Indian reinsurers by every insurer of such percentages, not exceeding thirty per cent, of his business, as may be specified by the Central Government and (b) for constituting an Advisory Committee which has to be consulted by the Central Government before specifying the percentages of business to be reinsured and the proportions of the reinsurance business to be allocated among the approved reinsurers.

GENERAL INSURANCE

Insurance Companies

On December 31, 1961 there were 82 Indian insurers and 73 non-Indian insurers registered under the Insurance Act, 1938 for transacting various classes of general insurance business as shown below.

TABLE 120
NUMBER OF INSURANCE COMPANIES

Class or classes of insurance business for which registered	Indian	Non-Indian	Total
Fire	2	12	14
Marine only	12*	8	20
Miscellaneous only	11	4	15

Assets and Investments

The total assets of the general insurance business of Indian insurers as on December 31, 1960 amounted to Rs. 64.04 crores as against Rs. 57.04 crores at the end of 1959 and Rs. 51.93 crores at the end of 1958.

The assets as on December 31, 1960 were invested as follows.

	(Per cent)
Central and State Government securities	11.7
Indian municipal, port and improvement trust securities	0.5
Shares and debentures of Indian companies	29.0
Foreign government securities	2.9
Agents' balances, outstanding premiums and amounts due from other insurers	21.1
Deposits, cash and stamps	23.6
Other assets	11.2
TOTAL	100.0

LIFE INSURANCE

The Life Insurance Corporation of India came into existence on September 1, 1956, the day notified for this purpose in the Life Insurance Corporation Act, 1956. The Corporation took over all the assets and liabilities appertaining to the controlled business of 245 insurers, including three State Insurance Departments.

The Corporation submitted an interim report on its activities on August 5, 1957, which covered the period up to June 1957. This was followed by the first statutory report which related to the period of 16 months from September 1, 1956 to December 31, 1957. The Corporation has since decided to adopt the calendar year as the financial year.

On December 31, 1961, the Corporation had 35 divisional offices, 309 branch offices, 131 sub-offices and 133 development centres.

New Business

During 1960, 16,99,594 proposals for assurances amounting to Rs. 702.93 crores were received and 14,69,664 policies assuring Rs. 608.82 crores were issued. These figures include figures of Janata business. The corresponding figures for 1960 were: 14,24,327 proposals for Rs. 568.40 crores and 12,57,557 policies assuring a sum of Rs. 497.54 crores. There

was thus an increase of 23·7 per cent in the proposed and 22·4 per cent in the completed business.

The following table shows the comparative figures of new business transacted during the last 8 years. The figures include the business of provident fund societies for 1956 and the earlier years and the business under the Janata Policy Scheme for 1957 and the subsequent years.

TABLE 123

1960	74·56	2,176	2·57	109	77·13	2,285

Foreign Business

The Corporation transacts new business in Aden, Fiji, Hongkong, Kenya, Malaya, Mauritius, Singapore, Tanganyika, Uganda and Zanzibar. A branch office was opened in the United Kingdom during 1960.

During 1960, the Corporation received from these countries 9,270 proposals for assurances amounting to Rs. 11·79 crores, and 7,736 policies assuring a sum of Rs. 9·70 crores were issued as against 9,191 proposals for assurances amounting to Rs. 11·20 crores and 7,912 policies assuring a sum of Rs. 9·47 crores during 1959.

Investments

The total investments pertaining to the life business of the Corporation on December 31, 1960 amounted to Rs. 526.96 crores as detailed below.

CHAPTER XX

AGRICULTURE

About 70 per cent of the people in India are dependent on land for their living. Agriculture and allied activities account for nearly a half of the country's national income. It supplies raw materials for some of the major industries such as cotton and jute textiles and sugar and provides a large proportion of the country's exports. India ranks first in the world in the production of groundnuts and tea and enjoys a virtual monopoly in the production of lac. It is the second largest producer of rice, jute, raw sugar, rape-seed, sesamum and castor-seed.

LAND UTILISATION

The total geographical area of the country is 80.63 crore acres. Land utilisation statistics are available for 72.41 crore acres or 89.8 per cent of the total area. The following table gives details of land utilisation in India for 1950-51 and 1958-59.

TABLE 126
LAND UTILISATION

(in crore acres)

	1950-51	1958-59*
Total geographical area	80·63	80·63
Total reporting area	70·25	72·41
Forests	10·00	12·81
Not available for cultivation --

Other unutilized land excluding fallow lands—		
(i) Permanent pastures and grazing lands	1·65	3·24
(ii) Land under tree crops and groves	4·90	1·42
(iii) Cultivable waste	5·67	5·08
TOTAL	12·22	9·74
Fallow lands—		
(i) Current fallows	2·64	2·94
(ii) Others	4·31	3·00
TOTAL	6·95	5·94
Net area sown	29·34	32·36
Total cropped area	32·59	37·22
Area sown more than once	3·25	4·86

Irrigated Area

Of the total area under cultivation, nearly 16 per cent is irrigated. During the period 1950-51 to 1958-59, the net irrigated area increased by 64 lakh acres as shown in the following table.

*Provisional.

TABLE 127
AREA UNDER IRRIGATION

(in lakh acres)

Source	1950-51	1958-59*	Increase or decrease
Canals	205	239	+ 34
Tanks	89	117	+ 28
Wells	148	167	+ 19
Other sources	73	56	- 17
TOTAL	515	579	+ 64

The two outstanding features of agricultural production in India are the wide variety of crops and the preponderance of food over non-food crops. Table 128 shows the area under major crops in 1950-51, 1955-56 and during the four years ending 1960-61.

Seasons

There are two well-defined crop seasons: (i) kharif and (ii) rabi. The major kharif crops are rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The major rabi crops are wheat, barley, gram, linseed, rape and mustard. The seasons and duration of principal crops are shown below.

*Final estimates. N.A.—Estimates not available.

TABLE 129
CROP SEASONS

Crop	Season	Duration*
Rice †	Winter	5½ — 6 months
	Autumn	4 — 4½ "

Jute	Kharif	6 — 7 "

Production

The overall production of foodgrains reached an all-time record of 793 lakh tons during 1960-61, registering an increase of 6.1 per cent over that of the preceding year. The production of the three major cereals, namely, wheat, rice, and jowar surpassed the previous record levels. Among cash crops, the production of sugarcane and cotton also touched an all-time record. The production of oilseeds recorded an increase of 11 per cent over that of the preceding year. Well-distributed rainfall and generally favourable weather conditions over most parts of the country, notwithstanding floods and droughts in some parts, largely contributed to the increase in production during the year. Table 130 shows the production of principal crops during 1950-51, 1955-56 and the four years ending 1960-61.

*Denotes the number of months the crop is on land.

†Seasons for rice in different States are known by different names. These are indicated below :

Assam	Autumn or Ahu or Aus	Gujarat and Maharashtra	Early
	Winter or Sali or Bao		Middle
	Spring or Borro		Late
West Bengal	Autumn or Bhadoi or Aus	Madhya Pradesh	Early
	Winter or Aman		Late

The index number of agricultural production (all commodities) came down from 124.3 in 1956-57 to 115.9 in 1957-58 showing a fall of 6.8 per cent. Agricultural production took a big stride during 1958-59 and the index reached a new high of 132.0 which showed an increase of 13.9 per cent over 1957-58 and 6.2 per cent over the previous record of 124.3 reached in 1956-57. During 1959-60, there was a setback in production, slumping the index to 128.7 but in 1960-61 production registered a remarkable increase with the index rising to a record level of 139.1. This was higher by 8.1 per cent over the 1959-60 index of 128.7 and by 5.4 per cent over the earlier peak index of 132.0 attained in 1958-59. The all-India index numbers of production of the various agricultural commodities and groups of commodities for 1950-51, 1955-56 and the four years ending 1960-61 are given in table 131.

*Final estimates. † 392 lbs. each **400 lbs. each.
N.A.—Data not available.

TABLE 131
INDEX NUMBERS OF AGRICULTURAL PRODUCTION

Commodity/Group	Weight	1950-51	1955-56	1957-58	1958-59	1959-60	1960-61
A. FOODGRAINS							
Rice	35.3	87.9	114.2	105.6	127.5	125.2	136.3
Wheat	8.5	101.1	131.3	118.5	147.0	151.8	160.2

GENERAL INDEX (All commodities)							
	100.0	95.6	116.8	115.9	132.0	128.7	139.1

Import of Foodgrains

During 1961, two new agreements were entered into for the import of foodgrains. Of these, one (February 1961) was for the import of 50,000 tons of rice from Egypt and the other (October 1961) was for the import of wheat from Canada under the Colombo Plan programme. Imports were also continued from Burma and the USA under agreements contracted in 1960 and from Australia and Canada.

The following table shows the import of cereals into India since 1956.

TABLE 132
IMPORT OF CEREALS

(in thousand tons)

Year	Rice	Wheat and wheat flour	Other cereals	Total cereals
1956	3,25	10,95	—	14,20
1957	7,36	28,52	—	35,88
1958	3,91	26,73	1,09	31,73
1959	2,90	34,97	20	38,07
1960	6,88	43,17	51	50,56
1961 (Jan.-Nov.) ..	3,69	28,10	19	31,98

*Provisional.

(1) Includes jowar, bajra, maize, ragi, small millets and barley besides rice and wheat.

(2) Includes gram, tur and other pulses.

(3) Includes groundnut, sesamum, rape and mustard, linseed and castorseed.

(4) Includes mesta.

(5) Comprises sugarcane, tobacco, potato, pepper, chillies and ginger.

Food Situation

The food position during 1961 remained generally satisfactory due to increased production of foodgrains, suspension of purchases of rice and wheat in some States, steady imports, judicious distribution, creation of bigger and self-sufficient food zones, and free movement of wheat within the country from April 5, 1961. Restrictions on advances by banks on wheat were withdrawn from May 15, 1961. Other regulatory and anti-speculative measures, including restrictions on advances by banks against rice and coarse grains were continued. During the 1960-61 season (November 1960 to October 1961) the Central and State Governments purchased in all about 5.41 lakh tons of rice (in rice equivalent) as against about 9.84 lakh tons in 1959-60. No purchase of wheat was made in any State.

DEVELOPMENT PROGRAMMES

The Third Plan provides for an outlay of Rs. 601.56 crores on programmes of agricultural production, including agricultural programmes under community development schemes, as against Rs. 260.65 crores in the second Plan. This is in addition to the provision of Rs. 80.10 crores for co-operation and Rs. 599.34 crores for major and medium irrigation projects.

The principal technical programmes for increasing agricultural production, around which intensive work is being organised, are : (i) minor irrigation, (ii) soil conservation, dry farming and land reclamation, (iii) supply of manures and fertilisers, (iv) seed multiplication and distribution, (v) plant protection, (vi) better ploughs and improved agricultural implements, and adoption of scientific agricultural practices.

Minor Irrigation

During the Third Plan it is proposed to bring an area of about 1.28 crore acres under irrigation through minor irrigation schemes as compared to 90 lakh acres during the second Plan. The total outlay on minor irrigation during the Third Plan is likely to be Rs. 250 crores. Three regional minor irrigation conferences held in October 1961 have recommended that all savings under agricultural production sector should be diverted to this programme and additional finances may also be provided, if necessary. Increased emphasis is being laid on the fuller utilisation of irrigation facilities already created and on the maintenance of existing irrigation works, construction of field channels, and on surveys and investigations.

Up to January 1962, 296 tube-wells had been drilled against the target of 739 tube-wells for the year 1961-62.

An extensive programme of groundwater exploration was undertaken during the Second Plan. Out of the 379 drillings attempted up to March 1961, 195 proved successful and were converted into production wells. Up to January 1962, 45 more bores were drilled, out of which 15 were successful.

Soil Conservation, Dry Farming and Land Reclamation

An outlay of about Rs. 72 crores has been provided for the execution of various soil conservation programmes as against Rs. 1.6 crores in the First Plan and Rs. 18 crores in the Second Plan.

Contour bunding and terracing were carried out over an area of 7 lakh acres of agricultural land during the First Plan and 20 lakh acres during the Second Plan. The Third Plan envisages the extension of these operations to 110 lakh acres. A number of demonstration projects for the popularisation of dry farming techniques were undertaken during the Second Plan. Work on such projects will be extended during the Third Plan so as to cover an area of about 2.2 crore acres. In 1961-62, 27 new dry farming projects were started in addition to the 40 already established during the Second Plan.

Afforestation and other soil conservation measures in the catchment areas of river valley projects were carried out over about 1.40 lakh acres during the Second Plan. An allocation of Rs. 11 crores has been made in the Third Plan for extending this programme to another 10 lakh acres.

Other soil conservation programmes during the Third Plan include reclamation of about 2 lakh acres of waterlogged, saline and alkaline lands in Punjab, Uttar Pradesh, Mysore, Gujarat, Maharashtra, Rajasthan and Delhi, and about 40,000 acres of ravine lands.

Under the All India Soil and Land Use Survey Scheme, an area of 20.03 lakh acres had been surveyed till September 1961 as against the target of 25 lakh acres for the year 1961-62.

Improved Seeds

For the development and popularisation of improved seeds, it was envisaged under the Second Plan to organise about 4,000 seed multiplication farms in different States. During 1961-62, 71 new seed farms were expected to be set up, besides effecting improvements in the working of existing ones. Greater attention is being given to further multiplication of improved seeds produced on the seed farms, arrangements for storage and distribution and for ensuring the maintenance of purity of seeds. It is now proposed to set up a National Seeds Corporation which will organise, on a country-wide scale, the production and distribution of high-yielding and disease-resistant varieties of hybrid maize and jowar in the first instance, and other food-grains and edible oilseeds subsequently.

Manures and Fertilisers

During 1960-61, about 26.84 lakh tons of urban compost were prepared and about 23.41 lakh tons distributed in 2,121 urban centres. During 1961-62, the production was estimated at 29 lakh tons. Schemes for the utilization of sewage and sullage were in operation in 67 important towns and cities, utilizing about 17.6 crore gallons of sewage and sullage water per day for irrigating about 20 thousand acres.

Under the three schemes being implemented for the development of local manurial resources (i) compost production had been intensified in 1,515 NES and CD blocks and (ii) night soil composting has been taken up in 1,217 of the bigger *panchayats*. Under the third scheme relating to the popularisation of green manuring practices, the distribution of green manuring seeds in small packets and in bulk is being carried out in most of the States. Some of the State Governments have also taken up the multiplication of green manure seeds in forest areas. An area of 115 lakh acres was green manured in 1960-61 and it was estimated to rise to 150 lakh acres in 1961-62.

The use of nitrogenous fertilisers has gained considerable popularity and the demand is far in excess of the internal production. Due to shortage of foreign exchange, however, it has not been possible to arrange imports to the full extent of the shortfall in supplies. During 1961-62, the demand for nitrogenous fertilisers amounted to about 26.71 lakh tons in terms of ammonium sulphate while their availability, including internal production and imports, was estimated at 15.1 lakh tons.

The distribution of nitrogenous fertilisers continued under the 'Central Fertiliser Pool'. The system of granting short-term loans to the States for the purchase of nitrogenous fertilisers from the Pool and other fertilisers from the open market and for their sale to cultivators on credit basis, as far as possible, was continued.

The demand for superphosphate, which is not distributed from the Fertiliser Pool, for 1961-62 was of the order of about 5.96 lakh tons as against the estimated consumption of about 3.17 lakh tons during the preceding year. Besides, bone meal (a valuable organic phosphatic manure)

manufactured in bone mills and bone digesters working in the country was also expected to be used to the extent of about 35 to 40 thousand tons. The system of subsidising the sale of phosphatic manures and fertilisers is in vogue, under which 25 per cent subsidy is admissible on these manures provided the States sponsoring the distribution scheme agree to bear one-half of the total subsidy admissible.

A Fertiliser (Control) Order was promulgated in May 1957 for quality and price control of fertiliser materials. The States of Andhra Pradesh, Maharashtra, Gujarat, Bihar, Delhi, Himachal Pradesh, Kerala, Madras, Mysore, Madhya Pradesh, Punjab, Orissa, Rajasthan, Tripura, West Bengal and U.P. have enforced the operative parts of the Order.

Under an Order issued under the Essential Commodities Act, 1955, a ban has been imposed on the inter-State movement of ammonium sulphate, urea, calcium-ammonium nitrate, ammonium sulphate nitrate and ammonium nitrate. By another Order issued under the same Act, the State Governments were empowered to ban, with the prior approval of the Central Government, movement of the above types of fertilisers from one district to another within the State, if they so desired, for the sake of equitable distribution.

Plant Protection and Locust Control

The Directorate of Plant Protection, Quarantine and Storage continued to assist the States and Union Territories with technical advice, equipment, pesticides and personnel in controlling crop pests and diseases through its 14 Central Plant Protection Stations. The stations also organised intensive plant protection work in selected Gram Panchayat areas. Help was rendered in controlling widespread outbreaks of *Psylla* pest on citrus trees in Madhya Pradesh, Maharashtra and Punjab, *Mahali* disease on arecanut crop in Kerala and Mysore, red hairy caterpillar on groundnut crop and late blight disease on potato crop in Madras and Mysore, grass-hopper pest on *jowar* crop and pod borer on *tur* crop in Mysore.

During 1961-62, over 84 locust swarms entered India from the west, but as a result of timely control measures, the multiplication of swarms was prevented and no report of any significant loss to crops was reported from any State. The Aerial Unit also conducted control operations against red hairy caterpillar over 7,500 acres of groundnut crop in Madras and against locust swarms over 14,199 acres in the desert areas of Rajasthan.

Intensive Agricultural District Programme

With a view to exploiting to the full the production potentialities of some favourable areas with maximum irrigation facilities and minimum natural hazards, a scheme entitled 'Intensive Agricultural District Programme' was sponsored during 1961-62 with financial assistance from the Ford Foundation. The programme has a two-fold objective of (a) increasing food production in order to meet the existing shortages as well as to provide a base for more rapid economic development and (b) demonstrating the most effective ways of increasing food production through concentration of resources, both men and material, and setting a pattern for extending such intensified agricultural programmes to other favourable areas having irrigation or assured water supply. The object is to promote the adopting of a combination of improved practices by the farmers by making available the needed wherewithals of production like credit, seeds, fertilisers, pesticides, implements, etc.

The programme, which will extend over a period of five years, will normally cover all the food crops grown in the district, emphasis being laid on major food crops like paddy, wheat and millets. It is also proposed to include livestock improvement programmes and other related activities.

The scheme was launched in the first instance in seven selected districts, namely West Godavari (Andhra Pradesh), Shahabad (Bihar), Tanjore (Madras), Raipur (Madhya Pradesh), Ludhiana (Punjab), Pali (Rajasthan) and Aligarh (U.P.).

It has been decided to extend the programme to selected districts in each of the remaining States, namely, Mandya (Mysore), Surat (Gujarat), Alleppey and Palghat (Kerala), Burdwan (West Bengal), Sambalpur (Orissa), Cachar (Assam) and 6 Blocks in Jammu and Kashmir. The choice of a district in Maharashtra is under consideration.

State Farms

A Central mechanised farm with an area of about 30,000 acres was established at Suratgarh in Rajasthan, in 1956. In kharif 1961, an area of 8,555 acres was shown as against 6,054 acres in the corresponding season of 1960. In the 1961-62 rabi season an area of about 19 thousand acres was brought under crops.

The possibility of establishing more State farms on similar lines has been studied and it is proposed to set up one and possibly two more farms during the Third Plan. The Committee on large-sized mechanised farms has suggested the setting up of another farm in the Rajasthan Canal area for which operational details are being worked out.

AGRICULTURAL MARKETING

In order to promote orderly marketing in the country, the Directorate of Marketing and Inspection continued its activities in regard to (a) grading and standardisation of agricultural commodities, (b) regulation of markets and market practices, (c) marketing investigations and surveys, (d) training of personnel in agricultural marketing and (e) administration of Fruit Products Order, 1955.

Grading and Standardisation

The grading of agricultural and livestock produce is carried out under the provisions of the Agricultural Produce (Grading and Marking) Act, 1937. Grade specifications have been prescribed for 33 commodities covering 124 varieties. The commodities for export compulsorily graded under Section 19 of the Sea Customs Act are tobacco, sunnhemp, wool, bristles, goat hair, lemon grass oil, palmrosa oil and sandalwood oil. It is proposed to extend compulsory quality control for the purpose of export to ginger grass oil and eucalyptus oil. Grading in respect of commodities intended for internal trade is being carried out on a voluntary basis for ghee, oils, butter, cotton, eggs, wheat atta, rice, potatoes, sugarcane, fruits, etc. A Central Control Laboratory at Nagpur and a Regional Control Laboratory at Cochin are under construction and will provide necessary laboratory facilities for fixing and revising grade standards. The Regional Laboratory at Guntur was established in August 1961 while the construction of a laboratory at Kanpur has been undertaken.

Regulation of Markets

With a view to eliminating unhealthy marketing practices and reducing marketing charges for the benefit of the producer continuous attention is being paid to increase the number of regulated markets in the country. The total number of markets regulated so far stood at 730 as against 707 in the preceding year.

Marketing Investigations and Surveys

A large number of surveys on the marketing of agricultural commodities has been carried out and since 1937 the Directorate has published over 100 marketing survey reports and brochures relating to 40 important

commodities. During 1961-62, ten more publications were brought out while another seven were expected to be issued before the end of the year.

Training of Personnel in Agricultural Marketing

There are two courses for training of personnel in agricultural marketing, viz., (i) one-year course at Nagpur for training superior personnel of the State Marketing Departments and (ii) five-month course organised at Sangli and Hyderabad for the training of marketing secretaries and marketing superintendents required for regulated markets. In the former course, 95 persons had been trained during five terms held between 1956-57 and 1960-61, while 27 candidates were under training. In the latter course 281 persons had been trained and 47 persons were receiving training.

Administration of Fruit Products Order, 1955

Under the Fruit Products Order, 1955, enforcement of quality control and rendering advisory guidance for the promotion of the industry on sound scientific lines were carried out as before and 903 licences were granted or renewed, 4,384 factory inspections carried out and about 6,296 samples of food products tested.

FORESTRY

India's forests cover 2.74 lakh sq. miles, that is, about 22 per cent of the total geographical area of the country. The per capita forest area works out at only 0.2 hectares in India. Not only is the forest area proportionately smaller in India but it is also unevenly distributed and the productivity per acre per annum is substantially below the average yield of forests in other countries. In view of these facts, the National Forest Policy Resolution of 1952 proposed that the area under forests be steadily raised to 33.3 per cent of the total land area, the proportion to be aimed at being 60 per cent in hilly regions and 20 per cent in the plains. The table given below shows the area under forests in 1950-51, 1955-56 and 1957-58.

TABLE 133
AREA UNDER FORESTS

	(sq. miles)		
	1950-51	1955-56	1957-58

Apart from providing the raw materials for paper, match-wood and plywood industries, forests are also the source of a number of minor forest products like gum, resins, tanning materials, medicinal herbs, etc., which are essential for certain industries or serve as valuable articles of export. Table 135 shows the value of minor forest produce during the years 1950-51, 1955-56 and 1957-58.

TABLE 135
VALUE OF MINOR FOREST PRODUCE

(in thousand rupees)

Year	Bamboos and canes	Fibres & flosses	Gum and resins	Other minor products	Total
1950-51	1,52,00	52	41,93	4,98,03	6,92,48
1955-56	1,36,78	43	1,01,42	5,63,11	8,01,74
1957-58	1,34,59	82	1,25,61	5,93,18	8,54,20

Development Schemes

Under the Third Plan, the forestry development programmes in the States include, among others, development of farm forestry, economic plantations, rehabilitation of degraded forests, improvement of forest communications and roads, development of forest research, nature conservancy schemes and forest protection measures. Besides, a project for a pre-investment survey of forest resources including a special programme for plantations* of fast growing species has been approved as a Centrally sponsored measure at a total estimated cost of Rs. 127 lakhs for the survey and Rs. 275 lakhs for the plantation programme. A new project for the establishment of four Logging Training Centres at Dehra Dun, Gauhati Jabalpur and Coimbatore under the Forest Research Institute at an estimated cost of Rs. 30 lakhs has also been formulated.

ANIMAL HUSBANDRY AND FISHERIES

Table 136 shows the number of livestock, poultry and agricultural machinery according to the quinquennial censuses of 1951 and 1956.

The Third Plan makes a provision of about Rs. 54 crores for animal husbandry. The object of Government policy in regard to the development of animal husbandry in the country is to develop the milk yielding capacity of well-defined milk breeds by selective breeding and upgrading of nondescript cattle, and improvement of draught breeds in milk yield without impairing the quality of the bullocks. The above objects are sought to be achieved through Key Village Scheme, Gaushala Development Scheme Gosadan Scheme, etc.

Key Village Scheme

The All-India Key Village Scheme, initiated during the First Plan period with a view to increasing milk production and raising the productive efficiency of cattle in the country, was continued with an expanded scope during the Second Plan. During this period 114 artificial insemination centres established during the First Plan were expanded, 260 new key village blocks and 72 extension centres were established and 31,116 superior calves subsidised for rearing. In addition, 21 lakh artificial insemination and natural services through superior bulls were performed, 5.7 lakh scrub bulls castrated and 83.4 lakh prophylactic inoculations against various contagious diseases given. The working of the key village scheme has been recently re-examined by an expert committee. In the Third Plan the programme is being reorganised so as to provide for about 10 units in each block and for the establishment of central artificial insemination centres.

Feeding and Nutrition

During the Second Plan the programme for the development of feeds and fodder was taken up in 11 States and 2 Union Territories and pasture

† Includes 86,200 for which details are not available.

* Comprises mules, donkeys, camels and pigs.

development was initiated at 32 farms and production of seeds and roots of improved crops and grasses was taken up at 38 farms. In addition, 77 pasture demonstration plots were established in key village blocks. Fodder and Grazing Committees were set up in 10 States for co-ordinating departmental work connected with the development of feeds and fodder resources.

Among the measures proposed in the Third Plan are work on forage improvement at livestock farms, establishment of forage demonstration plots in villages, distribution of planting materials, conservation of surplus fodder through ensilaging, feeding of selected cattle on balanced rations, adoption of improved cultural practices and establishment of fodder demonstration-cum-training centres. A fodder bank to serve during periods of scarcity was established during the Second Plan. It is proposed to set up two more fodder banks during the Third Plan. It is also proposed to set up a Forage and Grassland Research Institute.

Goshala Development Scheme

Towards the end of 1960-61, 13 new goshalas were taken up for development thereby achieving the Second Plan target of 246 goshalas. These institutions are serving as cattle breeding-cum-milk production centres and are supplementing governmental efforts for supply of good breeding bulls and increasing milk production in the country. The scheme is being continued during the Third Five Year Plan.

Gosadan Scheme

During the Second Plan, 37 gosadans and 11 *charmalayas* were set up. The scheme aims at the segregation of uneconomic and unproductive cattle from areas where active cattle development work has been taken up, to gosadans established in the remote forest areas. The scheme will be continued in the Third Plan.

Stray and Wild Cattle Catching Scheme

During the Second Plan period, 86,303 cattle were rounded up in Punjab, Delhi, U.P., Gujarat, Madhya Pradesh and Jammu and Kashmir and out of these, 8,750 productive ones were given to various States, breeders, etc. for breeding purposes while 11,667 unproductive cattle were sent to Gosadans. In 1961-62, 18,065 cattle were rounded up, 2,471 productive cattle distributed for breeding purposes and 1,681 unproductive ones sent to Gosadans. The scheme has received encouraging response from farmers, etc. whose crops were being damaged by such cattle.

Training in Hide Flaying, Curing and Carcass Utilisation

The Model Training-cum-Production Centre at Bakshi-Ka-Talab, Lucknow, which was developed with assistance from the Netherlands Government and the FAO, trained 42 candidates in hide flaying and 19 in tanning during the Second Plan period. In 1961-62, 49 persons were trained in hide-flaying, 16 in tanning and 15 in footwear and leather utilisation.

Nomadic Cattle Breeding Scheme

A scheme for rehabilitating nomadic cattle breeders has been started in four States. In Andhra Pradesh, U.P. and Rajasthan the programme aims at providing breeders with better bulls and veterinary aid while in Gujarat they are being settled on wasteland on co-operative basis. For this purpose 139 co-operative cattle breeding-cum-farming societies have been formed with a membership of 2,383 breeder families and allotted 26,000 acres of land.

Dairying

Dairy development programmes include establishment of city milk plants, colonisation of cattle, establishment of milk products factories and

rural creameries, services and rural dairy extension and training of technical personnel.

Under the city milk supply schemes, 9 new dairies have started functioning and installation of equipment has been taken up at 9 other places. Construction work in 12 other dairies is in progress. Pilot milk schemes, started in previous years, are being continued in 10 centres. The total number of animals colonised in the milk schemes of Calcutta and Madras has increased to 10,000. The daily handling of milk by the Delhi Milk Scheme has increased to about 3,500 mds., representing 50 per cent of the target envisaged under the scheme. At present, distribution of milk is being handled by 500 milk depots and 6 all-day milk stalls.

The Milk Powder Factory at Amritsar is being equipped and is expected to go into production during 1962-63. Installation of equipment is to be taken up shortly at the second Milk Powder Factory at Rajkot.

Construction of buildings for the rural creameries at Aligarh and Barauni is nearing completion and installation of equipment has been undertaken. The construction of the third rural creamery at Junagadh is being taken up shortly. Survey schemes in the milk sheds of the various dairy projects and also extension work around 80 dairy schemes have been taken up in the States.

The table below shows the production of milk, ghee and butter at the time of livestock censuses held since 1940.

TABLE 137
PRODUCTION OF MILK, GHEE AND BUTTER

(in lakh mds)

Year	Production of Milk				Ghee	Butter
	Cow milk	Buffalo milk	Goat milk	Total		
1940	2013.95	2435.35	134.46	4593.94	—	—
1945	2062.44	2619.71	133.53	4815.50	—	—
1950	2074.66	2460.54	128.30	4663.50	103.08	19.37
1956	2191.50	2940.63	150.44	5282.57	106.00	20.08

Poultry

Under the Second Plan, five regional poultry farms were set up in Maharashtra, Orissa, Mysore, Himachal Pradesh and Delhi. The production of eggs at these farms during 1961-62 was estimated at 6.0 lakhs as against 4.53 lakhs in 1960-61. These regional farms also distributed chicks to State poultry farms, extension centres and poultry breeders. During the Second Plan 269 poultry extension centres were also established. The Third Plan provides for the expansion of 60 State poultry farms, 3 regional poultry farms and 50 extension-cum-development centres. Two regional duck breeding farms, 17 duck extension centres, one egg powder factory and 15 centres for the manufacture of poultry feeds are also proposed to be established.

Piggery Development Schemes

In 1960-61, a Regional Pig Breeding Station-cum-Bacon Factory was established at Aligarh besides the one already established at Haringhata, West Bengal, in 1959-60. During the Second Plan the latter station distributed 301 boars and sows for upgrading work in other States. During

April to September, 1961, the station sold 24 animals worth Rs. 10,571. A building for the Bacon Factory at Haringhata is under construction. The Third Plan provides for the establishment of two new Regional Station-cum-Bacon Factories.

During the Second Plan 15 pig breeding units and 31 piggery development blocks were also established.

Fisheries

The production of fish which stood at about 10 lakh tons at the end of the First Plan increased to over 12 lakh tons in 1957. The production of fish during 1960 was 11.41 lakh tons. The following table shows the production and disposal of fish since 1955.

TABLE 138
PRODUCTION AND DISPOSAL OF FISH

Year	Total catch and landings	Disposal				Reduction
		Fresh marketing	Cured			
			Sun-dried	Salted		
1955	8,25.8	3,52.7	2,13.9	2,04.8	54.4	
1956	9,96.3	4,25.5	2,58.1	2,47.0	65.7	
1957	12,13.5	5,18.2	3,14.3	3,01.0	80.0	
1958	10,47.6	4,47.3	2,71.3	2,59.8	69.2	
1959	8,09.8	3,45.8	2,09.7	2,00.9	53.4	
1960	11,41.6	5,46.8	2,64.9	2,34.0	95.9	

There is a sizable foreign trade in fish and fish products. During 1960-61, 19,599 tons of fish and fish preparations valued at Rs. 4.6 crores were exported and 19,369 tons valued at Rs. 3.5 crores were imported.

Fisheries development programmes fall into two parts, marine fisheries and inland fisheries. Schemes for the former consist of mechanisation of fishing craft, exploratory and experimental fishing to locate new grounds, improvement of fishing methods, increasing the supply of fishery requisites and provision of facilities for landing, preservation, transport and marketing of fish. Schemes relating to the development of inland fisheries aim at increasing production through surveys, introduction of fish culture techniques, investigation of fish seed resources and development of reservoir fisheries.

Mechanisation of fishing craft and the development of suitable designs of mechanised crafts for different coastal regions was undertaken during the first two Plans. There are at present about 1,870 mechanised boats as against 1,500 at the end of the Second Plan period.

The construction of fishing harbours at Cuddalore in Madras and Veraval in Gujarat started during the Second Plan are nearing completion. The construction of fishing harbours at Karwar in Mysore, Vizingham in Kerala, Sassoon Docks in Maharashtra, Kandla in Gujarat and Royapuram in Madras are to be started shortly. Survey and investigations are also being conducted at several other places.

The fish marketing organisations in the country are being gradually strengthened to meet the growing needs of the fish industry. Refrigerated railway wagons have been introduced on three important routes and will shortly be introduced on one more route.

Research in inland fisheries is carried out at the Central Inland Fisheries Research Institute, Barrackpore and in sea fisheries at the Central Marine Fisheries Research Institute at Mandapam Camp. The Deep Sea Fishing Station, Bombay and the off-shore stations at Tuticorin, Cochin and

Visakhapatnam conduct exploratory surveys for charting grounds. Studies on fishing gear pertaining to gear materials and their preservation, gear designs and fishing methods and processing, preservation and storage of fish and fishery products are conducted at the Central Fisheries Technological Research Station at Cochin and Ernakulam.

There are now ten fisheries extension units functioning in the country. The programme of these units has been re-orientated, greater emphasis being laid on the training of inland workers and field staff of the C. D. and N.E.S. blocks and State Fisheries Departments.

Fisheries schemes in the Third Plan have been formulated with the main objective of increased production and the development of export trade. Measures to improve the condition of fishermen have also been given due consideration.

As a result of programmes included in the Third Plan, for which a provision of Rs. 29 crores has been made, an increase of four lakh tons in production and a doubling in exports are expected.

AGRICULTURAL LABOUR

The first Agricultural Labour Enquiry was conducted in 1950-51, in 800 villages, covering a sample of 11,000 agricultural labour families. The reports of the enquiry were published in 1954-55. The second Agricultural Labour Enquiry was conducted in 1956-57, in 3,600 villages and data on employment, unemployment, wages and earnings, income, expenditure and indebtedness were collected from 28,560 sample agricultural labour households. One of the main objects of the enquiry was broadly to assess the impact of developmental schemes undertaken during the First Plan on the condition of agricultural labourers.

The all-India report of the second enquiry was published in 1960. A summary of the main results of the second enquiry along with a comparison* with the corresponding data of the first enquiry is given below.

Occupational Structure

(i) The estimated number of agricultural labour households was 1.63 crores in 1956-57 as against 1.79 crores in 1950-51, i.e. a fall of 16 lakhs. This reduction might be mainly due to conceptual difference in the definition of the term "agricultural labour households" adopted during the two enquiries.

(ii) The landless agricultural labour households in 1956-57 accounted for 57 per cent of the total as against 50 per cent in 1950-51.

(iii) The proportion of attached and casual agricultural labour households was 10 : 90 in 1950-51. In 1956-57, attached labour households accounted for about 27 per cent of the all-India total, the remainder being casual labour households. The increase may, to some extent, be due to resumption of personal estates for self-cultivation by the erstwhile intermediaries like zamindars, jagirdars, talukdars, etc, in the different States.

(iv) The average size of the agricultural labour households rose slightly to 4.40 in 1956-57 from 4.30 in 1950-51. The average number of wage earners was 2.03 per household, comprising 1.13 men, 0.74 women and 0.16 children. The corresponding figures for 1950-51 were 2.0 wage earners, comprising 1.1 men, 0.8 women and 0.1 children.

(v) The estimated number of agricultural labourers during 1956-57 was 3.3 crores composed of 1.8 crore men, 1.2 crore women and 30 lakh children.

*Certain changes, in the light of improved international standards, were made in concepts, definitions and procedures adopted in the Second Enquiry as compared with those in the First. For a properly comparative study of the results of the two enquiries, especially those relating to the number of agricultural labour households, employment and wage rates, reference must be made to the Report of the Second Enquiry in which these changes have been explained at relevant places.

The corresponding figures for 1950-51 were 3.5 crores consisting of 1.9 crore men, 1.4 crore women and 20 lakh children.

Employment and Unemployment

(i) Casual adult male workers were employed, on an average, for wages for 200 days in 1950-51 and for 197 days during 1956-57. They were self-employed for 75 days in 1950-51 and for 40 days in 1956-57.

(ii) Casual adult female workers were employed on wages for 134 days during 1950-51 and for 141 days during 1956-57.

(iii) The wage-employment of children increased from 165 days in 1950-51 to 204 days in 1956-57.

(iv) Casual adult male workers were unemployed for 128 days in 1956-57, as compared to 90 days in 1950-51.

Wages

(i) About 76 per cent of the average income of agricultural labour households was derived from wage-employment in agricultural operations as well as from non-agricultural occupations during 1950-51 as against 81 per cent during 1956-57. About 56 per cent of the man-days worked were paid for in cash in 1950-51 and 48.7 per cent in 1956-57. Payments made entirely in kind accounted for 31.3 per cent in 1950-51 and 40.5 per cent in 1956-57. Wage-payments made partly in cash and partly in kind related to 9.8 per cent of the total man-days worked in the first enquiry and formed 10.8 per cent in the second enquiry.

(ii) The average daily wage rate of adult male workers decreased from 109 nP. in 1950-51 to 96 nP. in 1956-57, and the average daily wage-rate of adult women also fell from 68 nP. in 1950-51 to 59 nP. in 1956-57. Child labour received an average wage of 70 nP. in 1950-51 and 53 nP. in 1956-57.

(iii) The estimated wage-bill in agriculture worked out to roughly Rs.520 crores in 1956-57 as against Rs. 500 crores in 1950-51. The increase was mainly due to the proportion of attached labour households being considerably higher (above 27 per cent) in 1956-57 as compared with 1950-51 (about 10 per cent) and the average annual income per attached labour household as also of all households taken together from agricultural wage-employment in 1956-57 being higher than in 1950-51.

Household Income

(i) The average annual income of an agricultural labour household in 1950-51 was Rs. 447, while in 1956-57 it was Rs. 437.

(ii) The average income derived from different sources during the first and second enquiries by agricultural labour households is given in the following table.

TABLE 139
SOURCES OF INCOME*

	<i>(in rupees)</i>	
	1950-51	1956-57
Cultivation of land	59.90 (13.49)	30.07 (6.87)
Agricultural labour	286.97 (64.2)	319.55 (73.04)
Non-agricultural labour	53.19 (11.9)	34.94 (7.99)
Others	46.94 (10.51)	52.91 (12.10)

Income from farming and non-agricultural labour declined during 1956-57 but that from agricultural labour had increased.

*Figures in brackets are percentages of total income from all sources.

Consumption and Cost of Living

(i) The average annual consumption expenditure of agricultural labour households increased from Rs. 461 in 1950-51 to Rs. 617 in 1956-57. The percentage expenditure on different consumption groups is given below.

TABLE 140
CONSUMPTION EXPENDITURE

Consumption group	(percentage of total)	
	1950-51	1956-57
Food	85.3	77.3
Clothing and footwear	6.3	6.1
Fuel and lighting	1.1	7.9
Miscellaneous and service	7.3	8.7

(ii) The average income per household during 1956-57 was Rs. 437 while average consumption expenditure was Rs. 617. The deficit was thus Rs. 180. This deficit, to a considerable extent, would seem to have been met from past savings, sale of stocks, remittances received and loans.

Indebtedness

(i) About 64 per cent of agricultural labour households was indebted during 1956-57 as against 45 per cent in 1950-51. The average accumulated debt per household increased from Rs. 47 in 1950-51 to Rs. 88 in 1956-57.

(ii) The average debt per indebted household also rose from Rs. 105 in 1950-51 to Rs. 138 in 1956-57. One of the reasons for the higher percentage of indebted households as also the higher volume of debt in 1956-57 was the higher proportion of attached labour households, some of whom were under debt bondage and/or tie-in-allotment.

(iii) The total estimated volume of indebtedness of agricultural labour households in 1956-57 was Rs. 143 crores as against Rs. 80 crores in 1950-51.

(iv) Of the total debt, about 46 per cent was incurred for meeting the consumption expenditure. Social purposes accounted for 24 per cent and productive purposes for 19 per cent, the remaining 11 per cent of the total debt being incurred for meeting the expenditure on other miscellaneous items.

(v) Of the total loan, 34 per cent was taken from money-lenders, 44 per cent from friends and relatives, 15 per cent from employers, 5 per cent from shop-keepers and one per cent from co-operatives.

Minimum-Wage Fixation in Agriculture

One of the protective measures to improve the income of agricultural labourers is the Minimum Wages Act, 1948 which *inter alia* applies to employment in agriculture. Under this legislation, minimum wages for agricultural workers have been fixed throughout the States of Kerala, Orissa, Punjab, Rajasthan, Delhi and Tripura and for specified areas in the States of Assam, Andhra Pradesh, Bihar, Bombay, Himachal Pradesh, Madhya Pradesh, Mysore, Uttar Pradesh and West Bengal. Minimum wages have also been fixed by the Central Government in certain agricultural demonstration farms and military farms under the Central Ministries of Food and Agriculture and Defence respectively.

CHAPTER XXI

LAND REFORM

The First Five Year Plan recognised that the pattern of land ownership and cultivation was a fundamental issue in national development. It made certain recommendations for bringing about a gradual transition from a land system based on the exploitation of the cultivator to one in which the actual tiller would receive the maximum return from his labour and have the requisite incentive to raise productivity in agriculture. The policy was restated in the Second Plan with certain shifts in emphasis and direction necessitated by the experience gained during the First Plan period. The objectives aimed at were, firstly, to remove such impediments in the way of agricultural production as arise from the character of the agrarian structure and to create conditions for evolving as speedily as possible an agrarian economy with high levels of efficiency and productivity and, secondly, to establish an egalitarian society and eliminate social inequalities.

The Third Plan envisages as the main task during this period the completion of the implementation of policies evolved during the Second Plan and embodied in legislation which States have undertaken in pursuance of the accepted policies. It also stresses that as each phase of land reform is implemented, it will become possible to give fuller assistance to cultivators in increasing agricultural production and in diversifying the village economy. The Panel on Land Reform constituted by the Planning Commission to assist in the study of proposals for the Third Plan has stressed that while removing shortcomings in the legislation or the rules as may come to notice, it is important that the land reform programmes should be completed with the least delay, so as to eliminate any feeling of uncertainty arising from delays in implementation.

ABOLITION OF INTERMEDIARIES

More than 200 lakh tenants have been brought into direct relationship with the State as a result of abolition of intermediary tenures. Legislation undertaken in this direction has resulted in the elimination of intermediaries with the exception of a few minor tenures and *inams* in Assam, Gujarat, Madras and Maharashtra. As a result of the abolition of intermediaries, the occupants have been brought into direct contact with the State and uncultivated lands, forests, etc., have been acquired and are being administered directly by the States or through local agencies such as the village panchayats.

During 1961, legislation was undertaken for abolition of *Pattazhi Dewaswoms* in Kerala, *Patel Watans* in Gujarat and post-1936 *inam* estates and minor *inams* in Madras. In Assam, legislation has been enacted for acquisition of lands held by religious and charitable institutions.

The main problem which is now engaging the attention of State Governments is the assessment and payment of compensation. The total compensation, including rehabilitation grant and interest, is estimated at Rs. 640 crores, out of which Rs. 216 crores have so far been paid either in cash or in the form of bonds.

The following table gives the State-wise break-up of the estimates of the compensation payable and amount already paid to intermediaries.

*For a brief account of the genesis and growth of the agrarian problem, see Chapter XXI of 'INDIA 1958'.

TABLE 141
COMPENSATION PAYABLE AND PAID FOR ABOLITION OF
INTERMEDIARIES

(in crores of rupees)

State	Compensation and rehabilitation grant payable	Amount paid
Andhra Pradesh	17.57	14.87
Assam	5.00	0.38
Bihar	238.98	14.79
Gujarat and Maharashtra	12.22	4.49
Kerala	0.20	—
Madhya Pradesh	22.10	13.57
Madras	7.16	6.24
Mysore	3.90	1.07
Orissa	8.25	2.23
Rajasthan	50.31	26.03
Uttar Pradesh	198.36	119.29
West Bengal	70.00	7.15
TOTAL*	639.57	215.63

The State Governments have been advised to arrange to issue compensatory bonds still outstanding and complete record of rights and other administrative tasks arising from the abolition of intermediaries during the Third Plan period.

TENANCY REFORM

The principal objectives of tenancy reform recommended by the Planning Commission are : (i) reduction of rents, (ii) security of tenure and (iii) ownership for tenants. The progress made in these directions is outlined below.

Andhra Pradesh

In the former Andhra area, tenants in possession on June 1, 1956, were given a minimum term of three years. It has been extended up to May 31, 1962. Tenants admitted after June 1956 secured a minimum term of six years. The rent is not to exceed 50 per cent of the gross produce for lands under government irrigation sources, 45 per cent in the case of dry lands and 28½ per cent in the case of irrigation by baling.

In the Telangana area, the protected tenants (with 6 years' possession on specified dates or holding from substantial owners) have security of tenure subject to owner's right to resume before February 4, 1959, land for personal cultivation up to three family holdings (12 to 180 acres). Tenants are generally entitled to retain a basic holding or half the area. In the non-resumable area protected tenants have a right to acquire ownership up to one family holding provided the owner's holding is not reduced below two family holdings. The rent is not to exceed one-fourth or one-fifth or 3 to 5 times the land revenue, depending upon the class of land.

Legislation for a uniform tenancy law applicable throughout the State has been introduced and is under consideration of the Select Committee.

Assam

A landlord may resume land from tenants for personal cultivation up to 33½ acres subject to a minimum of 3½ acres to be retained by the tenant until alternative land is provided. The right of resumption expires on February 18, 1963. The crop-share rent is not to exceed one-fourth where

*Includes Rs. 5.52 crores in respect of former Hyderabad areas.

the cost of cultivation is met by the landlord, and one-fifth in other cases. The cash rent payable by a tenant in permanently settled areas is not to exceed 100 per cent of rent payable by his landlord; it is 50 per cent in temporarily settled areas.

Bihar

Right of occupancy accrues to an under-ryot after 12 years of continuous possession. Cash rent is not to exceed by more than 50 per cent of the rental value, if the land is held under a registered lease, and 25 per cent in other cases. The produce rent is not to exceed $\frac{7}{20}$ ths of the gross produce excluding chaff.

A Bill has been passed which permits a substantial holder to resume up to 20 to 120 acres depending on class of land and size of the family of the holder, subject to the condition that the tenant is left with some area, at least a minimum of one acre.

Gujarat

In the area of the former State of Bombay, a landlord is permitted to resume one-half of the area, provided that, together with the land held under his personal cultivation, it did not exceed three economic holdings (12 to 48 acres). In the non-resumable area, with effect from April 1, 1957, tenants have been deemed to have acquired ownership. The law was amended in 1960 to enable the tenants of small holders also to become owners with effect from April 1, 1962.

In the Kutch area, provision has been made for fixity of tenure subject to landlord's right to resume land up to three family holdings for personal cultivation. Provision has been made for enabling the State Government to transfer ownership to tenants with effect from April 1, 1961.

Jammu and Kashmir

The limit of resumption of land for personal cultivation is 2 acres of wet land or 4 acres of dry land in Kashmir Province and 4 acres of wet land or 6 acres of dry land in Jammu Province. In the non-resumable area, tenants have fixity of tenure. The rent payable by tenants of owners of more than $12\frac{1}{2}$ acres is not to exceed one-fourth of the gross produce for wet land and one-third for dry land.

Kerala

The *Kerala Agrarian Relations Act* provides for fixity of tenure for cultivating tenants and crop sharers. Persons owning more than the ceiling area are not permitted to resume any land, while others can resume for personal cultivation an area not exceeding 5 acres of double crop paddy land or equivalent land. Small owners are permitted to resume half the area. Resumption is not permitted in the Cochin and Malabar areas where most tenants have already acquired full security of tenure under previous laws. Tenants of non-resumable land can acquire ownership rights with effect from a date to be notified. The maximum rent varies between one-fourth and one-twelfth of the gross produce for paddy lands.

The provisions of the Act regarding regulation of tenancies have been brought into force with effect from February 15, 1961. The normal rates of rents were finalised and published on March 11, 1961. On the basis of these rates, the land tribunals are engaged in fixation of fair rent payable by each tenant.

Madhya Pradesh

Legislation has been enacted for providing a uniform revenue administration and land tenure throughout the reorganised State of Madhya Pradesh. It provides for fixity of tenure for tenants. The landlord is permitted to resume up to 25 acres of land subject to the condition, however, that the

tenant is left with 25 acres if he has more than 5 years' possession and 10 acres in other cases. The right of resumption expired on October 2, 1960. The rent is not to exceed 2 to 4 times the land revenue. Provision has also been made for transfer of ownership to tenants in respect of non-resumable area.

Madras

An interim measure for protection of tenants from eviction was adopted in 1955 and which remains in force up to September 26, 1963. Rent is not to exceed 40 per cent of produce for irrigated lands (35 per cent where irrigation is supplemented by lift irrigation) and 33½ per cent in other cases.

Maharashtra

In the former Bombay area, the tenant is generally entitled to retain half the area, the other half being resumable by the landlord for personal cultivation. Tenants in the non-resumable areas have been deemed to have acquired ownership with effect from April 1, 1957, except in cases of tenants of small holders who acquire ownership with effect from April 1, 1962.

In the Vidarbha region, the provisions are similar to those in the Kutch area of Gujarat. In 1961, a provision has been added enabling tenants of small holders to become owners in respect of non-resumable area from April 1, 1963. In the Marathwada region, the provisions are similar to those applicable to the Telangana region of Andhra Pradesh.

Mysore

In 1959, an interim measure was adopted for staying ejection of tenants, regulating surrenders and maintaining the *status quo*. Rents in Coorg were fixed at one-third of the produce. In other parts, rent continues to be regulated under earlier laws varying from one-sixth of the produce in the former Bombay area to two-fifths of the produce for wet lands in the former Madras area.

In 1961, a comprehensive Land Reform Bill applicable to the entire reorganised State of Mysore was passed. The tenants get fixity of tenure and are entitled to retain half the area (in case of protected tenants at least one standard acre is to be retained), the other half being resumable by landlord for personal cultivation. In the former Bombay and Hyderabad areas, if the landlord has already resumed land under existing law he will not be entitled to resume any further. The rent is not to exceed ¼th of the produce for wet lands and 1/5th in other cases. There is also a provision for transfer of ownership among tenants in respect of non-resumable area. This provision will not apply to tenants of a small holder in case he elects not to exercise right of resumption for five years.

Orissa

A comprehensive Land Reform Bill has been enacted which provides for fixity of tenure subject to the landlord's right to resume two-thirds to three-fourths of the area leased subject to a maximum of 25 standard acres. Tenants in non-resumable areas are to be provided with ownership rights.

Meanwhile, ejection of tenants has been further stayed up to December 31, 1962, and the maximum rent continues at one-fourth of the gross produce but not exceeding 4 to 6 maunds of paddy per acre.

Punjab

Tenants have been given fixity of tenure subject to landlord's right to resume up to 30 standard acres. The tenant thereby is, however, not to be left with less than 5 standard acres. The rent is not to exceed one-third of the gross produce or value thereof. Provision has also been made for

an optional right of purchase by tenants, if they are in possession for six years or more.

Rajasthan

A tenant is entitled to retain an area which yields a net annual income of Rs. 1,200. It varies from 15.6 acres in Ganganagar area to 125 acres in Jaisalmer. The excess land held by a tenant can be resumed by the landlord. Ownership rights have been conferred on tenants in the non-resumable areas except in cases where the tenants opted to continue as tenants. Rent is not to exceed one-sixth of the gross produce or twice the land revenue.

Uttar Pradesh

All tenants and sub-tenants have been brought into direct relationship with the State. Fifteen lakh sub-tenants and tenants holding 20 lakh acres have thus been brought into direct contact with the State.

West Bengal

All rent-receiving interests have been acquired by the State and the under-ryots and tenants have been brought into direct relationship with the State. Crop shares (*bargadars*) do not get tenancy status but have fixity of tenure subject to owner's right to resume two-thirds of the areas leased. In case a person owns less than $7\frac{1}{2}$ acres he can resume the entire area for the *bargadars*. Crop share is not to exceed 50 per cent of the produce if the landlord contributes the cost of cultivation, and 40 per cent if he does not.

Union Territories

In Delhi, tenants have been brought into direct contact with the State. Eighteen thousand tenants were made owners in respect of 25,000 acres. In special cases where tenancies continue, rent is not to exceed one-fifth of gross produce or four times the land revenue.

In Himachal Pradesh, tenants of owners paying more than Rs. 125 as land revenue have been brought into direct contact with the State. Occupancy tenants have optional rights to acquire ownership on payment of compensation, while in regard to non-occupancy tenancy the landlord can resume for personal cultivation one-fourth of his tenancy subject to a maximum limit of 5 acres. The rent is not to exceed one-fourth of the gross produce.

In Manipur and Tripura comprehensive legislation has been enacted providing for fixity of tenure to tenants, subject to landlord's right to resume and conferring ownership rights in non-resumable areas. Rent is not to exceed one-fourth to one-fifth of the produce or four times the land revenue.

In the First and Second Plans, it was contemplated that it would not be necessary to allow resumption beyond a period of five years. In the Third Plan it has been recommended that, except for owners holding land equivalent to a family holding or less, there should be no further rights of resumption, in view of the period which has already elapsed. It has also been recommended that in the course of the Third Plan period, steps should be taken to complete the programme for conferring ownership on tenants of non-resumable lands.

CEILING ON HOLDINGS

The principle that there should be a ceiling on land holdings was accepted in the First Plan. It was suggested that a census of land holdings and cultivation should be held to make available the data relevant to the determination of the ceiling limit. The census was held in most of the States. The Second Plan reiterated the recommendation that there should be a ceiling at three family holdings and recommended that steps should be taken

in each State to impose ceiling at existing holdings during the Second Plan period.

Ceiling has two aspects, namely (i) ceiling on future acquisition, and (ii) ceiling on existing holdings. Ceiling on future acquisition imposed in the following States is as follows :—

Andhra Pradesh	18 to 216 acres
Assam	50 acres
Gujarat	19 to 132 acres
Jammu & Kashmir	22½ acres
Kerala	15 to 37½ acres
Madhya Pradesh	25 to 75 acres
Maharashtra	18 to 126 acres
Orissa	25 to 100 acres
Punjab	30 standard acres
Rajasthan	30 standard acres
Uttar Pradesh	40 to 80 acres
West Bengal	25 acres
Delhi	30 standard acres
Himachal Pradesh	30 acres in Chamba district and land assessed at Rs. 125 in other areas.
Manipur	25 acres
Tripura	25 to 75 acres

During 1961, legislation was enacted in Andhra Pradesh, Gujarat, Kerala and Maharashtra for ceiling on existing holdings. The law was amended in Madhya Pradesh. Bills have also been passed in Bihar, Madras, and Mysore. The ceiling limit for existing units in the various States is as follows :

Andhra Pradesh	27 to 324 acres
Assam	50 acres
Gujarat	19 to 132 acres
Jammu & Kashmir	22½ acres
Kerala	15 to 37½ acres
Madhya Pradesh	25 to 75 acres
Maharashtra	18 to 126 acres
Orissa	25 to 100 acres
Punjab	Pepsu area 30 standard acres (in case of displaced persons 40 standard acres)
Rajasthan	30 standard acres
Uttar Pradesh	40 to 80 acres
West Bengal	25 acres
Delhi	30 standard acres
Himachal Pradesh	30 acres in Chamba district and land assessed at Rs. 125 in other areas.
Manipur	25 acres
Tripura	25 to 75 acres

In the former Punjab area, Government have been authorised to settle tenants on land under personal cultivation by landlords in excess of 30 standard acres.

The implementation of legislation for imposition of ceiling on existing holdings has been completed in Jammu & Kashmir where 2.3 lakh acres have been distributed. In West Bengal, the State Government have come into possession of 2.7 lakh acres of agricultural land which is being leased out to landless workers at present on a yearly basis. More area will become available as implementation proceeds. In the Punjab, declarations of land held by owners are being scrutinised for determining the surplus area. In the Pepsu area 1,33,647 standard acres have so far been declared surplus out of which 2,873 acres have been distributed. In Andhra Pradesh, Assam, Gujarat and Uttar Pradesh, the provisions have been brought into force, rules have been framed and preliminary steps taken for the implementation of the legislation.

Legislation has been passed for imposition of ceiling on holdings in the following States.

State	Future acquisition	Existing holdings
Bihar	20 to 60 acres	20 to 60 acres
Madras	24 to 120 acres	24 to 120 acres
Mysore	18 to 144 acres	27 to 216 acres

In Orissa, an amendment Bill is before the State Legislature for reduction of the ceiling level.

CONSOLIDATION OF HOLDINGS

Both the First and Second Plans have emphasised the need for the consolidation of holdings. The Planning Commission recommended that the consolidation of holdings should be undertaken in Community Development areas as a task of primary importance to the agricultural programme. A study of the methods evolved so far for consolidation operations has been made available to the State Governments to assist them in tackling the problem.

Consolidation operations were completed in 293 lakh acres and operations in 107 acres were in progress till the end of March 1961. The target for the Third Plan is 313 lakh acres.

During the Third Plan the Planning Commission propose to study how best the factors which came in the way of extension of the consolidation programme in the southern and eastern parts of the country can be overcome and what changes and adaptations in the present methods and system of consolidation are called for in these areas.

The following table shows the progress of consolidation of holdings in different States up to March 31, 1961.

TABLE 142
CONSOLIDATION OF HOLDINGS

(in lakh acres)

State/Union Territory	Work completed up to 31-3-1961*	Work in progress as on 31-3-1961@
Andhra Pradesh	3.12	3.55
Bihar	0.60	2.43
Gujarat	6.52	9.21
Maharashtra	13.23	20.02
Madhya Pradesh	40.88	4.15
Mysore	9.82	4.17
Punjab	1.47.28	14.28
Rajasthan	14.30	6.12
Uttar Pradesh	53.95	42.98
Delhi	2.04	
Himachal Pradesh	1.26	0.21
	2,93.00	1,07.12

SUB-DIVISION AND FRAGMENTATION

The operation of the laws of inheritance and unregulated transfers and leases have resulted in the sub-division and fragmentation of holdings to the detriment of agricultural production. The policy is to restrain this tendency by regulating transfers, partitions and leases.

*The expression "work completed" refers to areas where, after finalising the consolidation schemes, the possession of new holdings has actually been transferred.

@The expression "work in progress" means areas where the consolidation schemes are in various stages of implementation.

Legislation has been enacted for this purpose in Assam, Bihar, Gujarat, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Manipur, Tripura and in the former Hyderabad areas of Andhra Pradesh and Mysore. It has, however, not yet come into force in Orissa, Punjab and West Bengal. Bills are under consideration in Andhra Pradesh and Mysore.

CO-OPERATIVE FARMING

The ultimate solution of the land problem, as envisaged in the First and Second Plans, is co-operative village management. In the First Plan, co-operative farming was viewed as a method by which small and middle farmers could bring into existence sizable farm units which would facilitate the application on a wider scale of scientific knowledge, increase in capital investment and rise in the productivity of land. During this period, almost all States issued bye-laws for co-operative farming societies and framed rules for assisting them. Efforts during the Second Plan period were directed towards providing a sound foundation for the development of co-operative farming.

The Government of India set up a Working Group on June 11, 1959, to help the formulation of a programme to ensure the availability of financial and other facilities, technical knowledge and guidance to those who voluntarily decide to establish joint farming societies in the country. The report of the Group which was released on February 15, 1960, outlined a programme indicating the preparatory work and other requirements regarding the formation of co-operative farming societies.

The report of the Working Group was discussed and its recommendations were generally endorsed at the conference of State Ministers of Co-operation in June 1960, and by the National Development Council in September 1960. On the basis of these policy decisions, the pattern of organisation, management and financial assistance, etc., has been communicated to the State Governments.

The programme of co-operative farming in the Third Plan period envisages organisation of 320 carefully planned pilot projects of co-operative farming at the rate of one per district in selected community development blocks. Each project will consist of 10 co-operative farming societies. These projects would serve as catalytic agents for further expansion and it is expected that about 4,000 societies would come into being outside the pilot areas. The emphasis in the implementation of the programme would be on quality.

One hundred and forty co-operative farming societies in pilot projects and 282 outside the pilot areas were set up by the end of December 1961. It is expected that during 1962-63, 784 societies in the pilot areas and 1,015 outside the pilot areas would be set up. A sum of Rs. 6 crores has been provided in the States' plans for pilot projects during the Third Plan in addition to another Rs. 6 crores in the Central plan for assisting the development of other co-operative farming societies.

Fourteen training wings are to be established in selected Extension Training Centres which have farms attached and with successful co-operative farms near about. These centres will train secretaries of co-operative farming societies, conduct orientation courses for the extension staff and assist in organising village camps for education of members and prospective members. Such centres have already been selected in Assam, Gujarat, Madras, Orissa, Punjab and Uttar Pradesh.

A National Co-operative Farming Advisory Board has been set up for planning and promoting the programme of co-operative farming on voluntary basis. Its executive committee will ensure effective supervision and guidance and a periodical review of the programme. Thirteen states have set up advisory boards for co-operative farming.

Co-operative farming societies have since 1945 been classified into four categories: (i) better farming, (ii) tenant farming, (iii) joint farming and (iv) collective farming. There were 5,631 such co-operative farming societies at the end of June 1960 as shown in table 144.

BHOODAN

The Bhoodan or voluntary land gift movement owes its inspiration to Acharya Vinoba Bhave. Describing the aims of the movement, Acharya Bhave says : "In a just and equitable order of society, land must belong to all. That is why we do not beg for gifts but demand a share to which the poor are rightly entitled. The main objective is to propagate the right thought by which social and economic maladjustments can be corrected without serious conflicts."

In its practical application, it takes the shape of asking for voluntary donations of one-sixth of the land for redistribution among the landless. In the non-agricultural sector, the movement assumes various forms such as *Sampattidan* (donations of money or other resources), *Buddhidan* and *Jivandan* (dedication of one's mental abilities and life to the achievement of the *Bhoodan* ideals), *Sadhandan* and *Grihdan*.

The movement which began on a modest scale on April 18, 1951, now covers the length and breadth of India. The target is to obtain 500 lakh acres of land so that it may be possible to provide some land for cultivation to every rural family. The movement has now widened out into *Gramdan*, i.e., donations of entire villages, the ideal being that all land should belong to the village community as a whole.

Legislation has been adopted for facilitating donation and distribution of *Bhoodan* lands in Andhra Pradesh, Bihar, Gujarat, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, Delhi and Himachal Pradesh. Administrative instructions have been issued in Bombay and Kerala. Special legislation for management of *Gramdan* villages has been passed in Assam and Rajasthan. It is under consideration in other States.

The region-wise break-up of land collection and distribution and donation of villages under the movement up to December 31, 1961, is shown in the following table.

TABLE 143
BHOODAN AND GRAMDAN DONATIONS*

State/Union Territory	<i>Bhoodan</i> donations (in acres)	<i>Bhoodan</i> land dis- tributed (in acres)	<i>Gramdan</i> (numbers)
Andhra Pradesh	2,41,952	96,947	587

CHAPTER XXII

CO-OPERATIVE MOVEMENT

The idea of co-operation took concrete shape in India for the first time in 1904 when the Co-operative Credit Societies Act—a measure designed to combat rural indebtedness and provide for credit societies—was passed. Non-credit forms of co-operation in such activities as production, purchase, sale, insurance, housing, etc., and the creation of unions of primary co-operative societies for mutual control and audit, and of central and provincial banks to help the primary societies with credit were statutorily provided for in 1912. The Maclagan Committee, appointed by the Government of India in 1914, recommended greater non-official participation in the movement.

Although co-operation became a "Provincial" subject under the 1919 Act, the Government of India continued to take interest in the growth of the movement and established the Agricultural Credit Department in the Reserve Bank of India in 1935. The Co-operative Planning Committee appointed in 1945 recommended that primary societies should be converted into multipurpose societies and that efforts should be made to bring 50 per cent of the villages and 30 per cent of the rural population within the ambit of the reorganised societies within a period of 10 years. It was also urged that the Reserve Bank should provide greater assistance to co-operatives.

The Committee of Direction appointed by the Reserve Bank of India in 1951 surveyed the rural credit structure of the country and its report was published in December 1954. The survey revealed that co-operatives supplied only 3 per cent of the total borrowings of the agriculturists and the Government an equally insignificant proportion. The Committee recommended an "integrated scheme of rural credit," the salient features of which were (a) State partnership in co-operative institutions at all levels; (b) full co-ordination between credit and other allied economic activities, especially marketing and processing; (c) development, at the base, of viable primary agricultural credit societies; (d) establishment of a network of warehousing organisations; and (e) facilities for the training of co-operative personnel at all levels. The Committee also recommended the conversion of the Imperial Bank into the State Bank of India which through its branches, could provide vastly extended remittance facilities for co-operative and other banks and endeavour to be responsive to the needs of co-operative institutions, especially those connected with credit, marketing and processing. Suitable amendments to the Reserve Bank of India Act and the establishment of a National Co-operative Development and Warehousing Board were also recommended. While financial help for the reorganisation of the credit structure by such means as State participation in the share capital of co-operative credit institutions was to be given by the Reserve Bank, the promotion of planned development of co-operative activities particularly in the sphere of warehousing, processing and marketing was to be the responsibility of the National Co-operative Development and Warehousing Board.

The State Bank of India came into existence on July 1, 1955, as the result of the taking over, under an Act of Parliament, of the Imperial Bank

of India. In pursuance of a statutory obligation requiring it to open not less than 400 branches within five years, the Bank had opened 438 branches up to March 31, 1961.

The National Agricultural Credit (Long-term Operations) Fund was set up in February 1956 (by an amendment to the Reserve Bank of India Act carried out earlier in May 1955) with an initial contribution of Rs. 10 crores. The total contribution till the end of March 1961 was Rs. 50 crores. This Fund is to be used for (a) grant of long-term loans to State Governments to enable them to contribute to the share capital of co-operative credit institutions; (b) provision of medium-term agricultural loans to state co-operative banks; (c) grant of long-term loans to central land mortgage banks; and (d) purchase of debentures of central land mortgage banks. The National Agricultural Credit (Stabilisation) Fund set up at the same time with an initial allotment of Rs. 1 crore during 1955-56 received a further contribution of Rs. 1 crore each in the following five years. The Fund can be drawn upon for the purpose of giving medium-term loans to state co-operative banks to enable them to convert short-term credit into medium-term credit, under specific circumstances. Loans amounting to Rs. 23.66 crores were sanctioned from the Long-term Operations Fund of the Reserve Bank to 15 State Governments to enable them to contribute to the share capital of co-operative credit institutions, of which Rs. 20.86 crores were availed of by them till March 31, 1961. No occasion has so far arisen for drawing upon the Stabilisation Fund.

The Agricultural Produce (Development and Warehousing) Corporation Act which came into force on August 1, 1956, envisaged the setting up of a National Co-operative Development and Warehousing Board, a Central Warehousing Corporation and State Warehousing Corporations in the States. The National Co-operative Development and Warehousing Board was constituted on September 1, 1956, to promote the development of co-operative activities in general and particularly to assist the progress of warehousing, processing and marketing. The Central Warehousing Corporation, intended to set up warehouses at strategic centres such as ports and railway junctions, was established with an issued share capital of Rs. 10 crores and had set up 40 warehouses till the end of March 1961. Fourteen State Warehousing Corporations, intended for the construction of warehouses at other important centres, have so far been set up and the number of warehouses constructed by them up to the end of March 1961, was 266.

An integrated programme of co-operative development was drawn up for the Second Five Year Plan period incorporating the important recommendations of the Rural Credit Survey Committee. The co-operative movement, which was till then virtually restricted to the provision of credit, was extended so as to encompass other spheres of economic activity such as marketing, processing, warehousing, storage, etc. In November 1958, the National Development Council resolved that co-operatives should be organised on the basis of the village community as the primary unit and that responsibility and initiative for social and economic development at the village level should be placed fully on the village co-operative and the village panchayat.

In November 1958, the National Development Council resolved that the co-operative movement should be developed so as to bring within its fold all rural families by the end of the Third Plan. The programmes for the

Third Plan are generally based on the policy set out by the Council. The targets suggested for achievement by the end of the Third Plan period as against the estimated achievements at the end of the Second Plan period are as follows :

	Achievements at the end of the Second Five Year Plan (estimated)	Targets for the Third Five Year Plan
Number of primary co-operative societies	2·1 lakhs	2·3 lakhs
Membership	1·7 crores	3·7 crores
Coverage of villages	—	100 per cent
Coverage of agricultural production	33 per cent	60 per cent
Loans to be issued through co-operatives :		
Short-term and Medium-term	Rs. 200 crores	Rs. 530 crores
Long-term (outstanding)	Rs. 35 crores	Rs. 150 crores

Provision has also been made for starting 600 primary marketing societies and for constructing 9,200 rural godowns and 980 godowns at market centres. The Plan also provides for the setting up of an Agricultural Development Finance Corporation for augmenting the resources available for the issue of medium and long-term loans.

In pursuance of the recommendations of the Conference of State Ministers for Co-operation held in July 1959, a Committee on Co-operative Credit under the Chairmanship of V. L. Mehta, was appointed to consider different aspects of the questions of expanding agricultural credit, including standards for credit limits, loan policies and practices of co-operative credit institutions, measures necessary for increasing the borrowing power of primary credit societies and the desirability of share capital participation by the State in the village societies. The report of the Committee was submitted to the Government of India in May 1960.

The recommendations of the Committee were discussed at the Conference of the State Ministers for Co-operation held in Srinagar in June 1960. The Government of India have since indicated certain new lines of co-operative policy to State Governments, the more important of which are given below :

- (i) In organising village societies the aim should be to ensure viability with the inclusion of the smallest number of villages necessary, so that the co-operative society achieves both viability and the essential characteristics of co-operation, namely, voluntary basis, close contact, social cohesion and mutual obligation. The broad test of viability should be the ability on the part of a co-operative society to meet the requisite expenses without depending upon financial assistance from Government except for a limited period.
- (ii) The State may participate in the share capital of viable primary agricultural credit societies on a matching basis. Such contribution should ordinarily be limited to Rs. 5,000 and could go up to a maximum of Rs. 10,000 in exceptional cases.

An "Intensive Agricultural District Programme" was launched during the year 1960-61 in 14 selected districts in different States. This programme aims at an immediate increase in food production by concentrating efforts combining all essential elements for increased production in an integrated programme.

The salient features of the movement and the main operations of the societies in 1951-52 and 1959-60 are indicated in the table below.

TABLE 145
NUMBER, MEMBERSHIP AND WORKING CAPITAL OF
CO-OPERATIVE SOCIETIES

	1951-52	1959-60
Number of societies	1,85,650	3,13,499
Membership of primary societies	1,37,91,687	3,03,12,909
Working capital*	306.34	1,083.47
(a) Share capital	49.08	185.38
(b) Reserve & other funds	43.51	81.94
(c) Loans from		
(i) Central financing agencies	49.77	312.64
(ii) Reserve Bank	6.85	85.21
(iii) Government	14.12	54.19
(iv) Other sources	9.73	85.16
(d) Deposits from		
(i) Central societies	4.76	25.29
(ii) Primary societies	15.86	52.13
(iii) Individuals & other sources	96.44	174.47
(e) Debentures of land mortgage banks	7.91	27.07

Taking the average size of an Indian family as five, it may be estimated that by the end of March 1960 roughly 15.15 crores or a little more than 38 per cent of the population was served by the co-operative movement, allowance being made for individuals being members of more than one society.

The net results of the operations of the different types of co-operative societies during 1951-52 and 1959-60 are shown in the following table.

TABLE 146
PROFITS EARNED BY CO-OPERATIVE SOCIETIES

Type of society	<i>(in lakhs of rupees)</i>	
	1951-52	1959-60
State & central banks	81.60	3,58.28
Land mortgage banks	6.86	47.27
Primary agricultural credit societies	91.67	3,40.42
Grain banks	15.13	15.91
Primary non-agricultural credit societies	1,12.89	2,30.79
State and central non-credit societies	1,26.38	—
Primary non-credit societies	95.43	—

CREDIT SOCIETIES

The earliest co-operative societies formed in India were credit societies, which even today constitute the most important class of societies, both in number and membership. The structure of the credit societies is three-tiered consisting of the state co-operative banks at the State level, central co-operative banks at the district level and primary agricultural credit societies at the village level. In some States, grain banks give loans in kind to agriculturists. Long-term credit for agricultural purposes is provided by central and primary land mortgage banks while the banking and credit needs of urban people are met by urban banks and employees' credit societies.

State Co-operative Banks

The number of state co-operative banks, their membership and financial transactions during 1951-52 and 1959-60 are given below.

*Excludes figures relating to General Insurance Societies.

TABLE 147
STATE CO-OPERATIVE BANKS

	1951-52	1959-60
Number	16	22
Membership	23,272	31,007
	(in lakhs of rupees)	
Share capital	1,90	14,62
Reserve and other funds	2,36	5,07
Deposits	21,18	60,15
Other borrowings	11,27	94,89
Working capital	36,72	174,74
Cash in hand & with banks	2,81	17,93
Investments		
Government & other trustee securities	10,52	21,24
Others	78	6,97
Loans advanced	55,27	196,92
Loans outstanding	20,01	129,86
Loans overdue	3,22	6,43

Central Co-operative Banks

The principal function of central co-operative banks is to act as the balancing centre of their affiliated societies and to provide finance to the primary societies. The following table gives details relating to central co-operative banks.

TABLE 148
CENTRAL CO-OPERATIVE BANKS

	1951-52	1959-60
Number	509	400
Membership	2,31,318	3,69,037
Loans advanced (in lakhs of Rs.)	105,64	297,14
Working capital (in lakhs of Rs.)	60,11	247,40

Their share capital and reserves amounted to Rs. 4.62 crores and Rs. 5.18 crores in 1951-52 and Rs. 31.49 crores and Rs. 10.20 crores in 1959-60. The composition of their working capital is shown below.

TABLE 149

CO-OPERATIVE BANKS

	Percentage of working capital	
	1951-52	1959-60
Owened funds	16.3	16.8
Deposits	63.6	38.6
Other borrowings	20.1	44.6

Loans outstanding at the end of June 1960 against individuals and against banks and societies, totalled Rs. 3.53 crores and Rs. 172.58 crores respectively. The percentage of overdues to outstandings was 13.7. The total investments of central co-operative banks amounted to Rs. 41.12 crores at the end of 1959-60, of which Rs. 19.12 crores represented investments in Government and other trustee securities.

Agricultural Credit Societies

At the end of June 1960, there was 2,03,172 agricultural credit societies with a membership of 1,44,23,000. The working capital of these societies stood at Rs. 223.70 crores. During 1959-60, the societies advanced loans

amounting to Rs. 169.09 crores. Loans outstanding at the end of June 1960 amounted to Rs. 177.71 crores and the overdues stood at Rs. 37.70 crores. Loans from central financing agencies and Government amounted to Rs. 144.93 crores while owned funds and deposits stood at Rs. 62.97 crores and Rs. 11.86 crores respectively. A State-wise analysis of the working capital reveals that the ratio of deposits to working capital was less than 5 per cent in the case of as many as fourteen States. The following table shows the average membership, share capital, deposits and working capital of agricultural credit societies.

TABLE 150
AVERAGE MEMBERSHIP, SHARE CAPITAL, DEPOSITS AND
WORKING CAPITAL OF AGRICULTURAL CREDIT SOCIETIES

	1951-52	1959-60
Membership per society	44	71
	(in rupees)	
Share capital per society	827	2,312
Share capital per member	19	32
Deposits per society	408	585
Deposits per member	9	9
Working capital per society	4,190	11,011

Grain Banks

At the end of June 1960, there were 9,554 grain banks with a membership of 12.13 lakhs and a working capital of Rs. 4.41 crores. Andhra Pradesh, Maharashtra, Mysore and Orissa accounted for 96.6 per cent of the total number of grain banks. The grain loans advanced by them during 1959-60 amounted to Rs. 1,47.65 lakhs.

Central Land Mortgage Banks

The central land mortgage banks, which are the pivot of the structure of long-term finance to agriculturists through the primary land mortgage banks, raise their funds mainly by the issue of debentures. The debentures are guaranteed by the State Governments in respect of the repayment of principal and the payment of interest. Out of 16 banks, 6 banks floated debentures of the value of Rs. 4,23.16 lakhs during 1959-60. The Reserve Bank of India contributed Rs. 50.66 lakhs to the debentures issued during the year. Debentures of the value of Rs. 27.07 crores were in circulation at the close of 1959-60. The table below indicates the progress made by central land mortgage banks between 1951-52 and 1959-60.

TABLE 151
CENTRAL LAND MORTGAGE BANKS

	1951-52	1959-60
Number	6	16
Membership	34,579	2,16,500
	(in lakhs of rupees)	
Share capital	44	3,49
Reserve fund	25	57
Other funds	12	44
Debentures	7,83	27,07
Borrowings	1,53	5,34
Working capital	10,17	37,38
Sinking fund investments	1,27	7,31
Investments including cash and bank balances	77	2,14
Loans advanced	2,51	8,52
Loans recovered	44	2,46
Loans due	8,05	28,50

Primary Land Mortgage Banks

Of the 408 primary land mortgage banks in the country at the end of 1959-60, as many as 286 or 70 per cent were concentrated in Andhra Pradesh, Madras and Mysore. The membership stood at 5,50,395 and working capital at Rs. 20·39 crores. Loans advanced by the banks amounted to Rs. 5·10 crores. The table below indicates the progress made by primary land mortgage banks between 1951-52 and 1959-60.

TABLE 152
PRIMARY LAND MORTGAGE BANKS
(in lakhs of rupees)

	1951-52	1959-60
Share capital	58	1,55
Reserve fund	13	30
Other funds	5	17
Debentures and other borrowings	6,84	18,37
Working capital	7,60	20,39
Loans advanced	1,30	5,10
Loans repaid	48	1,43
Loans due	6,96	19,22

Non-agricultural Credit Societies

The non-agricultural credit societies include, among others, urban banks and employees' credit societies. At the end of June 1960 there were 11,371 societies with a membership of 42·31 lakhs. Deposits, which stood at Rs. 83·27 crores at the end of 1959-60 accounted for 60·60 per cent of the working capital. Some of these societies also did non-credit business. Goods worth Rs. 7·02 crores were received while sales amounted to Rs. 7·01 crores. The table below indicates the progress made by them during the period from 1951-52 to 1959-60.

TABLE 153
OPERATIONS OF NON-AGRICULTURAL CREDIT SOCIETIES
(in lakhs of rupees)

	1951-52	1959-60
Share capital	13,36	30,60
Reserve fund	3,78	7,19
Cash in hand and with banks	5,65	9,37
Investments in		
Land and buildings	73	1,61

Others	4,68	12,23
Loans advanced	50,97	117,40
Loans recovered	47,01	100,86
Loans due	44,36	106,52
Loans overdue	4,16	7,76

NON-CREDIT SOCIETIES

The number, membership and working capital of different types of non-credit societies as at the end of June 1960 are given in the following table. Comparative data for 1951-52 are not available as the detailed classification of the societies was adopted for the first time in 1957-58.

TABLE 154
NUMBER, MEMBERSHIP AND WORKING CAPITAL OF NON-CREDIT SOCIETIES

Type of society	Number	Membership	Working capital (in lakhs of Rs.)
Marketing societies			
State	21	4,719	8,09·89
Central	511	1,93,820	13,07·06
Primary	2,501	11,83,907	18,57·92
Sugarcane supply societies:			
Central	73	10,237	1,28·84
Primary	8,701	23,34,199	6,60·84
Milk unions	86	12,081	2,06·21
Milk supply societies	2,724	2,21,169	1,38·49

Consumers' societies:			
Wholesale	65	12,385	58·40
Primary	7,168	13,90,216	8,85·59
Housing societies:			
State	6	1,812	6,62·09
Primary	5,558	3,20,188	48,66·42
Fishermen's societies	2,111	2,20,358	1,39·98
Insurance societies	6	8,271	50·98
Other non-credit societies	19,895	13,06,875	17,79·79

OTHER SOCIETIES

Supervising Unions

In 1959-60 there were 1,036 supervising unions with 46,941 affiliated societies. These unions attended to the supervision of credit societies in Andhra Pradesh, Gujarat, Kerala, Madras, Maharashtra and Mysore and supervised special types of societies like housing, farming, purchase, sale societies etc. in the other States.

Co-operative Unions and Institutes

There were 31 state co-operative unions and institutes and 133 district unions and institutes on March 31, 1960. The number of societies affiliated to them was 42,859 and 32,824 respectively. These unions and institutes imparted training to 5,66,462 members, 44,991 honorary office bearers and 7,028 paid staff of co-operative societies. The total income of the state unions was Rs. 121·31 lakhs including government grants amounting to Rs. 93·91 lakhs, and those of district unions and institutes amounted to Rs. 15·71 lakhs of which Rs. 5·01 lakhs were government grants.

Societies under Liquidation

At the beginning of 1959-60 there were 15,329 co-operative societies under liquidation. The value of the assets realised and liabilities paid off during 1959-60 amounted to Rs. 54·50 lakhs and Rs. 46·77 lakhs respectively.

TRAINING

The Central Committee for Co-operative Training, constituted in 1953 jointly by the Reserve Bank of India and the Government of India, has drawn up a comprehensive scheme of co-operative training covering all ranks of co-operative staff. There is a Co-operative Training College at Poona for the training of senior officers of the co-operative departments and institutions; there are five regional training centres for the training of the intermediate grade personnel; and eight institutions for the training of block level co-operative officers working in the Community Development Blocks. Special courses on co-operative marketing are organised at the five regional training centres and a special course in land mortgage banking at one of them. The Block Level Co-operative Officers' Training Centres conduct on a peripatetic basis a special short-term course on Industrial Co-operation. Sixty-two training schools also exist in the States for the training of junior co-operative officers.

CHAPTER XXIII

IRRIGATION AND POWER

IRRIGATION

India's water resources have been provisionally estimated at 1,35,60 lakh acre-feet, of which approximately 45,00 lakh acre-feet are believed to be utilisable for irrigation. Up to 1951, about 7,60 lakh acre-feet, i.e. about 17 per cent of the usable flow or 5·6 per cent of the total annual flow, had been utilised. By the end of the Second Plan about 12,00 lakh acre-feet representing about 27 per cent of the usable flow or 8·9 per cent of the total annual flow was estimated to have been utilised. An additional 4,00 lakh acre-feet are likely to be used in the Third Plan, bringing the proportion to about 36 per cent of the usable flow.

The possibilities of diverting the normal flow of rivers into irrigation canals have been almost exhausted. The plans for the future development of irrigation, therefore, increasingly aim at impounding by dams the surplus river-flow during the monsoon for use in dry weather. In areas unsuitable for flow-irrigation, the construction of minor irrigation works, such as tanks and wells, and the installation of water-lifting devices have been planned.

The Central Board of Irrigation and Power, constituted in 1927, is responsible for the initiation of fundamental research in the country in the field of irrigation and power and the co-ordination of the work of 19 research stations established in different parts of the country.

The Central Water and Power Commission is charged with the responsibility of initiating, co-ordinating and furthering, in consultation with the State Governments concerned, schemes for the control, conservation and utilisation of water resources throughout the country for the purpose of flood control, irrigation, navigation and water power generation. It is also responsible for schemes of thermal power development and of transmission and utilisation of electrical energy throughout the country.

RIVER VALLEY PROJECTS*

India's natural waterways are more or less evenly distributed over the entire country. The ultimate goal of the development of irrigation is the doubling of the irrigated area within 15 to 20 years. The additional food production resulting from this extension of irrigation will not only cover the present deficit but also provide, to some extent, for the future growth of the population.

Particulars of the principal irrigation works in the country and the principal irrigation schemes included in the Third Plan are given at the end of this chapter in tables 163 and 164. The major river valley projects are described briefly in the following paragraphs.

Bhakra Nangal Project

A joint venture of Punjab and Rajasthan, the Bhakra Nangal Project is the biggest multi-purpose river valley scheme and is estimated to cost Rs. 175·6 crores. It consists of a 740-ft. high dam across the Sutlej at Bhakra; 90-ft. high Nangal dam; 40-mile long Nangal hydel channel; one power house on the left bank of Bhakra dam; two power houses on the

*A description of only selected projects is given.

hydel channel at Ganguwal and Kotla and about 652 miles of canals and over 2,200 miles of distributaries. Started in 1946, the project is expected to be completed by October 1962, only minor works like approach roads, parapets, elevator shafts, spillway walls and radial gates remaining to be constructed.

The Bhakra Canal system commands a gross area of about 67·6 lakh acres, of which the cultivable commanded area is 58·6 lakh acres. On full development an area of 36 lakh acres is expected to be annually irrigated. In addition, about 37 lakh acres will get increased water supply. Storing of water in the Bhakra reservoir started in 1958 and the live storage in 1960-61 stood at 19 lakh acre-feet. An area of 18·71 lakh acres in Punjab and Rajasthan received irrigation during 1960-61.

The three power houses at Bhakra, Ganguwal and Kotla have an installed capacity of 6,04,000 kw. With the exception of one unit of 29,000 kw. at the Ganguwal powerhouse all the other units have been commissioned. The total firm capacity of these units is 3·37 lakh kw.

It is proposed to construct another power house on the right bank of the Sutlej. Estimated to cost about Rs. 26 crores it will have four, and ultimately five, generating units of 1·20 lakh kw. each.

Beas Project

This project, which is a joint venture of the Governments of Punjab and Rajasthan, consists of two units, viz., (i) Beas-Sutlej Link and (ii) Beas Dam. The former provides for a diversion dam at Pandoh, a combination of tunnels and an open hydel channel, and a power plant with an installed capacity of 636 MW. The firm power capacity of this unit will be 391 MW at 100 per cent load factor. It will also provide irrigation to a culturable commanded area of 13 lakh acres, annual irrigation being of the order of 8 lakh acres.

A project report prepared in May 1959, for the second unit, is under revision in the light of the latest hydrological studies. Primarily intended for storing water for the Rajasthan Canal, the project will ensure extension of perennial irrigation to about 50 lakh acres in Punjab and Rajasthan. A power plant with an installed capacity of 240 MW will also be constructed. The total firm power from the Bhakra-Sutlej-Pong grid will be 733 MW.

Hirakud Dam Project

The project harnesses the river Mahanadi and will provide irrigation to 5·7 lakh acres of land in Sambalpur and Bolangir districts in Orissa. The power house at the base of the dam has an installed capacity of 1,23,000 kw. The main dam—the world's longest main stream dam—is 15,748 feet long; it is flanked by 13 miles of dykes on both sides and impounds 66 lakh acre-feet of water. The revised estimated cost of the project is Rs. 70·78 crores.

The main dam and dykes have been completed. An area of 3·52 lakh acres in Sambalpur and Bolangir districts has been brought under kharif irrigation and 1·10 lakh acres under rabi irrigation. In the power house, all the four generating units, with an installed capacity of 1,23,000 kw., have been commissioned and power is being supplied at present to the Indian Aluminium Factory at Hirakud, the cement factory at Rajgangpur, the steel plant at Rourkela, the ferro-manganese plant at Joda, the paper mills at Brajarajnagar and the textile and other industries in and around Chowdwar. The towns of Cuttack, Puri, Sambalpur, Sundergarh, Bargarh and several other places are also getting power from Hirakud.

A scheme costing Rs. 14·92 crores has been sanctioned for delta irrigation and will, on completion, supply perennial irrigation to 15·95 lakh acres annually in Cuttack and Puri districts.

To meet the increasing load demand, the Chiplima Power House scheme (Hirakud Dam Project—Stage II) costing Rs. 14.32 crores was sanctioned in July 1956. The scheme provides for the installation of 3 units of 24,000 kw. each at the power house at Chiplima, 15 miles downstream of Hirakud Dam and two additional units of 37,500 kw. each at the main power house at Hirakud. All the five units at the two power houses are expected to be commissioned during 1962.

Rajasthan Canal Project

The Rajasthan Canal Project estimated to cost Rs. 66.47 crores was sanctioned in July 1957. It envisages the construction of a canal taking off from the Harike barrage across the river Sutlej and has been divided into two parts:

(a) Rajasthan Feeder: 134 miles long, of which the first 110 miles lie in Punjab.

(b) Rajasthan Canal: 291 miles long, lying entirely in Rajasthan.

To begin with, the Rajasthan canal will be fed by flow supplies from the Ravi and the Beas rivers. Later, the flow supplies will be supplemented by stored waters from dams proposed to be constructed on these two rivers. The flow supplies will provide irrigation to about 26.20 lakh acres in the districts of Bikaner, Jaisalmer and Sriganganagar.

A Committee of Direction and the Rajasthan Canal Board have been set up to ensure efficient, economic and expeditious execution of the Rajasthan Canal Project including all connected works in Punjab and Rajasthan territories and colonisation of the areas covered by the project. The project report, which is being revised in the light of further surveys and investigations, provides for annual (perennial) irrigation of 36.29 lakh acres out of the total culturable commanded area of 46 lakh acres.

The project is now proposed to be executed in two stages. The first stage, comprising the Rajasthan Feeder and the first 122 miles of the Rajasthan Canal, including take-off channels, is expected to be completed in 1968-69.

It is proposed to line the entire length of the Canal and the feeder to save water losses through seepage.

Damodar Valley Corporation Project

The project comprises four storage dams at Tilaiya, Konar, Maithon and Panchet Hill with hydel power houses, of a total capacity of 1.04 lakh kw. attached to all the dams except Konar; three thermal power stations at Bokaro, Durgapur and Chandrapura with a total capacity of 6.25 lakh kw.; an extensive power transmission grid and an irrigation barrage at Durgapur with canals and distributaries. During the Third Plan, two units of 1.25 lakh kw. each are to be added to the D.V.C. System, raising the total power generating capacity to 9.79 lakh kw.

The all-concrete Tilaiya dam on the river Barakar, with earthen extension on either side, was completed in 1953. The Konar dam was completed in September 1955. The Maithon dam on the river Barakar stores 11.04 lakh acre-feet of water, and the underground hydro-electric station near the dam has a capacity of 60,000 kw. The dam was completed in September 1957; in the power house three generating units of 20,000 kw. each have been commissioned.

Designed primarily for flood control, the Panchet Hill dam, completed in December 1959, will impound 12.14 lakh acre-feet of water. A 40,000 kw. hydro-electric station has been built near the dam which was commissioned in September 1959.

The 2,271 ft. long and 38 ft. high barrage at Durgapur in West Bengal was opened in August 1955. It will irrigate, on full development, over 9.73 lakh acres of land through a network of canals and distributaries. Nearly 85 miles of the main left bank canal will be navigable, and provide an alter-

native means of communication between Calcutta and the coalfields of Raniganj.

The Bokaro Thermal Power Station with an installed capacity of 1.50 lakh kw. was commissioned in February 1953. An additional unit of 75,000 kw. has since been added to this station. At Durgapur one of the two 75,000 kw. units put into trial operation in November 1960, is working at full capacity. Work on two units of 1.25 lakh kw. each at Chandrapur is in progress.

Tungabhadra Project

This joint undertaking of the Governments of Andhra Pradesh and Mysore comprises a 7,942 ft. long and 162 ft. high dam on the Tungabhadra river at Mallapuram; a 127-mile long canal (called the Left Bank Canal) with a power house on the left side; a 217-mile long canal (called the Low Level Canal) with two power houses and a 122-mile long canal (called the High Level Canal) on the right side.

The dam was inaugurated in July 1953. The reservoir has a water-spread of 146 square miles. The two canals on either side will irrigate nearly 8.3 lakh acres in Andhra Pradesh and Mysore States. There will be two power stations on the right side, one below the dam and the other at the tail-end of a 14-mile long hydel channel at Humpi. Two generating units of 9,000 kw. each in the dam power house and two units of the same capacity out of three units in the canal power house have been commissioned. A power station will also be constructed below the dam on the left side where three generators of 9,000 kw. each will be installed in the first instance and another unit of 9,000 kw. will be added at a later date. The Low Level Canal including the hydel channel and its major distributaries has already been completed while work on the construction of the High Level Canal is in progress. An area of about 1.20 lakh acres in Andhra Pradesh and 1.77 lakh acres in Mysore has been brought under irrigation.

Kosi Project

The three-unit Kosi scheme, estimated to cost Rs. 44.76 crores, will, besides affording protection against floods, irrigate about 14.05 lakh acres annually in Bihar. Unit I of the scheme includes a barrage (scheduled for completion by June 1962) across the river Kosi about three miles above Hanumannagar in Nepal. Unit II consists of embankments (completed) about 152 miles in length, along both the banks of the river. Unit III comprises the Eastern Kosi Canal (work in progress) which will take off from the Hanumannagar Barrage. It will have four branches, viz., Murliganj Branch, Jankinagar Branch, Banmankhi Branch and Araria Branch.

Earth work on kosi canal is expected to be completed in June 1962. Flood embankments have been constructed and concreting work on the barrage and headworks is in progress.

Chambal Project

The first phase of the project, which is being jointly executed by the Madhya Pradesh and Rajasthan Governments, consists of the Gandhi Sagar Dam, Gandhi Sagar Power Station, transmission lines, Kotah Barrage and canals on either side of the barrage. The reservoir to be formed by the Gandhi Sagar Dam will have a gross storage capacity of 68.5 lakh acre-feet of water. The canal system will irrigate 11 lakh acres in Rajasthan and Madhya Pradesh. Besides, 80,000 kw. of power, at 60 per cent load factor, will be generated from the four generating sets which are being installed (three of them already commissioned) at the Gandhi Sagar Power Station. The Gandhisagar dam and power station have been nearly completed and power generation was started from November 19, 1960.

The Kotah barrage has also been nearly completed and water for irrigation was released on November, 20, 1960. Work has commenced on the second stage of the project which envisages the construction of the Rana Pratap Sagar Dam and a power house below it. When completed, it will provide irrigation facilities to 3 lakh acres and generate 90,000 kw. of power at 60 per cent load factor.

The first stage is estimated to cost Rs. 63.59 crores and the second Rs. 17.21 crores.

Nagarjunasagar Project

The Nagarjunasagar Project, which is a scheme of the Andhra Pradesh Government, comprises the construction of a masonry dam on the Krishna river near Nandikonda village, about 100 miles from Hyderabad, and two canals one on each side of the river. The right bank canal, 135 miles long, and the left bank canal, 108 miles long, will together irrigate an area of 20.6 lakh acres, resulting in the production of 8 lakh tons of foodgrains on the completion of the project. The reservoir will have a storage capacity of 54.4 lakh acre-feet and its water spread will be 73.66 sq. miles. The dam will be provided with eight pen-stocks of 14 ft. diameter for the generation of power in the final stage of the project. The dam and the canal are expected to be completed in 1968-69.

A ten-member control board, with the Chief Minister of Andhra Pradesh as Chairman, has been set up for the execution of the project.

Bhadra Reservoir Project

This multi-purpose project, estimated to cost Rs. 33.53 crores (revised) across the river Bhadra in Mysore State, will irrigate 2.45 lakh acres of land in Shimoga, Chikmagalur, Chitradurga and Bellary districts and will have a power station with an installed capacity of 33,200 kw.

Kakrapara Project

This project may be regarded as the first phase of the development of the Tapi valley. The weir, 2,038 ft. long and 45 ft. high, on the rocky riverbed near Kakrapara, 50 miles upstream of Surat, was completed in June 1953. Canals are scheduled to be completed in 1963. The project will irrigate 6.54 lakh acres in the Surat district.

Mayurakshi Project

This project of the West Bengal Government is mainly an irrigation scheme though it also provides for the installation of a 4,000 kw. hydro-electric plant. Power from the project will be supplied to the Birbhum and Murshidabad districts in West Bengal and Santhal Parganas in Bihar. The first stage of the project was completed in 1951 with the construction of a diversion barrage at Tilpara near Suri, 20 miles below the dam in West Bengal. The 155 ft. high and 2,170 ft. long Massanjore Dam, now named Canada Dam, was completed in June 1955. The canals will irrigate 7.2 lakh acres annually. The Canada Dam will have a capacity of 5 lakh acre-feet of water and will provide *rabi* irrigation for nearly 1.2 lakh acres. The first 2,000 kw. generating set was commissioned in December 1956 and the second in February 1957.

Project for the Preservation of the Port of Calcutta

The alarming deterioration of the Hooghly and the consequent threat of the extinction of the Port of Calcutta have reached a stage which requires immediate remedial measures. With the continuing reduction of upland supplies, the river has lost its capacity to transport the silt coming from the top to the sea. This has caused a serious bottleneck in navigation over the bars and crossings in the Upper Hooghly.

Moreover, the waters of the Hooghly have become increasingly saline, to an extent that the water supply of Calcutta City and its environs is no longer potable or suitable for industrial use.

There has also been an increase in the intensity and frequency of the bore tides with consequential increased damage to vessels and jetties.

The problem of the Calcutta Port has been engaging the attention of experts for over a century. The only technical solution of the problem is to restore the upland supply by the construction of a barrage on the Ganga. The Ganga Barrage Project envisages the following principal components.

- (i) a barrage across the Ganga at Farakka;
- (ii) a barrage across the Bhagirathi at Jangipur above the outfall of the canal.
- (iii) a feeder canal, 26 1/2 miles long, taking off from upstream of the Ganga Barrage on the right bank and outfalling into the Bhagirathi, downstream of the Jangipur Barrage.

By a judicious operation of these components, it will be possible not only to prolong the upland supplies into the Hooghly but also to even out the sharply-fluctuating hydrographs in the river, thus counteracting the deteriorating effects of the preponderance of tidal flow.

While the principal objective of the Project is the preservation of the Bhagirathi-Hooghly and the Port of Calcutta, a number of incidental benefits will also accrue, namely, improvement of the city water supply and the drainage of the region, improvements in communications and inland navigation, etc.

According to tentative estimates the project will cost Rs. 68.59 crores and will be completed in 8 years. The Farakka Barrage Control Board, an executive sub-Committee and a technical advisory committee have been set up for expediting the execution of the project.

Gandak Project

An International Agreement on the Gandak Irrigation and Power Project between the Government of Nepal and the Government of India was signed on December 4, 1959. It is an inter-State project in which Bihar and Uttar Pradesh are the participating States, while irrigation and power benefits would also accrue to Nepal.

The project envisages the construction of a barrage with a road-cum-railway bridge across the river Gandak at Bhaisalotan, about 2,749 ft. in length and 1,000 ft. below the existing Tribeni Canal Head Regulator. There will be two canal systems—the Eastern Canal System and the Western Canal System. The Main Eastern System will feed the Don Branch Canal, the Nepal Eastern Canal, the Tribeni Canal and the Tirhut Canal. The Western Canal System will comprise the Nepal Western Canal, the Main Western Canal and the Saran Canal. The project is expected to provide irrigation facilities to 38 lakh acres in Nepal and India. It is also proposed to construct a power house with an installed capacity of 15,000 kw. at the eighth mile of the Main Western Canal, which will be subsequently handed over to Nepal as a gift.

Construction work on the Don and Tirhut canals is in progress. The total estimated cost of the project is about Rs. 52 crores.

The project will improve communications and provide additional employment opportunities and better trade facilities for the people of Nepal and India.

The National Projects Construction Corporation Ltd.

The National Projects Construction Corporation Ltd., which was incorporated under the Companies Act in January 1957, with a nominal capital of Rs. 2 crores, has at present a paid-up capital of Rs. 123 lakhs, contributed

by the Central Government and the State Governments of Madhya Pradesh, Rajasthan, Bihar, Kerala, Jammu & Kashmir, Punjab, Assam and Uttar Pradesh.

Besides executing works on the Chambal project, Badua Dam and Kosi Barrage the Corporation has undertaken excavation of foundations at Rana Pratap Sagar Dam, construction of a submersible bridge on Tawa river in Madhya Pradesh and excavation of the outfall and side channels on Jhelum river in Jammu and Kashmir.

THE INDUS WATERS TREATY, 1960

The Indo-Pakistan boundary, drawn in 1947, cut across the Indus system of rivers, the areas irrigated from these rivers, and two of the canals. Of about 260 lakh acres of land annually irrigated in the Indus basin, about 210 lakh acres were in Pakistan and only 50 lakh acres in India. Most of the irrigation canals lay in Pakistan and only a few in India. Extensive desert lands in India were awaiting to be developed when the new political boundary was drawn. All these problems attracted attention soon after the partition. After 12 years of negotiations, for 8 years with the help of the International Bank of Reconstruction and Development, a settlement was reached in 1960.

A treaty fixing and delimiting the rights and obligations of India and Pakistan with regard to the use of the waters of the Indus system of rivers was signed by the Prime Minister of India and the President of Pakistan on September 19, 1960, in Karachi. Upon the exchange of the Instruments of Ratification between the two Governments on January 12, 1961, in New Delhi, the Indus Waters Treaty came into force with retrospective effect from April 1, 1960.

In accordance with the provisions of the Treaty the Governments of India and Pakistan each created a permanent post of Commissioner for Indus waters. With the appointment of the two Commissioners by the respective Governments the Permanent Indus Commission, as provided for the implementation of the Treaty, came into being.

DEVELOPMENT PROGRAMME

The area irrigated from all sources at the beginning of the First Plan was 5.15 crore acres, of which about 2.20 crore acres were irrigated by major and medium irrigation projects. The progress of irrigation up to the end of the First and Second Plans and the targets for the Third Plan are shown below.

TABLE 155
NET AREA IRRIGATED

(in lakh acres)

	Major and medium projects	Minor irrigation schemes	Total
1950-51	2.20	2.95	5.15
1955-56	2.49	3.13	5.62
1960-61	3.10	3.90	7.00
1965-66	4.25	4.75	9.00

Irrigation benefits accruing from the First and Second Plan schemes, at the end of the First Plan and during the Second Plan are given in table 156.

TABLE 156
IRRIGATION BENEFITS DURING THE SECOND PLAN

End of the year	Potential at channel outlets for gross irrigation	Utilisation	
		Gross	Net
1955-56	65	31	29
1956-57	74	42	34
1957-58	82	58	49
1958-59	97	65	59
1959-60	1,15	83	74
1960-61 (estimated)	1,32	1,00	90

The total irrigation potential remaining to be utilized at the end of the Second Plan was 32 lakh acres. During the Third Plan, additional irrigation potential of about 138 lakh acres is expected to be created from continuing schemes and 24 lakh acres from new schemes. The total utilisation in the Third Plan period is expected to be 128 lakh acres.

The new projects to be commenced during the Third Plan include (i) about 95 new medium irrigation schemes which will be of value both for agricultural purposes and regional development; (ii) storage schemes on the Beas in Punjab undertaken as a result of the conclusion of the Indus Waters Treaty, 1960; and (iii) schemes representing the irrigation component of multi-purpose projects taken up primarily for power development and those necessitated by irrigation projects in neighbouring States.

The cost of the irrigation and flood control programme during the Third Plan is Rs. 661 crores. This includes Rs. 436 crores for irrigation projects carried over from the Second Plan, Rs. 164 crores for new projects and Rs. 61 crores for flood control, drainage, anti-waterlogging and anti-sea-erosion schemes.

INLAND NAVIGATION

Some of the multi-purpose schemes completed or under construction include inland navigation as one of the objectives. The Damodar Valley Corporation envisages the construction of a navigation canal 85 miles long, linking up the lower Raniganj coal-fields with the Hooghly at Triveni, 30 miles above Calcutta. With the completion of the Hirakud Dam and availability of constant discharge, it will be possible to introduce navigation in the reach from Dholpur to Cuttack (a distance of about 106 miles) after necessary conservancy work. The Tungabhadra Project includes a navigation-cum-irrigation canal on the Andhra Pradesh side.

POWER

The progress of power production was very slow up to the mid-twenties; the aggregate installed capacity in 1925 was only 1,62,341 kw., by 1945, the installed capacity had increased more than fivefold to 9,00,402 kw. The installed capacity of power plants in the public utilities in March 1961 was 45,63,301 kw.— an increase of nearly 149 per cent over the past ten years. During the same period, the generation of electricity increased from 510,67 lakh kwh. to 1,685.46 lakh kwh. showing an increase of 228 per cent. The growth in steam, diesel and hydro plant capacity during the period was 140, 103 and 232 per cent respectively. The progress of electricity supply in India during the period from 1939 to March 1961, is illustrated below in terms of index numbers.

TABLE 157
INDEX NUMBERS OF ELECTRICITY SUPPLY

1939=100

	1948	March 1961
Installed Generating Capacity		
Steam plant	145·8	445·9
Oil plant	123·3	345·8
Hydro plant	116·9	418·8
Index of total generating capacity .. .	131·9	426·6
Generation of Electricity		
Steam plant	197·3	840·6
Oil plant	159·9	378·1
Hydro plant	181·5	593·8
Index of total generation .. .	187·3	690·2
Coal consumption	204·8	710·1
Fuel oil consumption	154·2	307·9
Sale of Electricity		
Domestic or residential	249·9	911·7
Commercial, light & small power	266·8	966·5
Industrial	180·7	708·1
Traction	137·6	211·2
Irrigation	188·3	1,294·2
Public lighting	109·2	414·5
Water works	171·0	425·2
Index of total sale	182·9	680·6

Table 158 indicates the progress of electricity supply during 1939-61

Resources

Power potential studies of the river basins of India indicate an aggregate hydro-electric potential of the order of 4 crore kw. at 60 per cent load factor, as follows:

	<i>lakh kw.</i>
West-flowing rivers of Western Ghats	43
East-flowing rivers of Southern India	86
Central Indian Rivers	43
Ganga Basin (excluding the potential in Nepal)	48
Brahmaputra, Manipur and Tyao (excluding the potential in Sikkim)	1,25
Indus	66
TOTAL	4,11

The pattern of power development in India, at present is as follows: Mysore, Kerala, Punjab, Orissa, Jammu and Kashmir mainly hydro Bihar, West Bengal, Gujarat and Rajasthan mainly thermal Maharashtra, Madras, Andhra Pradesh, Uttar Pradesh partly thermal Assam and Madhya Pradesh partly hydro

As at present visualised, power development in India will eventually be one of inter-connected hydro-electric and thermal power stations in various regions. It is conceivable that the regional systems will, in due course, be inter-connected so as to form an all-India grid, alongside the development of some of the large power resources which are capable of providing adequate capacity to meet the needs of outlying areas.

TABLE 158

PROGRESS OF ELECTRICITY SUPPLY

	Installed capacity of generating plants (thousand kw.)			(5)	(6)	Energy generat- ed (crore kwh.)	Energy sold (crore kwh.)	Average load factor based on cols (6) and (7) (per cent)	Average demand based on cols (5) and (6) (per cent)
	(2)	(3)	(4)						
(1)	Steam	Diesel	Hydro	Total	(7)	(8)	(9)	(10)	
1939	5.41	87	4.42	10.70	5.76	244	203	48.4	53.8
1947	7.57	98	5.08	13.63	8.83	407	336	52.7	64.8
1951	10.97	1.63	5.75	18.35	12.05	586	479	55.5	65.7
1956	15.96	2.28	10.62	28.86	19.90	966	796	55.4	68.9

Organisation for Power Development

The generation and distribution of electricity in India was for a long time governed by the Indian Electricity Act of 1910. The Electricity (Supply) Act passed in 1948 provided for the setting up of a Central Electricity Authority for the entire country as well as regional organisations known as State Electricity Boards. Accordingly, the Central Electricity Authority was constituted in 1960 and State Electricity Boards have been set up in almost all the States.

Ownership

Until 1925, the development of electric power was confined mainly to private companies that took out licences under the Indian Electricity Act of 1910. It was only in the late twenties that schemes for the development of power were launched by some of the States. In March 1961, private companies owned 78.1 per cent of the public utility undertakings and 29.7 per cent of the total installed capacity, as shown in the following table.

TABLE 159
OWNERSHIP : PUBLIC UTILITY INSTALLATIONS
(MARCH 1961)

Ownership	Number of undertakings (reckoned on the basis of ownership)	Installed generating capacity (in kw.)
State governments or State electricity boards	20	26,11,351
Power corporations	2	5,01,500
Municipalities	52	94,808
Private companies	263	13,55,642
TOTAL	337	45,63,301

Consumption

The table below shows the demand for electricity from different classes of consumers during 1960-61.

TABLE 160
CLASSES OF CONSUMERS

Nature of use	No. of consumers		Connected load		Energy sales	
	In thousands	Percentage of total	Total (thousand kw.)	Percentage	Crone kwh.	Percentage of total
Domestic ..	34,57.4	75.5	20,47.8	25.9	1,492.3	10.8
Commercial ..	7,07.6	15.5	5,54.1	7.0	847.7	6.1
Industrial (including water works & traction) ..	2,39.9	5.2	45,25.4	57.5	10,482.6	75.6
Public lighting ..	7.9	0.2	61.7	0.8	193.2	1.4
Irrigation ..	1,59.2	3.6	6,90.2	8.8	832.9	6.1
TOTAL ..	45,72.0	100.0	78,79.2	100.0	13,848.7	100.0

Rural Electrification

A few large power systems serve the needs of rural areas. Rural electrification has so far made some progress in Andhra Pradesh, Bihar, Kerala, Madras, Maharashtra, Mysore, Punjab, Uttar Pradesh and West Bengal.

The following table gives the distribution of towns and villages in terms of population range, numbers electrified during different Plan periods, and those expected to be electrified by the end of the Third Plan.

TABLE 161
TOWNS AND VILLAGES ELECTRIFIED

Population Range	Total number (1951 Census)	Number electrified by March 31			
		1951	1956	1961	1966 (estimated)
Over 1,00,000	73	49	73	73	73
50,000 to 1,00,000	111	88	111	111	111
10,000 to 50,000	1,257	500	716	1,073	1,257
Below 10,000	5,59,666	3,050	6,500	21,643	41,559
TOTAL	5,61,107	3,687	7,400	22,900	43,000

DEVELOPMENT PROGRAMME

The total installed generating capacity in the country at the beginning of the First Plan stood at 23 lakh kw. During the First Plan, the aggregate installed generating capacity increased by 11.2 lakh kw. or by about 49 per cent. During the Second Plan there was an increase of 64 per cent in the generating capacity which rose from 34.2 lakh kw. to 56 lakh kw. By the end of the Third Plan, the aggregate capacity of the plants in commission and under erection and testing is expected to be of the order of 134 lakh kw. of which about 127 lakh kw. are expected to be in commercial operation. With the completion of this programme, per capita generation of electricity would have risen from 18 kwh. in 1951, 28 kwh. in 1956 and 45 kwh. in 1961 to about 95 kwh. in 1966.

The following table shows the growth of installed capacity and energy generated at the end of the First and Second Plans and the target for the Third Plan.

TABLE 162
POWER GENERATION UNDER THE PLANS

	1950-51	1955-56	1960-61	1965-66 (estimated)
<i>Installed capacity</i> (in lakhs of kw.)				
Public Utility Undertakings				
(a) State-owned	6	14	32	98
(b) Company-owned	11	13	14	15
Self-generating industrial establishments	6	7	10	14
TOTAL	23	34	56	1,27
<i>Energy generated</i> (in crores of kwh.)				
Public Utility Undertakings				
(a) State-owned	210	450	1,093	3,450
(b) Company-owned	300	430	592	650
Self-generating industrial establishments	147	220	319	400
TOTAL	657	1,100	2,004	4,500

The estimated cost of the power programme in the public sector in the Third Plan is Rs. 1,039 crores. Investment in the private sector is expected to be of the order of Rs. 50 crores. The approximate breakup of the programme in the public sector is Rs. 661 crores for hydro and thermal generating schemes, Rs. 51 crores for atomic power and about Rs. 327 crores for transmission and distribution schemes including Rs. 105 crores for rural electrification.

Nuclear Power

Having regard to the available energy resources, nuclear power is expected to play a progressively increasing part in meeting energy demands in future years. A nuclear power station is planned for construction at Tarpur, near Bombay. It will consist of two reactors, each producing 150 MW of power. One of these is expected to be commissioned before the end of the Third Plan and the other in the first year of the Fourth Plan. Investigations are being undertaken for selecting a suitable site for a second nuclear power station in the Punjab-Delhi-Rajasthan-Uttar Pradesh region.

MAJOR POWER PROJECTS

The principal power stations commissioned during the First and Second Plans and the principal power generation schemes included in the Third Plan are given in tables 165 and 166 at the end of this Chapter. Some of the major power projects are briefly described below.

Koyna Project

The first stage of the project, estimated to cost Rs. 38.28 crores and inaugurated in January, 1954, envisages the construction of a 208 ft. high dam across the river Koyna and a tunnel which will divert the waters of the river to ensure a drop of about 1,570 feet. The underground power house will have four units of 60,000 kw. each. The first of the four generators was commissioned on May 16, 1962. About 2.8 lakh kw. of power will be supplied to Bombay and Poona and the remaining 10,000 kw. to the adjoining areas in Maharashtra.

The construction of the Power House is expected to be completed shortly.

Rihand Dam Project

The Rihand Project, estimated to cost Rs. 46.05 crores, includes the construction of a concrete gravity dam about 300 ft. high and 3,065 ft. long across the river Rihand near the village of Pipri in the Mirzapur district of Uttar Pradesh, about 29 miles south of the confluence of the Rihand and the Sone rivers. The reservoir, 180 square miles in area, to be created by the dam, will store 86 lakh acre-ft. of water. A power station with an initial installed capacity of 2.5 lakh kw. and an ultimate installed capacity of 3 lakh kw. is also under construction at the toe of the dam. A network of transmission lines with the necessary transmission and switching sub-stations will cover the entire eastern and south-eastern region of Uttar Pradesh. Power from the project will be used for the industrial and agricultural development of this economically backward region, with a population of over 2.5 crores, by providing cheap power for cottage industries as well as for medium and major industries and pumping schemes for irrigation. This power station will also supply power to the aluminium industry which is the first of its kind in the State. The project will further provide irrigation benefits to about 14 lakh acres in Uttar Pradesh and about 5 lakh acres in Bihar.

The project has almost been completed.

Machkund Project

A joint venture of the Governments of Andhra Pradesh and Orissa, this hydro-electric project harnesses the river Machkund which forms the boundary between the two States. A dam, 176 ft. high above foundations and 1,345 ft. long, has been constructed at Jalaput across the Machkund river to store 6,25,000 acre-feet of water. Three generating units of 17,000 kw. each and three units of 21,250 kw. each have been commissioned. The total installed capacity of the power station is now 1,14,750 kw.

FLOOD CONTROL

Following the disastrous floods in different parts of the country during the 1954 monsoon season, the Government of India formulated a comprehensive national programme of flood control in September 1954. Divided into three phases, the programme was devoted during the first two years mainly to intensive investigations, collection of data, and execution of some emergent works, while the second phase, covering the next four or five years, roughly corresponding to the Second Plan period, envisaged flood control measures such as embankments, channel improvements, raising of the level of villages, etc. These two phases are now practically over and the flood control programme is to enter the third phase, which envisages long-term measures, like the construction of reservoirs and additional embankments, where necessary, on the basis of comprehensive and integrated plans for flood control in each river basin. Special attention is being paid to drainage and anti-waterlogging measures.

Flood Control Boards assisted in technical matters by Technical Advisory Committees, exist in 13 States, with a Central Flood Control Board at the Centre. Four River Commissions (Floods) also assist the Central Flood Control Board in technical matters. Four major schemes, each costing Rs. one crore or above, and 971 minor schemes, each costing less than Rs. one crore, have been approved for Central loan assistance since 1954-55, involving an outlay of Rs. 9,22.47 lakhs and Rs. 40,24.56 lakhs respectively.

Out of a total programmed area of 52,191 sq. miles of aerial photography an area of 51,497 sq. miles has been surveyed by the Survey of India. The progress in regard to photo-mosaics was 65,994 sq. miles out of a programmed area of 66,214 sq. miles. About 3,600 miles of embankments and 700 miles of drainage channels were completed in various States. These works, together with other flood control works and the embankments on the Kosi, have benefited an area of about 66 lakh acres. In addition, 52 towns have been afforded protection against floods and/or erosion, and the level of 4,316 villages has been raised above flood level. The flood forecasting unit, set up in the Central Water and Power Commission, issued fairly accurate daily forecasts of the level of the Yamuna river at Delhi, two days in advance, during the last three flood seasons.

A High Level Committee on Floods, which was set up by the Government of India in April 1957, in order to assess the flood problem in the country and advise on measures that should be taken to tackle it, submitted the second volume of its report in November 1958. The recommendations contained in the first volume of the Committee's Report, submitted to Government in 1957, were accepted by the Central Flood Control Board in May 1958.

Expert committees set up after the devastating floods of 1959 by the Governments of Orissa and West Bengal, to enquire into the causes of floods and to formulate suitable remedial measures, have since submitted their preliminary reports and are now working on their final reports. The terms of reference of the Orissa Committee have been enlarged by the State Government to include the river systems affected by the floods of 1960.

Many States experienced heavy floods, during the 1961 monsoon season. A special feature of this year's floods was that States like Kerala, Madras, Mysore, Madhya Pradesh, Rajasthan, which are normally not subject to any appreciable floods, experienced heavy floods as a result of heavy and concentrated rainfall. Synchronisation of floods in the Ganga and its tributaries in South Bihar was another peculiar feature this year. Poona city in Maharashtra faced a grave flood following breaches in the Panshet and Khadakvasala dams. The Narmada in Madhya Pradesh,

the Brahmaputra in Assam, the Beas in Punjab and the Gandak in U.P. recorded the highest ever levels this year. The Mahanadi in Orissa recorded an unprecedented flow at the Hirakud Dam. Punjab, Uttar Pradesh and Delhi and to some extent West Bengal suffered from drainage congestion.

The experience gained during the last seven years indicates that new flood situations are liable to arise which may call for a review of the flood control policy being followed. With this end in view it is proposed to organise five seminars on a regional basis. The deliberations of these seminars will be co-ordinated by a Central Committee.

Flood control, drainage and anti-waterlogging are closely related to irrigation and have to be viewed together in formulating comprehensive development programmes. Owing to the dearth of sufficient data flood control programme had to be taken up on an emergency basis during the Second Plan period. In the Third Plan, as a result of surveys and investigations carried out in recent years, flood control, drainage, anti-waterlogging and anti-sea-erosion schemes have been incorporated in the irrigation plans of the States for which an outlay of Rs. 61 crores has been provided.

Kassels

airmaster

The finest fan in circulation

There is no secret behind the growing popularity of Kassels Fans.

- The fans give voluminous breeze at low current consumption, are fitted with ball-bearings at both ends and work silently.
- Rigid quality control at every stage of production ensures a uniform high standard
- They have totally enclosed motors and all the parts are interchangeable
- Kassels Fans conform to British and other standard specifications and are supplied regularly to the Central and State Governments.

PRAWN CANNING is an industry wholly dependent on foreign markets. Prawn exports from the Malabar coast-line to the United States and other parts of the globe are today earning foreign exchange worth several crore rupees. Metal Box has helped the enterprise of India's exporters of prawns—and many other products—by supplying packages made to exacting international standards.

The Canning Advisory Service of Metal Box—the only one in the packaging industry—provides free advice to packers on every aspect of the complex problems of canning technology. As part of this service Metal Box helps develop special containers and closures to suit the requirements of individual products.

In providing all this assistance to packers Metal Box draws on 29 years of experience in the packaging industry and the accumulated technical resources of its overseas associates.

Today precision-made Metal Box packages carry annually to over 50 foreign countries more than Rs 4 crores worth of Indian goods—fish, cashewnuts, vanaspati, vegetable oils, fruit, toiletries, confectionery and biscuits.

But this is not all. Metal Box helps to earn foreign exchange by selling direct to packers abroad. The value of exports of Metal Box packages to foreign customers has increased over 20 times in four years—a truly spectacular record!

Apart from earning valuable foreign exchange, Metal Box is helping to save it by reducing imports—

- Metal Box manufactures every year nearly Rs 60 lakhs worth of can-closing and bottle-sealing machinery and industrial components—all previously imported.
- Metal Box is constantly striving to conserve imported tinplate by developing alternative packaging materials such as plastics and aluminium.
- Metal Box is developing indigenous sources of supply of previously imported raw materials, putting to maximum use substitute raw materials available locally.

PAPER FOR THE PLANS

Paper means progress—to us it also means business. The throbbing pulse of India's industrialization can be felt as the country races towards the "take-off" stage. The Third Plan is the threshold that offers this exciting view of vital economic activity.

We at West Coast Paper Mills, with new expansion plans in hand, endeavour to keep in pace with the country's progress. From our plant at Dandeli, during the year 1960-61, we manufactured 17,084 tons of writing and printing and 8,583 tons of Kraft paper resulting in a net saving in exchange of Rupees 4 crores to the National Exchequer.

CHAPTER XXIV

INDUSTRY

According to the 1958 Census of Indian Manufactures*, India had 8,052 registered factories†. Of these 6,617 or 82 per cent of the total, which submitted returns, employed in all Rs. 1,215 crores worth of capital consisting of Rs. 631 crores fixed capital and Rs. 584 crores working capital. The total number of persons employed in these factories was 18,20,539 including 15,99,901 workers. The total value of the products of these manufacturing industries was Rs. 1,717 crores, the net value added by manufacture amounting to Rs. 490 crores. Salaries and wages (including the money value of other benefits) paid to employees amounted to Rs. 268·1 crores.

The total profits earned by 311 joint-stock companies during 1956, according to another estimate**, amounted to Rs. 39·58 crores as against Rs. 40·52 crores in the previous year. The revised index of industrial profits (profits before tax) in respect of public limited companies during 1959 for all industries, with 1955 as the base year, was 138·7 compared to 102·9, 90·4 and 112·0 during 1958, 1957 and 1956 respectively. The index numbers of industrial profits during 1959 for certain important industries in respect of public limited companies were as follows: jute 684·9; cotton 83·9; tea 165·0; sugar 158·1; paper 156·2; iron and steel 85·2; coal 116·4; and cement 82·4. The index number of industrial profits (before deduction of tax) in respect of 333 selected private limited companies, with 1955 as the base year, was 185·3 in 1959 compared to 157·2, 129·3 and 122·6 in 1958, 1957 and 1956 respectively.

INDUSTRIAL POLICY

Independent India's industrial policy was first announced in 1948. This envisaged a mixed economy with an overall responsibility of the Government for the planned development of industries and their regulation in national interest. While it reiterated the right of the State to acquire an industrial undertaking in the public interest, it reserved an appropriate sphere for private enterprise‡.

A fresh statement of industrial policy, necessitated by the acceptance of a socialistic pattern of society as the national objective, was announced on April 30, 1956. Under this, industries specified in Schedule A will be the exclusive responsibility of the State, while Schedule B industries will be progressively State-owned, but at the same time private enterprise will be expected to supplement the efforts of the State in these fields. (The two schedules are enumerated below.) Future development of industries falling outside these Schedules will, in general, be left to private enterprise. Notwithstanding this demarcation, it will always be open to the State to undertake any type of industrial production.

Schedule A Industries

Arms and ammunition and allied items of defence equipment; atomic energy; iron and steel; heavy castings and forgings of iron and steel; heavy

*The following States and Union Territories were not covered by the Census: Jammu and Kashmir, Manipur, Tripura and the Andaman and Nicobar Islands.

† Those employing 20 or more workers on any day and using power.

**By the Department of Company Law Administration, Ministry of Commerce and Industry.

‡See 'India 1957', p. 289.

plant and machinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic industries as may be specified by the Central Government; heavy electrical plant including large hydraulic and steam turbines; coal and lignite; mineral oils; mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold and diamonds; mining and processing of copper, lead, zinc, tin, molybdenum and wolfram; minerals specified in the Schedule to the Atomic Energy (Control of Production and Use) Order, 1953; aircraft; air transport; railway transport; shipbuilding and telephones and telephone cables; telegraph and wireless apparatus (excluding radio receiving sets); generation and distribution of electricity.

Schedule B Industries

All other minerals except "minor minerals" as defined in Section 3 of the Minerals Concession Rules, 1949; aluminium and other non-ferrous metals not included in Schedule A; machine tools; ferro-alloys and tool steels; basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics; antibiotics and other essential drugs; fertilisers; synthetic rubber; carbonisation of coal; chemical pulp; road transport; sea transport.

REGULATION OF INDUSTRY

Consistently with the policy first announced in 1948, the Constitution was amended and the Industries (Development and Regulation) Act, 1951, was enacted. Under the Act, all new and existing undertakings and any substantial expansion of, and the manufacture of new articles by, existing undertakings were required to be licensed. The Government were authorised to examine the working of any industrial undertaking and to issue such directions as they considered necessary. If the undertaking continued to be mismanaged, the Government were empowered to take over its management or control. A Central Advisory Council consisting of the representatives of industry, labour, consumers and primary producers was to be constituted to advise the Government on all matters concerning the development and regulation of industries. Development Councils for individual industries were also to be set up.

By exercising these powers, the Government aim at securing a proper utilisation of the country's resources, a balanced development of large and small industries, and a proper regional distribution of the various industries. At present, 162 industries come within the scope of the Act. Besides the Central Advisory Council of Industries, Development Councils have been set up for the following industries: (i) inorganic chemicals, (ii) internal combustion engines, power-driven pumps, air compressors, (iii) bicycles, sewing machines and instruments, (iv) sugar, (v) light electrical, (vi) heavy electrical, (vii) drugs and pharmaceuticals, (viii) machine building (ix) woollen textiles, (x) art silk textiles, (xi) machine tools, (xii) non-ferrous metals and alloys, (xiii) oils, soaps and paints, (xiv) food processing, (xv) organic chemicals, (xvi) automobiles, (xvii) paper, pulp and allied industries, (xviii) leather, leather goods and pickers, and (xix) glass and ceramics. A number of panels and expert committees have been appointed from time to time to study various industries. Between January and November 1961, 1,117 new licences were issued under the Act. It was decided in 1959 that for industrial machinery as well as a number of other items, firms concerned might apply straightaway for import licences for capital goods and once these were granted, the Industries Act licence would follow as a matter of course. Small and medium industries employing less than 100 workers and having fixed assets of not more than Rs. 10 lakhs, have been exempted from licensing.

For the development of important industries for which sufficient capital has not been forthcoming in the private sector, the Government give financial assistance either by granting loans on special terms or by participating in equity capital. The Directorate-General of Supplies and Disposals, the central purchase organisation of the Government of India, have been encouraging indigenous industry through their stores purchase policy. The total purchases during 1960-61 (Rs. 222 crores) contained only 19 per cent imported stores against 37 per cent in 1955-56. The value of indigenous stores purchased during 1960-61 amounted to Rs. 180.5 crores as against Rs. 75.9 crores in 1955-56.

PRODUCTIVITY

Following the recommendations of a Productivity Delegation which visited Japan in October-November 1956, a National Productivity Council was set up in February 1958 as an autonomous body with representatives of Government, employers, labour and others. The object is to inculcate productivity consciousness in the country and apply the latest techniques of increasing productivity in industry, by promoting the setting up of local productivity councils in industrial centres and of regional productivity directorates manned by specialists. So far 43 local councils have been set up; six regional directorates at Bombay, Calcutta, Madras, Kanpur, Bangalore and Ludhiana have also been established. The National Council gives matching contributions of equivalent amount to all local councils. India is a member of the Asian Productivity Organisation set up in April 1961 to promote mutual co-operation in this field.

INDUSTRIAL FINANCE

The Industrial Finance Corporation of India, established in July 1948, has been giving assistance in the form of advances and long-term loans to industrial concerns. The Act was amended in 1957* and again in December 1960 with a view to enlarging and diversifying the assistance provided by the Corporation. The 1960 amendment has, among other things, empowered the Corporation to directly subscribe to the shares of industrial concerns. The Corporation's resources were strengthened by the sanction in June 1960, by the US Development Loan Fund, of a \$ 10 million (about Rs. 4.76 crores) foreign currency loan for the private sector industries in India. Up to March 1961, loans sanctioned by the Corporation amounted to Rs. 99.67 crores including a record sum of Rs. 27.48 crores* during 1960-61. Foreign currency loans amounting to Rs. 3.48 crores were for the first time sanctioned by the Corporation. Loans worth Rs. 54.90 crores were actually disbursed. A sum of Rs. 13.5 crores was provided in the Second Plan for Central Government loans to the Corporation; the amount was later raised to Rs. 22.25 crores.

The State Financial Corporations** assist medium and small-scale industries which do not fall within the scope of the all-India corporation. The total amount of loans and advances sanctioned by them till March 1961 was Rs. 36.17 crores, of which Rs. 22.16 crores were disbursed.

By the end of 1960, the Industrial Credit and Investment Corporation of India, set up in January 1955 to assist industrial enterprises in the private sector, approved financial assistance for a total amount of Rs. 31.41 crores† covering a wide range of industries: paper, chemicals and pharmaceuticals, electrical equipment, textiles, sugar, metal ores, lime and cement works,

*See also 'India 1961', p. 302.

**With the setting up of a new Corporation for Gujarat following the bifurcation of Bombay State in May 1960, the number of State Financial Corporations rose to 15, one for each State.

†Excluding applications sanctioned but subsequently withdrawn by applicants or not proceeded with for other reasons.

glass manufacture etc. Actual disbursements amounted to Rs. 12.46 crores. The Corporation obtained a \$ 20 million (Rs. 9.52 crores) loan from the World Bank and a \$ 5 million (Rs. 2.38 crores) loan from the US Development Loan Fund.

The Refinance Corporation for Industry Ltd. was set up in June 1958 to provide re-lending facilities against loans given by banks to industrial concerns for the purpose of increased production primarily in industries included in the Plan. Loans to be eligible for rediscount must be for periods between 3 and 7 years and of a medium-sized amount, not exceeding Rs. 50 lakhs. These facilities will be available only to those industrial concerns whose paid-up capital and reserves do not exceed Rs. 2.5 crores. Refinance assistance sanctioned till March 1961 amounted to Rs. 7.69 crores.

The National Industrial Development Corporation, set up in 1954, also acts as an agency of the Government for the grant of special loans for the rehabilitation and modernisation of the cotton textile and jute industries and for expansion of machine tool units. Till the end of September 1961, loans amounting to Rs. 22.29 crores were sanctioned by the NIDC to these industries.

The Government assist the private sector by facilitating the import of essential raw materials and basic intermediates, offering tax concessions and protecting new industries in the first few years. The statutory Tariff Commission, established in January 1952 in place of the previous non-statutory Tariff Board, have been reviewing the progress of protected industries and examining new cases for protection.

Efforts have been made to secure technical help from the industrially advanced countries either under the international technical assistance schemes or through direct negotiations. (See chapter on 'India and International Organisations').

Foreign Capital

In order to supplement the capital resources for rapid industrial development, the Government have invited foreign assistance in cases where sufficient capacity for the manufacture of a particular item does not exist in the country and where it is desirable to secure the know-how from leading foreign firms. The policy in regard to foreign capital was enunciated in the Industrial Policy Resolution of April 1948, and in the Prime Minister's statement in the Constituent Assembly in 1949, which laid down that:

- (i) the participation of foreign capital and enterprise should be carefully regulated in the national interest by ensuring that major interest in ownership and effective control should, save in exceptional cases, always be in Indian hands and that the training of suitable Indian personnel for the purpose of eventually replacing foreign experts will be insisted upon in all such cases;
- (ii) there will be no discrimination between foreign and Indian undertakings in the application of the general industrial policy;
- (iii) reasonable facilities will be given for the remittance of profits and repatriation of capital consistent with the foreign exchange position of the country;
- (iv) in the event of nationalisation, fair and equitable compensation will be paid.

According to a study by the Economic Department of the Reserve Bank of India, the value of the private foreign non-banking business investments in India at the end of 1959 totalled Rs. 610.7 crores (inclusive of IBRD loans). Net of capital repatriation, the flow of foreign business investments (inclusive of IBRD loans) during 1959 amounted to Rs. 38.1 crores against Rs. 27.7 crores during 1958 and an annual average of Rs. 38.2 crores during 1956-58. India's foreign liabilities at the official sector during 1959 amounted to Rs. 944 crores and those at the banking sector

Rs. 60 crores. Total investment liabilities of India thus amounted to Rs. 1,615 crores in 1959. The net investment liabilities, after taking into account her foreign capital assets of Rs. 645 crores in the official sector and Rs. 59 crores in the banking sector, however, amounted to Rs. 911 crores at the end of 1959. The official foreign capital assets of Rs. 645 crores include Rs. 300 crores of partition debt to India from Pakistan. Of the Rs. 610.7 crores worth of foreign (non-banking) business investments in India, the bulk (Rs. 400.1 crores) came from the UK and Rs. 82.0 crores from the USA.

DEVELOPMENT OF INDUSTRIES

Early Stages

Although the first cotton mill in India was built at Calcutta in 1818, the real beginnings of the industry were made in Bombay in the year 1854, with predominantly Indian capital and enterprise. The foundations of the jute industry were laid near Calcutta in 1855, mostly with foreign capital and enterprise. These, along with coal mining, were the only major industries which had developed substantially before World War I. The War gave a further impetus to industrial development. The policy of discriminating protection, adopted in 1922 on the recommendation of the Indian Fiscal Commission, did much to help the growth of Indian industries. Between 1922 and 1939, the production of cotton piecegoods more than doubled, that of steel ingots increased 8 times and of paper 2½ times. The protected sugar industry progressed so speedily between 1932 and 1936 that the country became self-sufficient in sugar. About the same time the cement industry also began to grow, and by 1935-36 it was able to meet about 95 per cent of the total needs of the country. The production of matches, glass, *vanaspati*, soap and several engineering industries recorded large increases during this period. An electrical goods industry came into being.

World War II created conditions favourable for the maximum utilisation of capacity in Indian industries. Several new industries came into existence such as ferro-alloys, non-ferrous metals, diesel engines, pumps, bicycles, sewing machines, soda ash, caustic soda, chlorine and superphosphate. The manufacture of machine tools and simple machinery, cutlery and pharmaceuticals also commenced.

In the immediate post-war period, a new range of industries grew up; ball and roller bearings, carding engines, ring frames and locomotives. The fertiliser, cement, sheet glass, caustic soda and sulphuric acid industries expanded.

During First and Second Plans

During the period of the First and Second Plans (1951-52 to 1960-61), the growth and diversification of industry have been remarkable and particularly so in the five years of the Second Plan. Three new steel works, each of 10 lakh tons capacity, were completed in the public sector and two existing steel works in the private sector doubled so as to bring their ingot capacity to 20 lakh and 10 lakh tons respectively. The foundations have been laid of heavy electrical and heavy machine tools industries, heavy machine building and other branches of heavy engineering, and the production of machinery for the cement and paper industries started for the first time. In chemical industries there has been an advance on a wide front, leading not only to larger units and greatly increased output of basic chemicals such as nitrogenous fertilisers, caustic soda, soda ash and sulphuric acid, but also to the manufacture of a number of new products: urea, ammonium phosphate, penicillin, synthetic fibres, industrial explosives, polyethylene, newsprint, dyestuffs and so on. The output of many other industries has

increased substantially: bicycles, sewing machines, telephones, electrical goods, textile and sugar machinery. New skills have been learnt by the workers and a large and growing class of industrial managers has come into being. Organised industrial production practically doubled in these ten years; the index of industrial production rose from 100 in 1950-51 to 194 in 1960-61. New industrial townships and various factories have sprung up in the environs of the main cities of the country.

At the same time there have been some large shortfalls. The combined output of the new steel works was only 6 lakh tons in 1960-61 as against the target of 20 lakh tons. The Tata Iron and Steel Works' production also fell short of the target set for the Second Plan period. The expansion of the Government Sindri fertilizer factory and the private sector ammonium chloride project at Varanasi were not completed till 12 to 18 months after the scheduled date and have been finding it difficult to reach capacity output. The three new fertilizer plants in the public sector at Nangal, Neyveli and Rourkela, have all been delayed by one or two years; whereas they were all planned to be more or less in full production in 1960-61, the Nangal plant came into partial production only in January 1961, while the other two are still under construction. The delay in their case, as also in that of the Heavy Electrical Project at Bhopal, is mainly due to foreign exchange difficulties. The heavy machinery, the mining machinery and the foundry forge projects, which should by now have been quite far advanced in their construction, are still in their initial stages; they will only begin to yield output at the end of the Third Plan. The project for the manufacture of organic intermediates has been delayed due to difficulties in concluding negotiations with overseas collaborators. The experience of the Second Plan has shown that the gestation period of a project, especially in the case of heavy engineering industries, is generally longer than expected. This highlights the importance of advance planning. The shortfall in some industrial production targets of the Second Plan, which include some industries of crucial importance to the economy, is shown in the table below.

TABLE 167

SHORTFALL IN INDUSTRIAL PRODUCTION TARGETS (SECOND PLAN)

	Unit	Production targets (Second Plan)	Actual production (1960-61)
Steel finished	Lakh tons	43	22
Nitrogenous fertilizers (in terms of nitrogen)	Thousand tons	2,90.0	1,10.0
Phosphatic fertilizers (in terms of P ₂ O ₅) ..	Thousand tons	1,20.0	55.0
Textile machinery	Value; Rs. crores	17.0	9.0
Cement machinery	Value; Rs. crores	2.0	0.6
Paper machinery	Value; Rs. crores	4.0	—
Aluminium	Thousand tons	25.0	18.5
Newsprint	Thousand tons	60.0	25.0
Chemical pulp	Tons	30,000	—
Soda ash	Thousand tons	2,30	1,45
Caustic soda	Thousand tons	1,35	1,00
Dyestuffs	Lakh lbs.	2,20	1,15
Cement	Lakh tons	1,30*	85

Most of the other targets of capacity and production have been approximately fulfilled and in some cases, for example, power-driven pumps, diesel engines, electric motors, ACSR cables, electric fans, radio receivers and sugar, target was exceeded.

*Revised to 1,00-1,10 lakh tons in May 1958.

The actual cost of many of the projects has been more than what was envisaged when the Second Plan was drawn up, often owing to lack of experience in project engineering. The importance of more accurate estimates have been emphasised in the Third Plan. Consultant organisations who could correctly advise in this respect have been springing up in this country and will be an advantage in future.

Dispersal of industry has been effected by giving preference in the location of public sector projects to relatively backward areas whenever possible. Similarly in the licensing of private sector projects the claims of under-developed regions have generally been kept in view to the extent possible. The overall fixed investment on public sector projects during the Second Plan (1956-61) has been about Rs. 770 crores as against the original estimate of Rs. 560 crores. For the private sector, the corresponding investment figures are Rs. 850 crores and Rs. 685 crores respectively. The industry-wise break-up of the overall investment, as now assessed, as compared with the original estimates given in the *Programmes of Industrial Development: 1956-61*, page ix, is shown in the table below.

TABLE 163
OUTLAY ON INDUSTRIES (SECOND PLAN)

	Estimate under Second Plan	As now assessed
Metallurgical industries (iron and steel, aluminium and ferro-manganese)	502.5	770.0
Engineering industries (heavy and light)	150.0	175.0
Chemical industries including drugs and pharmaceuticals	132.0	140.0
Cement, electric porcelain and refractories	93.0	60.0
Petroleum refining	10.0	30.0
Paper, newsprint, security paper	54.0	40.0
Sugar	51.0	56.0
Cotton, jute, woollen and silk yarn and cloth	36.3	50.0
Rayon and staple fibre	24.0	34.0
Others	41.5	115.0
Replacement and modernisation	150.0	150.0
TOTAL	1,244.3	1,620.0

In spite of the large investment (about 30 per cent above the Plan estimate), the physical targets set under the Second Plan are broadly estimated to have been achieved to the extent of only about 85 to 90 per cent. The wide gap between the rather high target originally set for the cement industry and the capacity actually achieved accounts for a high proportion of the overall shortfall in the physical performance.

Development Programme under Third Plan

The main emphasis in the Third Plan is on the establishment of basic capital and producer goods industries—with special emphasis on machine building programmes—and also the acquisition of the related skills, technical know-how and designing capacity, so that in the following Plan periods the growth of the economy will become self-sustaining and increasingly independent of outside aid. The priorities have been laid down as follows:

- (i) completion of Second Plan projects which are yet to be implemented or which had been deferred owing to foreign exchange difficulties;
- (ii) expansion and diversification of capacity of the heavy engineering and machine building industries, castings and forgings, alloy

- tool and special steels, iron and steel and ferro-alloys and step-up of output of fertilizers and petroleum products;
- (iii) increased production of major basic raw materials and producer goods like aluminium, mineral oils, dissolving pulp, basic organic and inorganic chemicals and intermediates inclusive of products of petrochemical origin; and
- (iv) increased production from domestic industries of commodities required to meet essential needs like essential drugs, paper, cloth, sugar, vegetable oils and housing materials.

The development programmes for industries and minerals envisaged under the Third Plan will entail an outlay of about Rs. 2,993 crores. The foreign exchange component is placed at about Rs. 1,338 crores. The break-up is as follows:

TABLE 169
OUTLAY ON INDUSTRIES (THIRD PLAN)

(in crores of rupees)

	Public sector		Private sector		Public and private sectors	
	Total	Foreign exchange	Total	Foreign exchange	Total	Foreign exchange
New investment						
Mineral development ..	478	200	60	28	538	228
Industrial development ..	1,330	660	1,125	450	2,455	1,110
TOTAL ..	1,808	860	1,185	478	2,993	1,338
Replacement ..	—	—	150	50	150	50

The fixed investment of Rs. 1,808 crores for industries and minerals in the public sector shown in the table above does not include (i) assistance to plantation industries, which do not strictly fall within the scope of manufacturing industries; (ii) the cost of the construction subsidy given to Hindustan Shipyard; (iii) programmes of the National Productivity Council and the Indian Standards Institution and expenditure on the extension of the metric system of weights and measures; (iv) assistance to the private sector through the National Industrial Development Corporation (NIDC); and (v) direct loans and State participation in private undertakings.

Including the above, the overall cost is about Rs. 1,882 crores, whereas the provision that it has been possible to make for them is only Rs. 1,520 crores (Rs. 1,450 crores at the Centre and Rs. 70 crores in the States). It is probable, therefore, that their full implementation will take more than five years. Projects of the Central Government have been grouped into three categories, namely, (i) projects under execution and carried over from the Second Plan; (ii) new projects for which external credits are already assured wholly or partly; and (iii) new projects for which external credits have yet to be arranged.

Tables 170 and 171 show the industrial and mineral projects in the public sector (Central Government), projected investment (including foreign exchange component) in each and the target of capacity to be attained.

Table 173 shows, for selected categories of industries, the targets of capacity and production to be attained during the Third Plan. Capacity and production at the beginning of the Third Plan as well as production at the beginning of the First and Second Plans, are also shown.

TABLE 170
INDUSTRIAL PROJECTS IN THE PUBLIC SECTOR (CENTRAL GOVERNMENT)—THIRD PLAN

Name of scheme	Location	Total investment (Rs. crores)	Foreign exchange component (Rs. crores)	Capacity in 1965-66 (final capacity in case of expansion)
A. Projects				
Completion of the three steel plants..	under execution and carried over from Second Plan	50.0	20.0	30 lakh tons of steel ingots and 7,00,000 tons of pig iron for sale
Rourkela fertilizer factory	Rourkela	1,20,000 tons of nitrogen
Heavy machinery plant	Durgapur			
Foundry forge shop ..	Rourkela			
Mining machinery plant	Ranchi			
Heavy electrical plant	Durgapur			
	Bhopal	80.0	55.0	45,000 tons of finished machinery 94,000 tons of castings and forgings 30,000 tons of mining machinery
		16.0	7.0	Rs. 12.5 crores worth of electrical equipment
Drug projects				
(a) synthetic drugs plant ..	Santnagar (Andhra Pradesh)	30.0	15.0	Rs. 6.4 crores worth of drugs
(b) antibiotics plant ..	Rishikesh (Uttar Pradesh)			Rs. 25.8 crores worth of antibiotics
(c) phyto-chemicals plant ..	Munnar (Kerala)			Rs. 77 lakhs worth of phyto-chemicals
(d) surgical instruments plant ..	Gundy (Madras)			Rs. 2.8 crores worth of instruments
Organic intermediates plant ..	Near Panvel (Maharashtra)	11.0	6.0	25,000 tons of organic intermediates
Expansion of Hindustan antibiotics	Pimpri (Maharashtra)	0.5	—	45,000 kgs of streptomycin and 1.5 tons of tetracyclines
Trombay fertilizer factory ..	Trombay (Maharashtra)	25.0	13.0	90,000 tons of nitrogen
Naharkatiya fertilizer factory	Naharkatiya (Assam)	12.0	7.0	32,500 tons of nitrogen
Neyveli fertilizer factory	Neyveli (Madras)	15.68	11.56	70,000 tons of nitrogen
Briquetting and carbonisation plant ..	Neyveli (Madras)	13.84	8.61	3,80,000 tons of carbonized briquettes
Neyveli thermal power plant	Neyveli (Madras)	9.67	5.86	250 mw
Nummati oil refinery ..	Nummati (Assam)	8.5	4.9	7.5 lakh tons of crude oil
Barauni oil refinery ..*	Barauni (Bihar)	23.0	7.5	20 lakh tons of crude oil
		295.19	161.4	
B. New Projects				
Expansion of heavy machinery plant	for which external credits are	already	assured, wholly	80,000 tons of finished machinery
Expansion of foundry forge ..	Ranchi	14.0	11.0	1,53,000 tons of castings and forgings
Expansion of mining machinery plant	Durgapur	10.0	5.5	45,000 tons of mining machinery
		15.0	10.0	

TABLE 170 (contd.)

Name of scheme	Location	Total investment (Rs. crores)	Foreign exchange component (Rs. crores)	Capacity in 1965-66 (final capacity in case of expansion)
Second and third heavy electrical projects ..	Not yet decided	69.0	45.0	Scope yet to be finally decided in the case of the third project
Heavy machine tool project ..	Ranchi	11.0	9.0	Rs. 3-4 crores worth of machine tools
Precision instruments project ..	Not yet decided	8.0	6.0	Rs. 20 crores worth of instruments
Ophthalmic glass project ..	Durgapur	2.6	2.0	300 tons of ophthalmic glass
Raw film project ..	Ootacamund	8.0	5.0	63 lakh sq. metres of raw films, photographic paper etc.
Watch factory ..	Bangalore	2.5	1.5	3,60,000 watches
Expansion of Bhilai steel plant ..	Bhilai	138.0	56.0	25 lakh tons of steel ingots and 3,00,000 tons of pig iron for sale
Expansion of Durgapur steel plant ..	Durgapur	56.0	27.0	16 lakh tons of steel ingots and 3,00,000 lakh tons of pig iron for sale
Expansion of Rourkela steel plant ..	Rourkela	90.0	50.0	18 lakh tons of steel ingots
Expansion of Hindustan Machine Tools ..	Bangalore	3.0	2.0	Rs. 7 crores worth of machine tools
Basic refractories project ..	Bhilai	3.0	1.5	Scope yet to be decided
New machine tool works in Punjab ..	Exact location not yet decided	5.0	3.0	1,000 machine tools (Rs. 3.5 crores)
Gujarat oil refinery ..	Exact location not yet decided	30.0	15.0	20 lakh tons of crude oil
Expansion of Praga Tools ..	Secunderabad (Andhra Pradesh)	1.0	0.5	Rs. 1 crore worth of machine tools
Heavy structural works ..	Not yet decided	6.0	4.0@	10,000 tons of heavy structurals on single shift basis.
Heavy plate and vessel works ..	Not yet decided	18.0	8.0	18,000-20,000 tons of chemical plant machinery on single shift basis.
Gorakhpur fertilizer factory ..	Gorakhpur	5.5	4.0	80,000 tons of nitrogen
Security paper mill ..	Hoshangabad (Madhya Pradesh)	3.5	1.2	1,500 tons of security paper
Expansion of Hindustan Cables ..	Rupnarainpur (West Bengal)	499.1	267.2	2,000 miles of dry core cables and 500 miles of plastic insulated city cables on double shift basis.

@ According to the latest estimates these projects will cost Rs. 10.1 crores and will need foreign exchange expenditure of Rs. 6.4 crores.

TABLE 170 (concl.)

Name of scheme	Location	Total investment (Rs. crores)	Foreign exchange component (Rs. crores)	Capacity in 1965-66 (final capacity in case of expansion)
Bokaro steel project	Bokaro	200.0	100.0	10 lakh tons of steel ingots and 3,50,000 tons of pig iron for sale
Alloy and tool steel plant	Durgapur	50.0	20.0	48,000 tons of finished products
Expansion of Bhopal heavy electrical plant	Bhopal	19.0	8.0	Rs. 25 crores worth of electrical equipment
Expansion of Hindustan Shipyard (expansion and subsidy)	Visakhapatnam	10.0	1.5	
Dry dock project of the Hindustan Shipyard	Visakhapatnam	2.0	0.5	
Second shipyard	Cochin	20.0	5.0	
Expansion of FACT	Alwaye (Kerala)	8.0	3.0	50,000-60,000 dwt
Expansion of Nepa mills	Nepanagar, Madhya Pradesh	4.0	3.0	60,000 tons of nitrogen
Salt development	..	3.0	0.8	60,000 tons of newsprint
Heavy compressors and pumps project	Not yet decided	15.0	10.0	Scope yet to be decided
Ball and roller bearing project	Not yet decided	8.0	6.0	20 lakh bearings
Additional capacity for machine tools	Not yet decided	15.0	10.0	Scope yet to be decided
Second heavy structural works	Not yet decided	3.0	1.5	
Second plate and vessel works	Not yet decided	0.4	—	
Marine diesel engine factory	..	12.0	6.0	1,00,000 tons of HVI Lubricants.
Expansion and modernisation of the Government alkalioid factory	..	22.0	15.0	22 lakh tons of coal
Lubricating oil plant	Ghaziipur (Uttar Pradesh)	25.0	13.0	10 lakh tons of lignite
Low temperature carbonisation plants	..	50.0	—	
Neyveli lignite high temperature carbonisation plant and connected facilities for pig iron production	Neyveli (Madras)	466.4	205.9	
Townships	At project sites	1,260.69	634.5

INDUSTRIAL PRODUCTION

Industrial production during 1959 and 1960 and the index numbers of industrial production (base : 1951=100) for the year 1960 and for the months of October 1960 and October 1961 are given in table 172. For January-October 1961, the general index* was 180.6 (provisional) compared to 167.8 for January-October 1960. Some new engineering and chemical industries, not included in the index, have also been recording considerable progress. Shortage of foreign exchange continues but it has been possible to ensure generally that industrial production is least hampered on that account.

TABLE 172
INDUSTRIAL PRODUCTION

	Unit	Actual production during		Index number of production (1951=100)		
		1959	1960	1960 (a)	October 1960	October 1961
Coal	Lakh m. tons	4,78	5,26	150.9	149.4	147.5
Iron ore	Lakh m. tons	79	1,06	286.5	290.7	354.5
Sugar (b)	Thousand m. tons	19,50	24,85	228.7	41.3	48.9

N.B.—Capacity for engineering industries is estimated on the double shift operation basis.

- (1) Except in the case of cotton textile machinery, capacity and production under this head are related to the demands for original equipment.
 (2) Excepting for the production figure in 1965-66, the figures relate to the organised sector only.
 (3) Figures relate to crop year.

- (a) Relates to calendar year.
 (b) Actual production will be linked by and large with the programme for expansion of steel capacity.
 (c) Relates to the public sector only.
 (d) Relates to five-year period.
 (e) By working the capacity on three shifts.
 (f) An additional 5 lakh bicycles are expected to be produced in the small-scale sector.
 (g) An additional 1,50,000 sewing machines are expected to be produced in the small-scale sector.
 (h) These figures are for 300 hp and below.
 (i) Single shift capacity.

PRINCIPAL INDUSTRIES

Cotton Textiles

The growth of the cotton textile industry in the pre-independence period is shown in the following table.

TABLE 174
GROWTH OF COTTON TEXTILE INDUSTRY (1879-1947)

Year	Number of mills	Number of spindles (thousand)	Number of looms (thousand)	Production (lakh lbs.)	
				Yarn	Piecegoods
1879-80	58	14,08	13.3	—	—
1889-90	114	29,35	22.1	—	—
1901	178	48,41	40.5	57,30	12,00
1911	233	60,95	85.8	62,50	26,70
1921	249	72,78	133.5	69,40	40,30
1931	314	90,78	175.2	96,60	67,20
1941	396	1,00,26	200.2	157,70	109,30
1947	423	1,03,54	203.0	129,60	376,20 (lakh yds.)

The production of cotton yarn and cloth since 1947 is shown in the table below.

TABLE 175
PRODUCTION OF COTTON YARN AND CLOTH

Year	Cotton yarn (lakh lbs.)	Cotton cloth (lakh yds.)
1947	129,60	376,20
1950	117,48	366,70
1955	163,08	509,40
1956	167,12	530,66
1957	178,01	531,74
1958	168,54	492,70
1959	172,28	492,54
1960	173,71	504,83
1961 (provisional)	188,75	512,70

At the beginning of 1960, there were 479 cotton textile (186 spinning and 293 composite) mills in India, with 1,35.5 lakh spindles and about 2.0 lakh looms. The number of mills decreased to 478 (192 spinning and 286 composite) at the beginning of 1961. Nearly Rs. 122 crores were invested in the industry which employed about 8.9 lakh workers.

The Government have been carrying out, since 1955, a survey of the industry both from the technical and financial points of view to find out the requirements of modern equipment and machinery. The assistance of the National Industrial Development Corporation to the industry is based on these data. Loans amounting to about Rs. 11.26 crores were sanctioned till September 1961 by the NIDC.

Jute

The early development of the jute industry is shown in the following table.

TABLE 176
GROWTH OF JUTE INDUSTRY (1879-1947)

Year	Number of mills	Authorised capital (Rs. crores)	Number of looms (thousand)	Number of spindles (thousand)
1879-80 to 1883-84 (average) ..	21	2.71	5.5	88
1899-1900 to 1903-04 (average)	36	6.80	16.2	3,35
1909-10 to 1913-14 (average) ..	60	12.09	33.5	6,92
1925-26	90	21.35	50.5	10,64
1930-31	100	23.61	61.8	12,25
1937-38	105	24.89	52.4	11,08
1946-47	106	—	66.0	12,95

According to the 1958 Census of Indian Manufactures, there were 106 jute mills in India out of which 96, which had submitted returns, employed total capital worth Rs. 78.33 crores (Rs. 40.26 crores fixed capital). As many as 2,53,860 persons (including 2,38,203 workers) were employed in the industry. The following table shows the production of jute goods since 1947.

TABLE 177
PRODUCTION OF JUTE MANUFACTURES

(in thousand tons)

Year*	Production†
1947	10,52
1950	8,36
1955	10,27
1956	10,93
1957	10,30
1958	10,62
1959	10,52
1960	10,85
1961 (provisional)	9,70

To encourage modernisation, licences for the import of machinery have been liberally granted to the jute mills and a start made in the manufacture of jute mill machinery in the country. Loans are also being offered through the National Industrial Development Corporation for modernisation of equipment; loans worth Rs. 7.1 crores have been approved so far. About 84 per cent of the loom spinning capacity is now fed by silver spun yarn. Owing to successive seasons of shortage and fall in production of raw jute and violent fluctuations in the prices of raw jute as well as jute goods, the industry is in an unhappy state. The industry is now working with 12 per cent of the loomage sealed; also, a reduction of working hours from 48 to 45 (42½ in case of the bigger units) has been effected.

Sugar

The rapid development of the sugar industry under protection in the early thirties and thereafter is shown below.

* Figures relate to the period July-June which is the jute year.

† Figures for 1950 onwards relate to the production of mills in the membership of the Indian Jute Mills' Association and of one non-member mill. Figures for 1960 and 1961 are in metric tons.

TABLE 178
GROWTH OF SUGAR INDUSTRY

Year (November-October)	Number of mills	Production (thousand tons)
1931-32	32	1,60
1938-39	132	6,42
1945-46	138	9,23
1950-51	138	11,01
1955-56	143	18,62
1956-57	147	20,29
1957-58	158	19,78
1958-59	164	19,21
1959-60 (estimated)	170	24,00
1960-61	175	25,00

Cement

Manufacture of Portland cement started in Madras in 1904. The real beginning on a large scale took place with the formation of three companies in 1912-13. At present there are 34 factories. The installed capacity now stands at 94.7 lakh metric tons and is expected to rise to 99.6 lakh metric tons by the end of 1961-62 when the number of factories would rise to 35. The growth of the industry is traced below. (Figures from 1955 onwards are in metric tons).

TABLE 179
PRODUCTION OF CEMENT

Year	Production (thousand tons)
1914	1
1918	84
1930	5,63
1940	17,12
1947	14,47
1950	26,12
1955	45,59
1956	50,08
1957	56,92
1958	61,66
1959	69,36
1960	78,35
1961 (provisional)	82,00

The targets of installed capacity and production at the end of the Third Plan have been set at 152.4 lakh m. tons and 132.1 lakh m. tons respectively.

Paper

The production of machine-made paper in India dates back to 1870, when the Bally Mills were established near Calcutta. During World War II, the number of mills increased to 15 and production reached 1,03,884 lakh tons (1944). Rapid progress has been made since 1950. The installed capacity has risen to 12.6 tons including 8.56 lakh tons licensed in 1961-62. Production of grease-proof paper started in 1959. The following table gives production figures (in metric tons since 1955).

TABLE 180
PRODUCTION OF PAPER AND PAPER-BOARD

Year	Production (thousand tons)
1950.. .. .	1,09
1955.. .. .	1,88
1956.. .. .	1,97
1957.. .. .	2,14
1958.. .. .	2,57
1959.. .. .	2,99
1960.. .. .	3,45
1961 (provisional)	3,64

The first newsprint mill in India, the National Newsprint and Paper Mills Limited, Neplanagar (Madhya Pradesh), started as a private venture in 1947 and the responsibility for its management was taken over by the Madhya Pradesh Government in 1948. After its reorganisation in 1958, the Government of India and the Government of Madhya Pradesh now hold shares of Rs. 2.55 crores and Rs. 1.70 crores respectively. Total authorised and issued capital is Rs. 5 crores. The mill went into production in January 1955. It has an installed capacity of 30,000 tons, while the present internal demand is about 80,000 tons a year. Output during the last few years was as follows (the 1960-61 figure in metric tons).

TABLE 181
PRODUCTION OF NEWSPRINT

Year	Production (tons)
1955-56	3,455
1956-57	13,534
1957-58	14,145
1958-59	21,838
1959-60	22,411
1960-61	23,398

Two additional units were licensed in 1960. Capacity is to be doubled. Third Plan target of production is placed at 1,50,000 tons.

Iron and steel

The earliest attempt at the manufacture of iron and steel by modern methods, made in 1830 in South Arcot, failed. In 1874 the Barakar Iron Works started work on the Jharia coalfields; the works were acquired by the Bengal Iron and Steel Company in 1889. Production amounted to 35,000 tons in 1900. The Tata Iron and Steel Company, established by the late Jamsetji Tata in 1907 at Sakchi, Bihar, first produced pig iron in 1911 and steel in 1913. The two other important manufacturers were the Indian Iron and Steel Company (formed in 1908 at Hirapur near Asansol, Bengal) and the Mysore State Iron Works (now Mysore Iron and Steel Works), started at Bhadravati in 1923. By 1939, the production of steel was over 8 lakh tons. World War II gave an impetus to the industry. By 1960 steel output rose to 22.63 lakh tons. Imports of iron and steel in 1960 amounted to about 11.44 lakh tons against 9.42 lakh tons in 1959.

According to the 1958 Census of Indian Manufactures, there were in that year 167 large and small iron and steel works in India, in which about Rs. 131 crores of fixed capital and Rs. 52 crores of working capital was invested and 93,283 persons (including 75,997 workers) were employed.

The table below shows the progress of the industry since 1900.

TABLE 182
PRODUCTION OF IRON AND STEEL

(in thousand tons)

Year	Pig iron	Finished steel
1900	35	—
1916	—	99
1939	18,35	8,48
1941	—	11,38
1947	13,20	8,93
1950	15,62	10,04
1955	17,57	12,60
1956	18,07	13,38
1957	17,89	13,46
1958	20,03	13,00
1959	31,30	17,11
1960	41,62	22,63
1961 (provisional)	49,75	28,40

During the Second Plan, the three existing steel plants, Tata, Indian Iron and Mysore Iron, were earmarked for expansion. Tata were to increase their production to 20 lakh tons of steel ingots (15 lakh tons of finished steel), Indian Iron to 10 lakh tons of steel ingots (8 lakh tons of finished steel) and Mysore Iron to 1 lakh tons of steel ingots (85,000 tons of finished steel). The expansion schemes of Tata and Indian Iron have been completed and their production is gathering momentum. The Tata Works produced 8,26,000 tons and the Indian Iron 4,16,000 tons of finished steel in 1960. The expansion programme of Mysore Iron has, however, been delayed and is to be completed during the Third Plan period. A company called Mysore Iron and Steel Limited was registered in June 1961 to take over the management of the Works.

Three integrated iron and steel plants in the public sector were set up at Rourkela, Bhilai and Durgapur in the Second Plan period. The management of all three vests in the State-owned Hindustan Steel Limited (authorised capital Rs. 300 crores, later raised to Rs. 600 crores). In the Third Plan period it is proposed to double the capacity of the three steel plants. In addition, a new steel plant at Bokaro with a capacity of 10 lakh tons of ingots and a special alloy and special steel plant at Durgapur are to be set up.

Two blast furnaces, four open-hearth furnaces, three LD Converters, the blooming and slabbing mill, the plate mill and so on have already been commissioned at Rourkela. Production in 1961 included 4,38,855 tons of pig iron and 3,11,905 tons of steel ingots. Capacity of the plant is to be expanded to 18 lakh tons of ingots per annum.

After the completion of the 10 lakh ton stage, the Bhilai steel plant will be expanded in the Third Plan period to produce 25 lakh tons of steel ingots. Three coke oven batteries producing 11,45,333 tons of coke, three blast furnaces producing eight lakh tons of iron for steel-melting and 3,10,000 tons of foundry iron, six open-hearth furnaces producing 10 lakh tons of steel ingots and four rolling mills have all been commissioned. The 1961 production included 9,57,092 m. tons of pig iron and 7,01,647 m. tons of steel ingots. Expansion of capacity to produce 25 lakh tons is expected to be completed by 1965.

The plant at Durgapur is designed to produce initially about 7,90,000 tons of saleable steel and 3,50,000 tons of foundry grade pig iron. The plant was switched on to production in 1959 when the first blast furnace was commissioned. The second blast furnace was commissioned in 1961. Production in 1961 included 7,21,312 m. tons of pig iron and 3,63,166 m. tons of steel ingots. The plant capacity is to be expanded to 16 lakh tons ingot

steel to be processed into 12,39,000 tons of finished products and 3,00,000 tons of pig iron for sale. The Alloy and Special Steel Plant, also to be located at Durgapur, will have initially a capacity of 48,000 tons of finished products. The project report for this plant is under examination.

For the supply of washed coal to the steel plants in the public sector, Hindustan Steel Limited have their own coal washeries at Durgapur and Dugda. Two more washeries at Bhojudih and Patherdih are to be completed shortly.

There are more than 170 re-rolling mills in the country. The larger among them require billets, but many of the small units work on local scrap. The Government have removed restrictions on the establishment of such small units as employ less than fifty workers. The Government have approved in principle the licensing of small units in the private sector to produce one lakh tonnes of pig iron per annum each.

Engineering

Since 1947 the Government have been trying to foster the growth of the engineering industry; and India has become self-sufficient in a variety of articles. The development of the engineering industry during the First and Second Plan periods has already been outlined in a previous section.

During 1961-62 the machine building industries as well as other engineering industries reported sustained growth. A number of projects designed to build up and fabricate a wide variety of machines and equipment have been taken up in the public sector. The country is currently producing industrial machinery valued at about Rs. 200 crores per year, 55,000 motor vehicles, 20,000 motor cycles, scooters and three-wheelers, 9,250 diesel engines, 1,14,500 power driven pumps and 4,14,000 hp of electric motors. With increasing supplies of steel and other basic raw materials, the output of machine-building industries is gaining momentum. Stress has also been laid on the establishment of industries that make essential raw materials and components needed by industries. Thus an increase in the capacity for foundry and forging has been given a high priority.

Heavy mechanical engineering industries such as wire ropes, boats and craft, structural fabrication, cranes and lifts, steel pipes and tubes were licensed for additional capacity. Items of light mechanical engineering industries like typewriters, machine screws, duplicators, razor blades, etc., maintained their upward trend in production. The bicycle industry did not show any progress on account of high price. Items such as sintered bearings, shoe grindery items, time-pieces and watches were manufactured for the first time. Schemes for surgical instruments, calculating machines and other office and data processing equipment have been approved. Among electrical engineering industries, electric lamps, fluorescent lamps, radio receivers, electric fans, air conditioners, house service meters, aluminium conductors, power cables, electric motors, power transformers, measuring instruments and switch gear and control gear recorded increase in production. Items such as compressors (sealed unit), starting relays for air-conditioners, radio valves, storage batteries for fork lift trucks, etc., were produced for the first time. The production of machine tools is expected to increase to Rs. 8 crores and nearly half of this would be in the private sector. New machine tools produced were Ram Turret milling machines, foundry moulding machines, hydraulic presses, gas cutting machines and depressed centre wheels. The production of scientific instruments also maintained steady progress and items like clinical thermometers, box cameras, theodolites and microscopes registered significant increase.

The Nahan Foundry, Himachal Pradesh, originally established in 1872 as a private organisation, was taken over by the Government of India in 1952 from the erstwhile Sirmur State and formed into a Government company (authorised capital Rs. 1 crore). The foundry manufactures mainly agricultural implements such as cane-crushers. It also produces sleepers for the Railways and cast iron saddles and anchors for the Posts and Telegraphs Department. Production during 1960-61 amounted to 3,182 tons against 3,067 tons in 1959-60. Following the recommendation of an expert committee, steps are being taken to modernise the foundry and diversify production which will include electric motors, railway stores and so on.

The first batch of predominantly Indian lathes were produced in May 1956 in the machine tool factory at Jalahalli near Bangalore, now a Government of India undertaking, the Hindustan Machine Tools Limited. The factory produced, in 1961, 1,198 machines including 571 lathes, 393 milling machines, 219 radial drills, 7 grinding machines and 8 special purpose machines. The Plan target for 1960-61 (400 machines) was already exceeded in 1957-58. In collaboration with European machine tool manufacturers, diversification of production has been effected and a project for the construction of a second machine tool production unit at Bangalore so as to raise production capacity to 2,000 machines per annum, was undertaken. The second machine tool factory was completed in May 1961. A third machine tool factory (capacity 1,000 tools) will be set up at Pinjore (Punjab). The Company has also undertaken a project, in collaboration with a Japanese firm, to set up a watch factory (capital cost Rs. 2.5 crores; capacity 2,40,000 watches per annum). Ladies' and gents' wrist watches assembled out of imported components have been released for sale.

The Praga Tools Corporation Ltd., Hyderabad, of which majority shares are held by the Union Government and the Andhra Pradesh Government, also produced, in 1960-61, Rs. 48 lakhs worth of tools and have plans for expansion.

To meet the requirements of the Posts and Telegraphs Department of telephone cables, the Hindustan Cables Factory, established at Rupnarainpur, West Bengal, began production in 1954. It already exceeded its planned annual capacity of 470 miles of cables in 1956-57. In 1960-61 the factory produced 1,077 miles of cables (value Rs. 1.5 crores) against 691 miles of cables (value Rs. 1.15 crores) in 1959-60. Since July 1960 the factory has also been producing coaxial cables.

The history of the National Instruments Factory, Calcutta, dates from 1830. During World War II, it was converted into a full-fledged instruments factory. In June 1957, it was converted into a Government company called the National Instruments Ltd. It produces 250 types of scientific and precision instruments, including hydrometers, measuring cylinders, barometers and monometers. There has been a progressive increase in the production of items like thermometers, compasses, vacuum gauges and so on. During 1961, Rs. 58.25 lakhs worth of instruments were produced in the factory. The factory has undertaken an expansion programme in various items including cameras.

The ophthalmic glass project, to be set up at Durgapur (estimated cost Rs. 3.5 crores), with technical collaboration from USSR, has been transferred from the Heavy Engineering Corporation to the National Instruments Ltd. The factory is likely to start production in 1963.

The development programme of the Chittaranjan Locomotive Works included the establishment of a heavy steel foundry, so that the requirements of heavy castings for the railways might be secured entirely from within the country. A 7,000-ton capacity foundry is being set up accordingly. Similarly, the programme of the NIDC included a provision of Rs. 15 crores

for heavy foundries and forgeshops and for heavy structural shops. The heavy machinery industries provided in the public sector in the Second Plan were : manufacture of electrical equipment (Rs. 20 crores), expansion of Hindustan Machine Tools (Rs. 2 crores) and manufacture of industrial machinery and machine tools (NIDC Rs. 10 crores).

For the manufacture of heavy electrical equipment, a consultant's agreement was reached with a British firm. A wholly Government company, the Heavy Electricals (India) Ltd., (authorised capital Rs. 30 crores), was formed in August 1956. The plant is being erected at Bhopal. Investment in about seven to eight years (first phase) is estimated at Rs. 21 crores, and may eventually go upto Rs. 45.5 crores (excluding the cost of township). Certain sections of the plant such as transformers, switchgears, thermal welders, etc., have started production from July 1960. More basic items of equipment like hydraulic turbines and generators, and generators for diesel sets will be produced in the early years of the Third Plan. A training school for 3,000 apprentices has been set up. Graduate engineer trainees are being sent for training in UK. An annual output worth Rs. 25 crores is being aimed at. A further expansion of output Rs. 80 crores by the end of the Fourth Plan is now being considered.

The production of heavy industrial machinery is being specially fostered by the National Industrial Development Corporation (set up in October 1954 as a Government-owned company). The Corporation has completed examination of a number of projects relating to primary intermediates, and basic organic chemicals, cinema and X-ray film, newspaper and so on. Loans totalling Rs. 22.29 crores were sanctioned to jute textile and machine tool units till September 1961. The Corporation also develops projects for crucial industrial raw materials such as sulphur from pyrites. An agreement was reached in 1957 with the Government of the USSR for assistance in establishing a heavy machine-building plant at Hatia near Ranchi in Bihar (capacity 80,000 tons per annum), a coal mining machinery plant (capacity 45,000 tons) and an optical glass factory (both to be located at Durgapur in West Bengal). Adjacent to the heavy machine-building plant will be set up, with Czech assistance, a foundry forge plant, to serve as its metallurgical base. A body called the Heavy Engineering Corporation (authorised capital Rs. 50 crores) was formed in December 1958 to administer these projects as also the heavy machines tool building plant (capacity 10,000 tons) to be set up with credit and technical cooperation from the Government of Czechoslovakia. Preparatory work in respect of these projects is in progress.

Locomotives and Coaches

As part of a plan to achieve self-sufficiency in locomotives, the Government in the Ministry of Railways have established a locomotive factory at Chittaranjan in West Bengal. Originally designed to produce 120 locomotives and 50 spare boilers a year, the Chittaranjan Locomotive Works have been expanded and now produce about 168 WG type locomotives a year, which is the equivalent of over 200 standard-type locomotives. In 1960-61 the factory turned out 173 locomotives. Eventually, the aim is to manufacture 300 standard-size locomotives a year. Additional capacity is being developed for producing 60 electric locomotives a year. Besides, the Government-assisted Tata Engineering and Locomotive Works delivered 106 locomotives in 1959-60 and 99 in 1960-61. India has become self-sufficient in respect of steam locomotives and may even export them. The same is true of wagons and coaches.

The State-owned Integral Coach Factory at Perambur went into production in October 1955. In 1959-60, 448 coaches were produced and 583 were expected to be delivered during 1960-61. Second shift working in the factory has been introduced.

Shipbuilding

The Visakhapatnam shipyard was acquired by the Government from the Scindia Steamship Navigation Company in March 1952. The management was entrusted to the Hindustan Shipyard Ltd., now wholly owned by the Government. The shipyard can build four modern diesel-propelled ships a year. The first ship built in the yard was launched in March 1948. The shipyard is now manned entirely by Indian personnel.

So far, 27 ocean-going ships and 3 small craft in addition to a mooring vessel (aggregate grt 1,45,304) have been built here. The first and second phases of a Rs. 2.60-crore development programme of the shipyard are almost complete. During the Second Plan period 75,000 to 90,000 GRT were proposed to be produced (investment Rs. 9.8 crores) against 50,000 GRT during the First Plan period (investment Rs. 6 crores). A second shipyard is now proposed to be built at Cochin with initial shipbuilding capacity of 60,000 GRT per year, to be later raised to 80,000 GRT per year. Land is being acquired for the purpose and a sum of Rs. 20 crores has been provided in the Third Plan for the project. A Technical Mission from the UK. visited the country in this connection in 1957 and submitted a project report in April 1958.

Aircraft

The Hindustan Aircraft Limited has been dealt with in the chapter on 'Defence'.

Chemicals and Drugs

World War I gave a considerable stimulus to the chemical industry in India. Yet India was largely dependent on imports of chemicals on the eve of World War II which gave the industry further impetus. Since Independence, steady progress has been made in the development of the chemical industry. The establishment of the Sindri factory in the public sector was a significant development in this direction. In the private sector, 60 companies dealing with chemical industries came into existence during 1946-50. The development of the chemicals and drugs industry during the First and Second Plan periods has already been outlined in an earlier section. During 1961 production went up in the case of sulphuric acid, caustic soda, soda ash, calcium carbide and bleaching powder. Potassium permanganate was produced for the first time as also organic chemicals like butyl alcohol, butyl acetate, plasticisers, bakers, yeast and the plastic raw material PVC. A marked increase in the production of phenol formaldehyde resins, polythene and phenolic laminates was recorded. A major bottleneck, the complete dependence on imported intermediates, would be largely overcome with the completion of the projects of the Indian Drugs and Pharmaceuticals Ltd. and the Hindustan Organic Chemicals Ltd. During the year, Vitamin B₆ and C were produced for the first time, and manufacture of tetracycline and oxytetracycline was commenced. A significant increase was recorded in the production of penicillin, tetracyclines, sulpha drugs, nicotinic acids/oxides and vitamin B₁₂. Production of fast colour bases, intermediates, methyl violet and printing pigment emulsion commenced for the first time.

The Government of India have set up a DDT factory in Delhi with the assistance of UNICEF and WHO. The factory, which is managed by the Hindustan Insecticides Ltd. (authorised capital Rs. 1 crore), commenced production in April 1955 and produced 1,466 metric tons of technical DDT during 1959-60. Capacity of the plant was doubled in 1958 and now amounts to 1,400 tons per annum. A second DDT factory (capital cost Rs. 79 lakhs), set up at Alwaye in Kerala (capacity 1,400 tons technical DDT), went into production in April 1958, and produced, during 1959-60,

1,109 tons of technical DDT. Production at the two factories during the ten months ending January 1962 amounted to 2,364 tonnes of technical DDT and 2,858 tonnes of formulated DDT.

The Government have set up a penicillin factory at Pimpri near Poona with the help of UNICEF and UNTAA. Production began in August 1955. The management of the factory vests in the Hindustan Antibiotics Ltd., a Government undertaking with an authorised capital of Rs. 4 crores. During 1960-61, a rate of production of 4,27.6 lakh mega units of penicillin (in finished form for clinical use) a year was achieved including 25.2 lakh mega units processed from imported first crystals.

A streptomycin plant with a capacity of 40-45 tons per year (estimated cost Rs.2,10 lakhs), being set up at Pimpri, will be shortly completed. A proposal for doubling the capacity of this plant to 80-90 tons per year at an additional cost of Rs. 60 lakhs has been approved. A pilot plant for the manufacture of 1.5 tons of tetracyclines per annum has been set up and trial production of oxytetracycline commenced in August 1961. Erection of a plant for the manufacture of 50 tons of Vitamin C per year is under consideration.

Fertilizers

The Sindri fertilizer factory, built by the State at a cost of about Rs. 28 crores is under the management of the Sindri Fertilizers and Chemicals Ltd. It went into production in October 1951. In 1960-61, it produced 3,05,218 m. tons of ammonium sulphate. The scheme to raise the output by about 60 per cent by utilising the entire quantity of 100 lakh cubic feet of gas from the coke oven plant has been completed at a cost of about Rs. 15 crores. At present, the expansion plants are running on one stream only. The expansion scheme envisages the production of 70 tons of urea and 400 tons of ammonium sulphate nitrate (double salt) per day. In 1960-61, the factory produced 10,666 metric tons of urea and 36,000 metric tons of double salt.

A factory is being set up at Nangal (cost Rs. 30 crores) for production of 3,90,000 tons of nitro-limestone (equivalent to 80,000 tons of nitrogen) and 14 to 15 tons of heavy water per annum. The fertilizer part of the factory was commissioned in February 1961 and produced in that year 1,52,409 tons of calcium ammonium nitrate. The heavy water plant is nearing completion. Additional units are to be set up at Neyveli, Rourkela, Trombay and Naharkatiya (Assam) with annual production capacities of 70,000, 80,000, 90,000 and 32,500 tons of nitrogen respectively. The factory at Neyveli will produce urea and that at Rourkela nitro-limestone. The factory at Trombay will produce 97,500 metric tons of urea per year and 2,54,000 m. tons of nitro-phosphate. It will start production in 1964. The Assam factory at Naharkatiya will produce urea (55,000 m. tons) and ammonium phosphate (1 lakh m. tons) and will go into production in 1964. Another factory is being designed at Gorakhpur to produce 55,000 m. tons of urea and 1 lakh tons of ammonium sulphate.

The Fertilizer Corporation of India Ltd., was formed in January 1961 (authorised capital Rs. 75 crores) to administer the public sector fertilizer factories including those under construction.

Licenses have also been granted for the setting up of fertilizer plants with capacity from 8,000 to 80,000 tons of nitrogen at various sites such as Visakhapatnam, Kothagudam (AP), Hanumangarh (Rajasthan), Tuticorin and Ennore (Madras). In its third stage of expansion, the factory at Alwaye envisages the production of 66,000 tons of ammonium

sulphate, 99,000 tons of ammonium phosphate, and 16,500 tons of ammonium chloride per annum. The scheme will cost Rs. 10 crores, to be financed partly by the Union Government.

Oil

At the beginning of the Second Plan, the country's resources of oil were still poorly developed, about 66 lakh tons out of her total annual requirement of 70 lakh tons being met from imports. The only producing oilfield was in Assam, around Digboi. Drilling is in progress in the Hoshiarpur region of the Punjab, near Rudrasagar in Assam, near Cambay, Ankleshwar and Kalol regions in Gujarat and Ujhani (Badaun) in UP, under the auspices of the Oil and Natural Gas Commission which was made a statutory commission in October 1959. Geological and geophysical surveys are being carried out in the Punjab, Rajasthan, Gujarat, UP, West Bengal and Assam. The search for oil is being carried out with assistance from certain foreign countries. Oil was struck at Lunej (Cambay), Ankleshwar and Kalol in Gujarat and Rudrasagar in Assam where drilling operations have been intensified.

At the commencement of the First Plan, practically the entire demand of the country for petroleum products was met by imports, the output of the Assam Oil Company's refinery at Digboi having been a little more than 5 per cent of the total requirements. The establishment of three refineries was accepted as part of the First Plan : two were set up at Trombay (near Bombay) by the Standard Vacuum Oil Company of New York and the Burmah-Shell Group of London, respectively, and the third by the Caltex Company at Visakhapatnam. The annual production capacity of all the refineries at the end of 1957 was about 43 lakh tons in terms of crude processed petroleum. The pattern of production of these refineries was revised in 1958 to increase the output of kerosene and diesel oils to meet the country's urgent requirements. The present throughput of all these refineries amounts to about 60 lakh tons.

The Indian Oil Company Ltd., a wholly Government-owned company, was incorporated in September 1959 (authorised capital Rs. 12 crores) for the marketing and distribution of petroleum products in the country. The company will take up at refinery points the products of the public sector refineries (totalling about 27.5 lakh tons per annum) being set up at Nunmati in Assam and at Barauni in Bihar. This company will also handle imports of deficit petroleum products, such as kerosene, HSD oil, aviation turbine fuel etc. The company entered into a contract in July 1960 with the Soviet Trade Organisation for the import of petroleum products during a period of four years against payment in non-convertible rupees. The Company have acquired installations at Bombay, Cochin, and Visakhapatnam and have also taken up the construction of bulk storage facilities and up-country depots at important consumer points.

The Oil India Ltd. in which the Government of India and Burmah Oil Company have equal shares, was incorporated in February 1959, for exploration and production of petroleum and crude oil (including natural gas) and for the construction of pipelines to the two refineries proposed to be set up in public sector. Commercial production of crude oil is expected to start by the middle of 1962.

The public sector refinery at Nunmati (near Gauhati,) with a refining capacity of 7.5 lakh tons, which is being set up with the collaboration of the Rumanian authorities, is nearing completion. This refinery is expected to be on full stream in 1962. The estimated total cost of the refinery is about Rs. 17.70 crores.

The refinery at Barauni is being established in collaboration with the USSR authorities, with a refining capacity of 20 lakh tons per annum

The cost of technical assistance and equipment to be supplied by USSR is covered by a credit of 100 million roubles (about Rs. 11·9 crores). The total cost of the refinery may be of the order of Rs. 41 crores. The first 10-lakh-ton unit is scheduled to be commissioned by December 1962; and the second 10-lakh-ton unit by April 1963. The full refinery, including the kerosene unit and the lube-oil processing unit is scheduled to be on full stream by April 1964.

It has been decided to set up, with financial help from USSR, a refinery with a capacity of about 20 lakh tons per annum at Koyali in Gujarat to process the oil discovered in that region.

A Government company, the Indian Refineries Private Ltd. (authorised capital Rs. 30 crores), was incorporated in August 1958 to operate the two new refineries.

Coal and Lignite

Coal mining was first started at Raniganj, Bengal, in 1814. The construction of railways gave the industry a great impetus and a number of joint-stock companies, mostly European owned and managed, came into the field. The production of coal showed rapid increases after 1868, as shown below.

TABLE 183
PRODUCTION OF COAL

Year	Production (lakh tons)
1868	5
1880	10
1890	22
1900	61
1910	1,20
1920	1,80
1930	2,38
1940	2,51
1946	2,60
1950	3,20
1955	3,82
1956	3,94
1957	4,35
1958	4,53
1959	4,70
1960	5,18
1961 (provisional)	5,58

The target of coal production at the end of the Second Plan was 6,00 lakh tons; of the additional output of 2,20 lakh tons, 1,00 lakh tons were allotted to the private sector and 1,20 lakh tons to the public sector (1,05 lakh tons to the National Coal Development Corporation Ltd. a Central Government company set up in October 1956; and 15 lakh tons to the Singareni Collieries Company Ltd., in which the Central Government and the Government of Andhra Pradesh are collaborating).

During the Second Plan period, the NCDC fulfilled the target and raised its rate of annual production to 1,37 lakh tons in the last quarter. The target set for the Corporation was a rate of 1,35 lakh tons per year. Production during January-November 1961 amounted to 70·7 lakh m. tons.

The Singareni Collieries Company Ltd. also raised its output to an annual rate of 32 lakh tons in December 1960, thus exceeding the target rate. The production during January to November 1961, was 25,18,042 m. tons.

In the Third Plan the target of coal raisings has been fixed at 9,70 lakh tons by 1965-66—an additional output of about 3,70 lakh tons per annum.

Of this, the private sector has been allotted 1,70 lakh tons and the public sector 2,00 lakh tons.

For the supply of coking coal to the Bhilai and Rourkela steel plants, a coal washing plant, costing about Rs. 2.46 crores and with an annual capacity of 16 lakh tons of washed coal, was set up at Kargali, District Hazaribagh (Bihar) in November 1958. Production of washed coal in the last quarter of 1961 correspond to an annual rate of 12 lakh tons.

The Integrated Neyveli Lignite Project envisages the mining of 35 lakh tons of lignite per annum to be utilised as follows:

15 lakh tons	2,50,000 kw of thermal power.
5 lakh tons	1,52,000 tons of urea to be utilised as chemical fertilizer.
15 lakh tons	7,14,000 tons of raw lignite briquettes to yield on carbonisation 3,80,000 tons of carbonised briquettes for use as domestic and industrial fuel.

The lignite bed was exposed, after removing 180 feet of overburden, in August 1961.

The Neyveli thermal power station is one of the industrial enterprises being set up under the Indo-Soviet 500 million rouble credit agreement of November 1957. The first unit of the power station is expected to be commissioned in 1962 and the entire power station in 1964. The fertilizer plant at Neyveli for the production of 1,52,000 tons of urea per annum is also expected to commence full production by 1964. A clay washing plant at Neyveli was commissioned in December 1961.

Other Minerals

In 1960, nearly 6,52,000 persons were engaged in mining (including coal mining) and there were 3,056 working mines excluding minor minerals and minerals prescribed under the Atomic Energy Act, 1948. In India concessions for all minerals, except petroleum and natural gas, are granted in accordance with the provisions of the Mines and Minerals (Regulation and Development) Act, 1957. The more important mining centres are in Bihar, Orissa, West Bengal, Rajasthan, Mysore and Andhra Pradesh and the more extensively worked minerals are coal (851 collieries), mica (720 mines), manganese ore (537 mines), iron ore (243 mines), gypsum (34 mines), and limestone (over 147 mines).

The value of mineral production in India during 1960 was Rs. 163 crores as against Rs. 143 crores in 1959—an increase of about 14 per cent. The total value of mineral production (including coal) in India since 1901 is given in the following table.

TABLE 184
VALUE OF MINERAL PRODUCTION IN INDIA (1901-1960)

Year	Value (Rs. lakhs)
1901	6,70
1911	11,40
1921	32,90
1931	23,90
1939	20,20
1948*	64,00
1950	71,60
1955	94,40
1956	106,90
1957	129,30
1958	138,30
1959	142,90
1960	163,20

*From 1948 onwards the value of mineral production is calculated on the pits, mouth value basis.

The quantity index of mineral production in 1960 stood at 133·2 (base 1951=100) compared to 125·7 in 1959. Table 185 shows the output and value of the principal minerals in 1959 and 1960.

TABLE 185
QUANTITY AND VALUE OF MINERALS PRODUCED

	Unit of quantity	1959		1960	
		Quantity	Value (in thousand rupees)	Quantity	Value (in thousand rupees)
Metallic Minerals					
Ferrous					
Chromite	Metric ton	95,596	53,64	1,00,112	57,33
Iron ore	Thousand tons	79,82	5,74,61	1,06,83	9,02,85
Manganese ore ..	Thousand tons	11,78	9,16,15	11,99	8,27,43
Non-ferrous					
Bauxite	Metric ton	2,17,991	22,12	3,87,380	40,89
Copper ore	Thousand tons	4,04	2,13,97	4,48	2,37,36
Gold	Kilogram	5,144	5,36,04	4,995	5,66,74
Ilmenite	Thousand tons	3,03	1,78,41	2,50	1,46,95
Lead (concentrates) ..	Ton	6,488	23,18	6,245	22,31

PLANTATION INDUSTRIES

Between 1834 and 1865, tea was cultivated in Government plantations. Since 1865, tea plantations have been mainly financed and managed by European business firms. Some data regarding the extent of tea plantation are given below.

TABLE 186
TEA—AREA AND PRODUCTION (1885-1936)

Year	Area under tea (acres)	Production (lakh lbs.)
1885	2,84,000	—
1896	4,33,133	—
1910	5,64,000	26,30
1935-36	7,81,230	39,50

Systematic cultivation of coffee dates from 1830 and the industry reached its peak in 1862. Progress was hampered at this stage owing to

the appearance of a destructive beetle and later by competition from Brazilian coffee. Some figures showing the extent of coffee cultivation are given below.

TABLE 187
COFFEE—AREA UNDER CULTIVATION (1896-1939)

Year	Area under coffee (acres)
1896	2,28,000
1903	1,04,800
1913-14	2,03,677
1935-39 (average)	1,86,000

Plantation of rubber is of comparatively recent origin. The output amounted to 10,000 tons in 1931 and 12,000 tons in 1940. The area under rubber in 1940-41 amounted to 1,38,000 acres.

Tea, coffee and rubber plantations together cover about 0.4 per cent of the cropped area and are concentrated mainly in the north-east and along the south-west coast. They provide employment to over 12 lakh persons and India earns a large amount of foreign exchange from their export, tea alone accounting for over Rs. 100 crores. Coffee and rubber, which used to be important export commodities, are now largely consumed within the country. The cropped area and the production of each of the three plantation industries in recent years are given in the table below.

TABLE 188
PLANTATION INDUSTRIES

Year	Area under cultivation (thousand acres)	Production (thousand lbs.)

(a) In terms of cured coffee.

*Provisional.

In 1954, Rs. 113 crores were invested in the tea industry which employed 9,93,594 persons (including 64,371 temporarily employed). The number of tea plantations in 1957 was 6,622 and the number of persons employed 9,31,196 (including 76,581 temporarily employed). There were in 1955-56, 12,805 coffee estates employing 2,27,233 persons (including 86,023 temporarily employed). At the end of 1956 there were 18,175 rubber estates which employed on an average 63,034 persons (including 19,660 temporarily employed).

The Plantation Inquiry Commission, appointed in April 1954 to conduct a comprehensive inquiry into the economic conditions and problems of the tea, coffee and rubber industries, submitted their reports in 1956 and made various recommendations*. High priority has been given to the development of the plantation industries in the Third Plan. Production of tea is to be raised from about 72,50 lakh lbs. to 90,00 lakh lbs., of coffee from 48,000 tons to 80,000 tons, and of rubber from 26,400 tons to 45,000 tons. Export of tea will rise from 46,50 lakh lbs. to 55,00 lakh lbs. and that of coffee will be doubled during the Third Plan. It was decided in September 1958 to reduce the export duty on tea and to fix excise duty at different rates for different zones. From March 1959 the export duty was further reduced to 24 nP. per lb. From October 1959 the Indian Tea Board has been subsidising the cost of fertilizers and transport charges of the tea gardens in Cachar and Tripura. The fertilizer subsidy was suspended in October 1961. Loans are also granted to the weaker gardens for repairs and renovation of plant and machinery. Government have decided to make available a Rs. 5-crore revolving fund to the Tea Board for granting long-term loans to estates for replanting, replacement and/or extension of old tea areas. An expert committee was set up in August 1958 to review the system of marketing of coffee. The committee's report was submitted to the Government in 1959, and the Government's decisions have been announced since. The central excise duty on coffee was raised with effect from March 1961. Under the Coffee Board's replanting subsidy scheme, 7,421 acres were replanted and Rs. 12.9 lakhs of subsidy disbursed till October 1959. A replanting subsidy scheme was put into operation by the Rubber Board in 1957; 10,635 acres have been replanted under the scheme so far. Conditions for the grant of subsidy to small estates were liberalised in 1958. Consumption of rubber has been increasing rapidly and may rise to 1 lakh tons by the end of Third Plan. Besides increasing the production of natural rubber, it is also proposed to produce 15,000 tons of reclaimed rubber and about 50,000 tons of synthetic rubber. A synthetic rubber factory, being set up at Bareilly, is expected to go into production in 1962.

SMALL-SCALE AND COTTAGE INDUSTRIES

Although there has been considerable development of large-scale industries, India remains mainly a country of small-scale production. It is estimated that there are about 2 crore persons engaged in cottage industries. The handloom industry alone employs 50 lakh people or nearly as many as are employed in all other organised industries, including large-scale industries, mines and plantations.

The work of organising these small industries is primarily the responsibility of the State Governments. To supplement their effort, the Central Government have set up the following bodies : the All-India Khadi and Village Industries Commission; the All-India Handicrafts Board; the All-India Handloom Board; the Small-scale Industries Board; the Coir Board; and the Central Silk Board.

*See 'INDIA 1958', p. 345.

Financial assistance to small industries* is given both by the Government and banking institutions. Recently, measures were taken to make this assistance more effective. During 1960-61 loans and grants totalling Rs. 7.70 crores were sanctioned to State Governments and Union Territories for the development of small-scale industries. Sanction was given till March 1961 for the establishment of 105 industrial estates, which seek to remove small industrial units from urban areas and provide them at the new sites with factory space and common facilities for efficient working. One hundred estates were to be set up by the end of the Second Plan (total cost Rs. 12.8 crores—Rs. 11.12 crores till the end of the Second Plan on 97 estates). Fifty-two industrial estates were functioning till March 1961, and 14 more had been completed. The entire cost of starting these estates is advanced as loans by the Centre to the State Governments, Rs. 10.70 crores had been spent on the development of the industrial estates till the end of 1960-61.

A programme of technical assistance to small industries, known as the Industrial Extension Service, has been undertaken directly by the Central Government. Sixteen small industries service institutes (one for each State except Gujarat where there is a branch institute and one in the Union territory of Delhi), and four branch institutes have been set up. Seventy-two industrial extension centres were sanctioned till March 1961, of which 56 were already working; these offer technical facilities to various trades. Experts are also brought in from abroad to help these industries in technical matters and Indian technicians sent for training abroad, both with assistance from the Ford Foundation.

Another significant development was the establishment of the National Small Industries Corporation in February 1955. Its Contract Division has established liaison with Government purchase departments and has evolved a workable arrangement for giving contracts to small units. The number of small units so enlisted is 8,342. Central Government contracts received by cottage and small-scale industries under this scheme totalled over Rs. 8 crores. The Corporation has also been guaranteeing, since January 1959, credits to these small units offered by the State Bank of India for execution of the orders. The Corporation has introduced a scheme for hire-purchase of machinery and equipment needed by small units; machinery worth Rs. 5.31 crores was delivered under the scheme to small units so far. The terms and conditions have been further liberalised but from August 1960 a service charge of 5% of the value of the machines has been introduced. Decentralisation was achieved through four subsidiary corporations set up in 1957 at Bombay, Calcutta, Madras and Delhi. The activities of the Corporation, which also helps in the setting up of small industrial units as ancillary to large ones, are financed by loans and grants by the Central Government. A credit of \$ 10 million (Rs. 4.76 crores) has been obtained by the Corporation from the Development Loan Fund of the USA. An industrial design exhibition called 'Design Today in America and Europe', was organised by the Corporation in New Delhi and other centres during 1959 and 1960.

Special attention has been paid by the All-India Handicrafts Board, set up in 1952, to the improvement of production and marketing of handicrafts in India and abroad. The Board is running 19 pilot centres—4 for training, 3 for training-cum-production, 3 for research experimentation, 5 for revival of traditional crafts and 4 for experimentation and production. About 115 cottage industries emporia have been set up all over the country.

*The definition of 'small-scale' industries has been revised so as to include all industrial units with a capital of not more than Rs. 5 lakhs, irrespective of the number of persons employed.

Rs. 5 lakhs have been allocated in the Third Plan to finance artisans and their co-operatives through the emporia. A number of economic surveys of various regional handicraft industries have been carried out. The services of foreign experts are utilised from time to time for advising on different aspects of the industry. The Indian Handicrafts Development Corporation was set up in April 1958 to take over some of the functions of the Board in respect of export promotion. Schemes for inspection of various handicrafts for quality control have been finalised. Mobile exhibition units have been sent round the country and funds allocated for the exhibition of metalware, bambooware, etc. 'Handicrafts weeks' are held from time to time in different States. Publicity is given to Indian handicrafts in various international fairs. Production of handicrafts has gone up and is now estimated at about Rs. 100 crores annually. Exports amount to nearly Rs. 7 crores a year.

The coir industry is mainly carried on on a cottage basis, though some factories employ wooden looms worked by manual labour. Of an estimated annual production of 1,20,000 tons of coir yarn, more than 90 per cent is produced in Kerala. Almost the entire production of about 23,000 tons of manufactured articles comes from that State.

On an average, about 50,000 tons of coir yarn and 21,000 tons of coir products are exported. The Coir Board is engaged in popularising and promoting coir products in India and abroad. In view of the importance of coir products as foreign exchange earner, the overall provision for coir industry under the Second Plan was raised to Rs. 2.3 crores: Rs. 2 crores* for State schemes and Rs. 30 lakhs for Central schemes to be implemented by the Coir Board (including research and marketing). The Third Plan provides for Rs. 3 crores (Rs. 75 lakhs for Central and Rs. 2.25 crores for State schemes). Emphasis in the Third Plan has been laid on improving the quality of production, developing new lines of production and on stepping up of exports. A research institute at Kalavoor, near Alleppey (Kerala), and a regional research station at Uluberia in Howrah district (W Bengal) have been set up. The institute at Kalavoor started functioning in April 1959.

In 1960, the production of raw silk in India (mulberry and non-mulberry) amounted to 15 lakh kilograms. Nearly half the quantity is produced in Mysore State followed (in order of importance) by the States of West Bengal, Assam, Jammu and Kashmir, Madhya Pradesh and Bihar. The Central Silk Board, established in 1949, looks after the promotion of sericulture and silk industry. The Central Sericultural Research Station, Berhampore (West Bengal), was established in 1943. It has a sub-station at Kalimpong (West Bengal). The station is Centrally-administered and conducts research in improved methods of production, better and disease-free mulberry leaves and seeds. The station is being expanded on modern lines. The Board has set up an All-India Sericultural Training Institute at Mysore and a Central Foreign Race Seed Station at Srinagar. An eminent geneticist from Japan conducted a survey of the problems of research in Indian sericulture in 1957. The services of two other sericulture experts have since been obtained from Japan under the Colombo Plan for a period of one year.

During the First and Second Plan periods, Rs. 218 crores (Rs. 175 crores during Second Plan) were spent by the Government for the development of the village and small industries. Rs. 264 crores have been provided in the Third Plan for the purpose (about Rs. 141 crores for the schemes of the States and Union Territories and the rest for Central Government schemes and programmes). The industry-wise allocation is as follows.

*Later reduced to Rs. 1.48 crores.

TABLE 189
OUTLAY ON VILLAGE AND SMALL INDUSTRIES (THIRD PLAN)

(in crores of rupees)

Industry	Second Plan (estimated expenditure)	Third Plan		
		States and Union Territories	Centre	Total outlay
Handloom	29.7	31.0	3.0	34.0
Powerlooms in the handloom sector	2.0	—	4.0	4.0
Khadi—traditional	82.4	3.4	37.0	92.4
—ambar			32.0

Small-scale industries	44.4	62.6	22.0	84.6
Industrial estates	11.6	30.2	—	30.2
Total	180.0*	141.2	122.8	264.0

A five-member delegation of Japanese experts on cottage and small industries visited India in 1959 to advise the Government regarding the lines on which further development might take place.

Khadi Industry

Financial assistance to the khadi industry is given by the All-India Khadi and Village Industries Commission through co-operative societies, registered institutions, State Governments and the statutory boards set up by the State Governments. The value of khadi produced with traditional *charkha* yarn during 1959-60 is estimated at Rs. 13 crores. To encourage the production of khadi a rebate is allowed to the consumer at the following rates : 10 nP per rupee on reeled silk khadi; 19 nP per rupee on cotton khadi (20 nP from May 1962). A subsidy of 75 per cent of weaving charges, or 31 nP per square yard, whichever is less, is given to those who produce khadi for their own use. A sliding scale of subsidy of 5 per cent to 1 per cent of the value of production and of 3 per cent to 1 per cent of the value of sales, is given to centres engaged in the production and sale of khadi.

These measures have led to a significant improvement in the production and sale of khadi, as the following figures will indicate.

TABLE 190
PRODUCTION AND SALE OF KHADI

(in lakhs of rupees)

Year	Value of production	Value of sale
1952-53	1.94	1.95
1955-56	4.79	4.26
1956-57	7.29	5.95
1957-58	10.16	7.72
1958-59	9.51	8.61
1959-60	14.14	10.60

Ambar Charkha

A four-spindle manually operated charkha, known as Ambar charkha, was evolved in 1956 and a programme for the manufacture and distribution of these Ambar charkhas, and for the training of instructors, carpenters,

*Actual outlay anticipated to be of the order of Rs. 175 crores.

spinners and others was introduced in 1956-57. Till June, 1961, 3,78,309 Ambar charkhas were introduced.

Further development of khadi in the Third Plan will be mainly along the lines of the reoriented programme drawn up by the Khadi and Village Industries Commission in which the emphasis will primarily be on intensive efforts to secure integrated rural development of selected compact areas or gram *ekais*. It is proposed to organise 3,000 gram *ekais*, each covering a selected village or group of villages having a population of 5,000 each. Local plans for the maximum exploitation of available resources for local use will be prepared with a view to achieving local self-sufficiency to the extent possible. These plans are to be executed by registered institutions as well as service co-operatives and gram panchayats. The responsibility of the Commission will be largely limited to provision of financial and technical assistance and training facilities and the preparation and execution of the programmes will be left to the State boards, the institutions and the local agencies at the village level. Gradual reduction of dependence on urban markets and correspondingly greater production for local use and improving the techniques of spinning and weaving so as to raise the output and earnings, is an aim. By the end of the Third Plan period, about 40-50 per cent of the khadi production is expected to be marketed locally and the prices to be reduced by 15-20 per cent. Certain improvements in the Ambar charkha have already been introduced, which are expected to raise the productivity from 1 hank per hour to 1.5 hanks per hour. These improvements are at present undergoing field trials. A committee has also been set up to suggest measures for increasing the sales of hand-spun yarn and khadi.

CHAPTER XXV

TRADE

EXTERNAL TRADE

The total value of India's foreign trade (imports and exports including re-exports) during 1960-61 amounted to Rs. 1,651·53 crores—imports Rs. 1,003·20 crores and exports Rs. 648·33 crores. The value of India's imports and exports and the total value of her foreign trade since 1950-51 are given below.

TABLE 191
FOREIGN TRADE OF INDIA*
(By sea, air and land)

Year	Imports* (less transit trade)	Exports* (less transit trade)	Total value of foreign trade
1950-51	650·43	600·68	1,251·11
1955-56	774·35	608·91	1,383·26
1956-57	902·91	619·62	1,522·53
1957-58	1,036·40	635·14	1,671·54
1958-59	903·64	572·64	1,476·28
1959-60	956·31	639·36	1,595·67
1960-61	1,003·20	648·33	1,651·53

As will be seen from the above figures, India was having an adverse balance of merchandise trade during these years. The balance of trade since 1950-51 is shown below.

TABLE 192
BALANCE OF MERCHANDISE TRADE*

Year	(in crores of rupees)
1950-51	— 49·75
1955-56	—165·44
1956-57	—283·29
1957-58	—401·26
1958-59	—331·00
1959-60	—316·95
1960-61	—354·87

Balance of Payments

The following table shows the current balance of payments position since 1956-57 after taking into account net invisible receipts and official donations.†

*Source: Department of Commercial Intelligence and Statistics (See Reserve Bank of India, *Report on Currency and Finance for the year 1960-61*, statement 82).

NOTE:- Total sea, air and land trade but excludes land trade with Nepal, Tibet, Sikkim and Bhutan. Transit and transshipment trade and ships' stores are excluded; includes treasure-gold throughout the period and silver up to December 1956. From January 1957 silver is included under merchandise. Excludes certain consignments of foodgrains, and stores imported on Government account awaiting adjustment. Exports include re-exports. Imports are on c.i.f. basis and exports on f.o.b. basis inclusive of export duty. Figures thus differ from those given in earlier editions of 'India.'

† The figures of imports and exports in this and the following sections are based on Exchange Control records and are not comparable with those given by the Department of Commercial Intelligence and Statistics in *The Accounts Relating to the Foreign (Sea, Air and Land) Trade of India*, now called *Monthly Statistics of the Foreign Trade of India*. For an explanation of the difference, please see *India's Balance of Payments 1948-49—1955-56* (Reserve Bank of India, Bombay, pp. 7 and 27-28).

TABLE 193
CURRENT BALANCE OF PAYMENTS

(in crores of rupees)

	1956-57	1958-59	1959-60	1960-61 (preliminary)	1961-62 (April- September) (preliminary)
Imports c.i.f. (private and government)	1,099.5	1,029.0	924.5	1,088.0	492.0
Exports f.o.b. ..	635.2	576.3	623.2	631.9	320.3
Trade balance ..	-464.3	-452.7	-301.3	-456.1	-171.7
Official donations	39.5	35.8	37.1	45.4*	19.6
Other invisibles (net) ..	112.5	90.8	75.7	45.6	- 6.6
Current balance of payments (net)	-312.3	-326.1	-182.6 †	-365.1	-158.7

The marked deterioration in the balance of payments position in 1960-61 was mainly the result of considerably larger imports both on Government and private accounts. During the first half of 1961-62 the trade balance as well as the deficit in balance of payments was proportionately much less. The following table shows the manner in which the current balance of payments deficit was financed.

TABLE 194
FINANCING BALANCE OF PAYMENTS DEFICIT

(in crores of rupees)

	1956-57	1958-59	1959-60	1960-61 (preliminary)	1961-62 (April- September) (preliminary)
Official loans (net)	30.7	219.7	184.3	240.2	133.5
Drawings on IMF	54.7	—	-23.8	-10.7	58.3
Other capital transactions	4.0	88.0	21.7	75.7	-51.8
Draft on foreign exchange reserves**	221.3	42.3	16.1	59.2	11.1
Errors and omissions	1.6	-23.9	-15.7	0.7	7.6
Current balance of payments deficit	312.3	326.1	182.6	365.1	158.7

Imports

The growing maintenance needs of the economy pushed up import payments from Rs. 925 crores in 1959-60 to Rs. 1,088 crores in 1960-61 despite the restrictive import policy. Private imports of metals, machinery and vehicles had to be allowed to rise substantially, as also to a less degree those of electrical goods. Also raw materials like chemicals and dyes had to be imported in larger quantities. Higher imports of raw cotton had to be allowed owing to shortfall in domestic production. Imports of consumer goods and other miscellaneous items rose very little while payments for mineral oils declined by one-twelfth. Food imports on Government account increased by Rs. 87 crores, entirely under the PL 480 programme. Thus total Government imports rose by Rs. 80 crores in 1960-61.

*Includes Rs. 8.4 crores earmarked by US to finance export of goods and services to Nepal under aid programme to that country.

† Including non-monetary gold movement worth Rs. 5.9 crores.

**Variations in reserves include movements in the foreign assets of the Reserve Bank of India as well as in Government balances held abroad.

Imports on Government Account

The following table shows the particulars of Government imports since 1956-57.

TABLE 195
IMPORTS ON GOVERNMENT ACCOUNT

(in crores of rupees)

	1956-57	1957-58	1958-59	1959-60	1960-61 (preliminary)	1961-62 (April-September) (preliminary)
Foodgrains ..	107.6	165.3	150.7	151.6	238.4	74.1
Capital equipment for Government projects	52.5	104.7	144.2	94.9	98.1	43.4
Iron and steel ..	15.1	49.7	42.7	15.5	20.7	11.5

Capital goods ..	213.8	141.7	134.3	167.0	96.2
Others	47.0	52.6	24.8	16.8	9.3
TOTAL ..	810.9*	503.6	508.1	591.5	308.6

Exports

At Rs. 632 crores, export earnings in 1960-61 were Rs. 3 crores less than the Second Plan peak of Rs. 635 crores in 1956-57. The small rise of Rs. 9 crores over the previous year was very unencouraging in view of the numerous export promotion measures in force, the virtual absence of Chinese competition and the general buoyancy in economic activity abroad.

Jute manufactures earned Rs. 25 crores more, metallic ores (including manganese) brought in Rs. 6 crores more and earnings from spices (including pepper) and cashew kernels improved by Rs. 3 crores and Rs. 2 crores respectively. All other major items of exports recorded a decline; oilseeds and oilcakes and vegetable oils each brought in about Rs. 6 crores less, cotton manufactures Rs. 7 crores less and raw and waste cotton and raw hides and skins each earned Rs. 2 crores less. Japan and Czechoslovakia were equally responsible for higher earnings from metallic ores while the

*Revised figure is Rs. 811.9 crores.

USA, Australia and the United Kingdom intake of jute manufactures caused quite high earnings from jute goods, mainly through a rise in prices. Tea, on the other hand, suffered a decline due to lower offtake by the Sudan, the United States and the United Kingdom. Increased purchases by Ceylon and Persian Gulf ports helped push up earnings from spices and pepper. Cotton manufactures earned only about half as much as in the preceding year from the Sudan and the USA and were generally affected by competition from other suppliers. Lower earnings from oils and oilcakes indicated that the shortage of cattlefeed caused by extraordinary drought conditions in Europe had now passed. Earnings from hides and skins declined mainly due to a fall of 25 per cent in exports to the United Kingdom.

TRADE POLICY

Trade policy during and since 1961-62 continued to be characterised by increasing emphasis on export promotion. Even import control policy aimed at stimulating exports through export incentive schemes.

Export promotion has assumed crucial importance in the economy. The successful implementation of the Third Plan depends a great deal on it. The policy of progressive relaxation of control over exports and of organised export promotion, consistent with the internal economy of the country, has been followed during 1961-62. Control over exports of a number of items such as sheep and goats, white cement, certain items of wild life (dead or alive or parts thereof and produce therefrom) has been lifted. Export of ultra marine blue (indigenous), which was formerly not allowed to be exported, is being licensed freely. In order to conserve supplies for internal needs and with a view to checking the rising trend in the internal prices, a full-scale review of export control measures was made and control over the exports of bauxite, tassar silk waste, black buck (white variety), bananas, and handloom fabrics of the variety commonly known as Bleeding Madras has been imposed.

Import Policy

The import policy continued to be restrictive during 1961-62. With a view to stimulating exports, the scope of incentive schemes was extended for the grant of licenses for import of raw material and accessories and in certain cases machinery and capital equipment against exports of manufactured goods. The issue of licences on the basis of 'repeat' licensing scheme introduced in October 1959-March 1960 was continued. With a view to reduce the speculative spurt in prices, imports of certain items continued to be canalised through an agency approved by the Government. The distinction between the dollar and soft currency areas for the purpose of licensing has been removed.

During the licensing period April-September 1961, quotas for established importers were either reduced or banned in the case of as many as 147 items. The basic period for a number of items was extended. During the licensing period October 1961-March 1962, quotas for established importers were further reduced or banned in the case of 120 items. The basic period for a number of items was extended.

The total value of licences issued during April-September 1961 was Rs. 385 crores as against Rs. 334 crores during October 1960-March 1961 and Rs. 459 crores during April-September 1960. Higher licensing in the latter period was the result of introduction of the 'annual licensing scheme', which was discontinued in the subsequent licensing periods due to foreign exchange difficulties.

The import policy, announced in March 1962, fixed the policy again for the whole year 1962-63. This change in the policy period was made on the recommendation of the Import and Export Policy Committee (Mudaliar Committee). While licences will be issued on an annual basis,

only one half of the value of the annual licence can be utilised within the first six months. The policy continues to be restrictive and also attempts to secure a proper balance between 'maintenance' and 'developmental' imports. In view of their increased indigenous production, imports of yeast, arms and ammunition, cartridges cases (filled and empty), argon gas and a few other items have been completely banned.

Quotas of a wide range of items (numbering 55) have been reduced by varying proportions. These include: electric motor starters; tetracycline; weighing machines and parts; oil pipeline and tubes; vitamin C; motor vehicle parts; tape and wire recorders; laboratory balances and weights; microscopes and accessories; certain dyes; electronic valves, condensers, resistances, potentiometers, volume control, tone control, loudspeakers etc.; piston assemblies and so on.

Provision has also been made for the allotment of newsprint as far as possible to meet the requirements of additional circulation of existing newspapers and new newspapers. With a view to helping family planning, quotas for rubber contraceptives and foam tablets have been liberalised. Face value restrictions in respect of certain items have been modified. An Open General Licence for the import of the following five items from Pakistan has been issued: live tortoise; fish (not otherwise specified); fish, salted, wet; raw or salted hides and skins; and kapok. Payment for live tortoise and kapok is to be made in non-convertible Indian rupees.

Export Promotion

To co-ordinate all work relating to the development of India's foreign trade, particularly promotion of exports, a Foreign Trade Board and a Directorate of Export Promotion (as the Board's executive agency in the matter of export promotion) were created in June 1957. The Directorate of Export Promotion now consists of four divisions at headquarters and one each at Bombay, Calcutta and Madras. The Directorate of Export Promotion rendered some direct services such as the framing of simplified rules for a number of items subject to drawback and rebate schemes, the preparation of rules for manufacture-in-bond and subsequent export of items like aluminium products, made from imported ingots, umbrellas, cigarettes, handicrafts and grant of assistance to exporters in securing passport, visa and foreign exchange sanction for *bona fide* trade promotion tours abroad. To stimulate exports, Government have in recent years established Export Promotion Councils for different commodities, namely, (i) cotton textiles; (ii) silk and rayon textiles; (iii) plastics and linoleum; (iv) cashew and pepper; (v) tobacco; (vi) sports goods; (vii) chemical and allied products; (viii) shellac; (ix) leather; (x) engineering goods; (xi) mica; (xii) spices; and (xiii) marine products.

Besides, the Export Promotion Advisory Council was set up to advise on matters relating to export policy and procedure with particular reference to the promotion of exports. The appointment of a Committee of the Cabinet on Exports, a Freight Investigation Board (in place of the former Freight Investigation Bureau) to deal with matters relating to ocean freight, and of the Import and Export Policy Committee, among other things, to make recommendations regarding export promotion, were the important developments during 1961.

The Third Plan envisages export earnings of the order of Rs. 3,700-3,800 crores, or an annual average of about Rs. 740 crores against Rs. 609 crores and Rs. 614 crores during the First and Second Plan periods respectively. Following the recommendations of an expert committee, a State-owned Export Risks Insurance Corporation (authorised capital Rs. 5 crores) was set up in July 1957. The Corporation, with its headquarters at Bombay, offers facilities for insuring risks not normally covered

by commercial insurance companies. The Corporation has opened offices at Calcutta and Madras in order to reach more easily the exporters in other centres. During 1961 the Corporation issued 426 policies undertaking maximum liability for Rs. 13.02 crores.

The Director of Exhibitions looks after visual commercial publicity for Indian goods. During 1961, it participated in international fairs or exhibitions at Leipzig, Casablanca, Poznan (Poland), Kabul, Damascus, Sydney, Mogadiscio (Somalia), Zagreb (Yugoslavia) and Levant, Bari (Italy). Indian exhibitions were organised at Accra, Kuala Lumpur and Singapore. An Export Products Pavilion was set up in New Delhi in December 1959 as a laboratory-cum-show-room. The State Trading Corporation of India took part in international fairs at Leipzig, Plovdiv and Poznan. In addition, wholly Indian exhibitions were organised in British East Africa at Mombasa (Kenya), Dar-es-Salaam (Tanganyika), Kampala (Uganda), and Nairobi (Kenya). Trade centres and show-rooms at important foreign commercial centres continued to give publicity to Indian goods. In 1960 a programme of rotational commodity-wise displays in these show-rooms was launched to give intensive publicity to a selected group of commodities by turn.

TRADE AGREEMENTS

Trade agreements continued to serve as an instrument of reducing the imbalance in the payments situation through increasing export earnings by development of trade with newer markets and in newer commodities. Five agreements were renewed for further periods and four existing agreements were modified. New agreements were concluded with Morocco and Tunisia. A ten-year treaty of trade and commerce with Nepal, which expired on October 31, 1960, was replaced by another. The total number of trade and payments agreements in force at the end of 1960-61 was 26. The treaty with Nepal signed in September 1960 permits, among other things, a continuation of the existing arrangements between the two countries under which goods originating in either country and intended for consumption in the territory of the other are exempted from customs duties and other equivalent charges as well as from quantitative restrictions, with the proviso that Nepal, on revenue considerations, may continue to maintain the existing import and export duties on goods traded with India. The treaty also provides for freedom of transit to goods of both the countries intended for export to, or import from, a third country. The agreement with Pakistan was modified in November 1960 by the addition of a few commodities to the list of goods to be traded. It was also agreed, after the annual review in March 1961, to maintain the same ceilings in 1961-62 as in 1960-61. Agreements were concluded with the UAR (Egyptian region) and Burma for the import of rice within the framework of the existing payments arrangements.

TARIFF

In 1960-61 the Tariff Commission conducted 14 tariff enquiries and two major price enquiries. The tariff enquiries were conducted in respect of wood screws, automobile hand tyre inflators, calcium lactate, engineers' steel files, piston assembly, automobile sparking plugs, power and distribution transformers, sheet glass, plywood and tea chests, aluminium, conductors (bare copper, aluminium, steel reinforced and all aluminium, ball bearings, cotton textile machinery and bicycles, protection to which industries was to expire on December 31, 1960. The major recommendations of the Commission were accepted by Government of India in full for thirteen industries and partially for aluminium. Accordingly, tariff protection to automobile hand tyre inflators, calcium lactate, wood screws and plywood and tea chests, bare copper conductors and electrolytic copper rods was withdrawn from January 1, 1961; protection to ball bearings and sheet glass was extended for a further period of two years and that for aluminium, steel

reinforced and all aluminium conductors, automobile sparking plugs, piston assembly, engineers' steel files, cotton textile machinery, bicycles and power distribution transformers for three years. Aluminium received protection for a further period of four years and the protective duty was maintained at 35 per cent *ad valorem* though the Commission had recommended its reduction to 25 per cent.

The two main price enquiries conducted by the Commission during the year related to the fixation of prices of raw rubber and of ferro-silicon of different grades produced by the Mysore Iron and Steel Works, Bhadravati. In regard to raw rubber, Government did not accept the Commission's recommendation to reduce the price; the recommendations about the levy of additional cess and expansion of credit facilities for financing planting operations, methods of improving yield, etc., were, however, accepted. The Commission recommended a higher price structure for ferro-silicon in view of the increase in manufacturing costs consequent on the rise in electricity rates since 1953, and this was accepted by Government.

DIRECTION OF TRADE

The UK and the USA continued to be India's principal buyers as well as suppliers. During 1961, their shares in India's export trade were 24.7 per cent and 17.3 per cent respectively. The share of the UK in the imports was 19.7 per cent, of the USA 23.6 per cent, and of West Germany 12.1 per cent.

The principal countries to which India exported during 1952 and the values of the exports to each are shown in Table 197.

PATTERN OF TRADE

The principal commodities imported into India during 1952-56, along with their value, are shown in Table 199. The values of the commodities imported during 1957-61 are shown in Table 200. Owing to the adoption of the revised trade classification from January 1957 onwards, the grouping of articles in many cases differs from the earlier pattern.

TABLE 199
IMPORTS OF PRINCIPAL COMMODITIES (1952-56)
(By sea, air and land)

(value in lakhs of rupees)

Commodities	1952	1955	1956
Wheat	126.37	15.72	2.72
Rice (not in the husk)	48.75	18.78	70
Eggs	34	1.09	1.06
Fruits and vegetables	13.55	12.97	15.09

STATE TRADING CORPORATION

The State Trading Corporation of India Ltd. was established in May 1956 as an entirely State-owned Company (authorised capital now Rs. 5 crores). Its aim is to stimulate trade, by filling up the many gaps in India's foreign trade structure. Since its inception, the Corporation has been striving to increase India's exports to countries with controlled economies in order to secure from them such items as steel, cement and industrial equipment without straining the country's foreign exchange reserves. It has been endeavouring to diversify India's trade and find new markets for traditional and non-traditional export items of India. It has arranged a number of link deals with foreign countries for importing essential capital goods and industrial raw materials in exchange for exports of "hard to sell commodities" from India. It has also arranged bulk contracts and effected equitable distribution of vital raw materials (such as caustic soda, soda ash, newsprint, mercury, camphor, dye stuff and so on) so that the prices of these items are brought down to reasonable levels. The quantum and timing of the imports have been so fixed as to avoid recurring disruption in supply and to create and maintain conditions favourable for a larger production of these commodities in India. Among the goods for which exports have been arranged by the Corporation are: mineral ores, shoes, handicrafts, salt, tea, coffee and woollen goods. The Corporation has also played an important role in the development of minor port facilities, mines and transport

*These revised series are from the Department of Commercial Intelligence and Statistics.

which are essential for expeditious and efficient handling of goods imported or exported. The long-term contracts with Japan and some other countries arranged by the Corporation to boost up India's iron ore exports have contributed a good deal to speed up the development of railway connections between the mines and the shipping centres. The value of trade handled by the Corporation since its inception till the end of 1960-61 amounted to Rs. 183 crores including Rs. 65 crores (exports Rs. 37 crores; imports Rs. 28 crores) during 1960-61.

In July 1956 the Corporation was entrusted with the task of acquiring cement from Indian manufacturers, importing it from abroad, and distributing it at an equalised price at all railheads in India. With the improvement of internal supply position, the Corporation was authorised in 1958 also to export cement from India.

INTERNAL TRADE COASTAL TRADE

For purposes of statistics, the Indian coast has been divided into the following maritime blocks* : (i) West Bengal, (ii) Orissa, (iii) Andhra Pradesh (iv) Madras, (v) Kerala, (vi) Mysore, (vii) Bombay, (viii) Andaman and Nicobar Islands, and (ix) Laccadive, Minocoy and Amindivi Islands. Trade between ports in the same maritime block is classed as "internal trade" and that between one maritime block and another as "external trade".

In 1960, the total coast-wise trade was valued at Rs. 425 crores, consisting of Rs. 214 crores (imports) and Rs. 211 crores (exports). Of Rs. 214 crores worth of imports, over Rs. 208 crores constituted external trade as among the blocks and about Rs. 6 crores internal trade within the blocks themselves. Table 206 below shows the values of the coast-wise trade of India.

TABLE 206
COAST-WISE TRADE

(value in lakhs of rupees)

	1955-56	1956-57	1958	1959	1960
Imports					
Indian merchandise	164,52	166,87	166,80	192,41	208,02

Exports					
Indian merchandise	143,83	146,93	153,53	172,87	204,66
Foreign merchandise	15,90	16,21	8,88	5,78	6,46
Treasure	6	—	—	1	—
TOTAL exports	159,79	163,14	162,41	178,66	211,12
TOTAL TRADE	338,02	342,67	338,52	376,76	425,41

INLAND TRADE

Considering the vastness of the country, its varied climate and diverse natural resources, it is not unnatural that the inland trade of India is many

*Before April 1957, the following seven maritime blocks were counted: (i) West Bengal, (ii) Orissa, (iii) Madras (including Andhra Pradesh), (iv) Travancore-Cochin, (v) Cochin Port, (vi) Bombay, and (viii) Saurashtra, Okha and Kutch.

times larger than its external trade. According to an estimate in the report of the National Planning Committee's sub-committee on trade, the value of the country's internal trade in 1940 was about Rs. 7,000 crores as compared to Rs. 500 crores for external trade. Precise data about the internal trade are, however, not available. It is difficult to keep track of the large volume of goods carried by bullock carts and country boats. Statistics of the trade carried by rail and inland steamer are, however, available.

The following table shows the movement of selected articles by rail and river between the States and the chief port towns (in terms of imports).

TABLE 207
INLAND TRADE —SELECTED ARTICLES

(in thousand maunds)

	1951-52	1955-56	1956-57	1957-58	1958-59	1959-60
Coal and coke	54,13,00	58,01,88	57,52,22	65,88,54	71,41,02	71,34,41
Raw cotton ..	1,21,19	77,69*	—	83,59†	72,30 †	39,78 ‡
Cotton piecegoods	66,46	87,33	70,26	75,62	73,73	78,04
Rice (not in husk)	2,23,20	2,21,19	5,54,11	4,86,78	4,91,49	6,22,66
Wheat	5,21,48	5,40,06	2,97,74	5,00,75	6,68,69	6,93,18
Raw Jute ..	1,26,26	94,66	91,20	1,04,99	1,49,68	1,61,63
Iron and steel products	4,65,37	5,13,66	6,60,95	6,78,14	7,09,09	7,86,05
Oilseeds	2,22,56	2,53,35	2,50,57	2,53,36	2,63,78	2,48,06
Salt	3,38,63	3,02,45	2,94,20	3,19,49	2,90,90	3,55,66
Sugar (excluding khandsari sugar)	1,74,99	2,22,18	2,44,59	3,03,57	1,98,88	2,22,86

For purposes of these statistics, again, India has been divided since April 1955 into 36 trade blocks, roughly representing the former States of the Indian Union with the addition of the chief port towns of Bombay, Madras, Calcutta and Cochin. The Andhra ports, the Saurashtra ports and the ports in Madras other than Madras port have also been treated separately. Only the figures of actual imports into these blocks are represented here. Thus, the internal trade within each of these trade blocks is excluded from the scope of these statistics.

Metric Weights and Measures

The use of metric weights becomes compulsory in the whole country from April 1, 1962; the use of any other weights thereafter will be illegal. A uniform system of weights and measures is thus sought to be enforced throughout the country.

Since the passing of the Standards of Weights and Measures Act, 1956, the reform has been introduced gradually through a phased programme covering different industries, public undertakings and regions. In specified areas in all the States and Union Territories the use of metric weights was introduced in 1958 with a transition period of two years, during which the metric weights were used alongside indigenous weights. Since October 1960, however, the use of metric weights became compulsory in these areas. Selected industries such as cotton, jute, iron and steel, engineering, chemicals, cement, paper, petroleum, *vanaspati*, salt etc. also changed over. In Government departments such as the Railways, Posts and Telegraphs, Customs etc., the use of metric weights was introduced.

Metric capacity measures will also become compulsory but in selected areas only. The use of metric length measures, will become obligatory for trading purposes throughout the country from October 1962. Weights and Measures (Enforcement) Organisations throughout the country have been

*Twelve months ending August 1955.

† Seven months ending March 1958 and March 1959 respectively.

‡ Six months ending February 1960.

strengthened so that they may be able to enforce the use of metric weights and measures next year. Steps have also been taken to augment the production of metric weights and measures of length and capacity. Manufacturers were given help in procuring scarce raw materials like brass.

The Standards of Weights and Measures Act, 1956 has been applied to the State of Jammu and Kashmir. The use of metric weights in trade in the State was permitted from April 1961. A period of two years has been allowed for the continued use of other weights. Metric length measures would be permitted from October 1962, and capacity measures from April 1962. In either case, a period of one year would be allowed for the use of measures now in vogue.

On April 1, 1961 the Standards of Weights and Measures Act, 1956, was brought into force in regard to the levy of excise duties by State Governments on alcohol and alcoholic products, a period of one year being allowed for the continued use of the present units. The Excise Departments of Kerala and Madras have already adopted the metric system. Others would do so by April 1962. Motor transport undertakings would also adopt the metric system in their transactions from that date.

CHAPTER XXVI

TRANSPORT

RAILWAYS

The Indian railway system with a route mileage of 35,395 is the second largest individual railway network in the world and the biggest nationalised undertaking in the country. More than 44 lakh persons and 4 lakh tons of goods were carried, on an average, by the railways daily in 1960-61. The capital-at-charge of the railways, at the end of 1960-61, stood at Rs. 1,528 crores and the gross earnings at Rs. 459 crores. They employed 11,66,482 persons and paid Rs. 205 crores in wages and salaries.

Progress Since 1853

The first railway line in India was opened on April 16, 1853. The progress made by the railways during the past one hundred and eight years is shown in tables 208 and 209.

TABLE 208
PROGRESS OF ALL INDIAN RAILWAYS

(in lakhs of rupees)

Year	Mileage	Capital-at-charge	Gross earnings	Working expenses	Net earnings
1853	20	38	0.90	0.41	0.49

1960-61	35,395	1,527,83	459,38	361,88	97,50

Railway Zones

The 37 railway systems, which existed in India before August 1949, have been grouped into eight Zones with a view to effecting economy and efficiency in administration. Some details regarding the Zones are given in table 210.

Certain narrow-gauge feeder railways (total length 445 miles), owned and operated by private companies, were not included in the reorganisation scheme, although under the Railway Companies (Emergency Provisions) Act, 1951, Government assumed powers to ensure their efficient operation in the public interest.

(a) Burma Railways separated in 1937. (b) Following the Partition on August 15, 1947.

TABLE 209
RAILWAY TRAFFIC
(For all Indian Railways)

Year	Passengers originating (thousands)	Passenger earnings (Rs. lakhs)	Goods originating (thousand tons)	Goods earnings (Rs. lakhs)

Railway Finances

Railway finances were separated from general finances in 1925, the railways contributing to the general revenues according to a fixed formula. In December 1949, it was decided that during the quinquennium beginning 1950-51, the railways should pay a guaranteed dividend of four per cent on the capital-at-charge at the end of each penultimate year. The revised Financial Convention, which became applicable after 1955-56, prescribes the same rate of payment except that on new lines a moratorium is to be granted during construction and for the five years to follow. The Railway Convention Committee, established in 1960, recommended a dividend of 4½ per cent on the capital-at-charge for the five years 1961-66.

The following table gives an outline of the financial results of working Government Railways since 1955-56.

TABLE 211
RAILWAY FINANCES

<i>(in crores of rupees)</i>

Capital-at-charge	968·98	1,520·87	1,707·43	1,903·93

DEVELOPMENT UNDER PLANS

The main problem of the railways in recent years has been that of rehabilitation and replacements. First created by the economic depression, it was later accentuated by the severe strain of war and Partition. Under the First Five Year Plan, Rs. 423·73 crores were spent on rehabilitation and expansion of railways with emphasis on rehabilitation.

During the Second Plan period, involving an allocation of Rs. 1,121·5 crores**, the Railways were expected to (i) increase passenger transport capacity by 3%, (ii) raise goods traffic to 16,20 lakh tons; (iii) add 1,200 miles of new lines, double 1,300 miles of track and electrify 880 miles, and (iv) increase the number of locomotives to 10,600, coaches to 28,900 and wagons to 35,41,000.

*This includes Rs. 12·50 crores to be contributed to the General Revenues in lieu of merger of passenger tax with passenger fare.

**Inclusive of Rs. 15 crores allotted for the Post and Telegraph and Power Supply authorities.

The programme of development of railways during the Third Plan period, involving an outlay of Rs. 1,325 crores, aims at (i) 24,50 lakh tons of goods traffic during the years 1961-66; (ii) increase of passenger traffic by 15%; (iii) acquisition of 1,764 locomotives, 7,879 coaches and 1,17,144 wagons; (iv) doubling of 1,700 miles of track; (v) renewal of 8,125 miles of track; (vi) electrification of 1,100 miles; (vii) construction of 1,200 miles of new lines and (viii) construction of 54,000 new staff quarters.

The actual expenditure incurred during the Second Plan period and the expenditure allocated for the Third Plan period are as follows :

TABLE 212
EXPENDITURE ON RAILWAYS

(in crores of rupees)

	Second Plan (Actual)	Third Plan (Outlay)

Manufacture suspense	(—)3·13	
Miscellaneous advances	3·73	
Credit for released materials	(—)34·62	
Other credits	(—)10·93	
Total	1,043·69	1,325·00

The progress achieved at the end of the First and Second Plan periods is dealt with in the following paragraphs.

New Construction and Works

Four hundred and thirty miles of dismantled lines were restored, 380 miles of new lines constructed and 46 miles of narrow gauge lines converted into metre gauge during the First Plan period. 454 miles of new lines were also under construction, 52 miles were being converted into broad gauge and surveys for over 2,000 miles of new lines were in progress. 408 miles of broad gauge and 382 miles of metre gauge new rail lines were opened to traffic during the Second Plan period. One thousand and six miles of broad gauge and 251 miles of metre gauge lines were in various stages of construction. Six thousand two hundred and twenty-three miles of rail renewals and 7,102 miles of sleeper renewals were also completed.

Rolling Stock

During the First Plan period, 496 locomotives, 4,351 coaches and 41,192 wagons were produced in the country.

The acquisition of rolling stock both on additional and replacement account during the Second Plan is given in the table below.

TABLE 213
ROLLING STOCK (SECOND PLAN)

	Broad Gauge	Metre Gauge	Narrow Gauge
Locomotives	1,226	942	24
Coaches (including EMUS and rail cars) ..	4,149	3,149	217
Wagons	69,996	26,340	1,658

Workshops, Plant and Machinery

The remodelling and expansion of a large number of running sheds and locomotives, carriage and wagon workshops were undertaken during the Second Plan. A steel foundry with an optimum capacity of 10,000 tons of castings per annum at the Chittaranjan Locomotive Works is expected to commence production in 1963. Work on the furnishing unit attached to the Integral Coach Factory at Perambur has made considerable progress. An incentive scheme providing for payments by results, introduced in 1960, proved effective in the Integral Coach Factory, other production shops and repair workshops of the various railways.

Electrification

Electric traction, first introduced in 1925, is confined to areas near Bombay, Madras and Calcutta. The total electrified mileage on March 31, 1960, was 330.9. During 1960-61, 134.9 miles were energised.

Dieselisation

Diesel traction has been adopted on a few selected routes. There were 181 diesel locomotives on March 31, 1961.

Amenities for Railway Users

Of the improvements carried out during the period 1951-52 to 1960-61 to offer better travel conditions to passengers, particularly third class passengers, mention may be made of the following :

- (i) safe and relaxed travel—at a cost which is perhaps the lowest in the world—in all-steel light-weight coaches;
- (ii) reservation of coaches for long-distance travel in important trains and reservation of accommodation in accordance with distances in certain trains;
- (iii) introduction of new trains and extension of the runs of existing trains,
- (iv) introduction of new 75-berther sleeping coaches in certain trains for passengers travelling over 500 miles, without levy of any surcharge;
- (v) running of all-third class 'Janata' trains and vestibuled air-conditioned trains;
- (vi) improvement of catering facilities;
- (vii) improvement of drinking water facilities, provision of fans, waiting halls, new or improved over-bridges and new or improved platforms; and
- (viii) camping coach facility was extended to three more stations in 1960-61 bringing the total number of such stations to 13.

Staff Welfare

As against an annual average of a little over Rs. 4 crores spent on the construction of new quarters and staff welfare measures during the First Plan period, it was proposed to spend, on an average, Rs. 10 crores per annum during the Second Plan period.

While 40,000 staff quarters were constructed during the First Plan period, 57,000 were built during the Second Plan period. Provision

has been made for 54,000 new quarters in the Third Plan, in addition to those to be provided under composite schemes relating to workshops, yards and lines.

At the end of 1960-61, there were 77 hospitals and 480 health units/dispensaries. A number of chest clinics for domiciliary and out-door treatment of T. B. patients have been established in addition to expansion of facilities by way of additional beds. Steps are also being taken to increase educational facilities for the children of railwaymen. In addition to 644 existing schools, sixteen single teacher primary schools and one new middle school were opened.

In December 1957, it was decided to offer the choice of a pension scheme to all the 10 lakh or more railway employees. A scheme of large-scale upward re-distribution of posts calculated eventually to benefit 1,70,000 railwaymen in non-gazetted cadres was announced in February 1957. Steps are also being taken to explore avenues for quicker promotion of class IV Staff. The class IV Staff Committee's recommendations have been accepted by Government.

For the benefit of children of railway workers studying in places away from their parents, 12 subsidised hostels are being set up. Mobile libraries are being formed for the use of staff posted at wayside stations. The first mobile library was inaugurated on the North-Eastern Railway in December 1958.

Self-Sufficiency

The Indian railways are not only self-sufficient in their requirements of locomotives and coaches, but have now capacity to assist neighbouring countries not only in respect of the rolling stock but also of goods wagons and equipment like lighting, signalling, sleepers, girders and others. A beginning has been made in the direction of manufacturing electric and diesel locomotives and other equipment now being imported. As against Rs. 320 crores during the Second Plan, the Third Plan foreign exchange requirement of the Railways is placed at Rs. 186 crores.

OPERATING STATISTICS

Passenger Traffic and Earnings

The salient features of passenger traffic and earnings therefrom on all Indian railways during 1955-56 and 1960-61 are shown below.

TABLE 214
PASSENGER TRAFFIC AND EARNINGS

	1955-56	1960-61
Number of passengers (in hundreds)	129,73,55.0	161,58,93.8
A.C.	85.8	1,47.3
First class	1,90,30.1	3,46,74.5
Second class	1,68,75.2	1,11,16.3
Third class	126,13,63.9	156,99,55.7
Passenger miles (in thousands)	3,908,32.87	4,858,09.75
A.C.	5,12.79	6,85.55
First class	77,38.58	120,58.74
Second class	124,36.83	111,10.81
Third class	3,701,44.67	4,618,92.51
Earnings from passengers (in thousand rupees)	108,75.48	132,51.76
A.C.	87.51	1,18.44
First class	5,88.01	8,36.71
Second class	6,12.22	5,74.07
Third class	95,87.44	118,52.15
Average rate charged per passenger	Pies per mile 5.34	nP. per km. 1.71
A.C.	" 32.8	10.7
First class	" 14.6	4.31
Second class	" 9.45	3.19
Third class	" 4.97	1.59

Ticketless Travel

An amendment to the Indian Railways Act was passed on May 2, 1959, to provide *inter alia* for more stringent punishment for ticketless travel.

Among other steps taken for intensifying the effort against ticketless travel are raids on selected sections and, at frequent intervals, continuity checks from starting to terminal stations, surprise inspections of booking offices and the establishment of a temporary central ticket checking organisation with four squads of travelling examiners for conducting cross-country and surprise checks. The results of the checks made by the organisation during 1955-56 and 1960-61 are summarised below.

TABLE 215
TICKETLESS TRAVEL

	1955-56	1960-61
Number of passengers detected travelling without tickets ..	69,02,114	75,55,075
Amount of fare and excess charges realised (in rupees) ..	1,40,29,656	1,83,23,309

Accidents and Safety of Passenger Trains

The number of fatalities and casualties in train accidents expressed as a ratio of ten lakh passengers carried, excluding those resulting from unlawful tampering of track, for 1955-56 and 1960-61 were as follows :

TABLE 216
TRAIN ACCIDENTS

	Fatalities		Casualties	
	Number	Per ten lakh passengers carried	Number	Per ten lakh passengers carried
1955-56	16	0·01	266	0·20
1960-61	28	0·02	253	0·16

Goods Traffic and Earnings

The goods traffic carried and earnings therefrom on all Indian railways are shown in the following table.

TABLE 217
GOODS TRAFFIC AND EARNINGS

	1955-56	1960-61
Tons of goods carried (in thousands)	11,52,73	15,48,89
Revenue earning traffic (in thousand tons)	9,19,65	11,89,42
Non-revenue earning traffic (in thousand tons)	2,33,08	3,59,47
Net ton miles (in thousands)	3,647,18,50	5,371,48,93
Revenue earning traffic (in thousand ton miles)	3,088,17,87	4,428,70,71
Non-revenue earning traffic (in thousand ton miles)	559,00,63	942,78,22
Average miles a ton of goods was carried	316·4	346·8
Revenue earning traffic (in miles)	335·8	372·3
Non-revenue earning traffic (in miles)	239·8	262·3
Earnings from goods carried (in thousand rupees)	177,92,19	281,25,56
Average rate charged per ton of goods per mile	11·1 (pies)	6·34 (np)

The principal commodities carried by Government railways are shown in the following table.

TABLE 218
PRINCIPAL COMMODITIES CARRIED

(in thousand tons)

	1955-56	1960-61
Coal	3,53,37	4,95,99
Cement	39,56	64,45
Iron and steel*	36,55	74,67
Metallic ores (other than manganese ore)	43,73	1,09,63
Manganese ore	13,78	12,10
Foodgrains	90,44	1,24,59
Raw jute	5,12	6,34
Tea	2,58	2,46
Paper and paper products	2,56	4,35
Jute manufactures	2,90	2,58
Raw cotton	7,39	5,27
Cotton textiles	5,48	3,74
Oil Seeds	17,66	14,93
Sugarcane	34,08	31,86
Sugar	13,36	14,64
Salt	18,58	19,50

Punctuality Ratio

The punctuality ratio **for the years 1955-56 and 1960-61 on Government railways is shown below :

TABLE 219
PUNCTUALITY RATIO

	All trains including electric multiple unit trains	Mail and important through trains	Mixed trains	Suburban trains	Other passenger trains
Broad Gauge					
1955-56 ..	77·99	77·84	85·33	84·57	74·66
1960-61 ..	85·75	79·67	87·91	86·64	79·63
Metre Gauge					
1955-56 ..	75·14	61·96	75·81	74·71	71·70
1960-61 ..	82·58	82·94	84·98	93·09	78·31

Export Traffic

Priorities for rail movement of goods to ports for export have been upgraded. The balance of iron and manganese ore at the ports awaiting shipment at the end of 1955-56 and 1960-61 is shown in table below.

TABLE 220
EXPORT TRAFFIC

(in tons)

	Manganese Ore		Iron Ore	
	1955-56	1960-61	1955-56	1960-61
Calcutta	33,175	58,700	38,383	16,400
Bombay	46,431	72,400	7,210	8,200
Madras	16,791	21,900	58,929	18,800
Visakhapatnam	1,43,480	1,59,400	37,958	2,000

*Include machinery, etc.

**Percentage of passenger and mixed trains not losing time to the total number of trains on all Government railways.

Locomotive Utilisation

The average mileage obtained per engine per day on Government railways is as shown in table below.

TABLE 221
ENGINE MILES PER DAY (STEAM)

	Broad gauge		Metre gauge	
	1955-56	1960-61	1955-56	1960-61
Passenger Engine	164	172	128	136
Mixed Engine	121	117	97	93
Goods Engine	94	100	85	88
Engine in use (all services)	111	113	103	105
Engine on line	84	85	77	74

The productive service of engines on Government railways in freight service in terms of volume of freight transportation per engine hour for the same period is as indicated below:

TABLE 222
NET TON MILES PER ENGINE HOUR

	Broad gauge	Metre gauge
1955-56	2,124	915
1960-61	2,562	1,082

Wagon Usage

The use of wagons on Government railways during the period 1955-56 and 1960-61 is shown below:

TABLE 223
WAGON MILES PER WAGON DAY

	Broad gauge	Metre gauge
1955-56	46.3	28.5
1960-61	47.8	32.1

The productive work performed by wagons in terms of net ton miles per wagon day is as follows :

TABLE 224
NET TON MILES PER WAGON DAY

	Broad gauge	Metre gauge
1955-56	541	203
1960-61	610	247

FARES AND FREIGHT

The assumption of common carrier's liability on January 1, 1962, in respect of goods entrusted to railways has brought about a fundamental change in the sphere of railway's responsibility.

The Railways switched over to the decimal coinage from September 15, 1957, in the case of passenger fares and from October 1, 1958, in the case of freight on goods, parcels and other traffic. The commercial departments of the railways have adopted the metric system of weights and measures from April 1, 1960. The unit of weight for the purpose of charge from that date is a quintal or 100 kilograms and the distance between stations is reckoned in kilometres instead of in miles.

Passenger fare and rate tables showing the fares or rates for various distances from 1 to 5,000 kilometres have been printed and are available for arriving at the fare or freight rates.

For vestibuled air-conditioned third-class trains running between New Delhi-Howrah, New Delhi-Bombay and New Delhi-Madras, an additional charge of 1.25 naye paise per mile is collected.

The Railway Passengers Fares Act came into force on September 15, 1957. The rate of tax is 5 per cent of the fare for distances between 26 and 49 kms, 15 per cent for 50 to 805 kms and 10 per cent for over 805 kms. Distances up to 15 miles are exempt from the tax.

Following the recommendations made by the Railway Freight Structure Inquiry Committee, the revised railway freight structure came into force with effect from October 1, 1958.

ADMINISTRATION

The responsibility for the overall control and administration of the railways vests in the Railway Board, which was first set up in 1905. The Board now consists of a Chairman, who is *ex-officio* Secretary-General to the Union Railway Ministry, the Financial Commissioner and three Members, each in charge of Staff, Transportation and Engineering, who are of the status of Secretaries to the Union Railway Ministry.

Constant and close consultation between the public and the railway administration, is secured through the following committees: (i) Regional Railway Users' Consultative Committees; (ii) Zonal Railway Users' Consultative Committees at the headquarters of each railway zone; and (iii) the National Railway Users' Consultative Council at the Centre. From January 1, 1958, Divisional Consultative Committees have been set up for each division of the railways on which divisionalisation has already been brought about.

ROADS

In 1947, the Central Government assumed responsibility for the construction and maintenance of certain roads selected by them as suitable for inclusion in the system of national highways. These were statutorily declared as national highways under the National Highways Act, 1956. State highways, district and village roads are the responsibility of the State Governments.

Progress

The progress in road development during recent years as compared to the targets laid down in the Nagpur Plan (1943), as revised to apply to the Indian Union, is shown in the following table.

TABLE 225
ROAD DEVELOPMENT

	(miles)	
	Surfaced roads	Unsurfaced roads
Nagpur Plan targets	1,23,000	2,08,000
April, 1, 1951	98,000	1,51,000
March 31, 1956	1,22,000	1,98,000
March 31, 1961	1,44,000	over 2,50,000

National Highways

On April 1, 1947, when the Centre took over the liability for the national highways, approximately 1,600 miles of road and thousands of culverts

and bridges (including about 150 major bridges) did not exist. Missing road links which accounted for 1,600 miles have since increased to about 1,780 due to addition of new roads to the national highway system. The progress on national highways since then is indicated in the table below:

TABLE 226
PROGRESS OF NATIONAL HIGHWAYS

	Missing links constructed (in miles)	Major bridges constructed	Improvement of existing sections (in miles)	Widening of carriage-way (in miles)
April 1, 1947 to March 31, 1956	746	33	4,900	{ 2,300 900
April 1, 1956 to March 1961	640	40	3,500	
Third Plan Targets	350	60	1,200	

The national highway mileage in the States and Territories of the Indian Union after reorganisation of States is as follows :

TABLE 227
NATIONAL HIGHWAYS (STATE/TERRITORY-WISE)*

State/Union Territory	Miles
Andhra Pradesh	1,412
Assam	727
Bihar	1,189
Gujarat	676
Jammu and Kashmir	338
Kerala	260
Madhya Pradesh	1,669
Madras	1,050
Maharashtra	1,539
Mysore	816
Orissa	851
Punjab	784
Rajasthan	782
Uttar Pradesh	1,455
West Bengal	872
Delhi	44
Himachal Pradesh	200
Manipur	139
Nagaland	69

The national highways system includes, *inter alia*, the following roads:

- (1) Amritsar to Calcutta
- (2) Agra to Bombay
- (3) Bombay to Madras *via* Bangalore
- (4) Madras to Calcutta
- (5) Calcutta to Bombay *via* Nagpur
- (6) Varanasi to Cape Comorin *via* Nagpur, Hyderabad, Kurnool and Bangalore
- (7) Delhi to Bombay *via* Ahmedabad
- (8) Ahmedabad to Kandla Port (under construction) with branch to Porbandar
- (9) Ambala to Tibet border *via* Simla
- (10) Delhi to Lucknow *via* Moradabad
- (11) Lucknow to Barauni *via* Muzaffarpur with a branch road to the Nepal border

*Sikkim, which is included in the system, has a national highway mileage of 39, which is shown as part of the highways in West Bengal.

(12) Assam Access Road

(13) Assam Trunk Road with a branch to the Burma border through Manipur.

Other Roads

The Government of India also aid the development of certain arterial roads in the States. These include, *inter alia*, the Passi-Badarpur Road in Assam and the West Coast Road in the States of Maharashtra, Mysore and Kerala. Nearly 415 miles of roads were constructed or improved from April 1956 to the end of the December 1961.

Under a special programme approved in May 1954, for the development of certain selected State roads of inter-State or of economic importance, about 925 miles of new roads were constructed and about 1,975 miles of existing roads improved during the Second Plan period. In the Third Plan about 500 miles of new roads are expected to be constructed and 1,600 miles of existing roads improved under this programme.

Roads in the States' Sector

Under the programmes drawn up by the States and Union Territories for the Second Plan period, about 22,000 miles of surfaced roads were constructed. About 25,000 miles of surfaced roads are expected to be added during the Third Plan.

Twenty-Year Plan

A new long-term plan for road development, under consideration, aims at bringing every village (a) in a developed and agricultural area within 4 miles of a metalled road and 1.5 miles of any road, (b) in a semi-developed area within 8 miles of metalled road and 3 miles of any road and (c) in an undeveloped and uncultivable area within 12 miles of a metalled road and 5 miles of any road. These targets, when achieved, will provide an average of 52 miles of road per 100 sq. miles of area as against about 31 miles at present.

ROAD TRANSPORT

Motor Vehicles

The number of motor vehicles on road in India since 1947 is as follows :

TABLE 228
MOTOR VEHICLES

Year ending March 31	Number of motor vehicles
1947	2,11,949
1951	3,06,133
1956	4,22,041
1957	4,47,229
1958	5,14,805
1959	5,41,270
1960	5,98,384

The vehicles at the end of March 1960, comprised 69,364 motor cycles, 4,960 auto-rickshaws, 26,290 jeeps, 2,40,370 private cars, 50,767 public service vehicles, 18,148 motor cabs, 1,52,938 goods vehicles and 35,547 miscellaneous vehicles.

A provision of Rs. 26 crores has been made in the Third Plan for the expansion programmes of the nationalised road transport undertakings in addition to a provision of Rs. 10 crores in the Railway Plan for contribution to the Road Transport Corporations. The entire amount is intended to be spent for production of about 7,500 vehicles, construction of workshops, etc.

A substantial expenditure on road transport schemes outside the Plan is also expected to be incurred by a few States in the Plan period. The total expenditure on the nationalised road transport services may be about Rs. 35 crores in the States' sector.

The target for production of commercial vehicles during the Third Plan period is 60,000 of which 52,500 vehicles are likely to be produced in the private sector.

Administration

There is no separate Central organisation at present to provide road transport services. State Road Transport Corporations are, however, operating passenger services in Andhra Pradesh, Bihar, Gujarat, Maharashtra, Mysore, Punjab, West Bengal and Himachal Pradesh. Municipalities render passenger transport services within their jurisdiction in Ahmedabad, Bombay, Delhi and Poona. Departmental transport undertakings operate in most of the other States. More than 30 per cent of passenger transport industry is in the nationalised sector.

An Inter-State Transport Commission has been set up for the purpose of development, co-ordination and regulation of road transport services on inter-State routes. The Commission has brought about reciprocal agreements between all the States except Kerala and Madras.

To ensure proper co-ordination between the different modes of transport on the one hand, and Central and State policies on the other, the Government of India have set up the Transport Development Council, the Road and Inland Water Transport Advisory Committee and the Central Transport Co-ordination Committee.

INLAND WATERWAYS

The length of navigable waterways is over 5,000 miles. The important ones are the Ganga and the Brahmaputra and their tributaries, the Godavari and the Krishna and their canals, the backwaters and canals of Kerala, the Buckingham Canal in the Madras and Andhra States, the West Coast Canals and the Mahanadi Canals in Orissa.

To co-ordinate the development of water transport on the Ganga, the Brahmaputra and their tributaries, a body, known as the Ganga-Brahmaputra Water Transport Board, was set up in 1952 by the voluntary co-operation of the Central and State Governments.

At present, 1,557 miles of rivers are navigable by mechanically-propelled vessels and 3,587 miles by large country boats. Navigation can be developed on shallow stretches to some extent by deepening the channels, by regulation works, dredging, and by the use of craft specially designed to negotiate such stretches. Deepening by dredging entails heavy outlay. Attention has, therefore, been focussed on the use of specially designed shallow craft. The Ganga-Brahmaputra Board has taken up an experimental project for this purpose on the Upper Ganga.

Central Schemes costing approximately Rs. 6.6 crores have been included in the Third Plan for the development of inland water transport in the country. A further provision of Rs. 1.48 crores has been made in the Third Plan of the State Governments.

The Central plan provides for the purchase of survey launches, dredgers and tugs. Port facilities at Pandu and Gauhati will be developed. Work on the river port at Pandu is already in progress. The plan also includes development of inland water transport on the Brahmaputra, Ganga, Rupnarain, Mahanadi, Nerbada and Tapti rivers and the Hijli canal, Rajasthan canal, Orissa canals, Buckingham canal, Badagara-Mahe canal, Cochin-Quilon canal and Damodar Valley canal. Water transport facilities on Thana Creek and Govind Sagar Lake (Himachal Pradesh) and Kerborne (Maharashtra) are also to be developed during the Third Plan period.

SHIPPING

Progress during the Plans

The progress achieved during the First and Second Plan periods, is shown below :

TABLE 229
PROGRESS OF SHIPPING

(lakh gross registered tons)

	1950-51	1955-56	1960-61
Coastal	2.17	2.40	2.92
Overseas	1.74	2.40	6.13
TOTAL	3.91	4.80	9.05

At the end of November 1961, 175 ships totalling 9.05 lakh GRT were on the Indian Register—100 vessels of 3.43 lakh GRT on the coastal trade and 75 vessels of 5.62 GRT on the overseas trade.

The Third Five Year Plan envisages a total provision of Rs. 66 crores, of which Rs. 7 crores are likely to be contributed by private shipping companies and a sum of Rs. 4 crores is expected to be available from the Shipping Development Fund. This provision would enable a net addition of about 1.8 lakh GRT during the Third Plan period.

National Shipping Board

The National Shipping Board which advises the Government on the policy relating to shipping was reconstituted in 1961.

Shipping Corporation of India

The Shipping Corporation of India, which came into existence in October 1961, as a result of the merger of the Eastern and Western Shipping Corporations, has an authorised capital of Rs. 35 crores and a paid-up capital of Rs. 23 crores. It has a fleet of 15 dry cargo vessels, 2 passenger-cum-cargo vessels and 2 coastal tankers aggregating 1,38,593 GRT. The cargo vessels operate on India-Australia, India-Far East-Japan, India-Black Sea, West Coast of India-West Pakistan-Japan, India-Pakistan-U.K.-Continent and India-Persia routes. The passenger-cum-cargo vessels run on Bombay-East Africa, Madras-Singapore and India-Andaman routes. The tankers are on time charter to oil companies for carriage of refined products along the coast.

The Mogul Line Ltd., which is a subsidiary company of the Shipping Corporation of India, has a fleet of 4 passenger-cum-cargo ships of about 26,000 GRT engaged in the Haj pilgrim traffic.

Hindustan Shipyard

The Visakhapatnam Shipyard was purchased from the Scindias by the Government in March 1952, and its management entrusted to the Hindustan Shipyard Ltd., in which all the shares are held by the Government. The first vessel to be built at the yard was launched in March 1948. The Shipyard's production capacity is at present about 4 ships of modern design per year. The Shipyard has so far delivered 27 ocean-going ships and 3 crafts in addition to a mooring vessel of an aggregate gross tonnage of 1,45,304. Five ships of about 45,750 GRT are under various stages of production.

Second Shipyard

A second shipyard is being established at Cochin with an initial capacity to build ships totalling a GRT of about 60,000 per year. The productive capacity is to be increased later on to 80,000 GRT per year.

The project has been included in the Third Plan among the projects for which foreign credits are yet to be arranged and a provision of Rs. 20 crores has been made. Steps are being taken to acquire land and appoint technical consultants for the Shipyard.

Training Institutions

Eighty-two cadets passed out of T.S. *Dufferin* during the year ending June 1961, and have all been employed on board ships.

Four thousand four hundred and twenty-one candidates took advantage of the training facilities available at the Nautical and Engineering College, Bombay, till the end of September 1961. Forty-six cadets, representing the eighth batch of trainees, passed out of the Marine Engineering College, Calcutta, during 1961.

The three ratings training establishments—T.S. *Bhadra*, T.S. *Mekhala* and T.S. *Nau Lakshi*—together trained 13,438 boys, 7,304 for the deck department and 6,134 for the engine room department, till the end of September 1961.

PORTS

India has six major ports, namely, Calcutta, Bombay, Madras, Cochin, Visakhapatnam and Kandla. During 1960-61, these ports handled 331 lakh tons of cargo as against 310 lakh tons in 1959-60.

The ports of Bombay, Calcutta and Madras are administered by statutory port trust boards subject to the overall control of the Central Government. The ports of Cochin, Visakhapatnam and Kandla are administered directly by the Central Government through local administrative officers assisted by port advisory committees.

The traffic handled by, and the financial results of the working of the major ports, during 1960-61 are as follows :

TABLE 230
TRAFFIC AND EARNINGS OF MAJOR PORTS

Port	Ships entered		Imports (lakh tons)	Exports (lakh tons)	Surplus (+) or deficit (—) in earnings (Rs. lakhs)
	No.	Gross tonnage (lakhs)			
Calcutta	1,786	343.46	54.05	39.45	(+) 50.39
Bombay	3,239	200.71	106.25	38.64	(+) 326.78
Madras	1,204	84.86	20.94	8.96	(+) 48.04
Visakhapatnam ..	622	44.10	13.64	14.39	(+) 33.53
Cochin	1,337	70.89	15.95	3.80	(—) 2.07
Kandla	294	19.30	12.11	3.36	(+) 5.06
	8,482	763.32	222.94	108.60	(+) 461.73

A provision of Rs. 75 crores has been made in the Third Plan for the development of the six major ports. The two important schemes included in it are the setting up of a satellite port at Haldia in the Hooghly estuary and modernisation of Bombay docks. Mangalore and Tuticorin are also to be developed as major ports during the Third Plan.

Work on the expansion of Cochin and Madras ports is in progress. The construction of four additional berths at Visakhapatnam, two of which will be equipped with a mechanical ore handling plant enabling the port to export over 60 lakh tons of iron ore annually, has started.

Minor Ports

The Indian coastline is also served by a large number of minor ports (about 225, of which 150 are working ports), which together handle a coastal and overseas traffic of about 60 lakh tons per annum. The administration of these ports is the responsibility of the State Governments. Various works of improvement were undertaken under the First and Second Five Year Plans. The development programme for minor ports, included in the Third Plan, is estimated to cost Rs. 10.79 crores in the Central Sector and Rs. 4.90 crores in the States' Sector. The Central programme includes, among others, the setting up of a dredger-cum-survey launch pool with an initial strength of two dredgers and six survey launches. It is expected that at the end of the Third Plan, the minor ports will be able to handle a traffic of about 90 lakh tons.

National Harbour Board

For advising the Central and State Governments on the co-ordinated development of ports with special attention to minor ports, the National Harbour Board was constituted in 1950, consisting of representatives of the Government of India, the maritime States, major port authorities, and non-official members representing trade, industry and labour. A committee of the Board meets every year to screen and accord priorities to schemes for hydrographic surveys.

CIVIL AVIATION

Indian aircraft flew about 331 lakh miles carrying about 10.6 lakh passengers and nearly 18,22 lakh pounds of cargo and mail on scheduled and non-scheduled services taken together during 1961*.

Progress Since 1947

The tables below show the progress made by civil aviation in India since 1947, on scheduled and non-scheduled services.

TABLE 231
CIVIL AVIATION (SCHEDULED SERVICES)

Year	Miles flown (in thousands)	Passengers (in thousands)	Freight (in thousand lbs.)	Mails (in thousand lbs.)
1947	93.62	255	56,48	14,05
1951	1,94,98	449	8,76,65	71,82
1956	2,34,83	559	9,62,31	1,26,86
1957	2,34,96	615	8,56,91	1,30,81
1958	2,45,78	696	9,36,40	1,36,08
1959	2,47,42	736	7,38,77	1,50,49
1960	2,63,61	855	8,42,30	1,50,29
1961*	2,74,52	948	8,83,59	1,62,28

TABLE 232
CIVIL AVIATION (NON-SCHEDULED SERVICES)

Year	Miles flown (in thousands)	Passengers carried (in thousands)	Freight carried (in thousand lbs.)
1947	40,51	62	29,93
1951	66,14	66	13,16,24
1956	57,33	114	9,70,89

*Estimated.

Air Corporations

The Indian Airlines Corporation whose operating fleet consists of 10 Viscounts, 5 Skymasters, 5 Fokker Friendships, and 54 Dakotas links up most of the principal centres in the country and also provides services to the neighbouring countries, viz. Pakistan, Burma, Ceylon, Afghanistan and Nepal. The Corporation carried 7,87,187 revenue passengers on its services and its aircraft flew a total of 3,20,15,037 revenue miles during 1960-61.

The Air-India International Corporation, with its fleet of 9 Super-Constellations, 5 Boeing 707 Jets and one DC-3 freighter provides services reaching out to 21 countries. During 1960-61, it carried 1,24,951 revenue passengers on its services and its aircraft flew over 1,30,35,000 revenue miles.

Training

Pilots, Aerodrome Officers, Control Operators, Fire Operators, Radio Operators, and Radio Technicians are trained in the Training Centre of the Civil Aviation Department at Allahabad. Till October 31, 1961, the Centre trained 209 candidates in various courses, while 89 trainees were undergoing training.

Flying Clubs

There are 17 subsidised flying clubs with headquarters at Delhi, Bombay, Madras, Patna, Barrackpore, Bhubaneswar, Lucknow (with satellite centres at Kanpur, Allahabad and Varanasi), Jullundur, Hyderabad, Nagpur, Jaipur, Indore (with a satellite centre at Bhopal), Bangalore, Gauhati, Trivandrum, Coimbatore and Baroda. There are three Government Gliding Centres at Poona, Bangalore and Allahabad and two subsidised Gliding Clubs at New Delhi and Pilani. During 1961, the flying clubs trained 139 'A' Licence and 8 'B' Licence pilots till the end of November.

Aerodromes

Eighty-six aerodromes* are controlled and operated by the Civil Aviation Department of the Government of India. Three of these, viz., Bombay, (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam) are international airports. The aerodromes at Ahmedabad, Patna, Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam), Delhi (Safdarjang), Madras (St. Thomas Mt.), Tiruchirappalli, Varanasi, Jodhpur, Bhuj and Amritsar have been declared customs aerodromes.

Three new aerodromes at Raxaul (Bihar), Jogbani (Bihar) and Behala (West Bengal) are under construction. The aerodromes at Tulihal (Manipur) and Phoolbagh (Haldwani) have been completed. The main runways at the three international airports were extended and strengthened to meet the needs of jet transport aircraft. The air strip at Port Blair has been repaired and brought into commission.

The programme for the development of civil aviation during the Third Five Year Plan period aims at meeting the new demands which have arisen from recent technical advancements and from India's obligations under the Convention on International Civil Aviation to provide facilities at aerodromes in conformity with the standards laid down by the International Civil Aviation Organisation.

Aircraft

On December 1, 1961, 540 aircraft held current certificates of registration and 211 aircraft held current certificates of airworthiness.

* For a list of aerodromes, see Appendices.

Air Transport Agreements

Air transport agreements have been concluded with Afghanistan, Australia, Ceylon, Czechoslovakia, Egypt, France, Italy, Japan, Netherlands, Pakistan, Philippines, Sweden, Switzerland, Thailand, Iraq, the United States of America, the United Kingdom and the Union of Soviet Socialist Republics. Similar agreements concluded with Lebanon, Iran and the Federal Republic of Germany are awaiting ratification.

TOURIST TRAFFIC

Administrative Set-up

A Tourist Traffic Branch was set up under the Ministry of Transport in 1949 and a chain of regional tourist offices has since been established in important cities like Delhi, Calcutta, Bombay and Madras. Tourist information offices have also been set up at Agra, Aurangabad, Bangalore, Bhopal, Cochin, Darjeeling, Jaipur and Varanasi. These offices work in close collaboration with the State Governments, travel agents, hoteliers and carriers. Abroad, India has tourist offices in New York, San Francisco, London, Melbourne, Paris, Colombo, Toronto and Frankfurt.

A separate Department of Tourism in the Ministry of Transport and Communications has been set up. A Tourist Development Council, including representatives of the public, the travel trade and the State Governments, advises the Government on tourist problems. The four regional tourist traffic advisory committees have been reconstituted now as 4 zonal tourist traffic advisory committees.

Hotel Standards and Rate Structure Committee

The major recommendations of the Hotel Standards and Rates Structure Committee, constituted in 1957 to advise the Government on the question of laying down the criteria for standardisation and gradation of hotels in India and the question of presenting a suitable rate structure, are being implemented. A Hotel Classification Committee is being set up to classify hotels catering to foreign tourists according to the 'Star' system.

Relaxation in Tourist Regulations

Regulations relating to police, registration, currency, exchange control and customs have been relaxed to promote tourist traffic. A special inter-departmental committee makes periodic inspection of the various ports of entry with a view to ascertaining the possibility of further simplification of such formalities. Concessional tickets are offered by the railways for round trip journeys and circular tours. Special concessions are given to students and pilgrims as well as to tourists visiting hill resorts during summer. At present, there are 42 officially recognised travel agencies and shikar (big game) agencies to serve tourists. The services of an increasing number of educated, specially trained and approved travel guides are also available. A staff training school imparts training to fresh recruits as well as personnel engaged in tourist promotion activities.

Information

Tourist information material in the form of guide books, pamphlets, folders, maps, posters and picture cards is being brought out. These are produced in English, French, Spanish, German, Italian and in the Indian languages and are being distributed through tourist offices in India and abroad. A few publications have also been issued in Japanese and Siamese for distribution to tourists coming from Japan and Siam. An illustrated monthly magazine entitled *Traveller in India* is issued

to attract tourists. Travel films are also made for distribution and exhibition abroad.

Number of Tourists

The number of foreign tourists visiting India since 1951 is shown below.

TABLE 233
TOURIST TRAFFIC

Year											Number of Foreign Tourists*
1951	16,829
1956	65,887
1961	1,39,804

Tourist Revenue

The revenue from tourist traffic during 1960 was estimated at Rs. 20.6 crores. The earnings during 1957, 1958 and 1959, as estimated by the Reserve Bank of India, were Rs. 16.0 crores, 17.5 crores and 19.1 crores respectively.

Development Plans

The Central and some of the State Governments have formulated plans to provide for the development of tourism. The programme envisages additional accommodation, transport and recreational facilities at important tourist centres, especially those situated in out-of-the-way places. Broadly, these are of three kinds : (i) schemes for the development of facilities at a limited number of places visited largely by foreign tourists, (ii) facilities at places mainly for home tourists, and (iii) schemes for places of regional and local importance, which are visited by home tourists of low and middle income groups. Schemes in the first category are being taken up by the Central Government. Schemes in the second group are being implemented by the States with assistance from the Centre and those in the third group exclusively by the State.

The allocation in the Third Plan for expenditure by the Central Government on tourist traffic development schemes is Rs. 3.5 crores, while the State Governments are expected to spend on this count Rs. 4.5 crores.

* Excluding Nationals of Pakistan.

' This man helped start a revolution in automotive transport in 1912

He was the first T.V.S. passenger

50 years ago, it needed as much courage to travel in a bus as was needed to run it! The confidence of our first passenger, who boarded the bus ignoring the warnings of the timid, is the bedrock on which TVS builds its institution.

Today, TVS, with its several units, meets the increasing demands of the automotive industry in all its aspects in South India. As in 1912, it is the confidence of the customer that sustains its progress.

TVS UNITS INCLUDE

CHAPTER XXVII

COMMUNICATIONS

The Posts and Telegraphs services constitute the second largest State undertaking in India, next only to the railways. The number of persons employed on March 31, 1961, was 3,82,032 while the capital outlay was Rs. 141·04 crores.

The Department of Posts and Telegraphs functions through 14 territorial units—13 posts and telegraphs circles and 1 postal circle for Delhi only. There are three telephone districts for the cities of Calcutta, Bombay and Madras and two telecommunication units each for Delhi and Jammu & Kashmir and a number of other administrative units on a functional basis. The Department works as a commercial-*cum*-utility service and makes over a part of its surplus earnings as a contribution to the general revenues; the rest accrues to the credit of the Department. The accumulated surplus on April 1, 1961, stood at Rs. 29·58 crores. The administration of the Department vests in the Posts and Telegraphs Board constituted on December 14, 1959.

POSTAL SERVICES

The postal traffic and postal revenue since 1921 are shown below.

TABLE 234
POSTAL TRAFFIC AND REVENUE

Year	Number of postal articles		Postal revenue	
	Total (in crores)	Average per head of population	Total (in crores of rupees)	Average per head of population
1921*	141·0	4·54	5·83	0·19
1931*•	117·5	3·49	7·37	0·22
1941*	127·2	3·33	9·85	0·26
1951	227·0	6·37	21·04	0·59
1955-56	229·7	8·40	29·43	0·82
1960-61	402·9	9·25	40·78	0·93

Some statistics regarding the postal services are given below.

TABLE 235
POSTAL STATISTICS

	1950-51	1955-56	1960-61
Number of post offices	36,094	55,042	76,862
Mileage of surface mail routes	1,69,105	2,42,282	3,46,079
Mileage of airmail routes	18,994	18,959	24,858
Number of postal articles handled (crores)	227·01	299·7	402·9
Number of insured articles (lakhs)	37·23	40·0	41·0
Money orders (crores)	5·14	6·50	7·6
Postal revenue (crores of rupees)	21·04	29·43	40·8

*Pre-partition figures.

The following table shows the number of post offices and letter boxes in the urban and rural areas in India.

TABLE 236
URBAN AND RURAL POST OFFICES AND LETTER BOXES

	On March 31, 1951		On March 31, 1956		On March 31, 1961	
	Urban	Rural	Urban	Rural	Urban	Rural
<i>Post Offices</i>						
Permanent ..	4,665	21,441	5,567	32,575	6,249	43,789
Temporary ..	619	9,369	977	15,923	1,077	25,724
<i>Letter Boxes</i> ..	23,253	61,726	32,701	78,528	36,242	1,06,915

The number of new post offices opened between April 1, 1961, and December 31, 1961, was 2,530.

Urban Mobile Post Offices

The urban mobile post offices scheme is in operation at Nagpur, Madras, Delhi, Bombay and Calcutta. The mobile post office visits important centres of the city at specified hours after the ordinary post offices have closed for the day. It works on all days of the year, including Sundays and postal holidays. Money orders are not accepted at the mobile post office, nor is savings bank business transacted.

Air Mail and All-up Schemes

An inland night air mail service links up the principal cities of India, namely, Bombay, Calcutta, Madras, Delhi and Nagpur. Under the "All-up Scheme" all inland letters, letter cards, post cards and money orders are normally carried by air without any air surcharge.

Air Parcel Service with Foreign Countries

India has an airmail service for most of the countries outside and an air parcel service to Aden, Afghanistan, Australia, Bahrain, Bechuanaland protectorate, Belgium, British East Africa, Burma, Canada, Ceylon, China (Peoples' Republic), Czechoslovakia, Denmark, Egypt, Ethiopia, Fiji, Finland, France, Germany (Federal Republic), Germany (Democratic Republic), Gibraltar, Ghana, Hong Kong, Indonesia, Iran, Iraq, Ireland, Italy, Jamaica, Japan, Kuwait, Lebanon, Malaya, Mauritius, Netherlands, New Zealand, Nigeria, Norway, Pakistan, Portuguese East Africa, Rhodesia and Nyasaland Federation, Saudi Arabia, South West Africa, Sudan, Sweden, Switzerland, Thailand, Union of South Africa, UK, USA, USSR, Yugoslavia and Zanzibar.

Insured air parcel service is available for Aden, Australia, Belgium, British East Africa, Burma, Canada, Ceylon, Czechoslovakia, Denmark, Egypt, France, Germany (Federal Republic), Germany (Democratic Republic), Ghana, Hong Kong, Irish Republic, Japan, Malaya, Netherlands, Pakistan, Persian Gulf, Sweden, Switzerland, Thailand, UK, USA, USSR and Zanzibar.

Facilities are also available for booking insured airmail letters for Aden, Austria, Belgium, British East Africa, Burma, Ceylon, Czechoslovakia, Denmark, Egypt, France, Germany (Federal Republic), Germany (Democratic Republic), Hong Kong, Japan, Malaya, Netherlands, Norway, Pakistan, Sweden, Switzerland, Syria, Thailand, UK and Zanzibar.

Postal Savings Bank

Facilities are available at most post offices in the country for depositing savings, the maximum limit of the deposit for an individual depositor being Rs. 15,000 and for a joint account Rs. 30,000. The interest rates on these savings accounts are 2½ per cent per annum on any sum not ex-

ceeding Rs. 10,000 in the case of an individual account and Rs. 20,000 in the case of a joint account and 2 per cent per annum on the remainder of the balance.

Bi-weekly withdrawal facilities, subject to a maximum of Rs. 1,000, are now available in respect of individual accounts at all post offices doing savings bank work. Since 1958, a new system has been introduced in all postal head offices and sub-offices by which savings account holders can withdraw and deposit money by cheque. A system of nomination for savings bank has been introduced since August 1, 1960. To ensure expeditious action at the savings bank counter, Teller System has been introduced in New Delhi head office. Under this system deposits and withdrawals can be made without presentation of Pass Book and withdrawals up to Rs. 250 are permissible by the counter clerk himself.

Postal Life Insurance

Postal life insurance business was as follows.

TABLE 237
POSTAL LIFE INSURANCE

	New business effected		Total business in force	
	No. of policies	Sum assured (in crores of rupees)	No. of policies	Sum assured (in crores of rupees)
(a) <i>Civil Wing</i>				
1950-51	6,546	1.43	84,630	17.64
1955-56	17,074	3.29	1,26,305	26.89
1960-61	4,799	0.98	1,46,202	29.66
(b) <i>Military Wing</i>				
1950-51	875	0.52	1,573	0.89
1955-56	1,026	0.81	7,326	4.71
1960-61	272	0.15	9,197	6.00

TABLE 238
POSTAL LIFE INSURANCE—EXPENSE RATIO*

Year	Civil wing			Military wing		
	Total premium income (in thousand rupees)	Total expenses (in thousand rupees)	Expense ratio (%)	Total premium income (in thousand rupees)	Total expenses (in thousand rupees)	Expense ratio (%)
1950-51	73,34	9,52	13.46	6,38	80	13.03
1955-56	1,11,61	12,69	11.37	21,70	50	2.30
1960-61	1,28,83	13,99	10.86	28,25	58	2.07

TELEGRAPH SERVICES

Some salient statistics regarding the telegraph services are given in Table 239.

*The percentage of expenses to the premium income of the Post Office Insurance Fund (civil and military wings combined) for 1960-61 is 9.27.

TABLE 239
TELEGRAPH STATISTICS

	1950-51	1955-56	1960-61
Number of telegraph offices (including licensed offices)	8,205	9,893	11,229
Number of telegrams excluding P & T service telegrams (in lakhs)	2,79	3,35	3,81
Mileage of over-head wires	7,21,243	8,67,199	10,78,950
Mileage of underground cable conductors ..	7,13,880	10,03,437	16,43,044
Carrier and VFT channels (in miles)	3,94,912	4,79,210	7,00,009
Telegraph revenue (in crores of rupees) ..	5.94	6.7	7.51

Out of 3,81 lakh telegrams (excluding the P. & T. service telegrams) transmitted during 1960-61, 3,40 lakhs were inland and 41 lakhs foreign telegrams. The revenue derived from these telegrams amounted to Rs. 7.51 crores (Rs. 6.43 crores from inland and Rs. 1.08 crores from foreign telegrams).

Telegraph Service in Hindi and other Indian Languages

Introduced on June 1, 1949, first at Agra, Allahabad, Gaya, Jabalpur, Kanpur, Lucknow, Nagpur, Patna, and Varanasi, the Hindi telegraph service is now available at about 1,900 offices (including 60 railway telegraph offices) in the country. The service is available in all the P. & T. circles. Training classes in Hindi Morse have been opened at 10 places and about 4,000 operators have hitherto been trained.

Telegrams can be sent in any Indian language provided they are written in Devanagari script. In addition, the following special facilities are available in the Hindi telegraph system :

- (i) Greetings telegrams on festive occasions;
- (ii) Emergent telegrams to call relatives and friends in case of serious illness or death;
- (iii) Local telegrams;
- (iv) Tendering of telegrams in Hindi on phonogram system where such a facility exists;
- (v) Telegraphic money orders; and
- (vi) Registration of telegraphic abbreviated addresses at concessional rates.

Telegraph traffic in Hindi is progressively increasing as is indicated in the table below.

TABLE 240
TELEGRAPH TRAFFIC IN HINDI

Year	Number of telegrams
1950-51	5,784
1955-56	58,522
1956-57	66,927
1957-58	89,202
1958-59	1,06,445
1959-60	1,22,747
1960-61	1,74,983

TELEPHONE SERVICES

Table 241 shows the number of telephones, telephone exchanges, trunk calls and the amount of telephone revenue.

TABLE 241
TELEPHONE STATISTICS

	1950-51	1955-56	1960-61
Number of telephones	1,68,000	2,78,000	4,81,000
Number of telephone exchanges (including P. B. Xs. and P.Xs)	3,700	5,817	7,978
Number of trunk calls (in lakhs)	71	1,86	3,11
Telephone revenue (in crores of rupees) ..	9.07	14.4	26.0

Own Your Telephone Scheme

The Scheme is now in operation at Ahmedabad, Amritsar, Bombay, Bangalore, Calcutta, Delhi, Hyderabad, Kanpur, Madras and Nagpur.

Message Rate System

This system is in operation in 64 telephone exchanges. Under this system a subscriber pays for every additional local call over a prescribed free number of calls every quarter plus a fixed quarterly rental.

Ship to Shore Service

Under this service the subscribers can have telephonic contact with ships at sea, within 500 miles of the respective exchange. This service has so far been introduced at Bombay, Calcutta and Madras.

Telephone Industry

In 1960-61, the Indian Telephone Industries (Private) Limited, Bangalore, manufactured 1,14,014 telephones, 74,265 auto-exchange lines including small exchange lines and 1,300 transmission channels. The Company has undertaken the production of several new types of equipment for the railways. The ITI has developed a new type of telephone instrument named 'Priyadarshini' whose performance is far superior to the instrument now in use.

OVERSEAS COMMUNICATIONS

The Overseas Communications Service, which was nationalised on January 1, 1947, is responsible for the operation and development of telecommunication link of India with foreign countries. During the last nine years, the Service handled about 2,72 lakh paid telegrams consisting of about 71.97 lakh words; 2,58,300 paid telephone calls; 3,744 radio pictures totalling about 11,13,000 paid sq. cms., and about 2,54 lakh multipress words.

Radio Telephone Services

India has direct radio telephone service with the following countries : Aden, Australia, Bahrain, Burma, China, East Africa, Egypt, Ethiopia, France, Germany (Federal Republic), Hong Kong, Indonesia, Iran, Iraq, Italy, Japan, Malaya, Poland, Saudi Arabia, Switzerland, UK, USSR and Viet Nam (South).

Radio telephone service *via* our direct connection with international networks is available between India and 69 countries, namely : Abadan, Algeria, Argentina, Asmara, Austria, Balearic Islands, Barbados, Belgium, Bermuda, Brazil, British Guiana, Bulgaria, Canada, Canary Islands, Ceuta, Chile, Cuba, Costarica, Czechoslovakia, Denmark, Doha, Dubai, Finland, French Sahara, Frobishar Bay (Canada), Ghana, Gibraltar, Goosbay Labrador (Canada), Greece, Guatemala, Hawaii, Honduras, Hungary, Iceland, Irish Republic (Eire); Israel, Jamaica, Kuwait, Lebanon, Leeward Islands, Luxembourg, Manila, Mexico, Morocco, Muscat, Nairobi, Netherlands, Newfoundland, New Zealand, Nicaragua, Nigeria, Norway, Panama, Rhodesia, Ryukyu Islands, Spain, Spanish North Africa, South Africa, South West Africa, Sudan, Sweden, Tangier, Trinidad,

Tunisia, United States of America, Vatican City, Windward Islands and Yugoslavia. Thirty-five ships at sea make use of the radio telephone facilities.

Radio Telegraph Service

Direct radio photo telegraph service facilities are available from New Delhi to France, Poland, China and UK and *via* London to Australia, Belgium, Canada, Denmark, Italy, Egypt, Finland, Germany, Greece, Norway, Portugal, Sweden, Switzerland, Union of South Africa and USA. Similarly, at Bombay direct photo telegraph service facilities are available to USSR, Japan, United States of America, China and UK and *via* London to Australia, Belgium, Canada, Denmark, Italy, Egypt, Finland, Germany, Greece, Norway, Portugal, Sweden, Switzerland and the Union of South Africa.

Radio Photo Service

Direct radio photo service operates between India and China, France, Germany (Federal Republic), Italy, Japan, Poland, UK and USSR. In addition, the service is available *via* London to Australia, Belgium, Canada, Czechoslovakia, Denmark, Egypt, Finland, Germany, Ghana, Greece, Jamaica, Nigeria, Norway, Portugal, Singapore, South Africa, Sweden, Switzerland, USA and Yugoslavia.

International Telex Service

The Telex Service which was inaugurated between Bombay and Ahmedabad and UK on June 16, 1960 has been extended to 32 countries, namely : Argentina, Australia, Austria, Belgium, Brazil, Britain, Bulgaria, Canada, Czechoslovakia, Denmark, Finland, France, Germany (Federal Republic), Germany (Democratic Republic), Greece, Hong Kong, Hungary, Irish Republic, Italy, Japan, Kenya, Luxembourg, Malaya, Netherlands, Norway, Poland, Singapore, Spain, Sweden, Switzerland, USA and USSR. This service enables the subscribers to exchange telegrams on teleprinter machines direct with subscribers of other countries.

Other Services

The Service also handles news transmissions on behalf of the Government of India for the benefit of Indian consular posts abroad and on behalf of certain press agencies to different areas outside India. Leased circuits have been made available to 12 of the leading airline companies and other parties in India.

CHAPTER XXVIII

LABOUR

In the organised sector of India's economy, the largest number of workers are employed in the factories. In 1959, the average daily employment in factories for which figures are available stood at 36,34,713*.

The following table gives the State-wise break-up of average daily employment figures in factories subject to the Factories Act for the period 1957 to 1960 on the basis of the returns submitted by them.

TABLE 242
EMPLOYMENT IN FACTORIES

State/Union Territory	Average daily number of workers employed*			
	1957	1958	1959 †	1960 †
				First half
Andhra Pradesh	1,97,440	2,21,954	2,12,442	2,20,044

NATIONAL EMPLOYMENT SERVICE

The Employment Service, started in 1945, consists of a network of Employment Exchanges each staffed by personnel trained in a carefully devised procedure. The Employment Exchange renders employment assistance to all employment seekers. It also discharges certain special responsibilities, such as the provision of employment assistance to displaced persons, discharged government employees and those belonging to the Scheduled Castes and Tribes.

The Employment Exchanges (Compulsory Notification of Vacancies) Act, enacted in 1960, makes it compulsory for employers usually employing 25 or more workers to notify their vacancies to the Exchange.

At the end of November 1961, there were 322 Exchanges (excluding 5 University Employment Bureaux) in the country. The table below gives figures relating to the activities of the Exchanges.

TABLE 246
NATIONAL EMPLOYMENT SERVICE

Year	No. of Exchanges	No. of registrations	No. of applicants placed in employment	No. of applicants on the Live Register	Monthly average number of employers using the Exchanges	No. of vacancies notified
1956	143	16,69,895	1,89,855	7,58,503	5,346	2,96,618
1957	181	17,74,668	1,92,831	9,22,099	5,632	2,97,188

*All mines subject to Mines Act.

†Relate to the period January-October.

The day-to-day administrative control over the Employment Exchanges was transferred to the State Governments with effect from November 1, 1956. The Central Government now limit their responsibilities to policy-making, co-ordination of procedure and standards and to rendering of assistance whenever needed.

Several schemes, such as (i) the collection of employment market information, (ii) occupational research and analysis, (iii) the publication of career pamphlets and handbooks on training facilities, and (iv) vocational guidance and employment counselling, are under implementation to improve the quality of service rendered by the Exchanges.

The Central Committee on Employment, constituted in 1958, advises the Government of India on problems relating to employment, creation of employment opportunities and the working of the National Employment Service.

Craftsmen Training

There are 166 training centres functioning under the Craftsmen Training Schemes. The other schemes which have been introduced during the Second Plan period are the National Apprenticeship Training Scheme, the Scheme for the Training of Industrial Workers (evening classes) and the Revised Scheme for the Establishments of Work and Orientation Centres for Educated Unemployed. The Central Training Institute at Koni-Bilaspur (Madhya Pradesh) has been shifted to Calcutta and a second centre which started functioning on a temporary basis at Aundh (Bombay) will shift to Bombay. Another institute was set up at Kanpur in 1961. Three new training institutes will be established at Madras, Hyderabad and Ludhiana and the Central Training Institute for instructors for women in New Delhi will be expanded.

A National Council for Training in Vocational Trades has been set up to advise the Government of India on all questions of training policy, to co-ordinate vocational training and to lay down uniform standards. It also awards national certificates of proficiency to craftsmen.

The Apprentices Act 1961 is intended to provide for the regulation and control of training of apprentices in trades and allied matters. With the implementation of the Act, the existing National Apprenticeship Scheme being tried on a voluntary basis will come to an end.

Central Institute for Labour Research

A Central Institute for Labour Research is proposed to be set up to undertake research on labour matters. It will be a society registered under the Societies Registration Act XXI of 1860 and its membership will consist of (i) a chairman nominated by the Government of India, (2) representatives of the Government of India, (3) representatives of State Governments, (4) representatives of employees' organisations, (5) representatives of employers' organisations, (6) representatives of educational and research institutions, (7) persons interested in labour research and who would like to be associated and (8) persons adopted by the members mentioned in (1) to (7).

WAGES AND EARNINGS

Annual Earnings

Table 247 gives the average annual earnings of factory workers during the period 1956-1959.

Index of real earnings	134	126(a)	124(b)

Working Class Consumer Price Index

Tables 249 and 250 show the different series of consumer price indices.

Regulation of Wages

The regulation of wages is governed by the Payment of Wages Act, 1936, and the Minimum Wages Act, 1948, as amended subsequently. The former extends to the whole of India except Jammu and Kashmir and applies to persons employed in any factory as defined in the Factories Act, 1948, and in any railway, and in receipt of wages and salaries which average below Rs. 400 a month. Under authority vested by the Act, the provisions of the Act have been extended to mines, plantations, docks, wharves or jetties in the ports of Calcutta, Bombay and Visakhapatnam and certain other establishments to which the Act can be extended.

(P) Provisional.

* Figure excludes those relating to petroleum, coal and metal products, water and sanitary services.

(†) Figure excludes those relating to petroleum, pumping, filling and storage.

@ Revised.

(a) Excludes Madras (including Andhra Pradesh).

(b) Provisional and excludes Madras (including Andhra Pradesh) and Punjab.

Regulation of Wages

The Minimum Wages Act, 1948, empowers the appropriate Government to fix minimum rates of wages payable to employees in industries specified in the Schedule. Such rates have been notified and enforced in most of the scheduled employments. The Act, as amended in 1957, extended, *inter alia*, the date for initial fixation of minimum wages for the employees in scheduled employments, including agriculture, to 31 December, 1959. The time limit for initial fixation of minimum wages has been done away with in the subsequent Amendment Act of 1961.

Wage Boards

The function of the Wage Boards is to fix a wage structure on the principle of fair wages. Central Wage Boards set up by the Government of India for cotton textiles, sugar and cement industries have submitted their reports. Wage Boards for the jute industry, the tea, coffee and rubber plantation industries have been set up.

Wage Census Scheme

The scheme envisages collection of occupational wage rates and earnings data in respect of workers employed in major factories, mining and plantation industries. Approximately 3,000 sampled establishments were covered in course of the field survey launched in July 1958. Besides having information on the extent of overtime and incentive bonus schemes obtaining in the establishments, a large volume of data relating to wage rate and pay-roll earnings of sample workers were collected occupation-wise. The result of the survey is being embodied in two reports—one general, the other industry-wise.

Steering Group on Wages

The Steering Group, consisting of nominees of the Union and State Governments and representatives of workers and employers, studies the trends in relation to wages, production and prices, and plans the collection of material for drawing up a wage map of India, industry-wise and region-wise, for the guidance of wage-fixing authorities.

Coal Mines Bonus Schemes

The Coal Mines Bonus Schemes framed under the Coal Mines Provident Fund and Bonus Schemes Act, 1948, apply to all coal mines in India except those in the State of Jammu and Kashmir. Under these schemes, colliery employees other than those in Assam, are entitled to receive a third of their basic earnings as quarterly bonus by virtue of a minimum qualifying attendance during the quarter. In Assam, the daily-rated workers are entitled to both weekly and quarterly bonus while the monthly-rated employees get quarterly bonus only.

INDUSTRIAL RELATIONS

Industrial Disputes

The table below shows the number of disputes, workers involved and man-days lost during 1957-60.

TABLE 251
INDUSTRIAL DISPUTES

Year	Number of disputes	Number of workers involved (in thousands)	Total number of man-days lost during the period (in thousands)
1957	1,630	8,89	64,29
1958	1,524	9,29	77,98
1959	1,531	6,94	56,33
1960	1,556	9,83	65,15

Industrial Employment Standing Orders

Under the Industrial Employment (Standing Orders) Act, 1946, the Central Government have framed model rules for adoption by industrial establishments employing 100 workers or more.

The Act was amended in 1961, *inter alia*, empowering the appropriate Governments to extend its provisions to establishments employing less than 100 workers; making provision for appointment of additional certifying officers and enabling the Central Government to delegate its powers to State Governments whenever necessary.

The measure has been extended to all establishments in Gujarat, Maharashtra and West Bengal employing 50 workers or more. In Assam the Act applies to all industrial establishments (except mines, quarries, oilfields and railways) which employ 10 workers or more. In Madras all the factories registered under the Factories Act 1948 are within the purview of this measure.

Discipline in Industry

A Code of Discipline has been evolved with the approval of the Indian Labour Conference and the Standing Labour Committee. The employers and workers avoid breaches of the code by settling their disputes through constitutional methods rather than by resorting to direct action. The implementation organisations at the Centre and in the States, which look into the breaches of the Code, have settled a number of complicated and long-standing disputes. The Evaluation and Implementation Organisation at the Centre has been successful in persuading the parties concerned to withdraw cases pending in High Courts or the Supreme Court and settle them out of court in 48% of the cases so far taken up by it. The central organisation has also been dealing with the implementation of the code to govern inter-union relations.

Works Committees

Under the Industrial Disputes Act, 1947, 845 works committees in central undertakings were functioning at the end of the second quarter of 1960.

Tripartite Machinery

The machinery at the Centre mainly consists of the Indian Labour Conference, the Standing Labour Committee and the Industrial Committees. There is also the Labour Ministers' Conference which is closely associated with the machinery, though not tripartite in character. The discussions at the session of the Indian Labour Conference in 1961 centred round the proposals for introducing an integrated scheme of social security and a code of efficiency and welfare. It also recommended methods for the elimination of contract labour in factory establishments.

The Standing Labour Committee at its meeting in 1961 recommended the setting up of safety councils at the national and regional levels and reviewed the working of the Code of Discipline and of the schemes of workers' participation in management and workers' education. The industrial committees on plantations, coal and non-coal mines discussed a variety of subjects including housing programmes in plantations and coal mines, wage revision in the coal industry and institution of a statutory welfare fund in the iron-ore mines.

Conciliation Machinery

The administration of industrial relations in the central sphere undertakings rests with the Chief Labour Commissioner. To assist the Chief Labour Commissioner, there is a field organisation consisting of Regional Labour Commissioners, Conciliation Officers and Labour Inspectors. Similarly, the State Governments have their own conciliation machineries headed by the Labour Commissioners.

Adjudication Machinery

There is a three-tier machinery for the adjudication of industrial disputes—Labour Courts, Industrial Tribunals and National Tribunals—all with original jurisdiction. Besides the Labour Courts at Delhi and Dhanbad, there are three Industrial Tribunals at Dhanbad, Bombay and Calcutta. In addition, there is an Industrial Tribunal at Delhi for the Delhi Administration, which is utilised by the Central Government. The States have their own tribunals and labour courts, which also function, when necessary, as *ad hoc* tribunals for the adjudication of disputes in the central sphere. National Tribunals are set up as and when necessary.

Workers' Participation in Management

The scheme for workers' participation in management was in operation in 29 undertakings in 1960. The desirability for extending the scheme to as many establishments as possible has been recognised on all hands and efforts are now being directed towards this end. The sub-committee of the Indian Labour Conference has since been reconstituted as an independent body and designated as the Committee on Labour Management Co-operation. The Government at the Centre and in the States have set up special agencies for expeditious implementation of the scheme.

Code of Efficiency

A committee has been appointed to explore means for realising the objectives for which the Code of Efficiency was suggested by the sub-committee of the Indian Labour Conference in December 1959. Collection of data for further study is now in progress.

Workers' Education

The Central Board for Workers' Education consisting of representatives of Government, both Central and State, organisations of employers and educationists, is a registered society which implements the workers' education scheme in three distinct phases, namely the training of top-level instructors known as teacher-administrators, of worker-teachers and of workers. One hundred teacher-administrators were trained by the end of November 1961, while another 37 were under training. The Board has established 14 regional workers' education centres in the country, which trained 1,502 worker-teachers and had 262 of them under training by the end of November 1961. Five thousand and twenty-four unit level classes were in existence at the end of November 1961, which had trained 17,089 workers and were imparting training to 9,254 other workers.

TRADE UNIONS

Tables 252 and 253 show the number and membership of the registered trade unions in India and of those affiliated to the four national federations.

SOCIAL SECURITY

Employees' State Insurance Scheme

The provisions of the Employees' State Insurance Act, 1948, apply to all perennial factories using power and employing 20 or more persons and cover labourers and clerical staff with monthly earnings up to Rs. 400.

By the end of March 1961 the insurance scheme was extended to about 16.74 lakh industrial workers in 121 centres in the Union Territory of Delhi and all the States except Gujarat. Medical care was provided to about 5.73 lakh units of families of insured workers in Delhi and all the States except Gujarat, Kerala, Madras and West Bengal. At the end of 1960-61, employees' contribution stood at Rs. 5.01 crores and the employers' contribution at Rs. 3.74 crores. A sum of about Rs. 3.47 crores was given to insured persons by way of benefits, of which Rs. 2.57 crores accounted for sickness, Rs. 15.15 lakhs for maternity, Rs. 63.41 lakhs for disablement and Rs. 11.73 lakhs for dependents.

Employees' Provident Fund

The Employees' Provident Funds Act, 1952, which was originally applied to six major industries to provide for the benefit of compulsory provident fund to industrial workers, covered at the end of November 1961, sixty-one industries. The Act applies to such of the factories and establishments in the covered industries as have completed three years of existence where the employment strength is 50 or more, and five years of existence where the employment strength is 20 or more.

All the employees in the covered factories and establishments drawing basic wages and dearness allowance including the cash value of food concessions, if any, and the retaining allowance, if any, not exceeding Rs. 500 per month, are eligible for membership of the Fund, after completing one year's continuous service or 240 days' actual work during a period of 12 months or less. The employees have to contribute at the rate of 6½% of basic wage, dearness allowance including the cash value of food concession and retaining allowance, if any, while the employers have to contribute at the same rate for their employees. The employees may, if they so desire, contribute at a higher rate upto 8½ per cent. At the end of August 1961, the number of exempted and unexempted establishments covered under the Act was 15,242. The corresponding number of subscribers to the Fund was 30,38,856, while the provident fund contributions amounted to Rs. 292·84 crores, of which Rs. 212·59 crores stood to the credit of the subscribers, the balance having been refunded to outgoing members or given as loans.

Coal Mines Provident Fund Schemes

The Coal Mines Provident Fund Schemes framed under the Coal Mines Provident Fund and Bonus Schemes Act, 1948, apply to all coal mines in India except the State of Jammu and Kashmir. In terms of the schemes the employees and the employers are to contribute at the rate of 6½% of the total emoluments of the employee, which include basic wage, allowance, overtime allowance, compensation for guaranteed wage, additional payment for difficult and arduous work and remuneration for paid holidays. The number of subscribers to the fund was 4,00,335 during the year 1960-61 and the amount of the fund was about Rs. 25 crores at the end of September 1961.

Maternity Benefits

Legislation concerning the payment of maternity benefits is in operation in almost all the States. Some of the State Acts apply to all regulated factories within their jurisdiction, while others apply to non-seasonal factories only. The qualifying period and the rates of benefit vary from State to State. Three Central Acts—the Mines Maternity Benefit Act, 1941; the Employees' State Insurance Act, 1948; and the Plantations Labour Act, 1951;—also regulate payment of maternity benefits. The Maternity Benefit Act 1961 has been enacted to provide uniform standards for maternity protection. It will apply in the first instance to all factories, mines and plantations, except those to which the Employees' State Insurance Act applies.

LABOUR WELFARE

Provision for amenities such as canteens, creches, rest shelters, washing facilities, medical aid and for the appointment of welfare officers has been made in respect of industries and establishments covered by the Factories Act, 1948, the Mines Act, 1952, and the Plantations Labour Act, 1951. In addition, legislative measures for the constitution of funds for financing welfare schemes in coal and mica mines have been enacted and are in force.

Motor Transport Workers Act

In May 1961 the Motor Transport Workers Act was enacted to provide for the welfare of motor transport workers and to regulate the conditions of their work. It contains provisions for canteens, rest rooms, uniforms, hours of work, leave etc.

Coal Mines Labour Welfare Fund

The Fund maintains 2 central hospitals, 8 regional hospitals-cum-maternity and child welfare centres, 2 dispensaries, a T.B. clinic and a T.B. hospital. Steps are being taken to increase their number. Anti-malaria measures and a scheme of domiciliary treatment are also in operation.

The Fund is also running adult education centres, women's welfare centres, children's parks and a family counselling service. A scheme for imparting elementary education to miners' children is in progress.

Under the subsidy-cum-loan scheme 3,698 houses were constructed and 115 are under construction. The allocation of 31,022 houses amongst collieries under the New Housing Scheme was completed. Construction work on 9,985 houses was completed and 7,322 houses were under construction under the scheme. The earnings of the Fund are estimated to be Rs. 2,53,80,000. The expected expenditure on general welfare measures and that on housing is Rs. 1,83,71,000.

Mica Mines Labour Welfare Fund

The Fund provides medical, educational and recreational facilities for mica mine workers. Three hospitals have been established by the Fund at Karma (Bihar), Kalichedu (Andhra Pradesh) and Tisri (Bihar) and another is to be established at Gangapur (Rajasthan). Several dispensaries with maternity and child welfare centres are attending to the medical needs of mica miners. Nine mobile dispensaries are also in operation in certain areas. The Fund maintains several primary schools, awards scholarships and distributes books and stationery free of cost. During 1961-62 the sums provided to the mica producing States included Rs. 4.4 lakhs to Andhra Pradesh, Rs. 14.9 lakhs to Bihar and Rs. 9.1 lakhs to Rajasthan.

Iron Ore Mines Labour Welfare

The Iron Ore Mines Labour Welfare Cess Act, 1961, has been enacted to provide for the levy and collection of a cess for promoting welfare of labour employed in the iron ore mining industry as is being done for coal and mica miners under the coal and mica mines labour welfare fund.

Welfare of Plantation Labour

Under the Plantations Labour Act, 1951, all plantations are required to provide housing accommodation to their resident workers and their families and to maintain hospitals or dispensaries. Some of them also run elementary schools for the education of the labourers' children. Recreational facilities and training in useful handicrafts such as tailoring, knitting, weaving and basket-making, are provided in some of the tea estate centres with the help of donations from the Tea Board.

The Act has been amended to check, *inter alia*, fragmentation of plantations by employers in order to escape the liabilities.

Labour Welfare Funds in Central Government Industrial Undertakings

These welfare funds were created on a voluntary basis in 1946 for financing welfare activities among workers.

Labour Welfare Centres

Most States and Union Territories are running a number of welfare centres. These centres cater to the recreational, educational, vocational and cultural needs of the workers and their children. All private industrial establishments of some standing also maintain welfare centres for the benefit of their workers.

CHAPTER XXIX

HOUSING

The problem of housing in India is a complex one requiring finances on a large scale and dependent for its solution on concerted efforts on the part of individuals, co-operatives, State and Union Governments to be planned and executed over a number of years. There is acute shortage of housing in urban and rural areas and much of the available accommodation is of the qualitatively sub-standard variety. The shortage in urban areas has been largely due to considerable increase in population since 1921, the heavy shift of population from the rural to the urban areas, the haphazard growth of towns due to lack of sufficient State or municipal control over building activity and the comparative inability of private enterprise to keep pace with the growing demand.

The responsibility of Government and public bodies to provide adequate accommodation for their employees was recognised even before Independence. The Government of Bombay pioneered in this direction in 1921 by establishing a Development Department. The effort, which was discontinued after 15,000 tenements were built, was resumed in 1949 and a special Housing Board was set up for building houses for industrial workers and other low income groups, developing land and assisting in the production and distribution of building materials. Improvement Trusts in Bombay, Calcutta, Madras and Kanpur also undertook public housing schemes. Municipalities have also been engaged in building houses not only for their essential staff, but occasionally for low income groups in general. The Municipalities and Improvement Trusts, however, operate under severe limitations, particularly in the matter of finance.

The activities of the Central Government till 1950 were confined largely to providing houses for their employees, particularly in the essential services. The influx of displaced persons from Pakistan provided the Union Government an opportunity to undertake for the first time a large scale housing programme for persons other than their own employees. A similar extension of State activity was made in West Bengal, Assam, Bihar, Orissa and Punjab.

The record of private employers is not uniform in respect of provision of houses for their workers. While a number of employers have invested part of their earnings in providing better living conditions for their workers, construction of houses by employers generally in post-war years has fallen short of expectations. Co-operative Housing Societies, particularly in Madras, Bombay and Uttar Pradesh, have also attempted, though to a limited extent, to provide accommodation for middle and low income groups.

The bulk of the building activity has, however, throughout been in the hands of private enterprise, which for a variety of reasons has been unable to keep pace with demand.

According to the 1951 Census, there were 6,43,61,676 occupied houses in the country—5,40,56,388 in rural areas and 1,03,05,288 in urban areas. Estimates of the requirements of housing in urban areas during the decade 1951-61 called for the construction of about 89 lakh houses to make up for the past deficit and obsolescence and to provide for the increase in urban population. About 5 crore houses in rural areas were also required to be replaced by new dwellings or substantially improved. The deficit at the end of 1961 has been estimated to be about 50 lakhs in urban areas*.

*This is without reference to the deterioration/depreciation of existing houses and without reckoning about 10 lakhs of slum dwellings.

Since May 1952, when a separate portfolio was created in the Union Government, organised efforts are being made on a governmental basis to step up housing activities in general and in particular to provide suitable financial assistance for construction of houses to individuals, co-operatives industrial employers, planters, local bodies, etc., through the introduction of various housing schemes. Annual conferences of State Ministers and occasional seminars and symposia have helped in creating a keen sense of awareness of the gravity of the problem and crystallising the progressive action to be taken to meet the situation. Corresponding to the Housing Wing in the Union Ministry of Works, Housing and Supply, the State Governments have established separate departments (or Wings) for promoting housing activities. Statutory Housing Boards have been established in Andhra Pradesh, Madhya Pradesh, Madras, Maharashtra, Mysore and Gujarat, and a non-statutory Housing Board has been set up in West Bengal.

PROGRESS UNDER THE PLANS

The period of the First Five Year Plan was devoted to the formulation of the initial stages in the evolution of a national housing programme. Two Urban Housing Schemes—the Subsidised Industrial Housing Scheme and the Low Income Group Housing Scheme—envisaging an expenditure of Rs. 38.5 crores were initiated for the construction of 1,20,000 dwelling units. This effort was supplemented by housing programmes for certain sections of the population like displaced persons, Government servants, etc., launched by the Central and State Governments and local authorities. It has been estimated that public authorities provided about 7,42,000 houses or tenements during the First Plan period.

During the Second Five Year Plan period six more schemes were promulgated *viz.* the Plantation Labour Housing Scheme, the Slum Clearance Scheme, the Village Housing Projects Scheme, the Middle Income Group Housing Scheme, the Rental Housing Scheme for State Government Employees, and the Land Acquisition and Development Scheme. Government sources provided funds to the extent of Rs. 84 crores during the Second Plan period for all these public housing schemes including the two schemes carried forward from the First Plan. Rs. 17.2 crores from the Life Insurance Corporation were also channellised into housing (under the Middle Income Group Housing and Rental Housing Schemes). Substantial housing programmes of their own were also undertaken outside these schemes by the Union and State Governments as well as local bodies. The total outlay on public housing during the Second Plan was of the order of Rs. 250 crores and 5,00,000 houses were constructed. In the private sector, an investment of the order of about Rs. 1,000 crores is estimated to have gone into housing and other private construction. Considerable attention has also been paid by public authorities to the question of improving housing conditions in rural areas.

The Third Five Year Plan envisages a provision of Rs. 142 crores from the Government sources, for town planning and urban development programmes and the public housing schemes of the Union and State Governments. A further contribution of about Rs. 60 crores is expected to be made by the Life Insurance Corporation for housing programmes during the same period. In recognition of the inadequacy of the funds thus available, the Plan also recommends the establishment of a Central Housing Board with suitable statutory powers to raise additional funds from private sources and to channel them into the field of housing.

A brief resume is given below of the progress made under the public housing schemes launched by the Union Government to help the State Governments to provide better housing conditions.

Subsidised Industrial Housing Scheme

The Subsidised Industrial Housing Scheme, which came into operation in September 1952, envisages the grant of long-term interest-bearing loans and liberal subsidies by the Government of India to the State Governments and through them to other approved agencies, such as Statutory Housing Boards, Local Bodies, Industrial Employers and registered Co-operative Societies of Industrial Workers. The assistance is for construction of houses for industrial workers, covered by Section 2(1) of the Factories Act, 1948, and mine workers (other than those engaged in coal and mica mines) falling within the meaning of Section 2(h) of the Mines Act, 1952. The financial assistance and the number of houses sanctioned under the Scheme till the end of the year 1961 are shown in the following table.

TABLE 254
SUBSIDISED INDUSTRIAL HOUSING

Agency	Assistance sanctioned (in crores of rupees)			No. of houses sanctioned
	Loan	Subsidy	Total	
State governments	21.19	20.19	41.38	1,16,550
Private employers	3.02	2.14	5.16	25,546
Co-operative societies of industrial workers	0.96	0.41	1.37	4,641
Central government (in Delhi) ..	—	—	0.96	—
TOTAL	25.17	22.74	48.87	1,46,737

About 1,13,223 houses were reported to have been completed till the end of December 1961.

Low Income Group Housing Scheme

The Low Income Group Housing Scheme, which was introduced in November 1954, provides for the grant of long-term interest-bearing loans to the State Governments for the purpose of housing persons having an annual income not exceeding Rs. 6,000. The total loan assistance admissible under the scheme is 80% of the cost (including cost of land) subject to a maximum of Rs. 8,000 per house. Short-term loans, repayable in a period not exceeding five years, are also advanced under the Scheme by the Central Government to the State Governments for acquisition and development of land and for the subsequent sale of the developed sites to eligible persons on a no-profit-no-loss basis.

A sum of Rs. 42.74 crores was drawn by the State Governments/Union Territory Administrations under the Scheme till March 31, 1961. Another sum of Rs. 6.94 crores is likely to be disbursed to State Governments and Union Territories during 1961-62. Up to the end of 1961, 95,502 houses were sanctioned, 65,401 houses were completed and 19,839 houses were under construction.

Plantation Labour Housing Scheme

The Plantation Labour Act, 1951, makes it obligatory for every planter to provide housing accommodation for all his resident workers. A scheme known as the Plantation Labour Housing Scheme was formulated in April 1956 to help planters, specially the smaller ones, to fulfil this obligation. The Scheme envisages the grant of assistance in the form of interest-bearing loans (to the extent of 80% of the cost of houses) to the planters through the State Governments. By the end of February 1962, assistance to the extent of Rs. 14.89 lakhs was sanctioned for the construction of 708 houses, out of which 650 were reported to have been completed.

The planters have been experiencing practical difficulties in taking advantage of the Scheme, despite their reported willingness to do so, in view of their inability to furnish the security prescribed by the State Governments for loans under the Scheme. The State Governments have, therefore, been asked to constitute a "Pool Guarantee Fund" to indemnify themselves against bad debts that they might incur as a result of relaxation of security provision prescribed by them for advance of loans under the Scheme. The Pool Guarantee Fund, from which the State Governments could recoup their losses, is to be raised by charging an additional interest at $\frac{1}{2}$ per cent per annum. The losses, if any, in excess of the assets in the Fund, would be shared equally by the Government of India, the State Government and the Commodity Board concerned. The Tea and Rubber Boards have subscribed to the 'Pool Guarantee Fund' programme, while it is under consideration of the Coffee Board. "Model Rules" have also been drawn up for adoption by the State Governments, with minor modifications to suit local conditions.

Slum Clearance Scheme

The Slum Clearance Scheme came into operation in May 1956. Under the Scheme, financial assistance for slum clearance work is given to the State Governments and through them to municipal and local bodies. Financial assistance is envisaged for rehousing of families residing in slums and whose income does not exceed Rs. 250 per mensem in Bombay and Calcutta, and Rs. 175 per mensem elsewhere. The Scheme is for the present confined mainly to Bombay, Calcutta, Madras, Delhi, Kanpur and Ahmedabad where the problem has to be tackled without delay. Other urban areas are also eligible for Central assistance if slum clearance work is justified.

One hundred and ninety-six slum clearance/improvement projects formulated by the State Governments and the Administration of Tripura were sanctioned or approved till the end of 1961, for construction of 58,493 housing units at an estimated cost of Rs. 17.51 crores. Nineteen thousand and ninety-three housing units were completed and work was in progress on another 8,475 housing units by the end of 1961. Four thousand nine hundred and twenty-seven houses and 105 shops were constructed in Delhi till the end of August 1961, while another 1,026 houses and 24 shops are under construction. In 1961-62 the Delhi Municipal Corporation also took up implementation of Jhugis and Jhopris (on Government and public lands) Clearance Scheme.

Village Housing Projects Scheme

The Village Housing Projects Scheme, which was introduced in October 1957, envisages the establishment of housing projects in about 5,000 villages mostly selected from suitable Community Development Blocks. It is based on the principle of aided self-help. Financial assistance is given in the form of loans to the extent of two-thirds of the construction cost or Rs. 2,000 whichever is less. Technical advice and guidance is provided free of charge through the Rural Housing Cells set up by the State Governments for this purpose also through and the Block Development staff.

Rural Housing Cells have been established in all the States except Gujarat and Jammu and Kashmir. By the end of February 1962, about 4,130 villages were selected, survey conducted in 2,300 villages and layout plans drawn up for about 2,000 villages. Loans amounting to more than Rs. 3.26 lakhs were sanctioned by State Governments for construction of 29,200 houses. A sum of Rs. 2.55 lakhs was disbursed to beneficiaries, 7,800 houses were completed and another 16,600 houses were at different stages of construction.

There is a provision of Rs. 12,70 lakhs for the Scheme in the Third Five Year Plan, out of which a sum of Rs. 131.75 lakhs was allocated to State Governments and Union Administrations during 1961-62.

Land Acquisition and Development Scheme

The Scheme, introduced in October 1959, provides for grant of loan assistance to State Governments to facilitate acquisition and development of land on a large scale for making developed plots available at reasonable prices to intending house-builders, more particularly to those in the lower income brackets. The Scheme is also intended to help in stabilisation of land prices, rationalisation of urban development and promotion of self-sufficient composite colonies.

Commitments to the extent of Rs. 15 crores were permitted, although under this Scheme the actual expenditure was not to exceed Rs. 2.90 crores during the Second Plan period. A sum of Rs. 2.20 crores was drawn by the State Governments during the period. Up to the end of February 1962, about 875 acres of land were acquired under the Scheme by the State Governments.

The Third Five Year Plan envisages an overall provision of Rs. 26 crores for the Scheme. Rs. 9.5 crores are to be found from Government sources and the balance to be provided from the contributions to be made by the Life Insurance Corporation for housing programmes during the Third Plan period. The State Governments are expected to constitute a "Revolving Fund" out of the loan assistance released to them from time to time, for the purpose of the Scheme.

Middle Income Group Housing Scheme

This Scheme introduced in February 1959, as a non-Plan scheme financed through funds drawn from the Life Insurance Corporation, envisages grant of house-building loans to individuals or co-operative societies of persons whose income ranges between Rs. 6,001 and Rs. 15,000 per annum. The total loan assistance admissible under the scheme is 80% of the cost (including the cost of land) subject to a maximum of Rs. 20,000 per house. The Life Insurance Corporation of India has so far advanced about Rs. 13 crores for the purpose. By the end of February 1962, loan assistance was sanctioned to the extent of Rs. 10.65 crores for the construction of 6,337 houses, the actual amount disbursed to beneficiaries being Rs. 6.09 crores. The number of houses completed is 1,655.

Rental Housing Scheme for State Government Employees

The Scheme, also a non-Plan one, is intended to assist the State Governments to provide adequate housing accommodation for their own employees. A sum of Rs. 8 crores has so far been made available by the Life Insurance Corporation. Till the end of February 1962, construction of 6,327 houses at an estimated cost of Rs. 6.01 crores was sanctioned and 1,289 houses were constructed.

NATIONAL BUILDINGS ORGANISATION

The National Buildings Organisation was set up in July 1954, to ensure a rational approach to the problem of housing and to achieve reduction in building costs through development of building materials, techniques, designs and practices, and generally to help in the promotion of building activities through co-ordination of research and dissemination of useful information. The Organisation is being developed into the Regional Housing Centre for the Dry Tropical Zones of the ECAFE region in collaboration with the United Nations Technical Assistance Organisation.

The Organisation has a well-equipped library of publications and films and publishes quarterly and monthly journals. It has also brought out a number of publications on building science and allied subjects.

The Organisation also co-ordinates the activities of *Regional Research-cum-Training Centres on Rural Housing* set up by the Government of India in six existing engineering institutions located at Bangalore, Anand, Sibpur, Roorkee, Chandigarh and New Delhi for promoting research in the improved utilisation of local building materials and in the development of designs and construction techniques for village houses. These Centres also train technical personnel employed by the State Governments in the planning and implementation of projects under the Village Housing Projects Scheme. The symposium on "Housing Co-operatives" conducted by the Organisation in September 1961, has helped to bring together persons concerned with co-operative housing in the technical, administrative and sociological fields and also to gather information and ideas relating to the promotion and operation of housing co-operatives in the country and elsewhere.

CHAPTER XXX
STATES AND UNION TERRITORIES†
ANDHRA PRADESH

Area: 1,06,052 sq. miles
Principal language : Telugu

Population: 3,59,77,999

Capital: Hyderabad

Governor: Bhimsen Sachar

COUNCIL OF MINISTERS*

<i>Ministers</i>	<i>Portfolios</i>
N. Sanjiva Reddy Chief Minister, General Administration, Police and Home, Legislature and Elections, Services, Social Welfare and Major Industries.
N. Ramachandra Reddy Revenue, Registration and Stamps, Evacuee Property, Atiyat, Jagir Administration, Debt Settlement Board, Land Reforms, and Relief and Rehabilitation.
K. Brahmananda Reddy Finance, Commercial Taxes and Co-operation.
M. Pallam Raju Animal Husbandry, Forests and Fisheries.
M. Chenna Reddy Planning, Bureau of Economics and Statistics, Panchayats and Panchayati Raj.
P. V. G. Raju Education.
A. C. Subba Reddy Irrigation and Power.
Mir Ahmed Ali Khan Buildings, Highways, Ports, Public Gardens, City Water Works, Public Works Department Workshops, Muslim Waqfs and Waqfs Board, and Salar Jung Estate.
Y. Sivarama Prasad Health and Medical.
M. N. Lakshminarasiah Medium and Small-Scale Industries, Industrial Co-operatives, Stationery and Printing, Controlled Commodities, Small-Scale Industries Corporation, Mines, Mining Corporation and Central Stores Purchase.

Ministers of State

M. R. Appa Rao Excise and Prohibition.
P. V. Narasimha Rao Law, Law Courts, Law Officers, Prisons, Information and Publicity, and Tourism.
Alapati Venkatramayya Municipal Administration and Housing.
Smt. T. N. Sadalakshmi Religious and Charitable Endowments, Accommodation Control and Small Savings.
Adduri Balaram Reddy Agriculture, Food Production, Marketing, Rural Indebtedness and Debt Relief, Money Lending and Money Lenders, and State Warehousing Corporation.
B. V. Gurumurthy Labour and Transport.

Chief Secretary

M. P. Pai

† In this Chapter, only parties recognised by the Election Commission, India, (for the purpose of allotting reserved symbols to their candidates), have been shown in indicating party affiliations of members of Legislative Assemblies. Members belonging to non-recognised parties (i.e. those allotted free symbols) have been shown as independents. A distinction has, however, been drawn between those who stood as independents on a non-party basis and others sponsored by the recognised parties but who have been shown as independents because the party has not been recognised in the State concerned for the purpose of allotting a reserved symbol. Party affiliations are on the basis of information furnished by the State Governments.

*As on June 1, 1962.

ANDHRA PRADESH HIGH COURT*

<i>Chief Justice</i>	P. Chandra Reddy
<i>Puisne Judges</i>	K. Umamaheshwaram, P. Satyanarayana Raju, N. D. Krishna Rao, Manohar Pershad, P. J. Reddy, P. Basi Reddy, N. Kumarayya, M. Seshachalapathi, C. Sanjeeva Row Naidu, D. Munikanniah, G. Chandrasekhara Sastry, H. Anantanarayana Ayyar, K.V.L. Narasimham, Sharfuddin Ahmed, E. Venkatesam, Gopal Rao Ekbote, Mohd. Mirza.
<i>Advocate-General</i>	D. Narasaraju

PUBLIC SERVICE COMMISSION*

<i>Chairman</i>	Ghulam Hyder
<i>Members</i>	Y. Pitchi Reddy, W. Venkataswami Naidu, G. Simhadri

ANDHRA PRADESH LEGISLATIVE ASSEMBLY*

Speaker : B. V. Subba Reddy

†Members whose term expires on June 30, 1962.

*Population figures are on the basis of the 1961 census (provisional). Figures of area of districts (rounded to the nearest unit) have been revised on the basis of information provided by the Survey of India in January 1962. These are still provisional pending final revision survey of boundaries of States and Union Territories. Area figures provided by the State Government have been adopted in the case of taluks and of districts which have undergone reorganisation (shown with ‡).

‡Figure furnished by the State Government.

Unit	Area in sq. miles	Popula- tion	Unit	Area in sq. miles	Popula- tion

NAGA HILLS—TUENSANG AREA (NAGALAND)

Area: 6,236 sq. miles

Headquarters: Kohima

Under the Nagaland (Transitional Provisions) Regulations, 1961, promulgated by the President on February 8, 1961, the areas comprised in Naga Hills-Tuensang Area are known by the name of Nagaland and have the status of a separate State of the Indian Union. An Interim Body has been established consisting of forty-five members chosen by election from the tribes in Nagaland. An Executive Council consisting of five members has been set up to assist and advise the Governor in the exercise of his functions in relation to such matters (other than finance and the maintenance of public order) as may be specified by the Governor in this behalf. A village council for each village, a range council for each range and a tribal council for each tribe have also been constituted.

PONDICHERRY

Area: 186 sq. miles *Population:* 3,69,083 *Capital:* Pondicherry
Principal languages: French and Tamil

Following an agreement with the Government of France, the Government of India took over on November 1, 1954, the administration of the territories formerly known as the "French Establishments in India". The territories comprise Pondicherry and Karaikal on the Coromandal Coast; Yanam on the Andhra Coast; and Mahe on the Coast of Kerala. A Treaty ceding these territories to India was signed at New Delhi on May 28, 1956, between the representatives of the Governments of India and France. This Treaty is yet to be ratified formally by the French Parliament. Meanwhile, the administration of the State is being carried on by the Government of India through a Chief Commissioner.

Chief Commissioner : S. K. Datta

COUNCILLORS*

V. Venkatasubba Reddiar	Public Works, Electricity, Fisheries, Port and Planning.
Edouard Goubert	Finance, Labour and Industries.
C. E. Bharathan	Local Administration, Education and Transport.

CHAPTER XXXI

INDIA AND INTERNATIONAL ORGANISATIONS

The activities of the Government of India in the international sphere have been guided since independence by the ideals of conduct embodied in one of the directive principles of the Constitution. This directive requires the State to endeavour to promote international law and treaty obligations and to encourage settlement of international disputes by arbitration.

The role that India played in the deliberations of the United Nations and its specialised agencies and other international organisations since independence has been reviewed in the previous editions of this Annual. A brief review of India's role during 1961 is given below.

UNITED NATIONS ORGANISATION

POLITICAL

The Indian delegation to the sixteenth session of the UN General Assembly in 1961 was composed as follows:

<i>Representatives</i>	V. K. Krishna Menon (Chairman) B. N. Chakravarty R. Venkataraman C. S. Jha G. Parthasarathy
<i>Alternate Representatives</i>			N. C. Kasliwal Moinul Huq Chaudhury C. R. Pattabhi Raman J. N. Khosla J. N. Sahni
<i>Parliamentary Adviser</i>	N. M. Lingam
<i>Advisers</i>	A. B. Bhadkamkar V. A. Kidwai N. Rasgotra K. Natwar Singh S. S. Nath
<i>Secretary-General</i>	S. K. Roy

Colonialism

India has been appointed a member of a committee of 17 members to examine the situation regarding the implementation of the General Assembly's resolution for grant of independence to colonies. A resolution was co-sponsored by India in the General Assembly condemning Portugal's non-compliance and appointing a committee of seven members to obtain such information as it can on Portuguese non-self-governing territories. India's permanent representative in the UN, C. S. Jha, was elected chairman of the 17-nation Special Committee on Colonialism charged by the General Assembly with the task of supervising the liquidation of colonialism.

Disarmament

In August 1961, the General Assembly adopted a resolution, co-sponsored by India, recommending resumption of the tripartite talks on the banning of nuclear tests and urging all States to refrain from the tests. B. N. Ganguli was appointed a member of a 10-member group to study the economic and social consequences of disarmament. V. K. Krishna Menon led the Indian

delegation to the Geneva Conference on Disarmament which began its session on March 14, 1962.

Trust and Non-Self-Governing Territories

India was appointed to a visiting four-member mission to Nauru and New Guinea early in 1962 for a two-month study of conditions in the two territories.

Atomic Energy Agency

At the fifth general conference held in Vienna during September-October 1961, India was elected as one of the Vice-Presidents and re-designated for membership on the Board of Governors for 1961-62.

Diplomatic Intercourse and Immunities

At the first International Conference on Diplomatic Intercourse and Immunities called by the United Nations in Vienna on March 2, 1961, A. S. Lall was elected chairman of the 'Committee of the Whole'.

Appointments and Elections to UN Bodies

India continued to be a member of the 15-Nation Conciliation Commission for the Congo. Col. Guha was appointed as the Chief of Staff of the UN Military Command in the Congo and Brigadier K. A. Raja as the Military Commander of the UN Forces in Katanga.

C. S. Jha, India's permanent representative in the UN, was elected (i) chairman of the 15-member working group for examination of administrative and budgetary procedures of the UN, and (ii) chairman of the committee on contributions.

R. Venkataraman was re-elected to serve on the UN Administrative Tribunal for a further three-year term beginning January 1, 1962.

C. V. Narasimhan was appointed as (i) Under Secretary for General Assembly's Affairs and (ii) Chief of the Secretary-General's Cabinet. He was also appointed to serve on a seven-member Economic Policy Board to accelerate economic and social advance in the under-developed countries.

Vaidyanathan, Secretary of the UN Advisory Committee on Administrative and Budgetary matters, was appointed as the UN Technical Assistance Board's regional representative for South-East Asia in Bangkok.

International Law Commission

At the thirteenth session of the Commission, held in Geneva in May-July 1961, India was represented by Radha Binod Pal. It discussed, *inter alia*, the following subjects : consular intercourse and immunities; law of treaties; planning of the future work of the Commission; and co-operation with other bodies. The UN General Assembly elected Radha Binod Pal as a member of the Commission for a five-year term.

The fourth and fifth sessions of the Afro-Asian Legal Consultative Committee were held in Tokyo and Rangoon during February 1961 and January 1962 respectively. During these sessions, the Committee had before it several subjects for consideration such as the status of aliens, extradition, dual nationality, legality of nuclear tests, arbitral procedure, reciprocal enforcement of judgements, etc. M. C. Setalwad was elected president of the Committee at its Rangoon session. The secretariat of the Committee is located at present in New Delhi.

ECONOMIC AND SOCIAL

India is represented on the following functional Commissions of the UN Economic and Social Council: Commission on International Commodity Trade; Commission on Human Rights; Commission on Narcotic Drugs and Statistical Commission. During 1961 India was elected as a

member of the Economic and Social Council and the Population Commission and was re-elected to the Human Rights Commission. She was also represented at the ninth session of the Commission on International Commodity Trade held in New York in May 1961.

Human Rights Seminar On Freedom of Information

The First UN Human Rights Seminar on Freedom of Information was held in New Delhi in February-March 1962, and was attended by representatives of the ECAFE region countries, Australia and New Zealand and observers from ILO and UNESCO. The leader of the Indian delegation, Asoke K. Sen, was elected as chairman of the Seminar. Among the subjects discussed by the Seminar were the role of Government, press laws, the role of the publisher and the proprietor, the role of the professional journalist, standards of journalism and the role of the reader.

Economic Commission for Asia and the Far East (ECAFE)

G. L. Nanda was elected as the chairman of the first Conference of Asian Economic Planners which met in New Delhi from September 26 to October 3, 1961. The recommendations of the Conference aimed at ensuring that a simultaneous and steady economic development in individual countries should also stimulate greater mutual co-operation within the region. In September 1961, a three-man committee of experts was appointed by ECAFE to suggest measures for economic integration of the region. K. B. Lall was appointed chairman of the Committee. At the ECAFE Seminar on Road Passenger Transport which met in Madras beginning with October 9, 1961, the leader of the Indian delegation, H.P. Sinha, was elected chairman. The seminar considered statutory regulations regarding road passenger transport, their purpose, scope and nature, and the economic consequences of such regulatory measures. The Seminar on Industrial Estates in the ECAFE region which was held in Madras at about the same time discussed the role of industrial estates with reference to patterns, policies and programmes of industrial development. A Seminar on Trade Promotion was held at Jaipur in November-December 1961. India also participated in two regional seminars organised by the ECAFE at Bangkok in November-December 1961, and in the 18th session of the ECAFE held at Tokyo in March 1962.

Food and Agriculture Organisation (FAO)

India was represented at all the important meetings and conferences convened by the FAO during 1960-61. The 35th session of the FAO Council which met in Rome in June 1961, discussed freedom-from-hunger campaign, expanded programme of technical assistance, etc. India's delegation to the eleventh session of the FAO Conference held in Rome in November 1961 was led by S. K. Patil. The Conference discussed national and international price stabilization measures, utilisation of food surpluses for economic and social development, etc. The FAO group on coconut and coconut products met in Trivandrum in December 1961. India also took part in a FAO Conference held in Kuala Lumpur in January 1962 which discussed means of controlling cattle diseases.

India was also represented at the UN Sugar Conference held in Geneva in September 1961, the meetings of working parties of the International Rice Commission held in New Delhi in December 1961, the meetings of FAO's Consultative Sub-committee on Economic Aspects of Rice held in Rangoon in February 1962, and at the UN Wheat Conference held in Geneva in January-February 1962.

International Labour Organisation (ILO)

Twenty-six of the one hundred and sixteen ILO Conventions have so far been ratified by India. The main provisions of a number of the Conventions are also being followed in practice.

Besides attending the three meetings of the Governing Body and the 45th session of the International Labour Conference held in Geneva in June 1961, Indian representatives participated in the meetings of several ILO Committees, *viz.*, the seventh session of the Inland Transport Committee held in Geneva in May 1961, the second session of the Tripartite Subcommittee on Seafarers' Welfare held in Geneva in September 1961, the eleventh session of the Asian Advisory Committee held in Geneva in November 1961, and the fourth session of the Committee on Work on Plantations held in Geneva in December 1961. S. T. Merani was elected chairman of the governing body for 1961-62.

India secured the services of four experts in industrial engineering, productivity, management development and personnel management during 1961, under the ILO Expanded Programme of Technical Assistance. Nine trainees were sent abroad for training in productivity, workers' education, occupational health, industrial disputes, etc, while seven trainees from Afghanistan, Burma, Ceylon, Pakistan and Philippines came to India for training in vocational rehabilitation of disabled persons, safety in mines, cottage industries, co-operation, etc.

United Nations Educational, Scientific and Cultural Organisation (UNESCO)

The 59th session of the UNESCO Executive Board held in Paris in June 1961, reviewed the programmes organised in different countries in connection with the Tagore Centenary. It also adopted a suggestion by Smt. Indira Gandhi that the Executive Board might formulate and adopt a declaration on the role of education in economic and social development for the guidance of member-states, UNESCO's Secretariat and other international organisations concerned. A consultative body called the Organisation of Asian News Agencies was set up in September 1961 by representatives of nine Asian news agencies to further their common interest and increase the flow of information among the countries of the region. K. N. Ramanathan was elected chairman of the Executive Board. The eighth session of the International Advisory Committee on Research in National Sciences Programme of UNESCO was held in New Delhi in October 1961. M. S. Thacker was a member of the Committee. An East-West cultural conference in Calcutta was organised by the Ramakrishna Mission Institute of Culture in November 1961, with assistance from the Indian National Commission for Co-operation with UNESCO. An International Literary Seminar organised by the Sahitya Akademi in November 1961 as part of the Tagore Centenary celebrations was also assisted. A six-week UNESCO regional workshop on production of low-cost visual aids was held at New Delhi in January 1962.

A regional centre for training of educational administrators, planners and supervisors in Asia was established in New Delhi in furtherance of UNESCO's regional programme for primary education in Asia. India also played host to a regional symposium organised by UNESCO in New Delhi in January-February 1962 on overall educational planning in Asia.

UNESCO approved technical assistance amounting to \$1,587,800 to India during the two-year period of 1961-62 for the development of the Indian Institute of Technology, Bombay; the Central Arid Zone Research Institute, Jodhpur; and selected universities and research laboratories. It has also provided financial assistance for 1961-62 for the development of a programme of education for international understanding, science museums, Asian Theatre Institute and the gallery of western art in the national museum. India has offered a sum of Rs. 10 lakhs and five fellowships for training of African personnel in India. India's contribution to UNESCO for 1961-62 amounted to \$728,739. India also paid a sum of \$ 166,000 as its contribution for the year 1961 towards the maintenance and

operation of the UNESCO Research Centre on Social and Economic Development in Southern Asia, New Delhi.

World Health Organisation (WHO)

During 1961, Indian representatives were appointed as members of several WHO expert committees and advisory panels. India played host to the 14th session of the WHO Regional Committee for South-East Asia held at Ootacamund in September 1961. The leader of the Indian delegation was elected as chairman.

During 1961, WHO budgeted a sum of \$439,044 for the implementation of programmes in India under its regular budget and \$474,774 under Technical Assistance funds. A sum of \$224,890 was also sanctioned for the implementation of the Malaria Eradication Programme in India during 1961. The Government of India's contribution to WHO during 1961 amounted to Rs. 20,27,190, besides a contribution of Rs. 1,00,000 to that organisation towards the Malaria Eradication special account.

United Nations International Children's Emergency Fund (UNICEF)

Assistance of the value of \$2,851,000 was provided to India during 1961 in the form of equipment and supplies for the following projects : basic M.C.H. continued assistance to paediatric training and services; national tuberculosis control programme; leprosy control; expanded nutrition project in Uttar Pradesh; milk conservation, Kanpur and Worli; B.C.G. campaign; trachoma control; applied nutrition; assistance to blind and departments of social and preventive medicine.

Total assistance from UNICEF till the end of 1961 amounted to \$32,235,257. India contributed Rs. 30,00,000 to UNICEF in 1961, besides a grant of Rs. 4,65,000 for the maintenance of the UNICEF local office.

General Agreement on Tariffs and Trade (GATT)

At the nineteenth session of the contracting parties to the General Agreement on Tariffs and Trade which was held in Geneva from November 13 to December 9, 1961, India was represented by K. C. Reddy. At the meeting of Ministers for trade and economic affairs of member countries held simultaneously, it was resolved that every possible effort would be made to remove barriers in the shape of quota restrictions, high protective duties, fiscal and other internal charges which barred access to the markets of the industrialised countries.

United Nations Technical Assistance Programme (UNTAP)

Upto December 1961, the programme provided India with 1,232 experts and awarded fellowships and scholarships to 1,133 Indian nationals for study abroad. During 1961, India contributed Rs. 35.71 lakhs to the UN Expanded Programme of Technical Assistance and Rs. 10 lakhs towards the living expenses of experts. About seven hundred and forty Indian experts are working in 23 different countries.

International Monetary Fund (IMF)

India is a founder-member of IMF and holds the fifth largest quota in the Fund. From the inception of the Fund upto December 31, 1961, India purchased foreign currencies of the value of Rs. 262 crores from the Fund, out of which a sum of Rs. 143 crores was repaid.

The Indian delegation to the sixteenth annual meeting of the Board of Governors of the Fund held in Vienna in September 1961, was led by the Union Finance Minister. A Mission from the Fund came to India in December 1961, to hold annual consultations with the Government of India on exchange restrictions, as provided under the Articles of Agreement of the Fund.

International Bank for Reconstruction and Development (IBRD)

India is a founder-member of the Bank and holds the fifth largest share in its capital. Loans granted by the Bank to India upto December 31, 1961, amounted to Rs. 249 crores to the public sector and Rs. 131 crores for the private sector, totalling Rs. 380 crores. Of this amount, Rs. 20 crores were utilised before the First Plan, Rs. 14 crores during the First Plan, and Rs. 223 crores during the Second Plan. Of the balance of Rs. 123 crores, a sum of Rs. 26 crores was utilised upto December 31, 1961. The schemes for which the Bank has advanced loans include : (i) purchase of locomotives and other equipment for Indian railways, (ii) purchase of agricultural machinery required for the reclamation of weed-infested and jungle lands, (iii) irrigation and power projects of Damodar Valley Corporation, (iv) purchase of aircraft by Air India Corporation, (v) development of the ports of Calcutta and Madras, (vi) hydro-electric project at Koyna in Maharashtra, (vii) expansion programmes of Tata Iron and Steel Company and Indian Iron and Steel Company, (viii) installation of thermal power stations at Trombay near Bombay, (ix) development of coal industry in the private sector, and (x) assistance to the Industrial Credit and Investment Corporation of India to enable it to advance loans to private companies. IBRD has also assisted India in arranging meetings of friendly countries to discuss India's foreign exchange requirements and devise methods of extending financial assistance.

The sixteenth annual meeting of the Board of Governors of the Bank was held in Vienna in September, 1961. The Union Finance Minister led the Indian delegation.

International Development Association (IDA)

The International Development Association, which is an affiliate of the IBRD, has granted six credits amounting to Rs. 51 crores to India for the following projects : (i) construction of National Highways; (ii) installation of 800 tubewells in Uttar Pradesh; (iii) completion of Salandi and Shetrunji Irrigation Projects in Orissa and Gujarat; (iv) Punjab Flood and Drainage Project; and (v) additions to the power plants of Damodar Valley Corporation.

UN Special Fund

India's contribution to the Fund during 1961 was \$ 1,75,000 (Rs. 83·3 lakhs) in non-convertible rupees.

During 1961, the United Nations Special Fund allocated to India assistance to the extent of \$3,417,300 (Rs. 162·73 lakhs) for purchase of equipment, expert services and fellowships for the following projects : Central Instructors' Training Institute, Madras; Training and Research Wing in the Oil and Natural Gas Commission (Institute for Petroleum Exploration), Dehra Dun; Central Instructors' Training Institute, Hyderabad; National Institute for Training in Industrial Engineering, Bombay; and Rajasthan Sheep and Wool Institute.

Other UN Specialised Agencies

Among other specialised agencies of the UN with which India is actively associated are the International Civil Aviation Organisation (ICA); the International Telecommunication Union (ITC); the Universal Postal Union (UPU); and the World Meteorological Organisation (WMO). The third session of the Commission for Instruments and Methods of Observation (CIMO) of the World Meteorological Organisation was held in New Delhi in January-February 1962. L.S. Mathur, Deputy Director-General of the Indian Meteorological Department, was elected as President of the Commission. K. R. Ramanathan, Director of the Ahmedabad Physical Research

Laboratory, was awarded the International Meteorological Organisation Prize, 1961.

OTHER INTERNATIONAL ORGANISATIONS

Commonwealth

India participated in the conference of the Commonwealth Advisory Committee on Defence Science held in London in July-August 1961. The Commonwealth Finance Ministers' Conference and the Commonwealth Economic Consultative Council met in Accra in September 1961. The Indian delegation was led by Morarji Desai. The Council meeting provided an opportunity for discussing the effects on the Commonwealth arising out of the decision of the United Kingdom to become a member of the European Economic Community. The ninth quinquennial Conference of the Commonwealth Press Union was inaugurated in New Delhi on November 2, 1961. The Conference passed a resolution opposing any restrictions on the freedom of the press to seek and distribute news and information among the peoples of the world.

The second Commonwealth Education Conference was held in New Delhi from January 11 to 25, 1962. K. L. Shrimali was elected chairman of the Conference. The Conference reviewed progress in the activities sponsored by the Commonwealth Education Conference at Oxford and made further plans in the light of the experience gained.

Colombo Plan

Since the inception of the Colombo Plan, India has provided training facilities for 1,694 nominees of various countries. Of these, 252 trainees were provided training facilities during 1960-61. These trainees came from Burma, Ceylon, Indonesia, Japan, Malaya, Nepal, Philippines, Sarawak, Singapore, Thailand and Vietnam. Services of Indian experts were also provided in the fields of life insurance nationalisation, entomology, taxation, cultivation of cashewnuts and irrigation projects. India received the services of 244 foreign experts and training facilities for 2,418 Indians in the Colombo Plan countries in the fields of medical and health education, food and agriculture, industries and trade, power and fuel engineering, transport and communications, banking, printing etc.

The total contribution to India under the economic development programme amounted to £12 million (Rs. 12·8 crores) from Australia, \$248·3 million (Rs. 118·2 crores) including a loan of \$ 33 million (Rs. 15·71 crores) from Canada, and £ 2·6 million (Rs. 3·4 crores) from New Zealand. India was represented by Smt. Tarakeshwari Sinha at the thirteenth session of the Consultative Committee of the Colombo Plan held at Kuala Lumpur, Malaya, in November 1961.

India's assistance to Nepal during 1960-61 was over Rs. 2·1 crores.

Asian Railways Conference

The Third Asian Railways Conference was inaugurated in New Delhi on November 13, 1961. Delegates representing the railway systems of 15 Asian and African countries and observers from the UK, France and the ECAFE attended the Conference. The Conference elected Karnail Singh, chairman of the Indian Railway Board, as its chairman.

World Confederation of Organisations of Teaching Profession

The tenth Conference of the World Confederation of Organisations of the Teaching Profession was held in New Delhi in July-August 1961. The Organisation's programme for 1961-62, as adopted, laid emphasis on the strengthening of professional organisation of teachers in various countries on a national basis.

General Assembly of the World Council of Churches

The 17-day session of the third General Assembly of the World Council of Churches (WCC) was held in New Delhi in November-December 1961. David G. Moses of India was elected as one of the six Presidents of the World Council of Churches.

REPUBLIC DAY AWARDS

BHARAT RATNA

The award is made for exceptional work for the advancement of art, literature and science and in recognition of public service of the highest order.

*Whether a visiting Class I Ambassador or Class I High Commissioner of India should be placed in Article 20 or Article 31 will be decided by the Ministry of External Affairs having regard to the seniority of the particular person.

The decoration is in the form of a *peepal* leaf, $2 \frac{5}{16}$ inches long, $1 \frac{1}{2}$ inches wide and $\frac{1}{4}$ of an inch thick. It is of toned bronze. On its obverse is embossed a replica of the Sun, $\frac{3}{4}$ of an inch in diameter, below which the words "Bharat Ratna" are embossed in Hindi. On the reverse are the State Emblem and the motto, also in Hindi. The Emblem, the Sun and the rim are of platinum. The inscriptions are in burnished bronze.

Recipient of the Award in 1962 :

Rajendra Prasad.

PADMA VIBHUSHAN

The award is made for exceptional and distinguished service in any field, including service rendered by Government servants.

The decoration is circular in design, with a geometrical pattern super-imposed on the circle. The diameter of the circular portion is $1 \frac{1}{2}$ inch and the thickness $\frac{1}{4}$ of an inch. On the obverse, there is a lotus flower embossed on the circular space. The word "Padma" is embossed in Hindi above and the word "Vibhushan" below the lotus flower. On the reverse are the State Emblem and the motto in Hindi. It is of toned bronze. The inscription "Padma Vibhushan" on the obverse, the geometrical pattern on either side and the border around the periphery are in burnished bronze. All embossing on either side of the decoration is in white gold.

Recipients of the Award in 1962 :

Vijaya Lakshmi Pandit.

Padmaja Naidu.

Haravu Venkatanarasingsha Varada Raja Iengar, Governor, Reserve Bank of India.

PADMA BHUSHAN

The award is made for distinguished service of a high order in any field, including service rendered by Government servants.

It has the same design as the "Padma Vibhushan"; on its obverse the word "Padma" appears above and the word "Bhushan" below the lotus flower. This inscription "Padma Bhushan" on the obverse, the geometrical pattern on either side and the border around the periphery are in burnished bronze. All embossing on either side of the decoration is in standard gold.

Recipients of the Award in 1962 :

Asaf Ali Asghar Fyzee, formerly Vice-Chancellor, Jammu and Kashmir University.

Bade Ghulam Ali Khan, Musician, Bombay.

Daulat Singh Kothari, Chairman, University Grants Commission.

Santosh Kumar Sen, Surgeon, New Delhi.

Saundaram Ramachandran, Social Worker, Gandhi Gram, Madurai, Madras.

Sisir Kumar Mitra, Professor Emeritus, Calcutta University.

Sitaram Seksaria, Social Worker, Calcutta.

Sudhansu Sobhan Maitra, Surgeon to the President.

Sudhindra Nath Mukerjee, Secretary, Rajya Sabha.

Tarabai Modak, Social Worker, Bardi, Maharashtra.

Tarlok Singh, Additional Secretary, Planning Commission.

Venkatarama Raghavan, Professor of Sanskrit, Madras University.

PADMA SHRI

The award is made for distinguished service in any field, including service rendered by Government servants.

The name of the decoration is embossed in Hindi with the word "Padma" above and the word "Shri" below the lotus flower on the obverse. The inscription "Padma Shri" on the obverse, the geometrical pattern on either side and the border around the periphery are in burnished bronze. All embossing on either side of the decoration is in stainless steel.

Recipients of the Award in 1962 :

Amalananda Ghosh, Director-General of Archaeology.
 Ashok Kumar Ganguly, Film Artist, Bombay.
 Bishnupada Mukerji, Director, Central Drug Research Institute, Lucknow.

 Tarashankar Bandyopadhyay, Bengali Writer.
 Vellore Pandurangam Appadurai, Chief Engineer, Electricity, Madras Government.
 Vvankatesh Ramchandra Vajramushti, Additional Engineer-in-Chief, Railway Electrification, Calcutta.

GALLANTRY AWARDS

PARAM VIR CHAKRA

The highest decoration for valour is the Param Vir Chakra which is awarded for most conspicuous bravery or some daring or pre-eminent act of valour or self-sacrifice in the presence of the enemy, whether on land, at sea or in the air.

This decoration is made of bronze and is circular in shape. It has, on the obverse, four replicas of "Indra's Vajra" embossed round the State emblem in the centre. On the reverse, the words "Param Vir Chakra" are embossed, both in Hindi and in English, with two lotus flowers in the middle.

The decoration is worn on the left breast with a plain purple-coloured riband, an inch and a quarter in width.

Recipient of Award in 1962 :

Capt. Gurbachan Singh Salaria.

MAHA VIR CHAKRA

The Maha Vir Chakra is the second highest decoration and is awarded for acts of conspicuous gallantry in the presence of the enemy, whether on land, at sea or in the air.

It is made of standard silver and is circular in shape. Embossed on the obverse is a five-pointed star with a domed centre-piece bearing the gilded State emblem in the centre. The words "Maha Vir Chakra" are embossed both in Hindi and in English, on the reverse with two lotus flowers in the middle.

The decoration is worn on the left breast with a half-white and half-orange riband, an inch and a quarter in width, the orange being nearer the left shoulder.

No award was made in 1962.

VIR CHAKRA

The Vir Chakra is third in the order of awards given for acts of gallantry in the presence of the enemy, whether on land, at sea or in the air.

The decoration is made of standard silver and is circular in shape. Embossed on the obverse is a five-pointed star which has an Ashoka Chakra in the centre. Within this Chakra is a domed centre-piece bearing the gilded State emblem. On the reverse, the words "Vir Chakra" are embossed, both in Hindi and in English, with two lotus flowers in the middle.

The Chakra is worn on the left breast with a half-blue and half-orange riband, an inch and a quarter in width, the orange being nearer the left shoulder.

No award was made in 1962.

ASHOKA CHAKRA—CLASS I

This medal is awarded for the most conspicuous bravery or some daring or pre-eminent act of valour or self-sacrifice on land, at sea or in the air.

The Chakra is made of gilt gold and is circular in shape. Embossed on the obverse is a replica of Ashoka's Chakra surrounded by a lotus wreath. Along the edge is a pattern of lotus leaves, flowers and buds. On the reverse, the words "Ashoka Chakra" are embossed, in both Hindi and in English, with lotus flowers in the intervening space.

The Chakra is worn on the left breast with a green coloured silk riband, an inch and a quarter in width, and divided into two equal segments by an orange vertical line.

Recipients of Award in 1962 :

1. Capt. Man Bahadur Rai
2. Sub. Major Kharka Bahadur Limbu (Posthumous)

ASHOKA CHAKRA—CLASS II

This decoration is awarded for conspicuous gallantry. It is made of standard silver and is circular in shape. The obverse and the reverse are exactly the same as in the Ashoka Chakra, Class I.

The Chakra is worn on the left breast with a green-coloured silk riband, an inch and a quarter in width and divided into three equal segments by the two orange vertical lines.

Recipients of Award in 1962 :

1. F/Lt. Balkrishan Desoares
2. F/Lt. Rajkumar Mehta (Posthumous)
3. F/O Vaidyanathan Ganesan (Posthumous)
4. Subedar Mangal Bahadur Limbu
5. Jemadar Dal Bahadur Thapa
6. Jemadar Dal Bahadur Rana

ASHOKA CHAKRA—CLASS III

This decoration is awarded for an act of gallantry. It is exactly like the other two Ashoka Chakras, except that it is made of bronze.

The Chakra is worn on the left breast with a green-coloured silk riband, an inch and a quarter in width, divided into four equal segments by three orange vertical lines.

Recipients of the Award in 1962 :

1. L/Naik Tirath Singh (Posthumous)
2. Sepoy Dara Singh (Posthumous)
3. L/Naik Kalu Rai (Posthumous)
4. L/Naik Alby D'Cruz
5. Rifleman Bevela Lushai
6. Jagdish Lal
7. Lt. Col. Robin Joseph Solomon
8. Major Balwant Singh
9. Capt. Bhola Nath
10. Jemadar Bhim Bahadur Gurung
11. Havildar Nar Bahadur Gurung
12. Naik Ram Prasad Limbu
13. L/Naik Risal Singh Pathania
14. Havildar Gopal Singh Gurung
15. Rifleman Kehr Singh Domai
16. Rifleman Tara Dutt Jaisi

*Honorary

APPENDICES

GENERAL ELECTIONS, 1962*

While it took nearly four months to complete the poll in the first general elections and over 19 days in the second, the bulk of the polling in the 1962 elections was completed in about 10 days (February 16 to 25). About 21·6 crore eligible voters, compared to 17·3 crores in 1952 and 19·4 crores in 1957, were called upon to elect 494 members to the House of the People and 3,031 representatives to the 13 State Legislative Assemblies (the States of Kerala and Orissa having had mid-term elections) and the three Territorial Councils of Himachal Pradesh, Manipur and Tripura. In the earlier elections, there used to be double-member constituencies, in which every voter had two votes, one for the general seat and the other for the seat reserved for a scheduled caste/tribe candidate. At the time of the 1962 elections, 91 such constituencies for the House of the People and 584 for the State Assemblies were bifurcated into single-member constituencies, without affecting the number of reserved seats.

House of the People

The present strength of the House of the People is 509. Of these, 494 members are directly elected from territorial constituencies in the States (excluding Jammu and Kashmir, from where six members are appointed by the President on the recommendation of the Legislature of that State) and the four Union Territories of Delhi, Himachal Pradesh, Manipur and Tripura. Compared to 12 uncontested returns in 1957, there were only three such returns in 1962, and all the three went to the Indian National Congress. Thus, for the 491 seats for which contests were held, the major political parties set up candidates as follows: Indian National Congress 488; Praja Socialist Party 166; Communist Party of India 137; Socialist Party 107; Jan Sangh 198; Swatantra Party 172; and other parties and independents 715.

The table below shows the State-wise allocation of seats and the strength of political parties (on the basis of party affiliations at the time of elections) in the House of the People, as on May 15, 1962.

State/Union Territory	No. of seats	Congress	Praja Socialist	Communist	Socialist	Jan Sangh	Swatantra	Other Parties †	Independents
Andhra Pradesh ..	43	34	—	7	—	—	1	—	1

Tripura	30	17	—	13	—	—	—	—	—	30

*Other Parties include : Bihar : Jharkhand 20; Jammu and Kashmir : National Conference 67; Praja Parishad 3; Kerala : Muslim League 11; Madhya Pradesh : Akhil Bharatiya Ram Rajya Parishad 10, Hindu Maharashtra 6; Madras : Dravida Munnetra Kazhagam 50, Forward Bloc 3; Maharashtra : Peasants' and Workers' Party 15, Republican 3; Orissa : Ganatantra Parishad 37; Punjab : Akali Dal 19; Rajasthan : Ram Rajya Parishad 3; Uttar Pradesh : Hindu Mahasabha 2; Republican 8; West Bengal : Forward Bloc 13.

† There are four vacancies still to be filled.

@ There is a vacancy to be filled.

‡ Figures in brackets indicate the strength of parties in States, and Union Territories where they have not been recognised by the Election Commission, India, for the purpose of allotment of a reserved symbol.

** Two results are yet to be known.

Elections to the House of the People

The details of the elections—electorate, valid votes cast, contestants, votes polled by each—for the 494 seats in the House of the People are given in the following pages. The abbreviations used are Indian National Congress (Con.); Praja Socialist Party (PSP); Communist Party of India (CPI); Bharatiya Jan Sangh (JS); Socialist Party (SP); Swatantra Party (SWA); Akhil Bharat Hindu Mahasabha (HM); Akhil Bharatiya Ram Rajya Parishad (RRP); Republican Party of India (RPI); Jharkhand Party (JP); Indian Union Muslim League (ML); Dravida Munnetra Kazhagam (DMK); Peasants' and Workers' Party (PWP); Ganatantra Parishad (GP); Akali Dal (AD); All-India Forward Bloc (FB); and Independent (Ind.).

SUPREME COURT DECISIONS*

Freedom of the Press**

In 1952 the Government of India appointed a Press Commission for enquiring into a large number of matters concerning the Press and one of the recommendations of the Commission was to enact a law in order to prevent unfair competition amongst newspapers as also to prevent the rise of monopolistic combines so that newspapers may have fair opportunities of freer discussion. In 1956 was passed the Newspaper (Price and Page) Act, 1956, which was followed by the Daily Newspaper (Price and Page) Order, 1960. The desired objects were sought to be achieved under section 3 of the Act by regulation of prices charged for newspapers in relation to their pages and sizes. This section also empowered the Government to regulate the allocation of space to be allotted for advertising matter. The Act further placed some restrictions on the publication of supplements.

The Sakal Papers of Poona filed a writ petition urging that the Order would have the effect of either compelling them to increase the price or to reduce the number of pages and also prevent them from publishing supplements. This, they said, would violate their fundamental right, guaranteed under Art. 19 of the Constitution, to publish news and views.

The Respondent, the Union of India, on the other hand, maintained that the effect of the provisions of the Act was to provide for the maximum matter which a newspaper could give to the public at a certain price and this did not affect the rights of the Petitioners to propagate their ideas; that the Act did not directly or indirectly deal with the subject of freedom of speech and expression; that the effect of the Act and Order would be to promote further the right of the newspapers in general to exercise the freedom of speech and expression and that the Act had been passed on the recommendation of the Press Commission.

The Supreme Court came to the view that since the impugned Act was intended to affect the circulation of a newspaper, which was a part of the right of freedom of speech, the Act must be regarded as one directed against that freedom. The Court observed that the freedom of speech and expression of opinion was of paramount importance under a democratic constitution which envisaged changes in the composition of legislatures and governments and must be preserved, and since the object of the Act was to affect directly the right of circulation of newspapers which would necessarily undermine their power to influence public opinion it could not but be regarded as a dangerous weapon

*Appendix to Chapter VI.

**Sakal Papers (P) Ltd., & Others Vs. the Union of India.

capable of being used against democracy itself. The Act and the Orders, therefore, could not be sustained on the ground that it merely implemented the recommendations of the Press Commission. The Court further observed that since the Act taken in conjunction with the Order made thereunder operated as a restraint on the freedom of speech and expression of newspapers the mere fact that its object was to suppress unfair practices by newspapers would not validate them. Carrying on unfair practices might be a matter of condemnation but that would be no ground for placing restrictions on the right of circulation. The Court held that section 3(1) of the Act, which was its pivotal provision, was unconstitutional and, therefore, the Daily Newspaper (Price and Page) Order, 1960, made thereunder was also unconstitutional. The Court allowed the petitions.

Reservation of Posts at Promotion Stage*

The Railway Board issued two directions ordering reservation of selection posts in Class III of the Railway Service in favour of the members of the Scheduled Castes and Scheduled Tribes. One K. Rangachari feeling apprehensive of the consequences of these two directions moved the High Court of Madras for a writ of *mandamus* restraining the Railway authorities from giving effect to the two circulars. The High Court issued the writ as prayed for.

The Railway Board came up in appeal to the Supreme Court. The question for consideration was about the scope and effect of Article 16(4) of the Constitution which reads: "Nothing in this article shall prevent the State from making any provision for the reservation of appointments or posts in favour of any backward class of citizens which, in the opinion of the State, is not adequately represented in the services under the State."

It was contended on behalf of Rangachari (Respondent) that the safeguard provided by Art. 16(4) applied only to reservation of posts at the stage of appointment and not for reservation of posts for promotion after appointment and so the circulars were outside the provisions of Art. 16(4) and as such contravened Art. 16(1) which guarantees equality of opportunity in matters relating to employment under the State. The Railway authorities asserted that the safeguard extended not only to initial appointment but also to promotions made by selection and that clearly brought the impugned circulars within the protection of Art. 16(4).

The Supreme Court by a majority of three to two accepted the contention of the Railway authorities, set aside the judgment of the High Court, and held: "The power of reservation which is conferred on the State under Art. 16(4) can be exercised by the State in a proper case not only by providing for reservation of appointments but also by providing for reservation of selection posts. This construction, in our opinion, would serve to give effect to the intention of the Constitution-makers to make adequate safeguards for the advancement of the backward classes and to secure for their adequate representation in the services."

The Court, however, observed that in providing for the reservation of appointments or posts under Art. 16(4), the State has to take into consideration the claims of the members of the backward classes consistently with the maintenance of the efficiency of the administration. At the same time an attempt must always be made to strike a reasonable balance between the claims of backward classes and the claims of other employees.

On the other hand, the dissenting judges held that Art. 16(4) properly construed in the light of Art. 335 of the Constitution contemplated and permitted reservation only in respect of appointments to services at the initial stage and not at each stage even after the appointment had taken place.

Res Judicata in Writ Jurisdiction**

Under the Constitution the citizens of India have two alternate remedies for enforcement of their fundamental rights. They can move the High Court under Art. 226 or the Supreme court under Art. 32. This group of cases brought before the Court the question whether the adoption of one remedy would act as a bar by way of *res judicata* to the adoption of other. The Court's findings on the question were: "If a writ petition filed by a party under Art. 226 is considered on the merits as a contested matter and is dismissed, the decision thus pronounced, would continue to bind the parties unless it is otherwise modified or reversed by appeal or other appropriate proceedings permissible under the Constitution. It would not be open to a party to ignore the said Judgment and move this Court under Art. 32 by an original petition made on the same facts and for obtaining the same or similar orders or writs. If the petition filed in the High Court under Art. 226 is dismissed not on merits but because of the laches of the party applying for the writ or because it is held that the party had an alternative remedy available to it, then the dismissal of the writ petition would not constitute a bar to a subsequent petition under Art. 32 except in cases where and if the facts thus found by the Court may themselves be relevant even under Art 32. If a writ petition is dismissed *in limine* and an order is

*The General Manager, Southern Railway, Vs. K. Rangachari.

**Daryao & Others Vs. The State of Uttar Pradesh and Others.

pronounced in that behalf, whether or not the dismissal would constitute a bar would depend upon the nature of the order. If the order is on the merits it would be a bar; if the order shows that the dismissal was for the reason that the petitioner was guilty of laches or that he had an alternative remedy it would not be a bar, except as indicated above. If the petition is dismissed *in limine* without passing a speaking order then such dismissal cannot be treated as creating a bar or *res judicata*. If the petition is dismissed as withdrawn it cannot be a bar to a subsequent petition under Art. 32."

Guarantee against Testimonial Compulsion*

These appeals were heard together by the court only in so far as they involved substantial questions of law as to the interpretation of the Constitution, with particular reference to cl. (3) of Art. 20 (No person accused of any offence shall be compelled to be a witness against himself).

In an earlier judgment in *M.P. Sharma Vs. Satish Chandra* (1954 S.C.R. 1077) the Supreme Court had observed that the phrase 'to be a witness' used in Art. 20(3) meant in its widest significance, 'to furnish evidence' which included not only oral testimony or statements in writing of the accused but also production of a thing or evidence by other modes. The Court in these appeals restated some of the propositions, which had been stated too widely in that case, with more particularity.

By majority of eight to three, it held that the phrase 'to be a witness' used in Art. 20(3) strictly meant imparting of personal knowledge in respect of relevant facts by a statement, either oral or in writing, made or given in court or otherwise, but did not include production of documents or things, or giving of impressions of thumb, or foot, or palm, or fingers or specimen writings or showing parts of body by way of identification and the like. It was further laid down that the mere questioning of an accused person by a police officer, resulting in a voluntary statement was not 'compulsion' even though such statement might ultimately turn out to be incriminatory. Likewise, the mere fact that an accused person made a statement while in police custody would not by itself bring in the presumption that the accused was 'compelled' to make the statement. Of course, it was open to an accused to show that while he was in police custody he was subjected to treatment which might lead to the presumption that compulsion was in fact exercised. It was also made clear that a person making a statement must, at the time of making it, stand in the character of an accused person in order to bring that statement within the prohibition of Art. 20(3). It was not enough that he became an accused subsequently.

Effect of Dissolution of Legislative Assembly on a Bill**

In December 1957 the Government of Kerala introduced in the Kerala Legislative Assembly the Kerala Agrarian Relations Bill which was ultimately passed by it in June 1959 and it was then reserved for the assent of the President under Art. 200 of the Constitution. On July 31, 1959, the President issued a proclamation under Art. 356 and the Assembly was dissolved. As a result of the mid-term general elections in Kerala in February 1960 a coalition Government came into power. On July 27, 1960, the President for whose assent the Bill was pending sent it back requesting the Legislative Assembly to reconsider the Bill in the light of the specific amendments suggested by him. The Bill as amended in the light of the President's recommendations was passed by the Assembly on October 15, 1960, and received the President's assent on January 21, 1961. In February 1961, a notification was issued by the State directing the implementation of a number of sections of the Act. As the Petitioner was to be adversely affected by the said notification he filed a writ petition challenging the validity of the Act on the preliminary ground that the Bill which was pending before the President for his assent at the time when the Legislative Assembly was dissolved lapsed in consequence of the said dissolution and so it was not competent for the President to give his assent to a lapsed bill with the result that the said assent and all proceedings taken subsequent to it were unconstitutional.

It was urged that if there were no provisions to the contrary in our Constitution the English convention with regard to the consequence of dissolution should be held to follow even in India. In England, in addition to bringing a session of Parliament to a close, prorogation put an end to all business which was pending consideration before either House at the time of such prorogation and as a result any proceedings either in the House or in any Committee of the House lapsed with the session. Dissolution of Parliament was invariably preceded by prorogation, and what was true about the result of prorogation was *a fortiori* true about the result of dissolution. Thus the petitioner contended that the inevitable conventional consequence of dissolution of Parliament was that there was a Civil death of Parliament and all uncompleted business pending before it lapsed.

*The State of Bombay *Vs.* Kathi Kalu Oghad; Pokhar Singh *Vs.* The State of Punjab; The State of West Bengal *Vs.* Farid Ahmed.

**Purushothaman Nambudiri *Vs.* The State of Kerala.

The Supreme Court held that there was no constitutional basis for the argument that unless the Legislature by law had made a contrary provision the English convention with regard to the effect of dissolution should prevail in this country. The Court expressed the opinion that clause (3) of Art. 196 of the Constitution made a complete departure from the English convention inasmuch as the prorogation of the House or Houses did not affect the business pending before the Legislature at the time of prorogation, and at whichever stage the pending business might stand, so long as it was pending before the Legislature of a State it should not lapse by the prorogation of the Assembly. The Court held that the preliminary contention raised against the validity of the Bill could not be sustained.

SCHOLARSHIP SCHEMES*

SCHEMES ADMINISTERED BY THE MINISTRY OF EDUCATION

For Study Abroad

I. Government of India Schemes

1. Agatha Harrison Fellowship for the study of Asian problems with special reference to India at St. Anthony's College, Oxford.
2. Foreign Languages Scholarships Scheme for specialisation in Arabic, Burmese, Chinese, French, German, Indonesian, Italian, Japanese, Persian, Pushto, Russian, Spanish, Turkish, Swahili and Rumanian languages.
3. Overseas Scholarships for Scheduled Castes, Scheduled Tribes and Other Backward Classes.
4. Passage Grants for Scheduled Castes, Scheduled Tribes and Other Backward Classes.
5. Partial Financial Assistance (Loan) Scheme.
6. Union Territories Overseas Scholarships for candidates who by birth or domicile are natives of the Union Territories.

II. Fellowships/Scholarships offered by Foreign Governments/Organisations/Institutions

1. Scholarships offered by the Governments of Austria, Belgium, Denmark, France, Hungary, Norway, Poland, USSR, and West Germany.
2. Philippines University Scholarships.
3. Walker's Travelling Association Scholarships, U.K.
4. British Council Scholarships.
5. Colombo Plan Scholarships/Fellowships.
6. Imperial Relations Trust (London University Institute of Education) Fellowships.
7. Scholarships/Fellowships under the UN Social Welfare Fellowships/Scholarships Programme.
8. Scholarships for teachers' training under the Commonwealth Fellowships/Scholarships Plan.
9. UNESCO Fellowships/Scholarships for Production of Reading Material (1962).
10. UNESCO—Thai Government Fellowships (1962).
11. Travel and Maintenance Grants Schemes administered by the US Educational Foundation in India.
12. People's Friendship University (Patrice Lumumba), USSR Scholarship for the Study of Humanities.

For Study in India

I. For Foreign Nationals

1. Commonwealth Scholarships and Fellowships Scheme for nationals of the other Commonwealth countries.
2. Colombo Plan Scholarships/Fellowships for scholars from South, South-East Asian and other countries.
3. French Fellowships Scheme for French nationals for post-graduate study/research.
4. General Scholarships Scheme for Indian students and students from certain Asian, African and other countries.
5. Indo-German Industrial Co-operation Scheme Fellowships for German nationals for post-graduate study/research.
6. Programmes for Exchange of scholars between India and Rumania, USSR, and UAR.
7. Reciprocal Scholarships Scheme for nationals of certain foreign countries for post-graduate study/research.
8. Scholarships to Bhutanese students for school study and degree/diploma courses.
9. Scholarships to Sikkimese students for school study and degree/diploma courses.

* Appendix to Chapter VIII.

II. For Indian Nationals

1. Merit Scholarships in residential schools.
2. Post-Matric Merit Scholarships Scheme.
3. Post-Graduate Scholarships in Humanities.
4. Scholarships for higher studies in Hindi for students from non-Hindi speaking areas.
5. Scheduled Castes, Scheduled Tribes and Other Backward Classes Scholarships Scheme for post-Matric education. (The Scheme has been decentralised from 1959-60; the Central Government gives grants only to the State Governments/ Union Administrations.)
6. Scholarships/other educational facilities to the children of political sufferers.
7. Post-Graduate Scholarships in Science.
8. National Scholarships Scheme for Post-Matric Education.
9. Merit Scholarships for Children of Primary and Secondary School Teachers for Post-Matric Studies

SCHEMES ADMINISTERED BY THE MINISTRY OF SCIENTIFIC RESEARCH AND CULTURAL AFFAIRS

I. Government of India Schemes

1. Central (Modified) Overseas Scholarships Scheme.
2. Fully-Paid Overseas Scholarships Scheme.
3. Union Territories Overseas Scholarships Scheme.
4. Government of India French Fellowships Scheme.
5. Reciprocal Scholarships Scheme.
6. Scheme of Scholarships to young workers in different cultural fields
7. Partial Financial Assistance Scheme.

II. Scholarships offered by Foreign Governments

1. Scholarships offered from time to time by the Governments of Australia, Austria, Belgium, Czechoslovakia, Denmark, France, Hungary, Indonesia, Israel, Italy, Japan, Netherlands, Norway, Poland, Rumania, Sweden, Switzerland, U.A.R., USSR, Yugoslavia.
2. *Federal Republic of Germany*
 - (a) Indo-German Industrial Co-operation Scheme 1956-57.
 - (b) Ad-hoc Scholarships offered by the Federal Republic of Germany and the Hamburg University Students' Union for post-graduate studies 1957-58.
 - (c) Scholarships offered by the Free Hanseatic City of Hamburg for post-graduate studies 1957-58.
 - (d) Hamburg Chamber of Commerce (West Germany) Scholarships 1957-58.
 - (e) Ad-hoc Scholarships by the Government of the Federal Republic of Germany for post-graduate studies 1959-60.
 - (f) Scholarships offered by the Board of Directors of Farbwerke Hoechst. A.G. for studies in West Germany 1961.
 - (g) Free Hanseatic City of Hamburg Scholarships for post-graduate studies 1959-60.
 - (h) Scholarships offered by the Alexander von Humboldt Foundation 1960-61.
 - (i) Scholarships offered by the German Academic Exchange Service 1960-61.
 - (j) Friedrich Ebert Foundation (West Germany) Scholarships 1961
 - (k) Ad-hoc Scholarships offered by the Government of the Federal Republic of Germany for post-graduate study/research 1961.
 - (l) Scholarship offered by the Government of the Federal Republic of Germany for practical training 1958-59 and 1959-60.
 - (m) Scholarships offered by M/s Demag Aktiengesellschaft, Duisburg, for practical training in West Germany, 1961.
 - (n) Scholarship offered by M/s Deutsche Phillips, Hamburg, for training in Radio and Television technique in West Germany 1962.
3. *German Democratic Republic*
 - (a) Scholarships offered by the Government of the German Democratic Republic for post-graduate studies/research 1957-58.
 - (b) Scholarships offered by the Government of the German Democratic Republic for post-graduate study/research 1959-60.
 - (c) The German Democratic Republic Scholarships for:
 - (i) Polygraphy.
 - (ii) Post-graduate study/research.
 - (iii) Practical training.
 - (iv) Indian Scientists.
 - (v) Post-Graduate Studies in Agriculture, 1961.

4. *Commonwealth Scholarships and Fellowships*

Scholarships and Fellowships offered from time to time by the Governments of the United Kingdom, Canada, Australia, New Zealand, Hong Kong, Malaya, Ceylon, Malta, Uganda, Kenya, Tanganyika, Rhodesia, Nyasaland and Pakistan.

5. Colombo Plan.
6. UNESCO Fellowships.
7. UN Technical Assistance Scholarships.
8. Admission to the Peoples' Friendship University, Moscow.
9. Colombo Plan Correspondence Courses.
10. Technical Co-operation Scheme of the Colombo Plan.
11. TCM Teachers' Training Programme.
12. Federation of British Industries Scholarships.
13. Royal Commission of Exhibition of 1851 and Rutherford Scholarships.
14. Canada Council Non-Resident Fellowships Scheme.
15. Ridgefield Foundation Scholarships Scheme.
16. Hawker-Siddeley Industries Commonwealth Scheme Scholarships.
17. Similar offers by other organisations/universities for studies in science, technology and culture.

III. *Exchange Programmes*

Scholarships offered from time to time by the Governments of USSR, Yugoslavia, Finland, UAR, Ceylon, Greece and Poland.

IV. *Miscellaneous Schemes*

Free sea passages offered by M/S. Hellenic Lines Ltd., to Indian students for travel from India to USA and back.

ENGINEERING AND TECHNICAL INSTITUTIONS*

(Degree and post-Graduate)

ANDHRA PRADESH

College of Engineering, Anantapur.
 College of Engineering, Kakinada.
 College of Engineering, Osmania University, Hyderabad.
 College of Engineering, Andhra University, Waltair.
 College of Engineering, Tirupati.
 Department of Chemical Technology, Osmania University, Hyderabad.
 J.V.D. College of Science and Technology, Waltair.
 Regional Engineering College, Warangal.

ASSAM

Assam Engineering College, Gauhati.
 Government Engineering College, Jorhat.

BIHAR

Bhagalpur Engineering College, Bhagalpur.
 Bihar College of Engineering, Patna.
 Birla Institute of Technology, Ranchi.
 Bihar Institute of Technology, Sindri.
 Indian School of Mines, Dhanbad.
 Muzaffarpur Institute of Technology, Muzaffarpur.
 Regional Institute of Technology, Jamshedpur.

GUJARAT

Birla Vishwakarma Mahavidyalaya, Anand.
 Faculty of Technology, M.S. University of Baroda, Baroda.
 L.D. College of Engineering, Ahmedabad.
 L.M. College of Pharmacy, Ahmedabad.
 Lukhdirji College of Engineering, Morvi.

*Appendix to Chapter VIII.

JAMMU AND KASHMIR

Regional Engineering College, Srinagar

KERALA

College of Engineering, Trivandrum.
 Government Engineering College, Trichur.
 Maharaja's College, Ernakulam.
 Nair Service Society Engineering College, Palghat.
 Thangal Kunju Musaliar Engineering College, Quilon.

MADHYA PRADESH

Department of Pharmacy, University of Sagar, Sagar.
 Engineering College, Vidisha.
 Government Engineering College, Jabalpur.
 Government College of Engineering and Technology, Raipur.
 Madhav Engineering College, Gwalior.
 Maulana Azad College of Technology, Bhopal.
 Shri Govindaram Seksaria Technical Institute, Indore.

TELL US YOUR JOB—

AND WE'LL GIVE YOU THE TOOLS

The size, shape or complexity of a project doesn't overawe us. We have the tools to help build it with a minimum of time, labour and cost. For nearly 70 years, BATLIBOI have supplied Industry and Trade in India with goods ranging from complete power plants to hacksaw blades. We represent internationally known manufacturers from the United

Kingdom, U.S.A. Czechoslovakia, France, Germany, Japan and many other countries. BATLIBOI also represent some of India's leading manufacturers of Machine Tools, Diesel Engines and various other types of machinery. Industry and Trade are vitally connected with the economic growth of any country, and BATLIBOI are vitally connected with Industry and Trade in India.

ACC CEMENT
HAVE SO FAR BEEN USED IN THE
KOYNA DAM (Maharashtra State)

ACC
the hallmark of
top quality cement

THE ASSOCIATED CEMENT COMPANIES LTD.
The Cement Marketing Co. of India Ltd.

It takes the patience of untiring men to make the land yield a golden harvest. So with a nation.

And so with a company like HINDUSTAN LEVER.

Many heads, many hands work and plan...building up knowledge regarding modern marketing methods. Guiding the training of a body of technicians. Diversifying to meet changing consumer needs. Developing new consumer goods, new ideas in foods, like dehydrated vegetables, and constructing milk plants. Establishing research laboratories. Experimenting in ways and means of making use of neglected resources of the country. Increasing the utilisation of partially used resources, for example, by cottonseed oil extraction.

Working up new methods to help the national economy.

Work and patience. Work to educate for tomorrow. A tomorrow that will bring a little less of care, a little more of joy.

Today and tomorrow...Hindustan Lever serves the home with soaps, foods, toilet preparations

AT HOME and Abroad

OUR FOLK
ART IS IN A WAY
THE AUTOBIOGRAPHY
OF OUR PEOPLE

The Bankura horse and the other handicrafts of Bankura rescued from the brink of extinction have been pivoted to world-wide recognition and fame. This art like all the folk arts of India, is deep-rooted in this country and forms the basic element of Indian culture and tradition. It is a composite art of people integrating their literary, mimetic and pictorial sensibilities, their music, mythological and social life. The Railways have played a great role in re-discovering this art and in bringing it within easy reach of millions all over the world.

SOUTH EASTERN RAILWAY

medium

So Says Legend

Innumerable monkeys and bears, villagers and *Nishads* were working heart and soul in the construction of *Setu Bandh—Rameshwar* designed to attack *Lanka*.

A small little squirrel was also contributing her humble bit in the construction of the bridge being laid for the emancipation of *Maa Sita*. She repeatedly rolled in and filled her furs with dust—dust which she removed on the bridge.

In the struggle of Indian Peoples against hunger and poverty; disease and unemployment we are also playing our humble role and are pledged to emancipate Mother India from economic dependence—the curse of slavery.

SWADESHI

COTTON MILLS COMPANY LIMITED

• KANPUR • NAINI • PONDICHERRY • UDAIPUR • MAU •

IT IS A *Swadeshi* ENTERPRISE

The Vertical Turbine Pump is an acknowledged method of raising sub-soil water from tube wells. You can certainly do the job with any make of pump. But a pump's worth will show up in power bills, which must be low, and life expectancy, which must be high.

On these two scores there is nothing to compare with JYOTI—India's largest selling VERTICAL TURBINE PUMPS.

Suitability: Tube wells from 4" to 24" dia.

Capacity: Up to 4,00,000 G.P.H.

Heads: Up to 300 ft.

Quality is our Creed

JALAHALLI--BANGALORE-13.

The Bayer factory at Leverkusen

SCIENCE IS OUR BUSINESS

Hardly any other branch of modern production owes its development so exclusively to the results of intensive scientific research as the chemical industry. It is therefore understandable that in their up-to-date laboratories Farbenfabriken Bayer, Leverkusen, one of the oldest chemical firms in the world, employ well over a thousand chemists, physicists, engineers, doctors, pharmacists, and biologists on an extremely wide range of research problems.

Today Bayer's manufacturing program consists of some 12,000 products, including about 3,500 dyestuffs and textile auxiliaries, 2,200 chemicals and plastics, 1,000 medical, dental and veterinary products, 275 crop protection products, 200 grades of man-made fibre, 600 photochemical products, and a comprehensive range of cameras, apparatus and photo accessories. 58,000 people work in our factories on the development, manufacture and sale of these products.

The scientific development of every Bayer product is accompanied by intensive practical trials in the firm's own testing plants. The knowledge and experience gained here is then made available to customers all over the world through our comprehensive technical service.

BAYER CHEMICALS

Syntans and chrome tanning agents – porcelain enamels – inorganic pigments – synthetic rubbers – rubber auxiliaries – materials for surface coatings – plastics – pre-products and auxiliaries for plastics – products for the mineral oil industry – products for water treatment – activated carbon – preservatives – inorganic heavy chemicals – organic intermediates – information on further special chemical products on request.

BAYER DYESTUFFS

Dyestuffs for all uses in all degrees of fastness – auxiliaries and finishing products for the manufacture of textiles, leather, paper, surface coatings, plastics etc. – Eulan for the mothproof finishing of animal fibres.

The South is well-known as the home of temples which also abound in exquisite pieces of architecture and sculpture. There are also other tourist attractions like Waterfalls, Game Sanctuaries and Hill resorts.

For assisting passengers desirous of undertaking tours for visiting such places, Railways have introduced Standard Circular Tour tickets at concessional fares. These standard tours include visits to important religious centres and also places of historical interest, architectural interest, etc. Circular tour tickets are also issued at concessional fares for tours over 1,500 miles of the tourists' choice subject to certain conditions which may be ascertained from The Chief Commercial Superintendent, Southern Railway, Madras-3.

Well-furnished First Class tourist cars and Third Class tourist cars are available at reasonable fares. These cars can be had on application to the Chief Operating Superintendent, Southern Railway, Madras-3.

HOW FAR IS LUCKNOW FROM KANPUR?

Though 43 miles by the road, Lucknow is now within dialling distance from Kanpur and vice-versa. The new automatic signalling equipment installed at these places make it possible for subscribers to dial through without the intervention of operators. Out-dating the conventional operator controlled trunk exchanges, trunk calls are now made as simple as local calls.

The automatic Equipment for the Lucknow Kanpur Trunk Dialling scheme was manufactured by the Indian Telephone Industries to the design of the P & T Department. Subscriber trunk dialling scheme marks an important step in our national progress. Projects similar to this scheme are under development for extension to other important cities in India.

BURMAH - SHELL

Selling milk for better living

That is what the farmers are doing in Kaira District — selling milk to the village co-operative societies, which in turn sell it to the Kaira District Co-operative Milk Producers' Union Ltd

The Union's Amul Dairy pasteurise the milk. The bulk of it is sent to the Aarey Milk Colony to meet the needs of Bombay city. Moreover, free milk is given to 16,000 children, and the surplus is made into Amul milk products.

The earnings made at every stage of sale provide the farmer members with free veterinary service and artificial insemination facilities for better breed, the best cattle feed at fair prices. The earnings have already brought schools, libraries, hospitals, metalled roads, electricity networks and fresh-water supply to Kaira villages.

Enough money all around, to improve the living standard.

Good ideas sell themselves

Realising the importance of developing India's dairy industry on sound CO-OPERATIVE lines, the following provisions have been made in the draft outline of the Third Five-Year Plan:

- Rs. 40 crores allocation for dairying
- Seventy-five milk supply schemes for cities with population exceeding 100,000 and for new industrial townships
- Thirty new rural creameries
- Eight new milk products factories
- Four cattle feed compounding factories

Working together—prospering together

BIHAR'S THIRD FIVE YEAR PLAN

Area : 67130 sq. miles

Population : 46·5 million

Total outlay

(1961 Census Provisional Estimates)

Rs. 337·04 crores plus Rs. 9·33 crores
as Centre's contribution to Power
development programme in Bihar.

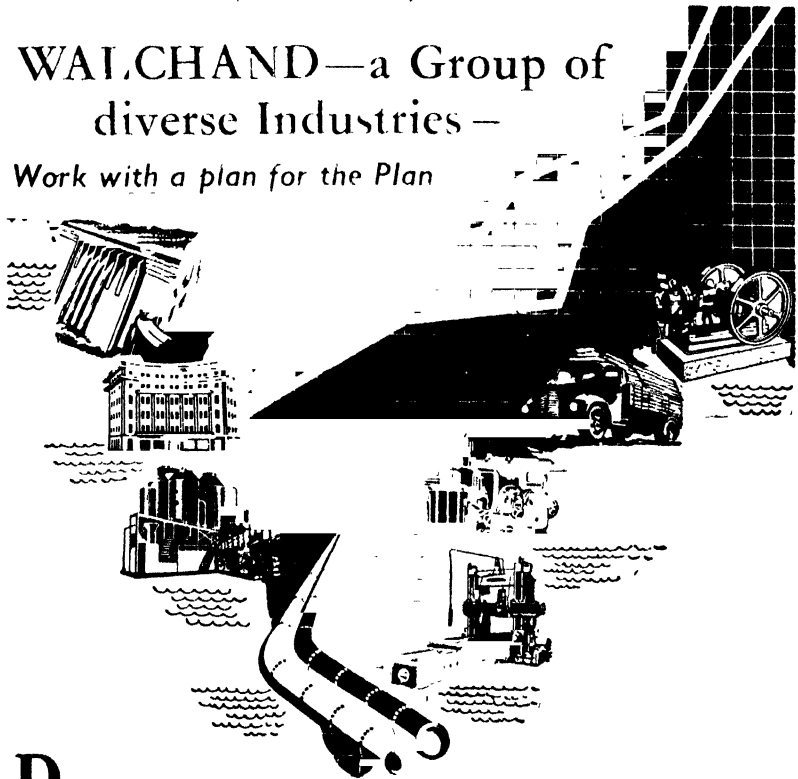

SECTORS OF DEVELOPMENT (Heads of Development)	PROVISION (Approved outlay)
1. Agriculture & Community Development	82·49
2. Irrigation	70·57
3. Power	70·62
4. Industry	14·03
5. Transport & Communication	21·40
6. Social Services	76·75
7. Miscellaneous	1·18

Under the First and the Second Five-Year Plans Bihar has been able to make all-round progress. The food-production has increased; more areas have been brought under assured irrigation, almost all the flood-affected areas have been given protection; heavy industries like the Hatia Project, and the Barauni Oil Refinery are in the making, and the fourth Steel Plant of the Public Sector is also going to be located in this State, at Bokaro in Hazaribagh district; village and small-scale industries have created many employment opportunities for the jobless; health services have been expanded to the country-side through the health centres in the Community Development Blocks; and above all, the darkness of ignorance is being expelled through expansion of General, Professional and Technical education, and creation of extension agencies in all sectors of development at the Block level.

The Third Plan now in operation, promises to these trends of development further ahead and ensure a fuller and happier life to the people of this State.

WALCHAND—a Group of diverse Industries —

Work with a plan for the Plan

DAMS and multi-purpose projects, sugar factories and machinery, Diesel engines and looms, machine tools and automobiles, Hume pipes and penstocks.. the Walchand Group Industries are engaged in all these varied economic fields, helping the Nation's Plan for rapid industrialisation.

THE HINDUSTAN CONSTRUCTION CO. LTD. have constructed gigantic multi-purpose projects, bridges and factories, which portend the economic activity of the Nation.

THE WALCHANDNAGAR INDUSTRIES LTD. have manufactured the first two completely Indian-made sugar factories and are also supplying important machinery throughout the country, thus stepping up the production of sugar and its by-products.

COOPER ENGINEERING LTD. produce Diesel engines which are used throughout the country, both for agriculture and industry; while

their looms and dobbies are used by the Indian Textile Industry. Cooper's Machine Tool Division produces Machine Tools—Shaping, Planing and Slotting Machines—'mother machines', which make other industries possible.

THE INDIAN HUME PIPE CO. LTD. fabricate giant penstocks for the generation of electric energy and pipe lines to bring life-giving water to the remotest corners of India.

THE PREMIER AUTOMOBILES LTD. produce reliable cars and trucks to speed the nation towards even more rapid industrialisation.

The other seven companies that belong to the Walchand Group Industries: **The Premier Construction Co. Ltd., The Ravalgaon Sugar Farm Ltd., The Hindustan Spun Pipes Ltd., Bombay Cycle & Motor Agency Ltd., Premier Auto Electric Ltd., The Acme Mfg. Co. Ltd., Acrow India Ltd.**

Rowing to school is a daily routine for these children of Kerala where inland waterways provide a common means of transport. Numerous rivers and canals traverse this lovely state, whose inhabitants take to water as happily as fish. Picturesque though travel by boat is, it is slow and leisurely and is being supplemented by the swift efficiency of motor transport.

More roads and improved transport are broadening the horizons of our children enabling them to travel further afield and know their neighbours better.

“We can now
look forward
to Mohan
becoming an
Engineer -*thanks*
to our investment in
National
Savings”

Prudence demands that you do not spend all you earn. Tomorrow and the day after have to be provided for. Today's savings lay the foundation for tomorrow's prosperity.

Your children's education, their career, a house of your own, unforeseen illness.... all these can be provided for only out of today's savings.

No less important is to make sure that your savings are wisely invested. Your savings invested in national development are twice best: they bless you and the nation.

Let your Small Savings help you and the nation.

ISSUED BY GOVERNMENT OF INDIA

DA 61/749

On the firm foundations of the First and Second Five Year plans, the task of successfully executing the Third Five Year Plan has begun. Development work is taking place in every village. There is activity in every farm and factory and in every small & cottage industry. From Rs. 72 crore and Rs. 155 crore spent respectively during the First and Second Plans, there is a significant rise in the Third Plan provision of Rs. 293.15 crore for West Bengal. Aiming at all-round progress, the Third Plan provides Rs. 53.60 crore for Agriculture, Rs. 63.86 for Irrigation & Power, Rs. 81.32 for Social Services, Rs. 26.50 for Transport & communications, Rs. 17.43 for Co-operative and Community Development, Rs. 12.14 for Industry & Mining and Rs. 38.30 crore for other development works.

a newspaper that is agrowing...

Founded in 1882 The SWADESAMITRAN stands for a sound tradition in journalism for over **eighty years** in Madras. It stands for solid, Victorian worth, though its methods of production and presentation are as modern as management can offer.

It counts on the steady support of nearly 50,000 readers in Tamilnad and beyond. And its circulation is well distributed as between Madras City and the districts among readers of Tamil.

Three distinguished Editors have left their stamp on The SWADESAMITRAN as a paper always pledged to order and progress.

Founded in faith, nourished on nationalism, The SWADESAMITRAN takes rank as an Institution serving the solid South. The paper is still growing, in service and success.

The Swadesamitran

What's in a name ?

*that which we call a rose, by some
other name would smell as sweet;*

—SHAKESPEARE

Yes, perhaps; but not quite! For instance, called by some other name, you wouldn't

know that we don't now have to make the switch from copper to aluminium. From a metal which is on the way out to a metal which is on the way up!

All that the cable industry is currently being urged to do, we did years ago. As far back as 1950.

If to-day, we're sitting pretty, it's because yesterday we showed vision. About the shape of things to come to-morrow!

A name is not just an identifying tag—a name carries with it a company's reputation!

Lines Include: ACSR; All-Aluminium conductors; Conductor accessories and tools; Covered aluminium conductors for indoor wiring and outdoor weather-proof applications; also EC-grade aluminium rod and high-tensile galvd. steelwire.

turn to

ALIND

a name with a tradition, and a future!

THE ALUMINIUM INDUSTRIES LIMITED

India's largest manufacturers of aluminium conductors and accessories.

Registered Office: Kundera (Kerala)

Works at: Kundera, Mirakud & Hyderabad

Managing Agents:

SESHASAYEE BROS. (TRAV.) PRIVATE LIMITED

Sunlight, water and nourishment are essential for a plant to live and grow. They are its basic needs.

Similarly, for an industry to rise and grow, Land, Water and Power are extremely essential.

Maharashtra provides an ideal venue for industries, large and small, by meeting the basic needs of Industry.
